Congressional Record

PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, SECOND SESSION

SENATE—Monday, August 9, 1982

(Legislative day of Monday, July 12, 1982)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

All power is given unto me in Heaven and in Earth . . . and, lo, I am with you always, even unto the end of the world.—Matt. 8:18, 20.

Heavenly Father, here we are in the place of power—greater power than any other legislative body on Earth. Yet we are essentially powerless. Law after law is passed—nothing changes. We wield our great power, and probably more often than we like to think, impress only ourselves. We wield our power forgetting that we are always only a heartbeat away from total powerlessness.

Great God, help us to understand that Thou art the source of all power, and that only as Thy power works through us do things really change. Deliver us from human pride that deceives and seduces and corrupts mankind. Grant us grace to acknowledge our weakness and submit to Thy sovereign rule in our lives. Let Thy power and love reign in us. In the name of the One whose power was supremely manifested on a cross. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order there be a period for the transaction of routine morning business to extend not past the hour of 1 p.m. today in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. BAKER. Mr. President, the supplemental appropriations bill, H.R. 6863, is now pending. It is anticipated that the debate on that measure and the amendment thereto cannot be completed today. It is hoped, however, that it can be disposed of tomorrow or Wednesday at the latest.

I remind Senators that time is growing short and that if we are to gain our objective of trying to make the Senate recess for the Labor Day break coincide with that of the House of Representatives that is to begin on August 20, we have a fairly busy schedule ahead of us.

This week we must do the supplemental appropriations bill and the immigration bill.

Next week we need to do the debt limit bill as well as any other conference reports that may be presented to the Senate or urgent matters which may come before us.

Senators are reminded that the recess date for the Senate is still August 27 and, according to the memorandum which I circulated to Members on this side and of which I supplied a copy to the minority leader, I expressed the hope that we could go out on August 20 if we could complete the must list of legislation.

The Senate has done very, very well so far in trying to dispatch the items on that must list. But I remind Members not to take for granted that we

will go out on August 20 for there are still important and controversial items that must be dealt with.

Mr. President, I regret to say that Senators should be on notice of the possibility of late sessions any evening this week or next week in order to improve the possibilities that we can complete our must legislation before August 20.

Senators should be on notice, and I say this with all sincerity and seriousness, of the possibility of a session on this Saturday and perhaps the following Saturday if that is necessary in order to complete action on the must list of legislation to which we have referred on many occasions.

I hope that it is not necessary to ask the Senate to remain late unduly and I hope it is not necessary to be in on this Saturday or the following Saturday. But Senators should note that for the sake of their own planning and convenience.

GLEN TROOP, JR.

Mr. BAKER. Mr. President, I express my sorrow and disbelief at the death of Glen Troop, Jr. Glen died suddenly last Wednesday night, and for those of us who knew and respected him, the shock of this tragedy has not worn off.

As the chief lobbyist of the savings and loan business, Glen dedicated himself to educating and counseling Members of Congress on a variety of issues that were important to the savings and loan industry. For over three decades, he was in constant contact with Senators, Congressmen, and their staffs, particularly those serving the various banking, tax writing, and finance committees. He also worked closely with the leadership of the Federal Home Loan Bank Board and other Government agencies regulating the savings and loan business.

A Senate staffer, when asked if her boss had been good friends with Glen said, "Yes, he was, but you know, everybody that knew Glen felt close to

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

him and liked him." Mr. President, Glen Troop was that type of individual, and it is that type of friendship that we will all miss very much.

Mr. President, I ask unanimous consent to have printed in the RECORD this week's poem, which I have lately done beginning on Mondays of each week, "World Breaking Apart," by Louise Gluck, in respect to Glen Troop.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

WORLD BREAKING APART

I look out over the sterile snow.
Under the white birch tree, a wheelbarrow.
The fence behind it mended. On the picnic table, mounded snow, like the inverted contents of a bowl whose dome the wind shapes. The wind, with its impulse to build. And under my fingers, the square white keys, each stamped with its single character. I believed a mind's shattering released the objects of its scrutiny: trees, blue plums in a bowl, a man reaching for his wife's hand across a slatted table, and quietly covering it, as though his will enclosed it in that gesture.

I saw them come apart, the glazed clay begin dividing endlessly, dispersing incoherent particles that went on shining forever. I dreamed of watching that the way we watched the stars on summer evenings, my hand on your chest, the wine holding the chill of the river. There is no such light.

And pain, the free hand, changes almost nothing.

Like the winter wind, it leaves settled forms in the snow. Known, identifiable—except there are no uses for them.

ELECTION VICTORY

Mr. BAKER. Mr. President, on another matter and sounding a personal note, I cannot remember a time when I have gone to the polling place on election day and enjoyed it so much. So many times in the past, in almost every election I can think of, I have been a candidate or I have been campaigning hard for someone else. Those election days were almost always filled with apprehension, tension, and even tedium as we waited for the polls to close and the first results to trickle in.

But this past Thursday was an exception to that rule. I was not a candidate. I was not campaigning for any other candidate. While it is true that my daughter was a candidate for the Republican nomination for Congress from the Fourth District of Tennessee, she forbade me to campaign for her.

So I found that my sole and total responsibility, even my only opportunity on that day, was to go to the polling place, to stand in line patiently for about an hour, present my voter's certificate, be granted the privilege of voting, to enter the booth, to cast my ballot, and to do so with a smile.

I wish to report as well, if I may, to my colleagues that she was nominated.

That will come with mixed reaction no doubt depending on the persuasion of Members of this Chamber as Republicans and Democrats, but as an unalloyed pleasure for me to announce that she won that election, her first. She is 26 years old, my youngest child and still the apple of my eye. And I have not yet become accustomed to the idea that she is the Republican nominee for Congress from the Fourth District of Tennessee. But she is.

A wise man once said that becoming a father is, and I say thank God for wise men. You never know how much to do or how much not to do. You never know when to talk and when to try to advise and when to sit down and when to shut up. You just try to be there supportively and let your little girl, turned political prodigy, run her own campaign.

Her victory would have been just as glorious had I not gone to Tennessee to vote on last Thursday, but it was eminently more satisfying to me that I did.

I apologize to the Senate for missing votes on last Thursday, but I am sure most Members will understand, and I am sure every father will understand why I was absent on that day.

Mr. President, I have no further need for my time under the standing order.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader yield.

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. Mr. President, Cornelia lived several hundred years before Christ. She was the mother of Gracchi. She had 12 sons and daughters. She lost all of her children except three.

One day a neighbor came by and proudly displayed her jewelry, according to Cornelia. Whereupon, she haughtily turned to Cornelia and asked if she had any jewelry. Cornelia, the great Roman woman that she was, turned to her three remaining children and said, "These are my jewels."

I share the pride that the majority leader has just expressed in the success of his daughter.

Being a father of two daughters, I think I have empathy and a kinship with the majority leader in this respect.

I congratulate him. I congratulate his daughter, and I know she is proud of her proud father likewise, and she has every right to be.

Mr. BAKER. Mr. President, if the Senator will yield to me, I think he must know how much I appreciate his kind remarks just now, how much they mean to me, and how much they mean to my daughter.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. BAKER. Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. HAYAKAWA). The minority leader is recognized.

THE PASSING OF A GOOD FRIEND

Mr. ROBERT C. BYRD. Mr. President, many Senators were saddened last week to learn of the Wednesday night passing of Mr. Glenwood S. Troop, Jr. Glen Troop was the chief lobbyist for the savings and loan industry. He was also a personal friend to many of our colleagues. In addition, over the years Mr. Troop earned for himself an exceptional reputation for his excellent work, his commitment to high ideals, and his integrity. One person has remarked that, as applied to Glen Troop, the word "lobbyist" was a badge of honor.

Glen Troop served as a Marine Corps sergeant in the Pacific during World War II. Following graduation from the University of Maryland in 1952, he became an assistant with the U.S. League of Savings Associations. Through his expertise and initiative, he rose to the league's posts of legislative director and staff vice president.

The savings and loan business involves millions of Americans, and Glen Troop could always be depended on to supply Congress with accurate, reliable, and valuable information on the impact of legislation on savings and loan associations and their members. His love of the Senate and House of Representatives was always evident, and he became one of Washington's best known and best liked association representatives.

We will miss Glen Troop. And I am sure that our colleagues join me in extending to Glen Troop's family our sincere sympathies, and our appreciation for the many services that Glen rendered to Congress and to America.

THE CALENDAR

Mr. BAKER. Mr. President, before I yield back my time, there are certain items in my folder that can be dealt with by unanimous consent according to the notations I have here. I want to inquire of the minority leader if he is in position to proceed to the consideration of S. 1193 and S. 901.

Mr. ROBERT C. BYRD. Mr. President, I answer in the affirmative. This side is ready to proceed.

Mr. BAKER. I thank the minority leader.

GEORGETOWN WATERFRONT USE

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 457, S. 901.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 901) to preserve and protect the Georgetown Waterfront for the recreational use of the public.

The Senate proceeded to consider the bill.

Mr. McCURE. Mr. President, S. 901 would authorize the Secretary of the Interior to acquire by donation, exchange, or transfer certain specified lands in the area generally known as the Georgetown Waterfront along the Potomac River shoreline. I have no objection at this time to Senate passage of this legislation, since it involves only a purely voluntary acquisition.

Mr. President, I continue to endorse the concept and principles of the July 13, 1979, memorandum of agreement relating to the Georgetown Waterfront in the District of Columbia entered into by the Department of the Interior, the Mayor of the District of Columbia, the National Capital Planning Commission, and Georgetown Harbour Associates providing for the joint public redevelopment and use of the Georgetown Waterfront property. With the able leadership of our distinguished colleague from Maryland, Senator MATHIAS, this agreement was negotiated to transform the waterfront from an unkept eyesore into a well-maintained recreational and commercial area. It is my hope that the private owners of this property, CSX Corp., and the other participants under the agreement will continue to insure the best public and private use of this land.

Mr. President, I am pleased to note that S. 901 is purely a voluntary exchange with the owner of the waterfront property and does not involve a mandatory taking. I should state for the record that I could not support any legislative initiative on this bill or another bill involving any legislative taking or other involuntary transfer of the private Georgetown Waterfront property.

Mr. President, I ask unanimous consent that a letter of July 14, 1982, which I received from John W. Snow, senior vice president of CSX Corp. discussing this legislation and the Georgetown Waterfront be printed in the RECORD:

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. JAMES A. McCURE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR McCURE: I am writing to express my concern about Senate Bill S. 901 which has been reported from the Senate Committee on Energy and Natural Resources. The purpose of the bill is to authorize the Secretary of the Interior to acquire certain lands along the Georgetown Waterfront by donation exchange or transfer only.

The land in question is owned by the CSX Corporation, which has begun a major development on the site. An integral part of this development is the provision of 13 acres for a public park along the waterfront. In addition, the development will provide 1400 jobs and bring an additional \$8.6 million in needed tax revenues to the District of Columbia. CSX and its partners have worked long and hard, and at considerable expense, to achieve a design for the project compatible with the existing development of Georgetown and beneficial to the public. The project now underway will turn an industrial eyesore into a revenue-producing development along with a new waterfront park accessible to all.

I have attached a memorandum which explains in detail the history of this project. I should point out that the mixed-use development which we are now constructing grew out of the efforts of Senator Mathias in 1978 to find a workable compromise between private development and public use of the site. We believe our development represents a good use of the property and clearly show that the efforts of private enterprise can be of public benefit. It is certain that without our development, there would be no park development along the waterfront in Georgetown.

The purpose of this letter is to make unequivocally clear that CSX and its partners should not undertake the voluntary transfer of the Georgetown site, even if S. 901 were enacted into law. We have already invested more than \$20 million for land acquisition and architectural and design fees and construction has begun. We believe the project is soundly designed and of public benefit and we do not intend to abandon it. Our desire is to proceed with the development as soon as possible in a way which will complement and enhance the proposed riverfront park adjacent to our properties and end the present condition of blight and decay in that area.

CSX and its partners have no interest in any speculative land exchange which would require us to give up the effort and investment made to date on the Georgetown Waterfront. Substantial sums have already been expended for the development and additional money will be required to create the proposed park. We have offered to provide the sum of \$1 million to pay for the initial landscaping of the proposed park as part of the development.

Since we are about to realize a long-time objective of CSX by developing its holdings on the Georgetown Waterfront in a socially-responsible manner, you will understand our concern that the proposed legislation may serve to delay that event and add to the cost of the development without accomplishing the desired result. We confess to a great deal of frustration because of the many delays in the public planning process for the Georgetown Waterfront. That process has involved the executive and legislative branches of the Federal and District Governments as well as the courts.

The process reached finality only a few months ago with a finding by the Mayor's Agent, after exhaustive hearings, that the architecture of the proposed project was compatible with the Georgetown Historic District. On the strength of that finding, the District of Columbia issued a building permit to Georgetown Harbour Associates on November 18, 1981. Georgetown Harbour is the name of the partnership doing the development, CSX and Western Development Corporation of Washington, D.C. The find-

ing of the Mayor's Agent and the permit issued under it are now being reviewed for, what we hope is, one last time by the District of Columbia Court of Appeals. Meanwhile, demolition work and construction are underway.

We believe that the Georgetown project is a good example of private enterprise acting in a socially responsible manner. As the history of the project shows, we have made every effort to cooperate with the appropriate authorities to make the project compatible with the community. The Interior Department has repeatedly stated that it does not have the funds, or the wish, to develop the Georgetown site as a park. It is safe to say that without CSX's development, which will make possible a 13 acre public park, there would be no park open to the public on the Georgetown waterfront.

It is difficult for us to understand the purpose of S. 901, since that bill is premised on a voluntary exchange of CSX's property for some unspecified Federal land. CSX hopes to expeditiously complete its development in Georgetown and would not at this date, when construction has begun, voluntarily exchange its property on the Georgetown waterfront. It is our hope that the Senate will not take up this bill, but rather let the development project proceed without further impediment.

Sincerely,

JOHN SNOW.

Enclosure.

CSX and its predecessor, the Baltimore and Ohio Railroad, have owned properties on the Georgetown Waterfront since the turn of the century. Those properties supported the transportation, industrial, and storage uses which were dominant on the waterfront until the early Nineteen Sixties. The waterfront was rezoned from predominantly industrial to a new mixed-use waterfront category in 1974, an action which was finally upheld by the D.C. Court of Appeals in 1978. Our proposed development is entirely in keeping with that enactment, but at densities and heights well below the maximums permitted by that zoning. We have voluntarily relinquished these development rights to carry out the objective of building a compatible development which would have ample open spaces and vistas and blend suitably with the proposed adjacent park.

The development which we are constructing grew out of a 1978 effort spearheaded by Senator Charles McC. Mathias, Jr. to find a suitable compromise of widely differing views about the future of the Georgetown Waterfront while assuring construction of waterfront park and providing for public access to the entire shoreline of the Potomac River. Senator Mathias called together officials of the Federal and District Governments responsible for public planning of this area and persuaded them to constitute themselves as a task force to resolve the matter once and for all.

The product of that task force was a July, 1979, recommendation that the six acres of privately held waterfront properties be developed in a unified manner with shoreline access assured which we readily agreed to provide. On the basis of that recommendation, we arranged with the Inland Steel Corporation to acquire their adjacent holdings.

To achieve a design which responded to expressed architectural concerns of the U.S. Commission of Fine Arts, we modified our original proposal to reduce its height and density. Ultimately, Fine Arts gave approval to the architecture which was proposed, a

superb design prepared for us by an outstanding Georgetown architect, Arthur Cotton Moore. Fine Arts withheld formal approval of the requested permit, however, in hopes that public funds would be forthcoming to purchase the privately held lands for inclusion in the proposed park. That has not occurred so, accordingly, the Mayor's Agent authorized issuance of the permit, with a finding of architectural compatibility.

The extensive records of the hearings before Fine Arts showed that as long ago as its April 8, 1980 meeting, the Commission gave conceptual approval to the development. In an April 22, 1980 letter, J. Carter Brown, Chairman of the Fine Arts Commission, directed us to proceed with architectural designs for the Commission's review before proceeding with working drawings. We followed the Commission's direction and presented these designs at the October 7, 1980 meeting of Fine Arts. Following that review, the Commission adopted its Board of Architectural Consultants' report that:

"The preliminary designs submitted for review are in conformance with earlier designs approved under O.G. 80-52. The Board recommends that development of working drawings and construction details closely follow the preliminary design. The Board also gives preliminary approval to a number of brick samples proposed for various elements of the development and recommends construction of sample wall panels showing mortar color and jointing for final inspection prior to ordering materials."

As noted, the partnership has spent in excess of \$20 million in architectural and other fees to achieve an acceptable development meeting the extensive public approval requirements of this site. As developers, we are committed to the creation of the proposed riverfront park as well as uninterrupted shoreline access for the public. We have made the following commitments to the District and Federal Governments with respect to access, open spaces and park development as follows:

Under the arrangements acceptable to the National Park Service, we will assure public access in perpetuity to the shorefronts of both the Potomac River and Rock Creek alongside our waterfront holdings.

The project design which has received a building permit specifically provides for this access and appropriate landscaping along both shores.

The developer will maintain all these spaces at its expense under arrangements agreeable to the National Park Service and the District of Columbia Government.

The so-called "mole" will be returned to the Federal Government in accordance with the existing easement from the Federal Government once railroad use of that parcel has been discontinued for two years.

The developer will provide the sum of \$1 million to landscape the "mole" and the park areas to be created west of 31st Street on the waterfront.

Virginia Avenue and Thomas Jefferson Street will be extended through the project on private lands as new public ways which will be maintained by the developer.

In summary, in addition to its commitment of funds for park landscaping, the developer is providing a total of 2.75 acres of its own land holdings for park, open spaces and public ways, including the shorefront access areas referred to above. It is also accepting perpetual maintenance responsibility for all these public areas. This acreage is in addition to the half acre of the "mole"

and the District of Columbia holdings of about 12 acres which will become part of the proposed park.

As stated, these commitments were affirmed in the permit package submitted to Fine Arts and the District Government and in testimony before the U.S. Commission of Fine Arts. These commitments are made as a matter of public service and enlightened self-interest. They will be carried out as outlined to make sure that the project properly serves all persons who choose to work, live or visit this remarkable location.

It is noteworthy that two successive Secretaries of the Interior have given support to the concept of mixed-use development of the privately held lands along the Georgetown Waterfront in harmony with the proposed park. On November 24, 1980, outgoing Secretary Cecil D. Andrus, writing to Mr. Sidney Howe of the National Committee for Urban Recreation, pointed out the lack of Federal funds for park development in Georgetown and affirmed the department's support of the joint development of the site in accordance with the spirit of the task force agreement. His successor, James G. Watt, the present Secretary, on April 3, 1981 wrote to the Fine Arts Chairman Brown to state that expenditure of Federal funds to acquire the waterfront holdings was not a "viable alternative" to the development proposal.

Beyond the desire to assure public access to the entire Potomac River shoreline and to see the city's waterfront holdings finally converted into the long-promised public park, the District of Columbia has a strong interest to end the condition of blight which has persisted along the waterfront for two decades and restore the private holdings to productive use. A study which we commissioned showed that the completed development will generate \$8.6 million a year in tax revenues and provide 1,400 jobs. These are additional considerations which suggest that the development should be allowed to go ahead at this time without forcing us to incur the costs of further delay and thereby posing the likelihood that existing conditions of blight will continue indefinitely.

Mr. MATHIAS. Mr. President, I have more than a passing interest in this bill, having worked with all of the affected parties on the Georgetown waterfront from February of 1978 to July of 1979 to reach a reasonable compromise of the many goals sought for the waterfront. If I might, I would like to recount for my colleagues, the history of my involvement in a bill similar to the one before us today, the task force which that bill generated, and the ultimate memorandum of agreement which resulted from that task force effort. That memorandum of agreement was signed by the Secretary of Interior, the District of Columbia Assistant City Administrator for Planning and Development, the Chairman of the National Capital Planning Commission, and Georgetown Harbour Associates, the private landowner on July 13, 1979.

It committed each of those parties to take certain steps to assure that 14 of the 20 acres on the waterfront became a public park, that the 6 privately held acres were developed in consonance with the park and reflect-

ed exemplary urban design respectful of existing Georgetown development.

The Georgetown waterfront, a relatively small area between the C. & O. Canal and the Potomac from Key Bridge to Rock Creek has had a stormy history of zoning litigation and citizen suits. The area was comprehensively rezoned from its traditional industrial uses to a new waterfront district in 1974.

Since then, rehabilitation of vacant warehouses and other industrial buildings has accompanied new residential, retail, and office construction. This former wasteland in Georgetown has become a vibrant part of the city in the past few years.

The legislation before us today involves only that part of the Georgetown waterfront which fronts directly on the river. It is relatively small in size—20 acres, in all—located between the Whitehurst Freeway and the river from Key Bridge to Rock Creek. Fourteen of those acres are publicly owned. Six are privately owned.

In February of 1978, I was approached by the Georgetown Advisory Neighborhood Commission 3A for help in protecting the Georgetown waterfront. The ANC had adopted a resolution expressing concern that the vistas to the Potomac be protected, that redevelopment be in keeping with the scale, texture, and historic character of Georgetown, and in harmony with the C. & O. Canal.

The resolution called on the Congress to do something to protect these important features. I subsequently introduced a bill in the Senate, the effect of which was to freeze further development on the waterfront.

Little did I anticipate the brouhaha my bill would create. I was immediately besieged with contending views on the legislation from affected property owners, developers, and citizens, not only from Georgetown, but from Maryland and Virginia, and even from one foreign country. I was suddenly catapulted into the middle of the fray and quickly learned that no one is neutral about the Georgetown waterfront—everyone has an opinion, passionately held.

Obviously, something had to be done to bring these many points of view into consensus. So I convened a meeting of the developers affected and listened to their ideas about the waterfront. Most of those developers already had projects underway with the necessary permits and approvals. Several were involved in recycling old industrial buildings to mixed residential and service commercial uses. So the basic texture, fabric, and scale of the waterfront was being respected by retaining those red brick buildings.

Having played a part in getting the C. & O. Canal designated an historic landmark and in protecting the Poto-

mac shoreline northwest of Washington, I wanted also to see the Georgetown waterfront restored and refurbished. I hated it to blight the largely green area that extends all the way from Cumberland, Md.; to West Potomac Park, in the city; Mount Vernon on the Virginia side, and Fort Washington on the Maryland side.

So, I convened another meeting, this time with the public officials who had a role to play on the waterfront. Together we began to sort out the actions each would need to take to create an urban waterfront park. The challenge of bringing such a park to life was taken up by the Chairman of the National Capital Planning Commission.

Under his skillful leadership, a task force of public officials, citizens, private landowners and affected developers was set up in May 1978. It met regularly throughout the summer and fall, molding and honing a consensus of what uses should and should not exist on the waterfront.

It was no small feat to achieve a consensus among such a diverse group, which in the past had not been on the best of terms, to say the least.

The task force made several findings, including these:

It would confine its efforts to the immediate waterfront, that is, the area from K Street to the river. That area involved only three property owners: The District Government with land originally purchased for the Three Sisters Bridge approach; the Chessie Railroad System (now the CSX Corporation) and the Inland Steel Company.

The National Park Service holds height and setback easements related to Rock Creek on the Chessie property.

The District Government holds title to so-called "paper streets" which also bisect the Chessie property, effectively restricting its development.

The Inland Steel property could be better designed and developed if a small triangle of DC-held property were part of Inland's holdings.

The National Park Service was willing to take title to the immediate waterfront and operate it as a park, rebuilding the sea wall along the water frontage in the process.

The District Government could find alternative sites for its trash trucks and car impoundment lot which at present deface the waterfront.

The U.S. Department of Transportation (DOT) was willing to forgive repayment to the Highway Trust Fund by the District Government, if an alternative public purpose were found for the waterfront land.

Various design proposals and development envelopes demonstrated the feasibility of limited waterfront construction set back from the River and Rock Creek to K Street.

The group agreed that some mixed use development south of K Street would complement a waterfront park. Properly designed and located, such development could give life to the otherwise dead space which stretches from the shadows of the Whitehurst Freeway to the water. The development, of course, would have to be in harmony with Georgetown's architec-

tural style, texture and scale. They would contribute pedestrian traffic, some limited ground floor retail outlets to serve residents and visitors, and provide some eyes on the park for security.

In addition, a promenade on the waterfront, a bicycle path, a waterfront quay and a boat docking facility perhaps with a river view restaurant, all have been mentioned as activities which would enhance the park without overwhelming it.

What became clear in this process was that all parties could agree on some common goals for the waterfront. Both the private landowners and the District Government hold several potential trading chips. And the development potential of the two private sites was actually enhanced by a park and setback. The marketability of homes on the waterfront, to use the developers' idiom, is increased by publicly provided amenities such as I have described.

In exchange for such amenities, however, the developer or developers of the privately held property had to be willing to build something less than the permitted zoning envelope and in keeping with the Georgetown character. One of the complaints Government officials frequently hear from developers is that the rules of the game are constantly changed on them in mid-play.

All of this effort resulted in the signing of the Memorandum of Understanding of July 13, 1979. Mr. President, I ask unanimous consent that the text of that agreement appear at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MATHIAS. What is remarkable about this document is that it represents a public-private partnership to create a public park on the waterfront while respecting the private property rights of the landowners. It is not everyday that the Secretary of Interior, a representative of the District of Columbia Government, the National Capital Planning Commission, and private landowners agree in writing to do something for the common good. Part of the attractiveness of the agreement was that no money had to change hands. Rather, each of the parties bartered certain things it wanted for certain things another could deliver.

It is therefore somewhat surprising to see this bill before us fail to recognize that good faith effort and the agreement that it produced.

It would undo that agreement of 1979 and might well result in another brouhaha and task force scenario similar to the one which I have just recounted for my colleagues.

It would abruptly halt the private development now about to proceed. This development has received all the

necessary approvals and has involved the expenditure by the developer of more than \$20 million for land, architectural design, and construction.

The developer has unequivocally stated to the chairman and ranking minority member of the Committee on Energy and Natural Resources as well as to the sponsor of this bill that they are not interested in, nor would they agree to a land exchange.

Given this history and the facts I have presented here, I would hope my colleague, the sponsor of this legislation, would agree to withdraw his bill or modify it to, at least, give the memorandum of understanding a chance to be implemented.

As the chairman of the Subcommittee on Governmental Efficiency and the District of Columbia, I am mindful of the 1,400 jobs and \$8.6 million annual tax revenue which this development will yield to the District of Columbia.

Mr. President, I ask unanimous consent that the text of a recent letter from the District of Columbia Assistant City Administrator for planning and Development be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GOVERNMENT OF THE
DISTRICT OF COLUMBIA,
Washington, D.C.

Mayor Barry has asked me to respond to your letter concerning the Georgetown Waterfront.

On September 11, 1981, the Mayor's Agent for Historic Preservation, Ms. Carol Thompson, issued her decision in the Western Development case. Her decision states that the proposed development's design is not incompatible with the character of the historic district of Georgetown and orders the issuance of a permit for new construction. The Mayor has requested that I provide you with the background information involved in the proposals, procedures and decision criteria in this case.

Mayor Barry, as you know, has been personally supportive of the citizens' desires for park along the Waterfront. He is also aware of the additional economic and social benefits that can accrue to the City from tasteful mixed-use development in combination with a park. The Mayor's Agent, Ms. Thompson, acts independently, basing decisions on the explicit provisions of the District of Columbia Historic Landmark and Historic District Protection Act of 1978, D.C. Law 2-144. The September 11th decision was based on the record resulting from six days of public hearing at which fifty-three witnesses were heard and seventy-four exhibits admitted into the record. Twenty-five additional exhibits were entered in the record before it officially closed. Although issues such as park use, historical waterfront uses, traffic environment, etc. were discussed at the hearing and addressed in the Mayor's Agent's findings of facts, the legally mandated focus of the decision was the design's compatibility with the historic district. On all relevant design features, the Mayor's Agent found the project was not incompatible.

I want to share with you the historical land use, planning and procedural context which led to the present case.

The Georgetown Waterfront consists of approximately 18 acres of land along the Potomac River from Rock Creek to beyond Key Bridge. The District of Columbia owns approximately 12 acres in this area, some of which is in public rights of way. (Approximately 3 acres). Most of the D.C. land is in temporary use for municipal storage purposes such as: an automobile impoundment lot, trash truck parking, and storage of a salt pile. The Mayor is committed to transferring as much public land as is feasible to the National Park Service for inclusion in a National Park to be created and maintained by the Park Service. The remaining Waterfront land consists of approximately 6.5 acres and is privately owned by Western Development Corporation. This land is currently occupied by a cement plant and used for industrial purposes. At present, there is no park, nor has there ever been a park on this stretch of Waterfront.

A couple of years ago through the leadership of Senator Charles McC. Mathias, Jr., the National Capital Planning Commission sponsored a task force effort including District government representation, the Department of Interior (Park Service), owners of the private land, and local citizens to attempt to work out an acceptable plan for the Georgetown Waterfront. I believe it is fair to say that everyone agreed it was desirable.

1. To remove the present industrial and municipal storage uses; and

To create some amount of public park.

Agreement broke down on the:

1. Amount of park; and

2. Amount of development on the private land.

Some citizens opposed any development and began an effort to galvanize support for a total park on the Waterfront. This would, of course, necessitate public acquisition of 6.5 acres of private land. The City has been consistent in stating that no local funds are available for such acquisition. (The cost has been estimated at between 30 and 60 million dollars or approximately 5 to 10 million dollars per acre.) The federal government, through two Secretaries of Interior (Andrus and Watt) has similarly indicated lack of funds. Senator Mark Hatfield introduced a bill to authorize a swap of federally-owned land elsewhere for the private holdings on the Waterfront. Western Development Corporation, the owners of the 6.5 acres, declined. The District is still willing to transfer its acreage suitable for park purposes. No funds have been committed by any other group or government body to acquire the private land for park purposes, nor do we anticipate any in the foreseeable future.

Over the past 20 years many public and private plans and policies have been formulated for the Georgetown Waterfront. There have been rezonings and Court Cases. The existing zoning on the private land is W2 and W3 and was upheld in Court. The "W" (Waterfront) zoning category would permit as a matter of right approximately 1,400,000 square feet of mixed-use development, with a maximum height of 90 feet, and up to 80% of the development in commercial use. Since Georgetown is an Historic District, there are restrictions other than zoning on the use of land. The Old Georgetown Act and the District of Columbia Historic Preservation Act, D.C. Law 2-144 provide that the Commission on Fine Arts and the Mayor's Agent for Historic Preservation

(if requested) can review compatibility of proposed building design with the historic district.

The Western Development Corporation has indicated it intends to exercise its property rights and develop a portion of its land. The proposal they have presented contains considerably less development than is permitted under existing zoning. Their development plans call for a mixed-use project of retail, residential and office space on 3.5 of their 6.5 acres. The overall square footage would be approximately half that permitted under the zoning, or approximately 740,000 square feet. The height would be limited to 67 feet at its highest point, instead of the 90 feet allowed in the W3 zone. Their design includes a boat basin on the Waterfront. The remaining private land, 2.75 acres would be landscaped and contributed as open space to the Waterfront Park. A continuous, 50 foot wide, public walkway would be provided on the private land along the River. Thomas Jefferson Street, which now terminates at K Street, would be continued as a 60 foot wide street from K Street to the Potomac River.

This proposal when combined with the City's intended transfer of its Waterfront land could produce a sizable park with a mixed-use development on 3.5 private areas. With this combination of public and private actions, no public funds would be needed for park land acquisition.

Under the Old Georgetown Act, the Western Development Corporation was required to present the project design to the Commission on Fine Arts. The owners made several modifications and resubmissions at the request of the Commission. The Commission recommended that the City not grant a building permit, stating that the Commission preferred a total park. The owners exercising their rights under D.C. Law 2-144, the District of Columbia Historic Landmark and Historic District Preservation Law, sought review by the Mayor's Agent for Historic Preservation. Review centered on the issue of the compatibility of the building design with the character of the Historic District of Georgetown. Under the Law, there seems no basis for the City to deny a building permit unless the design is deemed "incompatible." (see (f) below).

The Mayor's Agent for Historic Preservation is Mr. Robert Moore, Director of the Department of Housing and Community Development and State Historic Preservation Officer. Mr. Moore has delegated the authority to Carol Thompson, the Acting Director of the Department of Licenses, Inspections, and Investigations. The sections of the D.C. Law 2-144 affecting the decision state:

"Section 5-827 New Construction:

(e) In any case where the Mayor deems appropriate, or in which the applicant so requests, the Mayor shall hold a public hearing on the permit application.

(f) The permit shall be issued unless the Mayor, after due consideration of the zoning laws and regulations of the District of Columbia, finds that the design of the building and the character of the historic district or historic landmark are incompatible. . . ."

The public hearing in this case began on June 29, 1981 and concluded on July 8, 1981. Proponents and opponents presented their positions, experts and supporters. Based on the public record of the case and requirements of D.C. Law 2-144, the Mayor's Agent decided on September 11th that the project was not incompatible.

Irrespective of the Mayor's Agent's decision in this case, Mayor Barry continued to direct his agencies to seek a long range plan for a Waterfront park and to solve traffic, parking and circulation problems with which Georgetown is faced. An overall program is being devised to find alternatives for commuter traffic and to enhance pedestrian access. As part of this overall program, the Department of Transportation has recently announced a proposed feasibility study of lowering the Whitehurst Freeway to K Street grade. The purpose would be to divert commuter thru-traffic from M Street. Other initiatives are being considered to improve the parking situation.

An interagency task force was established by Mayor Barry some time ago to plan the relocation of existing Waterfront uses. This Task Force is at work on alternative site identification and the logistical and budgetary needs for relocation. Other sites in Ward 3 must be located for some Department of Environmental Services uses—such as a trash truck parking and a snow-emergency salt pile because of the decentralized nature of operations. City-wide consolidated sites can be sought for others. The City will utilize whatever public (local or federal) and/or private initiatives are available to create an interesting and lively area of Waterfront park. The Mayor is planning to form a committee to advise him on the development of a park, including related amenities such as streetscape improvements and the S.S. Williamsburg.

I hope this information will bring you up to date on all the complexities of the Georgetown Waterfront situation. Mayor Barry and I are confident that reasonable solutions can be found with the cooperation of the private sector, local citizens and the government. We appreciate your interest and hope you will be willing to assist the City as we move forward.

Sincerely,

JAMES O. GIBSON,
Assistant City Administrator
for Planning and Development.

EXHIBIT 1

MEMORANDUM OF AGREEMENT RELATING TO THE GEORGETOWN WATERFRONT IN THE DISTRICT OF COLUMBIA

This memorandum of agreement dated July 13, 1979 is entered into by and between the Secretary of the Interior (hereinafter called "Secretary"), the Mayor of the District of Columbia (hereinafter called "Mayor"), the Chairman of the National Capital Planning Commission (hereinafter called "Chairman"), and GEORGETOWN HARBOUR ASSOCIATES, a general partnership, with principal offices at 1204 Wisconsin Avenue, N.W., Washington, D.C. 20007, and its successors and assigns (hereinafter called "Developer"), for the purpose of initiating and insuring coordinated public and private planning and development of the area in the District of Columbia along the Potomac River between the Francis Scott Key Bridge and Rock Creek extending from the shoreline of the River to K Street, N.W. (hereinafter called "Georgetown Waterfront").

Such joint public-private redevelopment of the Georgetown Waterfront is deemed necessary by the parties hereto for several reasons. First, the Georgetown Waterfront consists of land owned by various public agencies and private parties. Second, exemplary redevelopment of such a large area under multiple ownership requires a coordi-

nated planning effort by the concerned public agencies and private interests. Third, it is in the public interest to achieve a lesser intensity of development than that permitted under existing zoning regulations. Fourth, implementation of a coordinated plan requires mutual assurances that the plan would receive continued support by the public and private redevelopers. In short, the complexity involved in producing exemplary urban design on the Georgetown Waterfront requires a joint effort. Accordingly, the Secretary, the Mayor, the Chairman, and the Developer agree as follows:

I. GEORGETOWN WATERFRONT PARK

1. The Secretary shall request, and the Chairman shall recommend, that the National Capital Planning Commission (hereinafter called "Commission") establish, as an addition to the park, parkway, and playground system of the National Capital, and acquire, by purchase, gift, condemnation, or otherwise, within the limits of appropriations made for such purposes, lands necessary therefor, pursuant to the Act of June 6, 1924 (43 Stat. 463), as amended, the Georgetown Waterfront Park (hereinafter called "Park") generally as shown on Map No. 1, Georgetown Waterfront Park and Development Area, NCPC Map File No. 71.10 (78.00)-28656, annexed hereto and made a part hereof.

2. In order to establish the Park, the Mayor shall, subject to the conditions set forth in this Memorandum of Agreement, initiate the procedures necessary to effect the conveyances, transfers, and uses of land which are described below. Such conveyances and transfers are shown generally on Map No. 2, Georgetown Waterfront-Proposed Land Transfers, NCPC Map File No. 71.10 (78.00)-28657, annexed hereto and made a part hereof. All required surveys, appraisals, and legal descriptions shall be prepared before any transfer or conveyance is executed.

A. The Mayor shall, pursuant to the provisions of Title 23 CFR, Part 480 ("Use and Disposition of Property Acquired by States for Modified or Terminated Highway Projects", 43 Federal Register 54074, November 17, 1978), seek the approval of the Federal Highway Administrator for the use and disposition, without the District's being required to make a credit to Federal funds, as such credit is defined in Part 480, of property acquired by the District for highway purposes. The use and disposition for which the Mayor will seek such approval are (1) transfer of jurisdiction to the National Park Service, pursuant to the Act of May 20, 1932, 47 Stat. 161, ch. 197, as amended (40 U.S.C. 122; Sec. 8-115, D.C. Code); and (2) conveyance to the Developer, pursuant to the Act of August 1, 1951, 65 Stat. 150, ch. 283, as amended (Sec. 9-401 through Sec. 9-404, D.C. Code), in exchange for a portion of land owned by the Developer which fronts on the Potomac River.

B. In the event that the Federal Highway Administrator determines that any proposed use or disposition of land acquired by the District for highway purposes requires a credit to Federal funds, the Mayor explicitly reserves the exclusive authority to determine whether he will proceed in accordance with this Memorandum of Agreement, pursue alternatives with the parties, or terminate all of his obligations under this Memorandum of Agreement, and in the event of such termination all parties' obligations hereunder shall terminate.

C. The Mayor shall request the Council of the District of Columbia (hereinafter called

"Council") to approve, pursuant to the aforementioned Act of August 1, 1951, the exchange of land owned by the District for land owned by the Developer. Such exchange shall conform to all procedural and substantive requirements of said Act.

D. The Mayor shall, pursuant to the aforementioned Act of May 20, 1932, initiate the transfer to the National Park Service of jurisdiction over (1) land acquired by the District for highway purposes and approved by the Federal Highway Administrator for use as a park and (2) the land transferred to the District from the Developer in exchange for District land, provided the Council approves the exchange of land described in paragraph C. above.

E. The Mayor shall request the Council to close streets and alleys, pursuant to the Street Readjustment Act of the District of Columbia, 47 Stat. 747, as amended (Sec. 7-401 through Sec. 7-410, D.C. Code) and vest title to such closed streets and alleys in the United States for such portions thereof as are to be included in the Park and in the Developer for such portions thereof as are to be included in the Development Area, all as shown on Maps Nos. 1 and 2.

F. The Mayor shall designate an official or officials of the District of Columbia to review any application of the Developer for a construction permit for compliance with the Development Area objectives and controls set forth in Part II of this Memorandum of Agreement and to review any application of the Developer for a certificate of occupancy for compliance with Paragraph 2.I. of Part II of this Memorandum of Agreement. If the application does not demonstrate such compliance, the construction permit or certificate of occupancy shall not be issued. If the application does demonstrate such compliance and compliance with all applicable laws and regulations, the construction permit or certificate of occupancy shall be issued.

G. It is specifically agreed to and understood by the parties hereto that the Mayor agrees only to take such actions as are specifically set forth in this Memorandum of Agreement, that the District of Columbia, through all its entities, will exercise all lawful discretion and authority in the review of and ultimate decision on all requests for permits and other required District of Columbia approvals or governmental actions, and that this Memorandum of Agreement represents only the approval in principle by the Executive Branch of the Government of the District of Columbia of the development concept expressed herein. It is further specifically agreed and understood by the parties hereto that the terms of this Memorandum of Agreement are in all respects subject to the procedures and restrictions of all applicable provisions of Federal and District of Columbia law. Nothing herein contained shall constitute a waiver of the rights of the Developer under law if the conditions of Paragraph 4.A. of Part I are not or cannot be satisfied within a reasonable period of time.

3. The Chairman shall request that the Commission (1) recommend favorably on all such proposed street and alley closings and (2) approve all such transfers of jurisdiction.

4.A. The performance by the Developer of its obligations under Paragraph 4.B. of Part I, and the compliance by the Developer with the Development Area objectives and controls set forth in Part II and the conditions in Paragraph 2.F. of Part I of this Memorandum of Agreement, are subject to the

satisfaction of all of the following conditions:

(1) the streets and alleys referred to in Paragraph 2.E. have been closed;

(2) the transfers of jurisdiction provided for in Paragraph 2.D. have taken place;

(3) the building height restriction easement referred to in Paragraph 1 of Part II has been terminated;

(4) the existing easement under the Whitehurst Freeway has been revised in such manner as to permit development to proceed; and

(5) a building permit has been issued to the Developer in accordance with Paragraph 2.F. of Part I.

4.B. The Developer shall, subject to the requirements of Paragraph 4.A. of Part I:

(1) convey any lands shown on Maps Nos. 1 and 2 titled in the Developer and necessary for the establishment of the Park to the United States, acting through the Commission, without consideration. Such lands shall be conveyed with all improvements removed to existing grade;

(2) erect a structure with a gross floor area of approximately 10,000 square feet, at the specifications of, and on a site approved by the National Park Service, and convey the structure to the United States for park purposes at no cost to the District of Columbia or United States of America; provided that the Developer shall have the right of reasonable approval of the specifications and location; provided further that the Developer and the National Park Service shall jointly agree upon a use thereof that is consistent with the nature of the adjacent development; and

(3) release to the United States, acting through the Commission, the perpetual use of a parcel known as "The Mole", part of lot 801 in Square 1172, containing approximately 20,000 square feet.

5. The Secretary shall (1) accept any transfers of jurisdiction from the District of Columbia to the United States of lands for inclusion in the Park, (2) accept jurisdiction of closed streets and alleys and lands titled in the United States and acquired by the Commission for the Park, (3) prepare a master plan for the Park, and (4) develop and maintain the Park within the limits of appropriations made for such purposes, it being the intention of the parties that the Park be so designed as to integrate the Park and the adjacent development in terms of the access between them.

6. The parties hereby mutually agree that, consistent with the terms hereof, the parties shall take such further actions as may be reasonably required, including joint District of Columbia and Developer submission of subdivision and building permit applications, if legally possible, to further the objectives of this Memorandum of Agreement and to expedite all governmental approvals and actions as are contemplated hereby.

7. The Secretary, the Chairman, and the Mayor (hereinafter collectively called the "governmental agencies") believe that the value to the governmental agencies of the various elements of the consideration being paid by the Developer is greater than the value of the elements of the consideration being paid by the governmental agencies to the Developer (the "Additional Consideration"). The governmental agencies acknowledge that the development objectives and controls in Part II of this Memorandum of Agreement could not be achieved unless the Developer, voluntarily and admittedly without receiving consideration of equivalent value, gave the governmental agencies

more than received. Being aware of this and relying upon the acknowledgement by the governmental agencies as set forth in the preceding sentence, the Developer is willing to make a voluntary contribution of all such additional properties and rights comprising the Additional Consideration to the appropriate governmental agency or to such other organization which qualifies at the time of the contribution as an organization exempt under Section 501(c)(3) of the Internal Revenue Code of 1954 (or any successor provision) and upon which the parties hereto shall agree, at such a time and in such a way as to permit the orderly development of the Georgetown Waterfront.

II. GEORGETOWN WATERFRONT DEVELOPMENT AREA

1. After the Developer has conveyed the lands as required in Paragraph 4 of Part I and the Secretary has accepted the transfers of lands and of closed streets and alleys pursuant to Paragraph 5 of Part I, the Secretary shall terminate the building height restriction easement which the National Park Service holds on lands within the Development Area.

2. Subject to the provisions of Paragraph 4.A. of Part I, the Developer shall develop the Development Area in accordance with the following development objectives and controls:

A. The heights of all buildings, except buildings under the Whitehurst Freeway, shall be measured from a point 19 feet above mean sea level datum ("19 foot datum") as determined by the U.S. Army Corps of Engineers. (This is equivalent to the 50-year flood plain datum for this area.) All habitable space shall be above the 19 foot datum; parking and storage are permitted below that point. The heights of buildings under the Whitehurst Freeway shall be measured from the curb line of K Street.

B. Building heights shall not exceed those specified on Map No. 3, Georgetown Waterfront—Development Area Building Height Zones, NCPD Map File No. 71.10(78.00)-28658, annexed hereto and made a part hereof; provided, that in the interests of flexibility and variety, the heights of buildings may be increased by 10 feet, to provide architectural interest and articulation of the roofscape, on (1) no more than 35 percent of the land areas within the 30 foot building height zone, and (2) no more than 40 percent of the land area within each of the 40 foot and 50 foot building height zones, provided, that all such building heights shall be inclusive of all rooftop structures except that penthouses over elevator shafts may be constructed to a height of three feet over the maximum height permitted in each building height zone.

C. Building height zones are intended to screen the Whitehurst Freeway from the Potomac River and the Virginia shoreline and create a stepped building complex which would reach its greatest height adjacent to the Whitehurst Freeway and step down to the east and west and toward the Potomac River in order to achieve a varied skyline with views of the river from Georgetown above K and M Streets, N.W.

D. A unified design of the Development Area is essential to preserve the ambience and character of Georgetown and to insure visual and architectural harmony and should be sensitive to the site, its riverfront location, and adjacent park and development.

E. Facades fronting on Rock Creek and the Potomac River should be articulated in plan and height to provide visual interest as

well as maximize river views for the residences.

F. Boundaries between building height zones are shown on Map No. 3 as straight lines; however, these lines are intended as averages. Reasonable variations within the Development Area; that maintain these averages, are permissible if the variations allow architectural enhancement and the development of such amenities as courts, gardens, walkways, terraces, and steps.

G. The massing of buildings within the Development Area, including the area under and adjoining the Whitehurst Freeway, should provide for vistas (including, but not limited to, the visual easements specifically required pursuant to Paragraph H), light, air, amenities, pathways, and landscaping.

H. Visual easements thirty feet wide at the 19 foot datum shall be established along Thomas Jefferson Street extended, 30th Street extended, and 31st Street extended. The visual easement along 31st Street and not more than 25 percent of the horizontal area of each of the visual easements along 30th Street and Thomas Jefferson Street may be covered by buildings, the lowest elevation of which shall be approximately the bottom of the Whitehurst Freeway deck and the highest elevation of which shall be approximately 40 feet above the 19 foot datum. The width of such visual easements shall be measured from the center lines of 30th and 31st Streets and the center line of Thomas Jefferson Street projected south of K Street. Within the visual easements, public pedestrian ways shall be provided. Additional pedestrian ways, accessible to the public, may be provided compatible with Georgetown's historic orthogonal grid development.

I. Not less than 60 percent of the floor area in all buildings in the Development Area shall be for residential uses and not more than 40 percent of the floor area in all buildings in the Development Area shall be for commercial and office uses except that no more than 15 percent of the floor area in all buildings in the Development Area shall be for retail sales and service uses.

J. The building massing in the Development Area shall be designed so as to integrate residential and commercial uses within the complex.

K. All vehicular access for parking, loading and service to buildings in the Development Area shall be designed and controlled to minimize conflict with pedestrian movements and to reduce impacts on adjacent public streets serving the Georgetown Waterfront area.

CECIL D. ANDRUS, *Secretary of the Interior*; MARION S. BARRY, JR., *Mayor of the District of Columbia*; JAMES O. GIBSON, *Assistant City Administrator for Planning and Development*; DAVID M. CHILDS, *Chairman, National Capital Planning Commission*; GEORGETOWN HARBOUR ASSOCIATES, a general partnership, Chessie Resources, Inc., Georgetown, Partner, ROBERT C. MCGOWAN, President; MDK Associates, Partner; HERBERT S. MILLER, Partner; RICHARD L. KRAMER, Partner.

Mr. HATFIELD. Mr. President, I am extremely pleased that today the Senate is considering S. 901, legislation which I introduced earlier last year in an effort to preserve the last remaining portion of the Potomac Riverbank within the District of Co-

lumbia that has not been set aside for the use of all the public.

Only a few years ago central cities were deteriorating at alarming rates with people and businesses fleeing to more suburban settings. Many of us watched with distress as the Nation's Capital City, one of the most beautiful and carefully planned in the world, suffered the same fate and once-beautifully kept residential and public areas became blighted and unkempt.

Among the effects of the 1973 world oil crisis and the resulting recognition of the limitations on world resources, the flight from inner cities were stemmed. Since then increasing attention has been paid to the potential that our cities hold for lively and ecologically healthy existences. Energy and imagination have been directed at our urban cores and out of them are arising exciting, people-oriented environments.

One of the long-neglected features of many east coast cities was their waterfront properties and harbors. In the 1970's, these blighted areas were transformed and became coveted locations for the products of the imaginations of increasingly creative architects and city planners. Understandably, local officials have welcomed these developments with open arms. But, unfortunately, these trends have had their negative side as well. First and foremost, a sad displacement of the poor has occurred and, as always, they have been forced to move to the least desirable areas rather than being accommodated among new residents. A second problem that has developed was created by the appeal of the almighty dollar. While many of the urban changes improved the cities, some have only produced a different set of problems because of the fact that the motive behind their creation was profit alone, with no consideration given to their impact upon people.

This is the situation we are facing at the site of the Potomac River waterfront south of the Georgetown area in Washington, D.C. This site is one of the most beautiful along the entire expanse of the river. It provides vistas of natural and manmade beauty both upriver and downriver. It is an ideal location for a public park to be enjoyed by residents and out-of-town visitors alike. It could provide the site for a future national memorial, as well.

Yet we have been slow to realize its importance. Slower, in fact, than private developers. Motivated by the potential profit to be earned by turning the area into a commercial and luxury residential complex, both private and public officials have fallen under the spell of well-financed and executed efforts to sell a plan for building on this site.

It has been my hope that Federal officials in charge of national parks will

develop a sense of the importance of protecting the Georgetown waterfront from development. To that end, I introduced legislation in the 96th Congress authorizing the purchase of the privately owned land at the site. Naturally, economic realities made passage of that bill unlikely. S. 901, on the other hand, has a much more narrow and achievable goal: To authorize the Secretary of the Interior to exchange land that is already owned by the Federal Government for the waterfront land, or to accept donation or transfer of the land by the current owners. It has been a constant source of concern for me that Interior Department officials, by their inaction, have encouraged rather than discouraged the unfortunate development that would create unbelievable congestion at an already overburdened part of the Nation's Capital. S. 901 would require simply that alternatives be explored before we "throw in the towel" and give up efforts to preserve that with which nature has blessed us.

Let me quote from section (a) of the proposed legislation:

The Secretary of the Interior, in cooperation with other public agencies is authorized to acquire by donation, exchange, or transfer the . . . lands and improvements comprising that area within the District of Columbia which is generally bounded on the north by K Street, on the east by Rock Creek, on the south by the Potomac River, and on the west by . . . Key Bridge . . .

In other words, I am not proposing the expenditure of any Federal dollars to acquire this important waterfront land.

Section (b) states that once acquired the land will be administered by the Secretary of the Interior in a manner that preserves and protects it for recreational uses as a national park.

The Mayor of the Nation's Capital has expressed his support for this goal. In hearings held on S. 1495, the Mayor's representative stated the Mayor's support this way,

Let me say unequivocally, Mr. Chairman, that Mayor Barry strongly prefers a total park on the waterfront. It would satisfy strong citizen interest and present a dramatic river entrance to Washington from the west. (Senate hearings 96-108, page 9.)

The U.S. Fine Arts Commission also has voiced strong official support for the maintenance of the waterfront land as a park. After careful and repeated review, the Commission rejected the proposed construction plans and voted last year to withhold a building permit for the project.

In the report which accompanies S. 901, the Secretary of the Interior is on record with the administration's position favoring preservation and protection of the Georgetown waterfront for the recreational use of the public. He states in a letter to Chairman McCURE that, "We would support enactment of S. 901." The Office of Management and Budget concurs in this

support. Let me review the reasons for the need to pass this legislation. First, since the 1930's the National Park Service has planned for inclusion of the Georgetown waterfront in the National Capital Park System.

Second, the Georgetown waterfront is the only portion of the Capital's main Potomac River shoreline not protected by inclusion in that system.

Third, the entire area of the Georgetown waterfront is needed as a public waterfront park that would provide energy-efficient, close-to-home, water-oriented recreation for residents of the National Capital area, and would serve visitors from across the country.

Fourth, the entire waterfront is located within a high-hazard floodplain where construction of buildings would go against both prudent land management and sound public policy.

Fifth, the waterfront could be an appropriate location for a future memorial—I trust our Nation will continue to be blessed with men, women, and acts of providence worth memorializing.

Sixth, the District of Columbia, which owns a portion of the waterfront, has expressed willingness to convey its land free of charge to the National Park Service.

Seventh, the use of the waterfront for public park purposes is being threatened by the proposed construction of a large commercial/residential complex on privately owned land within the waterfront.

Lastly, on two occasions the U.S. Commission on Fine Arts disapproved plans for the proposed development.

I thank the leadership for agreeing to take up this matter and welcome the consideration of the issues surrounding it by my colleagues. Finally, I hope that the Department of the Interior will be moved to perform its proper function in regard to the waterfront and assist the public in efforts to maintain the city of Washington for the enjoyment of all the people of the Nation.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on engrossment of the bill and third reading.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Interior (hereinafter referred to as the "Secretary"), in cooperation with other public agencies, is authorized to acquire by donation, exchange, or transfer the following described lands and improvements comprising that area within the District of Columbia which is generally bounded on the north by K Street, on the east by Rock Creek, on the south by the Potomac River, and on the west by a line four hundred feet west of Key Bridge, and is generally depicted on the map entitled "Potomac River Shoreline" dated September 1980; and numbered 80,000.

(b) Upon completion of the acquisitions authorized in subsection (a), such area shall be administered by the Secretary in accordance with the provisions of the Act of August 25, 1916 (29 Stat. 535), as amended and supplemented (16 U.S.C. 1 et seq.), and the Act of August 21, 1935 (49 Stat. 666; 16 U.S.C. 461-467), as part of the park system of the National Capital, in a manner so as to assure the preservation and protection of the Potomac River shoreline and for recreational and other compatible purposes. The Secretary shall promulgate such regulations as may be necessary to carry out the provisions of this Act.

(c) Exchanges shall be on the basis of equal value, and either party to the exchange may pay or accept cash in order to equalize the value of the property exchange, except that if the Secretary determines it is in the public interest, such exchanges may be made other than equal values.

SEC. 2. Effective October 1, 1982, there are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

DEPARTMENT OF STATE AND RELATED AGENCIES AUTHORIZATION—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 1193 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1193) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of Aug. 3, 1982, p. H4999.)

Mr. PERCY. Mr. President, I urge my colleagues to support the conference report on S. 1193, a bill authorizing appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting.

For fiscal year 1982, the conference substitute authorizes appropriations totaling \$2,873,760,000, which is \$250 million less than the bill which passed the Senate and only \$4.5 million more than the executive branch request.

For fiscal year 1983, the conference substitute authorizes appropriations

totaling \$2,923,244,000, which is \$86 million more than the bill which passed the Senate, but \$80.5 million less than the executive branch request.

The decrease in the fiscal year 1983 executive branch request contained in the conference substitute is due largely to the reluctance of the conferees to fund a construction program for the International Communication Agency, the costs of which will not be obligated until fiscal year 1984 and fiscal year 1985.

The total amount authorized in this conference report for fiscal year 1983 is essentially within the guidelines set for this purpose in the first concurrent resolution on the budget for fiscal year 1983.

I ask unanimous consent that two tables setting forth the amounts authorized by the conference substitute be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE I.—BUDGET ISSUES: FISCAL YEAR 1982

(In thousands of dollars)

	Executive branch request	Senate bill	House amendment	Conference
Department of State:				
Administration of foreign affairs	1,245,637	1,318,754	1,245,637	1,245,637
International organizations and conferences	503,462	523,806	503,462	503,462
International commissions	19,808	22,508	19,808	19,808
U.S. bilateral science and technology agreements	3,700	3,700	3,700	3,700
Asia Foundation		4,500		4,500
Migration and refugee assistance	504,100	560,850	504,100	504,100
Subtotal, Department of State	2,276,707	2,434,118	2,276,707	2,281,207
International Communication Agency	494,034	561,402	494,034	494,034
Board for International Broadcasting	86,519	98,317	86,519	86,519
Inter-American Foundation	12,000	12,000	10,560	12,000
Arms Control and Disarmament Agency	16,768	18,268		
Total	2,886,028	3,124,105	2,867,820	2,873,760

¹ In providing a separate authorization for the Asia Foundation for fiscal years 1982 and 1983, the conferees expect the executive branch to request separate authorizations for this purpose in succeeding fiscal year.

² Includes an earmarking of \$12,500,000 for Soviet and Eastern European refugees resettling in Israel, and an earmarking of \$1,500,000 for the "political detainee" program of the International Committee for the Red Cross (ICRC).

TABLE II.—BUDGET ISSUES: FISCAL YEAR 1983

(In thousands of dollars)

	Executive branch request	Senate bill	House amendment	Conference
Department of State:				
Administration of foreign affairs	1,248,059	1,248,059	1,248,059	1,248,059
International organizations and conferences	514,436	514,436	514,436	514,436
International commissions	22,432	22,432	22,432	22,432
U.S. bilateral science and technology agreements	3,700	3,700	3,700	3,700
Asia Foundation				4,500
Migration and refugee assistance	460,000	467,750	460,000	460,000
Subtotal, Department of State	2,248,627	2,256,377	2,248,627	2,252,127
International Communication Agency	644,000	482,340	482,340	559,000
Board for International Broadcasting	98,317	98,317	98,317	98,317
Inter-American Foundation	12,800		12,800	

TABLE II.—BUDGET ISSUES: FISCAL YEAR 1983—Continued

(In thousands of dollars)

	Executive branch request	Senate bill	House amendment	Conference
Arms Control and Disarmament Agency	19,942	(*)		
Total	3,023,686	2,837,034	2,842,084	2,923,244

¹ Includes an earmarking of \$16,875,000 for Soviet and Eastern European refugees resettling in Israel, and an earmarking of \$1,500,000 for the "political detainee" program of the International Committee of the Red Cross.

² The executive branch request, including supplemental, totals \$644,000,000. The Senate bill and the House amendment recommended \$482,340,000. However, since both the Senate Foreign Relations Committee and the House Foreign Affairs Committee subsequently reported supplemental authorization legislation (H.R. 5998 and S. 2581), the conferees agreed to the lower Senate combined level of \$559,000,000. This amount includes earmarkings of \$84,256,000 for grants for the Fulbright Academic Exchange Program and the International Visitor Program, \$3,248,000 for grants for the Humphrey Fellowship Program, \$8,906,000 for grants to certain private nonprofit organizations.

³ The Senate bill authorized "such sums as may be necessary" for fiscal year 1983.

Mr. PERCY. Mr. President, in addition to the authorization of appropriations, the conference substitute retains various identical or modified policy and administrative provisions which were contained in either the Senate or House version of the bill. I urge my colleagues to review the Statement of Managers which explains in great detail all of these issues.

One of these issues of particular concern to both the House and Senate conferees was the title dealing with the Foreign Missions Act. After many days of debate, the conferees finally adopted a compromise which I believe adequately protects both Federal and local interests. I ask unanimous consent that the following excerpt from the Statement of Managers be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

FOREIGN MISSIONS ACT

The House amendment (the "Foreign Missions Act") established a new "Office of Foreign Missions" within the Department of State and authorized the Secretary of State to review and control the operations of foreign missions in the United States and the benefits available to them. "Benefit" was broadly defined to include any type of service or supply, including real property transactions, available from the public or private sources. It empowered the Secretary to set terms and conditions upon which benefits may be provided; set forth the mechanism and criteria under which issues relating to the location of foreign missions in the District of Columbia are to be decided; provided for the preemptive effect of the exercise of Federal jurisdiction regarding the conferral or denial of benefits under this legislation; provided administrative authorities to enable the Office of Foreign Missions to operate under the direction of the Secretary of State, but not subject to control by the bureaus responsible for the day-to-day operations of the Department; granted authority to the Secretary to apply the foreign missions provisions to international organizations or official missions thereto; and limited to two persons per foreign mission any certification for purposes of issuance of diplomatic license plates.

The Senate bill contained no comparable provision. S. 854, passed by the Senate, is similar to the House amendment, but contained no provision on the location of foreign missions in the District of Columbia.

The conference substitute is similar to the House amendment with the following changes which were drawn primarily from provisions in S. 854: It adds language preserving the authority of the Secret Service to provide protective services; requires the Secretary of State to advise those proposing to enter into transactions with foreign missions whether the proposed transaction is prohibited by any regulation or determination of the Secretary under this legislation; broadens the definition of "international organization" to include those in which the United States does not participate; clarifies that the authorities of the bill shall be exercised in accordance with procedures and guidelines approved by the President; sets forth procedures and criteria under which issues relating to the location of foreign missions in the District of Columbia are to be decided; clarifies the preemptive effect of the exercise of Federal jurisdiction regarding the conferral or denial of benefits under this legislation; and provides that only amounts transferred or credited to the working capital fund of the Department of State may be used in carrying out the functions under the Foreign Missions Act.

Among those House provisions deleted by the conference substitute were the provision granting authority to the National Capital Planning Commission to settle chancery issues and the provision establishing the Foreign Missions Act as the exclusive law governing foreign missions in the District of Columbia. The original preemption provision was replaced with more limited language, which does not require State or local authorities to take any affirmative action.

The conference substitute also deletes the House provision concerning diplomatic license plates. The committee of conference took careful note of past abuses by foreign diplomatic personnel stemming from their special status and immunity. Such abuse was especially prominent in the area of diplomatic license plate issuance. Careful note was also taken of an exchange of letters between Representative William S. Broomfield and Under Secretary of State Richard T. Kennedy on this matter. The committee of conference is reassured by the Department's forthright response and its commitment to pursue this matter in the future. Specifically, the Department has indicated its intent to scrutinize the issuance of diplomatic license plates; assist local jurisdictions, as appropriate, with their collection of parking fines and the pursuit of other motor vehicle violations; and to monitor generally the number of diplomatic license plates issued. The committee of conference notes that these matters come within the purview of the new Foreign Missions Act and that the Department therefore will be able to remove this problem from the Office of Protocol and turn it over to the Office of Foreign Missions for handling.

With respect to the location of chanceries in the District of Columbia, the conference substitute contains a provision replacing that contained in section 206 of the House amendment. This new section retains the existing D.C. zoning structure composed of the National Capital Planning Commission, the D.C. Zoning Commission, and the D.C. Board of Zoning Adjustment. For purposes of considering chancery issues, the substitute provides that the President may design-

nate the Secretary of Defense, the Secretary of the Interior, or the Administrator of General Services to serve as the Federal representative on the Zoning Commission in lieu of the Director of the National Park Service, and that the individual so designated will also serve on the Board of Zoning Adjustment, as the Zoning Commission representative when the Board considers chancery matters. The substitute also provides for chanceries to be treated similarly to, and no less favorably than, office and institutional uses, and sets forth criteria for use in determining the chancery issues which take into consideration international obligations and the need to balance municipal and Federal interests.

ANALYSIS OF CERTAIN FOREIGN MISSIONS PROVISIONS

Chanceries in the District of Columbia

Section 206 affects chancery locations only in the Nation's Capital and, therefore, is set apart from other sections of the Foreign Missions Act which are of general application. Section 206(a) states that the location, replacement, or expansion of chanceries in the District of Columbia shall be subject to this section.

Section 206(b)(1) permits chanceries to locate as a matter of right in any area zoned commercial, industrial, waterfront, or mixed-use, but not in medium-high or high-density residential zones. This means that a chancery wishing, for example, to locate in a mixed-use (commercial-residential) zone, may do so if it meets the same standards as to building height, bulk, et cetera, and acquires the necessary permits, as do other property users within that zone. Additional administrative steps would not be required. The principal change from the current situation is the inclusion of lower density commercial areas as a matter of right. These areas are often desirable for chancery uses, as they are for certain office and institutional uses. Indeed, the majority of chancery uses are small scale and lower density and therefore suitable for such areas, or in some cases require placement in such areas for security reasons. This subsection also includes the commercial-residential mixed-use areas and waterfront areas, which is not a change from current law, and adds industrial areas. The section does not authorize the location of chanceries as a matter of right in areas zoned residential.

Section 206(b)(2) permits chanceries, upon application, to locate, as at present, in areas zoned medium-high or high-density residential, as well as in other areas which include office and institutional uses, including mixed-use diplomatic and special purpose districts. All locations within these areas are subject to disapproval under the District of Columbia zoning process as provided in this section. This subsection will not permit chanceries to be located in any area which is essentially a residential use area.

Section 206(b)(3) precludes the imposition of limitations or conditions on chanceries greater than those placed on other office or institutional uses. This insures treatment for chancery uses equal to that accorded comparable uses in the same area.

Section 206(c)(1) provides for filing with the D.C. Board of Zoning Adjustment and public notice of all applications for chancery use or appeals by chancery applicants from adverse zoning determinations. This is consistent with current law.

Section 206(c)(2) provides for appropriate public participation in proceedings under this section. The D.C. Zoning Commission

will have the responsibility for issuing the regulations governing public participation.

Section 206(c)(3) provides a limitation of 6 months for proceedings involving chanceries under this section. This is intended to insure an expeditious process which will avoid the extensive and overlapping proceedings which are required under existing law and regulations. A time limit of 6 months should, in most cases, be more than sufficient to complete the decisionmaking process. It is expected, however, that final decisions will, to the extent possible, be made in a shorter period.

Section 206(d) sets forth the criteria to be applied in the determination of chancery issues, which are intended to balance the municipal and Federal interests. In brief, these criteria include: (1) Recognition of the international obligation of the United States concerning the location of chancery facilities in the Nation's Capital; (2) historic preservation; (3) adequacy of parking and public transportation; (4) availability of Federal security; (5) the municipal interest, as determined by the Mayor of the District of Columbia, which includes matters such as traffic, height, bulk, area impact, among others; and (6) the Federal interest, as determined by the Secretary of State, which includes matters such as national security, foreign relations concerns, and the reciprocal impact on U.S. missions abroad.

Section 206(e)(1) provides that regulations, proceedings, and other actions of the National Capital Planning Commission (NCPC), the D.C. Zoning Commission, and the Board of Zoning Adjustment of the District of Columbia, shall be consistent with the provisions of this section, including the criteria described above, in order to assure consistency among actions of the several bodies administering this section.

Section 206(e)(2) provides for referral to NCPC for review and comment of proposed actions of the Zoning Commission, as is required under existing law.

Section 206(f) provides that proceedings concerning chanceries under this section would be conducted under a rulemaking and not an adjudicatory procedure. This will provide a process compatible with the conduct of diplomatic relations between the sovereign nations involved, and the participation of their diplomatic representatives in these proceedings. Such rulemaking procedures are currently employed by the Zoning Commission of the District of Columbia in some of its proceedings.

Section 206(g) directs the Secretary of State to require substantial compliance with building and related codes by foreign missions, which is stricter than current practice under which these codes are not enforced with respect to foreign missions because of diplomatic immunity. This subsection permits the Secretary of State to accommodate special building requirements, generally involving security, communications, and related needs, which are often required to be adjusted in a similar manner for U.S. missions abroad.

Section 206(h) provides grandfather rights for existing chancery locations and uses, so that such issues need not be reopened.

Section 206(i)(1) authorizes the President to adjust Federal representation on the D.C. Zoning Commission for purposes of proceedings under this section, in order to reflect, as appropriate, national security and foreign policy concerns. Under existing law, one Federal agency representative is now a member of the Zoning Commission. The Zoning Commission of the District of Co-

lumbia is composed of three representatives appointed by the Mayor of the District, one Federal agency representative (currently the National Park Service), and the Architect of the Capitol. This authority neither increases the Federal representation nor affects the District majority thereon appointed to the Commission by the Mayor of the District of Columbia.

Section 206(i)(2) provides that for purposes of chancery issues, the Federal agency representative (who may be the existing official or one designated under the preceding subsection (i)(1)) shall also be the Zoning Commission representative on the Board of Zoning Adjustment. The Board of Zoning Adjustment of the District of Columbia is composed of three persons appointed by the Mayor of the District, one representative of the Zoning Commission, and one representative of the National Capital Planning Commission. Under existing law and practice, one member of the Commission currently serves on the Board on a rotating basis. This provision therefore assures that the Federal interest will always be appropriately reflected in the performance of the Board's functions under this section. It does not affect the District majority appointed to the Board by the Mayor of the District of Columbia. This subsection also provides that in chancery proceedings, the NCPC representative serving on the Board shall be the Executive Director of the Commission, which conforms to the existing NCPC practice of appointing a staff member for such purposes.

Section 206(j) provides that other provisions of law shall apply to chanceries in the District of Columbia only to the extent they are consistent with this section. This is in lieu of the House provision which made the Foreign Missions Act the exclusive law governing foreign missions in the District.

Preemption

Section 207 expresses the preemptive effect of the right of the Federal Government, through the Secretary of State, to preclude the acquisition of any benefits by a foreign mission within the United States. A denial by the Secretary, for example, of a right of a particular foreign government to open or maintain a mission within the United States, or a condition limiting the number of their personnel or other factors relating to the mission, would be controlling. This is consistent with current practice and reflects the policy of Federal preemption in foreign relations. This subsection does not otherwise affect State or local law or regulations. Nothing in this section would require any State or local authority to take any affirmative action. The principal impact of its terms is to preclude reliance on local law, regulation, or practice by a foreign mission in an effort to secure benefits contrary to limitations imposed by the Secretary. This limited preemption is necessary in order to assure that the purposes of the Foreign Missions Act are carried out.

Of course, State and local governments are obliged to respect the rights of foreign missions to be granted certain benefits under international law and international agreements in force. The views of the Secretary of State on the requirements of international law are authoritative in this regard. Should a State or local governmental entity wish to deny benefits which it is not obliged to grant, contrary to a determination by the Secretary of State that such benefits should be granted, the matter would, as under present practice, be subject

to resolution through discussions between the Department of State and the State or local governmental entity. The committee of conference notes that the interests of the Department in promoting foreign policy and national security interests and the interests of State and local governments in protecting local citizen interests are not necessarily incompatible and therefore looks forward to a productive working relationship between the Department of State and State and local authorities.

This section also requires coordination among Federal agencies, under the leadership of the Secretary of State, in order to achieve an effective policy of reciprocity so as to fulfill the purposes of this legislation by precluding any Federal agency from taking any action inconsistent with the Foreign Missions Act. The provision has the effect of rendering unenforceable any rules or regulations of any Federal agency, to the extent that such rules or regulations would confer or deny benefits contrary to this title.

The committee of conference notes that the Foreign Missions Act is a new and unique piece of legislation which grants the Secretary of State significant authority over the activities and operations of foreign missions in the United States—authority which is long overdue. In order to carry out this authority effectively, the Office of Foreign Missions will need adequate numbers of trained personnel, as well as sufficient resources for the job. The committee of conference expects the Department of State to establish an effective and aggressive operation with a useful working relationship with the bureaus and offices of the Department, as well as with other interested agencies, but which maintains its distance from the day-to-day operations of the Department. In addition, the committee of conference cautions that a clear distinction must be made and maintained between the Office of Foreign Missions and the Office of Protocol, since their responsibilities may often be conflicting. The committee of conference expects, in particular, that certain responsibilities will be moved from the Office of Protocol to the Office of Foreign Missions, including such matters as: (1) the determination of eligibility and issuance of credentials of diplomatic, consular, and other foreign government officers and employees with respect to rights, privileges, and immunities; (2) advising and acting as liaison to State and local government authorities on diplomatic privileges and immunities and related matters; (3) providing certifications of the immunity status of individuals for use in court cases; (4) requesting waiver of immunity in appropriate cases; (5) assisting in the negotiations of consular conventions and other treaties and agreements involving rights, privileges, and immunities of foreign government missions and personnel; and (6) providing advice and assistance to diplomatic missions.

In certain areas, the Secretary may find it appropriate to permit sharing of responsibilities between the two offices, but the committee expects the new office to resolve the inherent conflict between protocol duties and those duties involving regulation of foreign mission activities. Appropriate liaison between the officer should assure that conflicts are minimized.

Mr. PERCY. Mr. President, in conclusion, the Foreign Relations Authorization Act is by its nature a long and complex bill. The committee of conference resolved more than 40 differences

between the two Houses. The managers on the part of the Senate were diligent in their efforts to uphold the Senate position and were, I believe, rather successful in that effort. It is the belief of the Senate conferees that the compromises in the conference substitute were reasonable solutions to some very difficult issues. Therefore, I urge the adoption of the conference report.

Mr. PELL. Mr. President, passage of the conference report on S. 1193 will provide authorization for fiscal years 1982 and 1983 for the State Department, the International Communication Agency—redesignated by the bill as the U.S. Information Agency—and the Board for International Broadcasting. Although the total funding authorized for these three agencies is relatively modest as compared to the Department of Defense budget—\$2,873,760 for fiscal year 1982 and \$2,923,244 for fiscal year 1983—these agencies have an absolutely vital national security role. Diplomacy, be it the government-to-government representation of the State Department or the public diplomacy of USIA and BIB, is the most cost-effective way, in terms of money and lives to protect and promote U.S. national interests.

S. 1193 includes several important provisions to strengthen our representation abroad. The conference substitute mandates the reopening of seven closed consulates and earmarks funds for that purpose. This will enhance our visible presence overseas. The bill also includes a provision, initiated by Senator GLENN, to exempt the inter-American organizations—OAS, PAHO, IICA—from the debilitating effects of the administration's deferral plan.

S. 1193 also incorporates two provisions, of which I am proud to have been the author, to strengthen our public diplomacy. The first provision mandates a doubling of exchange-of-persons programs in real terms over the next 4 years and specifically earmarks increases in fiscal year 1983 of 37 percent to 46 percent over the fiscal year 1982 levels in the Fulbright academic exchange program, the international visitor program, the Humphrey fellowship program, and the private sector program, all programs with a proven record of effectiveness. This provision reverses a long-term decline in U.S. exchange programs which has left us outspent by the Soviet Union in this area by more than 10 to 1.

Second, this bill strengthens the Federal oversight over Radio Free Europe and Radio Liberty by requiring that the Directors of the RFE/RL Board be the same as the Presidential appointed Directors of the Board for International Broadcasting. This provision, which in no sense federalizes the radios, will insure more effective use of the U.S. tax dollars in providing a source of reliable information

on Eastern Europe and the Soviet Union to the people of those countries.

Passage of the conference report on S. 1193 will lead to strengthening of the diplomatic arm of our Government. This strengthening is being accomplished, I would note, with slightly less than the amounts requested in the President's budget for fiscal year 1982 and fiscal year 1983.

In the long run, however, the Congress must address itself to the problems caused by the real decline in resources devoted to our foreign affairs agencies. I note that since 1960 the number of State Department Foreign Service Officers has declined from 3,717 to 3,564 while the number of missions overseas has increased from 165 to 224. In the same period, consular loads have increased 900 percent and Washington's demand for reporting cables has increased 400 percent. A comparable situation exists at USIA, which the mandated increase in exchanges will only partially correct. Again let me emphasize that the failure to provide adequate resources to these vital tasks will over time undermine our national security.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

ORDERS FOR TUESDAY

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF VARIOUS SENATORS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent after the recognition of the two leaders under the standing order, that the following Senators be recognized on special order for not to exceed 15 minutes each: Senators CHILES, HEFLIN, LEVIN, and HUMPHREY.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Finally, Mr. President, I ask unanimous consent that after the execution of the special orders there be a brief period for the transaction of routine morning business to extend not past the hour of 11:30 a.m. in which Senators may speak for not more than 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, there is provision for a period for the transaction of routine morning business, is there not?

The PRESIDING OFFICER. There is.

Mr. BAKER. I yield back my time, Mr. President, so that the Chair may put the Senate in morning business.

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FEDERAL ELECTION COMMISSION

Mr. FORD. Mr. President, the Federal Election Commission is so often the subject of criticism that it is far too easy to overlook and slight the valuable services performed by that agency.

It is refreshing to receive favorable comment regarding the FEC from an organization as involved in the conduct of Federal elections as the International Institute of Municipal Clerks, many members of which are regularly involved in the administration of Federal elections.

Recently I received a letter from that organization in support of full funding of the FEC. In particular, the institute praised the assistance and information provided by the programs of the clearinghouse to State and local election officials—services which are not available from any other agency.

In both its letter and a resolution adopted by IIMC, the institute makes note of the savings to the local officials as a result of the information provided by the FEC's clearinghouse, and its State and local workshops for local election administrators. It should be noted that the clearinghouse functions of the FEC have had very little funding during the past year, and that the present budget for next year will provide for very little as well—less than \$175,000, in fact. That this agency can continue to function with so little, and still provide services that cut costs for those local agencies that administer our Federal elections is a remarkable feat, and deserves commendation.

The clearinghouse, however, cannot continue to provide so many support services to the States in the future without adequate funding. It would be shortsighted and a false economy on our part to continue to restrict the

funding of this agency in view of the savings it has been able to make possible for local election officials in the administration of Federal elections throughout the country.

Mr. President, I ask unanimous consent that the letter and resolution of the IIMC be included in the RECORD in full immediately following this statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE INTERNATIONAL INSTITUTE
OF MUNICIPAL CLERKS,
Pasadena, Calif., July 20, 1982.

Hon. WENDELL H. FORD,
Member, Senate Rules Committee,
Washington, D.C.

DEAR SENATOR FORD: Please find attached a copy of a resolution that was adopted, unanimously, by the International Institute of Municipal Clerks at our recent annual meeting. The 6,400 membership body of municipal clerks, three-quarters of whom serve as their government's election officer, pointed out that the Federal Election Commission guarantees "The integrity of our nation's electoral system by providing information and assistance on Federal election matters."

The IIMC listed as valuable contributions to the election process the Commission's many reports and research surveys on voting systems, registration, training of poll workers, proposed legislation, and judicial systems. It praised its successful regional and state workshops and cited its National Clearinghouse on Election Administration as contributing to implementation of substantial cost savings to state, county and municipal election operation.

I also observe that Congress is now considering legislation to eliminate the Clearinghouse. Specifically, Sections 11 and 16 of H.R. 6479 would, as I understand it, eliminate both the Clearinghouse and the Voting Systems Standards study.

The IIMC and its 6,400 members are strongly opposed to eliminating the Clearinghouse and the Voting Systems study. Clearinghouse services are deemed important by our membership and, as I noted above, have resulted in substantial cost savings to state, county and municipal election operations. In our view, such services will be even more valuable in the future as state and local government will have even fewer resources to successfully administer Federal Elections.

Sincerely,

JOHN J. HUNNEWELL, CAE,
Executive Director.

RESOLUTION No. 2

Whereas, the Federal Election Commission has worked closely with both the International Institute of Municipal Clerks and individual clerks in guaranteeing the integrity of our nation's electoral system by providing information and assistance on Federal election matters; and

Whereas, many municipal clerks administer Federal Elections and the Federal Election Commission has provided invaluable reports and information on Voting Systems and Equipment, Voter Registration, Training of Poll Workers, Proposed Federal Legislation Relative to Elections, and Federal and State Election Laws and Case Decisions; and

Whereas, the Federal Election Commission has sponsored informative and success-

ful regional and state workshops attended by municipal clerks; and

Whereas, the International Institute of Municipal Clerks has been strongly represented on the Federal Election Commission's Clearinghouse Advisory Panel and regional and state panels; and

Whereas, the foregoing activities of the Federal Election Commission have resulted in substantial cost savings to state, county, and municipal election administrators and clerks; and

Whereas, the need for accurate and unbiased information and assistance on Federal elections and election administration becomes more critical each year: Now, therefore, be it

Resolved, That the International Institute of Municipal Clerks urges Congress to approve full funding for Fiscal Year 1983 as requested by the Reagan Administration and the Federal Election Commission, so that the Commission can continue its services to municipal clerks, and the President is hereby directed to send copies of this resolution to appropriate Congressional Leaders.

THE BALANCED BUDGET AMENDMENT

Mr. DIXON. Mr. President, we have spent much time in the past several weeks debating the balanced budget amendment and, of course the measure was approved by the Senate on August 4, 1982.

My friend and colleague of many years, Representative PAUL SIMON of Illinois, has recently written a newspaper column detailing his views on the subject, and I think they are well worth reading.

I hope all my colleagues in this body, as well as Representative SIMON's colleagues in the House, will take the time to examine his remarks.

I ask unanimous consent that the text of the column be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

BACKBONE IN BUDGETING

While I consider myself to be independent-minded and avoid tagging labels on myself, sometimes I am identified by newspapers as a liberal Democrat.

Though my fiscal impulses are conservative, I favor more government involvement in certain areas than some of my friends do. It is an honest disagreement.

But where we should not disagree is that whatever we spend we pay for. That is why the tax cut voted last year was so irresponsible—in essence we decided to borrow money to give ourselves a tax cut.

Back in 1960 the people of Illinois voted on a \$345 million bond issue for mental institutions and universities. As one who strongly supported a better mental health program and an improved university system for our state, I startled some of my friends when I opposed that bond issue.

Now I am startling some people by favoring a constitutional amendment to require a balanced budget, a position I have held since my first days in Congress.

There are some interesting parallels between Illinois' experience with indebtedness

and the current situation with federal deficit spending.

Every organization I know, with the lone exception of the Farm Bureau, backed the state referendum on the bond issue. So did every newspaper I know of.

In opposing it I made two points: First, that we would be much better off increasing our taxes slightly and meeting the need on a pay-as-you-go basis; that the money would not be spent in one or two years as claimed. Second, that such a bond issue would only be the beginning and the net result ultimately would be costly to the taxpayers in both tax dollars and reduced services.

The measure passed, and the money ended up being spent over seven years, not one or two. And now the State of Illinois has a bonded indebtedness of more than \$18 billion, according to a recent Chicago Tribune series, and is spending well over \$100 million each year on interest alone.

Illinois took the easy way out and we are paying for it.

At the federal level we also are spending an increasing percentage of our tax dollar on interest rather than on goods and services because no matter what the economic situation, we spend more than we take in.

The federal government's number one expenditure is Social Security, the number two is defense, and the number three is interest. Everything else is far behind. Our interest expenditure for fiscal year 1983 will be at least \$113 billion—just about what the total budget of the federal government was in 1964 when Lyndon Johnson was President.

Is it wise to endlessly go deeper and deeper into debt? Is it wise to each year spend an increasing percentage of money on interest payments which might go to help meet the needs of people? Is it wise for the federal government to compete with the private sector so mightily for borrowed money, sending interest rates up?

Then you get to the bottom line question: Can a Congress and an administration show enough backbone to balance the budget without having a constitutional amendment to force it? I have reluctantly reached the conclusion from some years of observing government that it is not possible.

Some charge that it is totally inconsistent for the same President and Congress who have voted record-breaking deficits to call for a constitutional amendment. And of course the charge rings true. Just as it is true that our year-after-year budgets of more spending than income are inconsistent.

The real question, however, is not whether the proposal is inconsistent (which it is) but whether it is in the national interest. I believe that it is.

I will argue for full employment programs with my friends who oppose them; I will argue for more adequate medical care for those who are just getting by in our society with those who somehow do not see the need; but I believe in paying for these initiatives as we go.

If we who serve in high office—and you who put us there—ask for an added service of government, then let us have the courage to tax ourselves for that service. If we do not have the courage to ask for the taxes, we should not ask for the services.

It is that simple.

Yes, there will be years in which there must be deficits, and Congress will have the ability to do that. But that should not happen regularly.

The national dialogue ought to be about the needs of this nation and how we effec-

tively meet those needs, but it should involve a realistic assessment of costs.

I am tired of the nation slipping into the quicksand of deeper and deeper debt. And somehow out there in the American public is a streak of common sense which agrees.

EXTENDED UNEMPLOYMENT BENEFITS TRIGGER OFF IN ILLINOIS TODAY

Mr. DIXON. Mr. President, I have been informed by the Governor of Illinois, James R. Thompson, that Illinois will trigger off extended unemployment benefits today.

This is a disgrace. It further points to the need for immediate action on the part of the Congress and the President to address this urgent problem.

Illinois has a total unemployment rate of 12.3 percent. This translates into nearly 700,000 people who are out of work and are receiving some unemployment benefits—either the first 26 weeks of regular benefits or the additional 13 weeks of extended benefits; 50,000 people will lose their benefits today, Mr. President.

I was gratified by the accord reached between Senator METZENBAUM, Senator DOLE, Senator PERCY, myself, and others regarding the sense of the Senate resolution which overwhelmingly passed this body last Thursday. A copy of unprinted amendment No. 1186 is included at the end of my statement.

In addition, the entire Illinois congressional delegation signed a letter which was sent to President Reagan last Thursday. In that letter, we explained the impending emergency in Illinois and asked for special consideration to this problem and to specific suggestions as they were developed. Every member of the Illinois delegation signed that letter. The problem, which has already affected many other States, is now before us in Illinois. We agreed, in a meeting of the delegation, to work together with other States similarly affected. A copy of the letter we sent to the President is included at the end of my statement.

As I said last Thursday, this problem will not go away. As long as there are millions of people who are out of work and unable to find jobs, there will be people whose basic needs must be met.

With the added discouraging news that the national unemployment rate is now at a staggering 9.8 percent, there is certainly a necessity for addressing this issue directly, constructively, and immediately.

It makes no sense to have the highest rate of unemployment in 40 years, and have States such as Illinois ineligible to receive funds, based on a change in Federal law last year which penalizes the very States who need help most.

I introduced S. 2802 last week, which addresses the fundamental problem of the way that States count the number of unemployed in determining eligibility for extended benefits. Those States which have had the longest period of high unemployment are facing the dilemma of having many people on extended benefits, and fewer people on the regular 26 weeks of benefits. Those who have endured the longest period out of work are not even counted in determining eligibility.

I urge the President to act immediately, in concert with the Congress. We cannot delay.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UP AMENDMENT No. 1186

The Senator from Ohio (Mr. Metzger), for himself and Mr. Schmitt, Mr. Dixon, Mr. Lugar, Mr. Robert C. Byrd, Mr. Chafee, Mr. Kennedy, Mr. Heinz, Mr. Riegle, Mr. Packwood, Mr. Levin, Mr. Durenberger, Mr. DeConcini, Mr. Specter, Mr. Cannon, Mr. Percy, Mr. Matsunaga, Mr. Sarbanes, Mr. Danforth, Mr. Domenici, Mr. Randolph, Mr. Dole, Mr. Baker, Mr. Pell, Mr. Huddleston, Mr. Sasser, Mr. Moynihan, and Mr. Boschwitz, proposes an unprinted amendment numbered 1186.

Sec. —. It is the Sense of the Senate that Senate conferees on H.R. 4961, the Tax Equity and Fiscal Responsibility Act of 1982, shall include the following provisions in the Conference Report on H.R. 4961:

(1) legislation establishing a Federal Supplemental Benefits program, which shall become effective in calendar year 1982 and which shall be appropriately coordinated with Federal job training and employment programs, under which Federal payments are to be made to provide, or to reimburse States for the costs of, not less than 10 weeks, and not more than 13 weeks of eligibility for unemployment compensation for workers who have exhausted their rights to any extended unemployment compensation under the Federal-State Extended Compensation Act of 1970; and

(2) legislation providing that States that are currently eligible or have been eligible since at least June 1, 1982, for the Federal-State extended benefit program will continue to be eligible to participate in the extended benefit program, notwithstanding any other criteria under Section 203 of the Federal-State Extended Unemployment Compensation Act of 1970 which makes those States ineligible for extended benefit participation.

U.S. CONGRESS,

THE ILLINOIS DELEGATION,

Washington, D.C., August 4, 1982.

HON. RONALD W. REAGAN,
President of the United States, The White House, Washington, D.C.

DEAR MR. PRESIDENT: We are writing to call to your attention an urgent problem in our State with respect to Unemployment Insurance Extended Benefits (EB) and to ask for your understanding and support.

Approximately 50,000 Illinois jobless receiving EB are in immediate danger of losing this critical financial support within the next three weeks when the program "triggers off" in our State. Changes in federal law made last year have precipitated

this unfortunate situation, even though our State unemployment rate stands at an intolerable 11.3%. In particular, we are affected by amendments made by the Omnibus Budget Reconciliation Act of 1981 to the computation of the Insured Unemployment Rate (IUR), which now excludes EB recipients from the count, and to the level of the state trigger, which will rise to 6% next month.

At an emergency meeting of the Illinois Congressional delegation on Monday, August 2, we agreed to work together, with our governor, and with other states similarly affected, to develop a solution to our common problem. As the extent of the hardship caused by this situation in many parts of the country becomes more widely known, we believe a consensus will emerge as to the fastest and most effective remedy. We urge you to give special consideration to this problem and we hope you will remain open to specific suggestions as they are developed.

Sincerely yours,

Charles H. Percy, Allan J. Dixon, Melvin Price, Paul Findley, Frank Annunzio, Tom Railsback, George O'Brien, Sidney R. Yates, Tom Corcoran, John G. Fary, Lynn Martin, Henry Hyde, Gus Savage, Phil Crane, Paul Simon, Robert McClory, Edward Madigan, Cardiss Collins, Marty Russo, Ed Derwinski, Harold Washington, John Porter, Robert Michel, John N. Erlenborn, Daniel B. Crane, Dan Rostenkowski.

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

SUPPLEMENTAL APPROPRIATIONS ACT, 1982

The PRESIDING OFFICER. The Senate will resume consideration of the pending business, which will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6863) making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes.

Mr. HATFIELD. Mr. President, H.R. 6863, the regular supplemental appropriations bill for fiscal year 1982 as reported by the Committee on Appropriations on Tuesday, August 3, provides a total of \$8,982,292,099 in budget authority. Of that total, \$6,107,184,460 is for pay and \$2,875,107,459 is for fiscal year 1982 program supplementals in a number of agencies Government wide. The bill also provides \$5,000,000,000 in borrow-

ing authority for the Commodity Credit Corporation, the same as the House bill. This amount is not scored as budget authority by the score-keeping conventions of the Senate.

The total recommended by the committee is \$2,073,878,901 below the President's request. Although the committee made reductions in several programs below the levels provided in the House-passed bill, our final product is still over the House bill by \$225,572,175. It should be pointed out, however, that the overage is in large part attributable to the committee's recommendation of \$426,531,000 in foreign assistance, including \$355,000,000 for the President's Caribbean Basin Initiative. The House bill provides a sum total of \$1,031,000 in the foreign operations chapter. I ask that a summary table listing total pay and program supplementals, by chapter, be printed at the conclusion of my remarks.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered. (See exhibit 1).

Mr. HATFIELD. Mr. President, I believe this is a good, sound, signable bill. Even if we have to make some concessions in conference with the House on items where we disagree, I think our final product will demonstrate remarkable restraint and fiscal prudence, and I sincerely thank my colleagues for their cooperation in this regard.

However, I also warn the Senate that any amendments which may be adopted providing more spending for the remainder of fiscal year 1982 and beyond will certainly jeopardize the prospects for a successful conference with the House and Presidential approval. My predisposition will be to oppose any add-on amendments unless they provide for some truly urgent, extraordinary, unforeseen matter. I think we have pretty well taken care of such items in the committee, but something may have been overlooked.

Mr. President, I believe the chairman of the Defense Subcommittee, Mr. STEVENS, is to be specially congratulated on his efforts to hold down spending in the fiscal year 1982 supplemental bill, despite great pressure to the contrary. Senator STEVENS was careful to admonish the committee in its markup session that supplementals should only be used to meet unforeseen requirements, and most certainly not be used to recapture funds denied to an agency by congressional action on a regular appropriations bill for a particular fiscal year, or to initiate new programs that should more properly be addressed in a regular appropriations bill for the next fiscal year. Let me quote from page 46 of the committee report to emphasize this point:

Generally, the committee has recommended full funding, by new appropriation or transfer, of the "must pay" items submitted

by the Department. These included such uncontrollable cost increases as unfunded pay entitlements, inflation adjustments, and unanticipated shortfalls in funding.

With few exceptions, however, the committee has rejected proposals to initiate or expand programs in the absence of urgent requirements or other unusual circumstances that are the basic criteria for supplemental appropriations. Many of the supplemental proposals can and should be considered in the normal appropriations process, many of them in the fiscal year 1983 defense appropriations bill.

Using these criteria, the committee has recommended a reduction of \$2,132,724,000 in the President's request for defense.

Of course, I am aware that this is of some concern to the administration, or at least certain agencies within the administration. There have been rumbles from some quarters reminiscent of last year's upheaval over the continuing resolution. Some would measure these bills on a defense versus nondefense basis, and seize on any reduction in the defense request as a cut made simply to add money to a nondefense program. I categorically reject that analysis. True enough, this bill recommends reductions in the President's request for defense, and some increases over the President's request for nondefense programs. But the Committee did not rob Peter to pay Paul. Separate, independent judgments were made as to the funding requirements of various programs, and whether those requirements warranted provision of funds in this bill. On that basis the committee has recommended reductions in the President's request for defense. I am confident we would have made those recommendations irrespective of the funding requirements of nondefense programs.

In making these comments I am echoing the sentiments of the ranking minority members of the House Committee on Appropriations, Mr. CONTE, in his remarks to the other body during its consideration of this measure. I congratulate him on those remarks, and support him completely. And, like him, I believe this is a good bill, and I will urge the President to sign it should he need any urging. If the President vetoes this bill, I will vote to override that veto and urge my colleagues to do likewise.

I also draw the attention of my colleagues to the remarks made by the ranking minority member of our Committee, Senator PROXMIRE, when this bill was laid down last Thursday. Of particular interest is the Senator's pertinent observation that 82 percent of the budget authority provided in this bill will outlay between now and September 30. Not that 82 percent will be obligated, but that 82 percent will actually be spent in the next 6 weeks. That demonstrates the necessity of this legislation.

Finally, Mr. President, I again express my appreciation to all the members of the committee for their usual display of unfailing courtesy and coop-

eration during our markup. At the request of the majority leader, it was advanced from Wednesday morning to Tuesday afternoon on very short

notice, and yet we had excellent attendance without complaint about disruption of schedules.

EXHIBIT 1

SUMMARY OF FISCAL YEAR 1982 SUPPLEMENTAL—H.R. 6863

	Supplemental request	House	Senate	Senate bill compared with estimates	Senate bill compared with House bill
Agriculture:					
Program					
Pay	36,320,000	38,720,000	38,720,000	+ 2,400,000	
Total, Agriculture	36,320,000	38,720,000	38,720,000	+ 2,400,000	
Defense:					
Program	2,422,350,000	367,560,000	492,754,000	- 1,929,596,000	+ 125,194,000
Pay	5,379,274,000	5,229,746,000	5,176,146,000	- 203,128,000	- 53,600,000
Total, Defense	7,801,624,000	5,597,306,000	5,668,900,000	- 2,132,724,000	+ 71,594,000
District of Columbia:					
Program					
Pay	(60,500,400)	(60,500,400)	(60,500,400)		
Total, District of Columbia					
Energy and Water Development:					
Program	97,400,000	92,700,000	56,200,000	- 41,200,000	- 36,500,000
Pay	3,344,000	35,000,000	35,000,000	+ 31,656,000	
Total, Energy and Water Development	100,744,000	127,700,000	91,200,000	- 9,544,000	- 36,500,000
Foreign Operations:					
Program					
Pay	516,531,000	1,031,000	426,531,000	- 90,000,000	+ 425,500,000
Total, Foreign Operations	516,531,000	1,031,000	426,531,000	- 90,000,000	+ 425,500,000
Housing and Urban Development:					
Program	3,775,000		304,000	- 3,471,000	+ 304,000
Pay	160,155,000	258,138,000	257,060,000	+ 96,905,000	- 1,078,000
Total, Housing and Urban Development	163,930,000	258,138,000	257,364,000	+ 93,434,000	- 774,000
Interior:					
Program	178,150,000	217,382,000	199,553,500	+ 21,403,500	- 17,828,500
Pay	60,980,000	77,563,000	72,401,000	+ 11,421,000	- 5,162,000
Total, Interior	239,130,000	294,945,000	271,954,500	+ 32,824,500	- 22,990,500
Labor, HHS, and Education:					
Program	561,046,000	800,154,000	704,648,000	+ 143,602,000	- 95,506,000
Pay	56,864,000	56,864,000	56,864,000		
Total, Labor, HHS, and Education	617,910,000	857,018,000	761,512,000	+ 143,602,000	- 95,506,000
Legislative:					
Program	35,629,000	7,359,325	2,489,000	- 33,140,000	- 4,870,325
Pay	40,243,000	24,092,000	24,536,000	- 15,707,000	+ 444,000
Total, Legislative	75,872,000	31,451,325	27,025,000	- 48,847,000	- 4,426,325
Military Construction:					
Program	198,700,000	45,000,000	45,000,000	- 153,700,000	
Pay	15,743,000	9,800,000	9,800,000	- 5,943,000	
Total, Military Construction	214,443,000	54,800,000	54,800,000	- 159,643,000	
State-Justice:					
Program	131,384,000	107,538,000	151,086,000	+ 19,702,000	+ 43,548,000
Pay	133,619,000	139,678,000	133,733,000	+ 114,000	- 5,945,000
Total, State-Justice	265,003,000	247,216,000	284,819,000	+ 19,816,000	+ 37,603,000
Transportation:					
Program	176,645,000	383,645,000	210,720,000	+ 34,075,000	- 172,925,000
Pay	167,821,000	167,475,000	152,775,000	- 15,046,000	- 14,700,000
Total, Transportation	344,466,000	551,120,000	363,495,000	+ 19,029,000	- 187,625,000
Treasury-Postal:					
Program	529,688,000	547,124,959	585,821,959	+ 56,133,959	+ 38,697,000
Pay	150,510,000	150,149,640	150,149,640	- 360,360	
Total, Treasury-Postal	680,198,000	697,274,599	735,971,599	+ 55,773,599	+ 38,697,000

Program	4,851,298,000	2,569,494,284	2,875,107,459	- 1,976,190,541	+ 305,613,175
Pay	6,204,873,000	6,187,225,640	6,107,184,640	- 97,688,360	- 80,041,000
Grand total	11,056,171,000	8,756,719,924	8,982,292,099	- 2,073,878,901	+ 225,572,175

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I am going to make a series of unanimous-consent requests.

COMMITTEE AMENDMENTS

Mr. President, I ask unanimous consent to modify the committee amendments by eliminating the amendment to strike the matter on page 64, lines 3 through 10. This has to do with payments for the widows of two Members of the House of Representatives and has been agreed to on the minority side.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HATFIELD, Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc for the purposes of further amendment.

Mr. EAGLETON. I object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. HATFIELD. We may be able to reach a compromise on this request a little later on this afternoon to adopt the committee amendments with certain exceptions en bloc. So I just want to put the Senate on notice that we are going to attempt to achieve that a little bit later.

Mr. President, the bill I believe now is open to amendment, is that correct?

The PRESIDING OFFICER. The question will be on agreeing to the first committee amendment.

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask unanimous consent that we temporarily set aside the committee amendments so that we may take up a non-controversial amendment to be offered by the Senator from Washington.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I yield to the Senator from Washington to offer an amendment.

UP AMENDMENT NO. 1192

(Purpose: To ensure that funds appropriated for flood control measures on the Toutle and Cowlitz Rivers in the State of Washington are obligated or expended)

Mr. GORTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Washington (Mr. GORTON), for himself and Mr. JACKSON, proposes an unprinted amendment numbered 1192.

Mr. GORTON. Mr. President, I ask unanimous consent that further read-

ing of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of Title III, on page 108, after line 19, insert the following:

"FLOOD CONTROL

"SEC. 304. Funds appropriated by Ch. VII of the Urgent Supplemental Appropriations Act of 1982, Public Law 97-216, in the amount of \$18,000,000 earmarked for use for flood control and related measures on the Cowlitz and Toutle Rivers shall be obligated or expended as expeditiously as practicable due to a declared state of emergency in the State of Washington as a result of a serious threat of catastrophic flooding."

Mr. GORTON. Mr. President, this amendment that I offer on behalf of myself and Mr. JACKSON does not affect the money balance of this bill at all. It deals with \$18 million which was appropriated by chapter 7 of the Urgent Supplemental Appropriations Act of earlier this year for flood control and related measures on the Cowlitz and Toutle Rivers in the State of Washington, the rivers impacted by the continued eruptions of Mount St. Helens.

It simply directs the Corps of Engineers to expend that money as expeditiously as practicable. The reason for the amendment is the very serious threat to additional flooding on the Toutle and Cowlitz Rivers and due to the fact that the various retaining structures from the eruption are now for all practical purposes filled. Such major flooding would have a very significant and very adverse impact on the valleys of those rivers which include relatively large inhabited towns and cities.

The chairman of the committee, the distinguished Senator from Oregon (Mr. HATFIELD) is, of course, personally as well as professionally familiar with not only the need for this work but for its importance both to my State and indirectly to his own.

I ask that the amendment be adopted.

Mr. HATFIELD. Mr. President, the Senator from Washington is correct regarding this amendment. Having been very close to this matter for a period of years, since the eruption of Mount St. Helens, I am fully aware of this particular problem.

As the Senator knows, unless this dredging proceeds on schedule, and, in fact, if we could beat the schedule it would be all to the better, it is conceivable that heavy winter rains could build up and bring forth a kind of additional silt and spoilage from the damage which has already occurred. It could actually threaten railroad bridges and five interstate highway bridges downriver, as well as build up in the Columbia River itself the residue from the ash and the other debris that resulted from the eruption of Mount St. Helens.

This has, of course, very important regional consequences or significance, far beyond the State of Washington. I am fully sympathetic with his proposal.

This amendment will have no budgetary impact because these are moneys that have already been appropriated. If they are not expended during this fiscal year they will carry over. I understand the purpose of the Senator is to expedite as much as practicable the handling of these moneys through the dredging programs that have been outlined by the corps and which have been approved by the committee's past actions. With that in mind, I would be happy to accept the amendment. It has been cleared on the minority side as well.

So, Mr. President, I will accept the amendment.

Will the Senator ask unanimous consent to merely modify the heading in the amendment to strike the term "flood control"? That is a technical term.

Mr. GORTON. That is correct. I ask unanimous consent that that be done. This Senator thanks the distinguished chairman of the Appropriations Committee for his understanding.

The PRESIDING OFFICER. The Senator has a right to modify his amendment.

The amendment will be so modified. The amendment as modified, is as follows:

At the end of Title III, on page 108, after line 19, insert the following:

"Sec. 304. Funds appropriated by Ch. VII of the Urgent Supplemental Appropriations Act of 1982, Public Law 97-216, in the amount of \$18,000,000 earmarked for use for flood control and related measures on the Cowlitz and Toutle Rivers shall be obligated or expended as expeditiously as practicable due to a declared state of emergency in the State of Washington as a result of a serious threat of catastrophic flooding."

Mr. EAGLETON. Mr. President, there is no objection on this side of the aisle.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1192), as modified, was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the first committee amendment.

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE AMENDMENTS

Mr. HATFIELD. Mr. President, I believe we have now worked out a compromise on the matter relating to the committee amendments to be adopted en bloc and let me read the unanimous-consent request and see if this is in accordance with the understanding with the minority.

Mr. President, I ask unanimous consent that the committee amendments, with the exception of the amendments starting on page 30, line 23, through page 34, line 2, and the amendment beginning on page 104, line 16, through page 107, line 2, be considered and agreed to en bloc and that the bill as amended be considered as original text for the purpose of further amendment, with the understanding that no points of order be considered as having been waived by reason thereof, and that excepted amendments dealing with foreign aid be temporarily set aside until called up by the floor managers, with the concurrence of the chairman and ranking minority member of the Foreign Relations Committee.

The PRESIDING OFFICER. Is there objection?

Mr. EAGLETON. Mr. President, I reserve the right to object.

I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, I rise to speak about the importance of a provision in the supplemental appropriations bill which relates to the committee's direction that uncommitted discretionary bridge funds should be allocated to five bridges, including specifically the Monongahela Bridge and the Charleroi-Monessen Bridge, both of which are located in the Monongahela Valley in Pennsylvania.

Earlier today, I visited these two bridges and am in a position to attest to the decrepit state of those bridges and the urgent need for their renovation or repair or reconditioning, whichever is most appropriate after the design and engineering studies have been completed.

The Charleroi-Monessen Bridge is over 75 years old and services 11,850 travelers a day in a population area numbering some 138,000 people. It has a posted 12-ton weight limit requiring detours in excess of 4 miles and subjecting the people in that area to enormous inconvenience.

The Charleroi-Monessen Bridge is a danger to those who travel on it either in vehicle or on foot. I walked across the span today on a rickety wooden sidewalk by the side of the bridge, taking care as to where I placed one foot after another because of spaces

between the boards and because of the appearance of weaknesses in the boards. As a pedestrian, I was able to observe with greater care than a motorist who could have looked out his window and seen through the rusted grate the river below but probably would not have noticed the deep rust and disrepair of the bridge. This bridge is part of the infrastructure of western Pennsylvania, much of which is in need of repair.

The Monongahela City Bridge bears a plaque which shows its construction to have been in 1909, some 73 years ago. It is designed to accommodate some 7,500 vehicles a day, again serving the entire Monongahela Valley with a population of approximately 138,000 people. It is posted for a limitation of 20 tons and it has resulted in detours of some 15 miles for heavy duty vehicles, including fire trucks, causing delays for those who wish to travel to a number of places, in some cases under emergency conditions.

The efforts to apply discretionary funds to these two bridges have met with a spirit of cooperation from the Honorable Drew Lewis, Secretary of Transportation, who has met with me and my staff and has committed himself to do whatever is possible on this subject. This item is a high priority for my colleague from Pennsylvania, Senator JOHN HEINZ, who has labored long and hard for some remedial action on these two bridges.

I do want to say for my colleagues who will be considering this supplemental appropriations bill that these two bridges are urgently in need of repair and that an allocation of discretionary bridge funds for design and engineering purposes will be an important step forward for badly needed repairs.

I thank the Chair, and I yield the floor.

Mr. BAKER. Mr. President, I have had discussion now with the distinguished manager of the bill, the chairman of the committee, Senator HATFIELD, and the distinguished manager on behalf of the minority. It appears to me that the best interests of all Senators on both sides of the aisle will be served now if we leave this bill and wait until the morning to resume consideration of it.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routing morning business to extend not past 3:30 p.m. in which Senators may speak for not more than 10 minutes each.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

THE STRATEGIC PETROLEUM RESERVE

Mr. MURKOWSKI. Mr. President, on June 20, 1982, the ABC television network broadcast an ABC News Close-Up entitled "The Oil Game." This hour-long broadcast raised some relevant points related to oil pricing and the collection of royalties for oil and gas produced on Federal lands. However, this broadcast also dealt with the strategic petroleum reserve, citing it as a case where "the Government and taxpayers may have been defrauded of millions of dollars and our national security may have been compromised."

Mr. President, since I came to Washington a little more than a year and a half ago, I have taken a special interest in the strategic petroleum reserve, (SPR). In my view, the filling of the SPR is one of the best ways we can act to protect ourselves against the possibility of a crude oil supply disruption, so you can understand why I sat up and took notice when ABC alleged that we may have fallen victim to a multi-million dollar fraud involving SPR.

According to ABC, it seems that an investigator for the State of Louisiana uncovered evidence that the Bayou Choctaw SPR facility just outside of Baton Rouge, La. was being filled with waste oil instead of the unrefined crude that was purchased by the U.S. Government to fill the SPR. The ABC correspondent interviewed an unidentified man wearing a hood—presumably to hide his identity for fear of retaliation. ABC told us the unidentified man had worked on the barge dock during the time the crude oil to fill the Bayou Choctaw SPR facility was being unloaded. The unidentified man said the oil had a "rotten egg smell," and that it did not look or smell like a sweet virgin crude should.

Instead, he said, the oil destined for SPR storage looked more like used motor oil. ABC, based upon the interview with the unidentified dock worker and the allegations made by the Louisiana State investigator, concluded its discussion of the SPR by stating that:

As many as 9,000,000 barrels of slop, tank bottoms and wastes may have been pumped into our Strategic Petroleum Reserve at a cost of more than \$100,000,000. Worse yet, an important component of our national security, a hedge against a future oil embargo, may have been undermined.

Mr. President, this particular segment of this broadcast was extremely misleading and incomplete, and I would like to take this opportunity to help set the record straight.

The allegations of theft of oil bound for the strategic petroleum reserve are being fully investigated by the U.S. Attorney's office for the middle district of Louisiana, the Department of Ener-

gy's Inspector General and other Federal agencies. Initial laboratory tests of the crude oil in storage at the Bayou Choctaw facility indicate that the crude oil meets purchase specifications. Unfortunately, while this information was available before the broadcast, ABC did not mention this on their program.

As I mentioned earlier, ABC produced an unidentified dock worker who said the oil smelled like rotten eggs, not sweet virgin crude. The reason for that is the Bayou Choctaw SPR facility stores "sour" crude—which, by the way, has a high sulfur content making it smell something like rotten eggs. The dock worker was not smelling waste oil—he was smelling "sour" crude which met the particular purchase specifications DOE had set for this oil. Again, ABC did not attempt to mention the fact that this might be the case.

Finally, the unidentified dockworker appearing on the program mentioned that, to his knowledge, he had never seen anybody testing the crude oil as it came off the barges. The fact is, Mr. President, the first thing the Department of Energy did when these allegations were first made was to recheck the quality assurance testing procedures that were underway in the previous administration at the time the oil substitutions were supposed to have been made. That review revealed that the testing procedures were prudent, complete, and rigorous. Just because a dockworker did not see the testing did not mean they did not occur.

Mr. President, ABC News did raise some relevant points about energy policy in this country. However, the program's segment on the strategic petroleum reserve was not representative of the highest standards of responsible journalism that I expect from ABC. Despite some early problems in the SPR program, the Reagan administration is making substantial progress in filling the reserve. While there may be some well-publicized disagreements over how quickly the reserve should be filled, the Reagan administration is, in my view, filling the reserve at a prudent rate. I believe we need to continue to move ahead with this program of great importance to our national security at the most ambitious rate possible given the budget constraints that we are faced with.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SIMPSON). Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT RECEIVED DURING THE RECESS

Under the authority of the order of the Senate of August 5, 1982, the Secretary of the Senate, on August 6, 1982, received a message from the President of the United States submitting sundry nominations; which were referred to the appropriate committees.

(The nominations received on August 6, 1982, are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 12:10 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 2036. An act to provide for a job training program and for other purposes.

The message also announced that the House has passed the following joint resolutions, without amendment:

S.J. Res. 123. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week";

S.J. Res. 183. Joint resolution to authorize and request the President to issue a proclamation designating October 17 through October 23, 1982, as "Lupus Awareness Week"; and

S.J. Res. 190. Joint resolution to authorize and request the President to designate "National Family Week."

The message further announced that the House has passed the following bills and joint resolution, in which it requests the concurrence of the Senate:

H.R. 756. An act to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes;

H.R. 5235. An act to amend the Sherman Act, the Clayton Act, and the Federal Trade Commission Act to exclude from the application of such acts certain conduct involving trade with foreign nations;

H.R. 601. An act to designate certain lands in Alabama as wilderness; and

H.J. Res. 521. Joint resolution to express the support of Congress for the United States and the Soviet Union to engage in substantial, verifiable, equitable, and militarily significant reductions of their nuclear weapons resulting in equal and sharply reduced force levels which would contribute to peace and stability.

The message also announced that the House has agreed to the following concurrent resolution; in which it requests the concurrence of the Senate:

H. Con. Res. 385. A concurrent resolution expressing the sense of the Congress that the Government of the Soviet Union should allow Yuri Balovlenkov to emigrate.

At 1:18 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed

the following bill and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 6812. An act to facilitate the collection of insurance premiums under title II of the National Housing Act and to authorize the expenses of the Bureau of the Mint for fiscal year 1983;

H.J. Res. 510. Joint resolution to designate the week of April 17, 1983, as "National Architecture Week"; and

H.J. Res. 516. Joint resolution to provide for the designation of April 17 to April 23, 1983, as "National Coin Week."

ENROLLED JOINT RESOLUTIONS SIGNED

At 2:10 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 123. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week";

S.J. Res. 183. Joint resolution to authorize and request the President to issue a proclamation designating October 17 through October 23, 1982, as "Lupus Awareness Week"; and

S.J. Res. 190. Joint resolution to authorize and request the President to designate "National Family Week."

At 3:07 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the following bill, without amendment:

S. 2154. An act to direct the Secretary of Agriculture to release a reversionary interest held by the United States in certain lands located in Christian County, Ky., so that such lands may be used for cemetery purposes.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED

The following bills and joint resolutions were read the first and second times by unanimous consent, and referred as indicated:

H.R. 756. An act to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes; to the Committee on Labor and Human Resources.

H.R. 5235. An act to amend the Sherman Act, the Clayton Act, and the Federal Trade Commission Act to exclude from the application of such acts certain conduct involving trade with foreign nations; to the Committee on the Judiciary.

H.R. 601. An act to designate certain lands in Alabama as wilderness; to the Committee on Energy and Natural Resources.

H.R. 6812. An act to facilitate the collection of insurance premiums under title II of the National Housing Act and to authorize the expenses of the Bureau of the Mint for fiscal year 1983; to the Committee on Banking, Housing, and Urban Affairs.

H.J. Res. 510. Joint resolution to designate the week of April 17, 1983, as "National Architecture Week"; to the Committee on the Judiciary.

H.J. Res. 516. Joint resolution to provide for the designation of April 17 to April 23, 1983, as "National Coin Week"; to the Committee on the Judiciary.

H.J. Res. 521. Joint resolution to express the support of Congress for the United States and the Soviet Union to engage in substantial, verifiable, equitable, and militarily significant reductions of their nuclear weapons resulting in equal and sharply reduced force levels which would contribute to peace and stability; to the Committee on Foreign Relations.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred to the Committee on Foreign Relations:

H. Con. Res. 385. Concurrent resolution expressing the sense of the Congress that the Government of the Soviet Union should allow Yuri Balovlenkov to emigrate.

COMMITTEE ON THE JUDICIARY DISCHARGED FROM FURTHER CONSIDERATION OF S. 349

Under the authority of the order of the Senate of June 4, 1981, the Committee on the Judiciary was discharged from the further consideration of the following bill, to which it had been referred on June 22, 1982:

S. 349. A bill to amend title 38, United States Code, to establish certain procedures for the adjudication of claims for benefits under laws administered by the Veterans' Administration; to apply the provisions of section 553 of title 5, United States Code, to rulemaking procedures of the Veterans' Administration; to provide for judicial review of certain final decisions of the Administrator of Veterans' Affairs; to provide for the payment of reasonable fees to attorneys for rendering legal representation to individuals claiming benefits under laws administered by the Veterans' Administration; and for other purposes.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HEINZ:

S. 2820. A bill to amend the Truth-in-Lending Act; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. SPECTER:

S. 2821. A bill to protect the public interest and to clarify the application of anti-trust laws with respect to the location of professional football teams; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DANFORTH (for himself, Mr. COHEN, Mr. BRADLEY, Mr. DURENBERGER, Mr. GORTON, Mr. PRYOR, Mr. ANDREWS, Mr. CHAFEE, Mr. DIXON, Mr. GLENN, Mr. HATFIELD, Mr. HEINZ, Mrs. KASSEBAUM, Mr. LEAHY, Mr. LEVIN, Mr. MOYNIHAN, Mr. PELL, Mr. PROXMIRE, Mr. RANDOLPH, Mr. SARBANES, and Mr. STAFFORD):

S. Res. 444. Resolution expressing the sense of the Senate that President Reagan should submit to the U.S. Senate a clear and comprehensive report on the administration's policy for minimizing the risk of nuclear war; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HEINZ:

S. 2820. A bill to amend the Truth-in-Lending Act; to the Committee on Banking, Housing, and Urban Affairs.

STUDENT LOAN PROVISIONS OF THE TRUTH-IN-LENDING ACT

● Mr. HEINZ. Mr. President, today, I am introducing a bill to exempt higher education loan programs from the requirements of the Truth-in-Lending Act. The purpose of the bill is to remove a superfluous and costly paperwork burden on lenders, which slows the process of providing loans to needy postsecondary students. While the act would simplify the disbursement of loans, disclosure protections for student consumers would remain in effect.

Currently, higher education loan programs, including the guaranteed student loan program (GSL), the auxiliary loans to assist students programs (PLUS), and the national direct student loan program (NDSL), are subject to requirements of the Truth-in-Lending Act (Public Law 90-321 as amended). Revised regulation Z, the implementing regulation for the Truth-in-Lending Act, requires lenders—financial institutions as well as educational institutions that originate GSLP, PLUS and NDSL loans—to perform cumbersome and unnecessary paperwork. The student loan programs contained in the Higher Education Act of 1965, as amended are already subject to statutory provisions and regulations that provide comparable disclosures and explicit controls over the issuance of loan proceeds to student consumers. These make the truth-in-lending provisions in regulation Z duplicative and unnecessary. Loan programs authorized under part B, which include the GSL, and PLUS programs, and part E, which includes the NDSL program, have specific statutes which govern the interest rates—finance charge or annual interest rate; minimum repayments—payment schedule; accelerated payment conditions—prepayment disclosure; late charges—other charges; grace periods, deferments, cancellations—free-ride period; and endorsement provisions—security interests. Additionally, institutions and lenders that make loans under parts B and E are also subject to statutory disclosure requirements outlined in section 433A and section 463A, governing student loan information.

A full complement of regulations governing the student loan programs have also been issued by the Secretary

of Education and are governed by the Administrative Procedures Act, which requires publication changes or modifications that are subject to public comment and congressional review and approval. Internal operating procedures within the Department of Education, also require approval of the wording and formula of promissory notes used by the lender to make an educational loan. Approval is also required on the information contained on other forms and disclosure statements. Schools must also give students a statement of their rights and responsibilities under the student loan programs as required under section 485 of the Higher Education Act. Consequently, all disclosures required under regulation Z are currently being provided to students who are receiving loans under part B or E of the Higher Education Act and are required either through statute or regulations currently employed by the Department of Education.

Therefore, by exempting these student loans from regulation Z, institutions and lenders will be freed from unnecessary and duplicative paperwork. Overall estimates of savings to lenders range as high as \$25 million in administrative costs. Also they will no longer be subjects to possible financial liabilities due to regulation Z. This bill precludes the prospect of the Federal Trade Commission—which is the monitoring agency for regulation Z and truth in lending—being involved in programs administered by the Education Department. However, this exemption will not in any way reduce the protection afforded to students who receive education loans. All the disclosures and provisions required by regulation Z for other forms of credit are covered under the current educational statutes.

Some 23 States have enacted their own truth-in-lending provisions. As is true with respect to the Federal Truth-in-Lending Act, State disclosure laws serve no useful purpose in connection with loans made under title IV of the Higher Education Act of 1965. It is therefore appropriate that the proposed exemption apply as well to State laws. Moreover, the multiplicity of often differing State laws create additional problems for national lenders and secondary markets. The need to set aside State disclosure requirements when the requirements of the Federal Truth-in-Lending Act are suspended has been recognized in the Omnibus Budget Reconciliation Act of 1981. Under section 536 of that act, the Congress set aside the disclosure requirements of both State and Federal law when it established an origination fee on guaranteed student loans.

Since the proposed exemption is remedial in nature, it should be given wide application. With respect to loans

already made, continuing disclosure responsibilities, which also serve no useful purpose, would remain if these loans are not included in the coverage of the exemption. Lenders, guarantors, secondary markets and State and Federal regulatory agencies should no longer have to concern themselves with these disclosure requirements of Federal or State law. Therefore, the proposed exemption should apply to loans made both before and after its enactment.

In short, all parties to student loan transactions will gain from this legislative change. Processing of the loans will be expedited and the reduction in administrative costs will make it more attractive for commercial institution to provide a greater volume of loans to needy students. The entire higher education community, including the U.S. Student Association (USSA) and the Council of Private University Students (COPUS), has endorsed this proposal. The U.S. Department of Education (ED) and the Office of Management and Budget (OMB) included language to exempt higher education loan programs from the truth-in-lending requirements in the administration's omnibus budget proposal for 1981. The administration recognizes that the students are already protected by existing education statutes, and also anticipates notable administrative savings for Federal and State agencies.

The student loan programs in the Higher Education Act, including GSL, PLUS, and NDSL, are all noncompetitive, carefully regulated programs with the same terms required for all lenders.

This bill does nothing to compromise these protections for students. In addition, my distinguished colleague and cosponsor, Senator STAFFORD, intends to amend the Higher Education Act, to guarantee further the continued protection of student borrowers in the future. It is with these safeguards in mind that I urge my Senate colleagues to support this legislation to exempt higher education loan programs from the Truth-in-Lending Act. ●

By Mr. SPECTER:

S. 2821. A bill to protect the public interest and to clarify the application of antitrust laws with respect to the location of professional football teams; to the Committee on the Judiciary.

PROFESSIONAL FOOTBALL STABILIZATION ACT OF 1982

Mr. SPECTER. Mr. President, after studying the issue at length, I am introducing the Professional Football Stabilization Act because I believe it is appropriate for the Senate to consider legislation which would prevent a professional football team from leaving a city where it has established ties unless it cannot survive as a profitable business. This legislation deals only with the issue raised by the plan to

move the Oakland Raiders to Los Angeles, and is more limited than S. 2784, the bill introduced by the distinguished Senator from Arizona, Mr. DECONCINI.

This legislation is premised on the judgment that sports fans in a city have a form of a "proprietary interest" in their team which should preclude the owners from moving the franchise unless it is a failing business. In my judgment, a sports team is "affected with the public interest."

I believe a sports team is different from a regular business entity. If an ordinary business moves away, another such business will take its place if a reasonable profit can be made. That is customarily not so with a sports team.

It is my sense that two generations of sports fans still resent the movement of the Brooklyn Dodgers and the New York Giants baseball franchises. Conversely, people understood the necessity for the relocation of the St. Louis Browns and the Philadelphia and later Kansas City Athletics.

It should be noted that this legislation is not a limitation on private property rights. It is instead an exception to the antitrust laws which restrict private action. From a free enterprise perspective, the 28 owners of NFL football teams should be free to contract away their rights to move without the consent of 21 of the owners. The antitrust laws have been interpreted to invalidate that expression of freedom of contract. This bill would create an exception to that limitation and give effect to their bargain so long as their joint agreement gave proper weight to loyal fan interest and restricted opportunities to relocate to situations in which such support was lacking and the team was, consequently, in true financial peril.

Professional football teams should not be moved at an owner's whim or simply to increase profits from enormous to astronomical. Nor should justifiable relocations be prevented by personal vendetta or caprice. This bill stakes a course of providing standards by which fans and local investments can be protected and by which teams can join by agreement to govern their respective home game locations.

I want to stress that the bill I am introducing today does not grant blanket antitrust immunity to professional sports leagues, nor is it intended to affect adversely the players' labor concerns. Instead, this bill provides, in recognition of the legitimate interests our cities and fans share in their "hometown" teams, that professional football teams may relocate only where such relocation is necessary for their continued commercial viability.

While I am concerned about legislation which would apply to a pending case, this issue is fundamentally different, for example, from applying

contribution to pending antitrust cases. On the contribution controversy, sophisticated litigants chose not to settle but instead to take their chances by litigating through to verdict. Unlike the antitrust damage actions, the Raiders case was not realistically settleable.

While the bill in its present form would be applicable to the Raiders controversy, it may be that hearings will be persuasive to make such legislation applicable only to future cases.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2821

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Professional Football Stabilization Act of 1982".

SEC. 2. (a) The Congress finds that—

(1) professional football teams achieve a strong local identity with the people of the cities and regions in which they are located, providing a source of pride to their supporters;

(2) professional football teams provide a valuable form of entertainment in the cities and regions in which they are located;

(3) substantial tax revenues and employment opportunities derive from the operation of professional football teams to the cities and regions in which they are located;

(4) the public, through a municipal stadium authority (which may be a city or county agency, or a municipal corporation) generally authorizes capital construction bonds to build a stadium, while the team's lease or use agreement generally sets rent to cover only operating costs of the stadium, without reimbursing the public for construction costs; and

(5) professional football teams are invested with a strong public interest.

(b) The Congress, therefore, finds and declares that professional football teams are affected with a strong public interest and that it is the national policy to discourage the relocation of professional football teams receiving local support.

SEC. 3. The Act of September 30, 1961 (75 Stat. 732; 15 U.S.C. 1291-1295) is amended—

(1) by redesignating section 4 as section 7 and striking out all after section 7, as redesignated;

(2) by inserting after section 3 the following:

"SEC. 4. No professional football team which has played its home games in a metropolitan area for six continuous years or more shall relocate unless—

"(1) one or more of the other parties to the stadium lease agreement fails to comply with a provision of material significance to the agreement, and such noncompliance cannot be remedied within a reasonable period of time;

"(2) the stadium in which the team wishing to move presently plays is inadequate for the purposes of properly and competitively operating the team, and the stadium authority demonstrates no intent to remedy such inadequacies; or

"(3) the team has incurred an annual net loss for at least three consecutive years immediately preceding the relocation, or has

incurred losses in a shorter period that endanger the continued financial viability of the team.

"Sec. 5. The antitrust laws, as defined in section 1 of the Clayton Act, and the Federal Trade Commission Act, shall not apply to any joint agreement by or among persons engaging in or conducting the organized professional sport of football which restricts the movement of any member team in accordance with the criteria provided in section 4.

"Sec. 6. Any government authority in a metropolitan area from which a professional football team relocates may bring a civil action for damages and equitable relief if such relocation does not comply with the criteria provided in section 4."

(3) by inserting after "section 1" in section 7, as redesignated, "and section 5";

(4) by inserting after section 7, as redesignated, the following:

"Sec. 8. For purposes of this Act:

"(1) The term 'persons' means any individual partnership, corporation or unincorporated association or combination or association thereof.

"(2) The term 'relocate' means to change the location in which a team plays its home games from one metropolitan area to another.

"(3) The term 'government authority' means any unit of general local government or other government agency or authority which exercises regulatory authority with respect to a professional sports team.

"(4) The term 'metropolitan area' means a standard metropolitan statistical area."

ADDITIONAL COSPONSORS

S. 2061

At the request of Mr. MOYNIHAN, the name of the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of S. 2061, a bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public and Indian lands, and for other purposes.

S. 2267

At the request of Mr. HEINZ, the name of the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of S. 2267, a bill to amend the Internal Revenue Code of 1954 to allow the Secretary of the Treasury to waive the interest penalty for failure to pay estimated income tax, for elderly and retired persons, in certain situations.

S. 2270

At the request of Mr. LUGAR, the name of the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 2270, a bill to amend section II of the Social Security Act to provide generally that benefits thereunder may be paid to aliens only after they have been lawfully admitted to the United States for permanent residence, and to impose further restriction on the right of any alien in a foreign country to receive such benefits.

S. 2702

At the request of Mr. ANDREWS, the name of the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of S. 2702, a bill to amend section 8(a) of the Small Business Act

to treat businesses owned by Indian tribes as socially and economically disadvantaged small business concerns.

S. 2720

At the request of Mr. QUAYLE, the names of the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Hawaii (Mr. INOUE) were added as cosponsors of S. 2720, a bill to provide transitional funding for the de-regulation of health planning.

S. 2803

At the request of Mr. SASSER, the name of the Senator from Mississippi (Mr. STENNIS) was added as a cosponsor of S. 2803, a bill to create a Federal, State, and local drug forfeiture fund.

S. 2811

At the request of Mr. HAYAKAWA, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 2811, a bill to extend the restriction of water resource project construction for 1 year on the Tuolumne River, Calif.

SENATE RESOLUTION 444—RESOLUTION RELATING TO THE RISK OF NUCLEAR WAR

Mr. DANFORTH (for himself, Mr. COHEN, Mr. BRADLEY, Mr. DURENBERGER, Mr. GORTON, Mr. PRYOR, Mr. ANDREWS, Mr. CHAFEE, Mr. DIXON, Mr. GLENN, Mr. HATFIELD, Mr. HEINZ, Mrs. KASSEBAUM, Mr. LEAHY, Mr. LEVIN, Mr. MOYNIHAN, Mr. PELL, Mr. PROXMIRE, Mr. RANDOLPH, Mr. SARBANES, and Mr. STAFFORD) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. Res. 444

Whereas, the growing threat of nuclear annihilation poses the most important moral issue in human history;

Whereas, nearly half of President Reagan's term in office has expired, and considerable time has elapsed since the President proposed the prohibition of U.S. and Soviet theater nuclear forces in Europe and the substantial reduction of U.S. and Soviet strategic force levels;

Whereas, ten years have elapsed since the SALT I agreements, including the ABM Treaty, went into effect, eight years since the signing of the Threshold Test Ban Treaty, six years since the signing of the Peaceful Nuclear Explosion Treaty, and three years since the signing of SALT II, the last three having never been ratified;

Whereas, the change in leadership at the Department of State presents a highly appropriate occasion for the Administration to clarify its nuclear weapons policies in light of recent actions which have caused anxiety at home and abroad, including:

(1) The relaxation of export restrictions affecting nuclear fuel cycles and reprocessing technology;

(2) The characterization of SALT I and II as "fundamentally flawed" and the suggested development of ballistic missile defenses in violation of the ABM Treaty;

(3) The proposal to renegotiate the Threshold Test Ban Treaty and the Peaceful Nuclear Explosion Treaty;

(4) The indefinite suspension of negotiations on a comprehensive test ban treaty;

(5) The formulation of a defense guidance paper which has raised questions whether United States nuclear policy contemplates limited or protracted nuclear war and whether any circumstances justify the first use of nuclear weapons; and

(6) The reported intention of the Department of Defense to seek "preclearance" for the use of tactical nuclear weapons; and

Whereas the promulgation of a coherent nuclear weapons policy should be the highest responsibility of government: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President of the United States should submit to Congress, at the earliest possible date, but no later than December 1, 1982, a comprehensive review of our nuclear weapons policies including where we stand, where we intend to go, and how we intend to treat the agreements that have been signed but not ratified.

Sec. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

Mr. DANFORTH. Mr. President, during the last 6 months the American people and people throughout the world have developed an active concern that their respective governments are not doing enough to reduce the risk of nuclear war. It is not difficult to understand why this concern has created a wave of political activism. Governments now have the power to destroy—in a matter of a few hours—the entire creation. For modern civilization, the possibility that a nuclear holocaust could occur has become the most important moral issue in human history.

There is a recognition that the growth of nuclear weapons, in both numbers and destructive capacity, is unabated. And there is a recognition that the spread of nuclear know-how and capability also is unabated. So many nuclear weapons have been accumulated that it would take more than 9 years to explode them at the rate of one an hour. And by the end of this decade several dozen additional nations may accumulate even more nuclear weapons. This growth is exactly like a cancer. If allowed to spread unabated it will produce death.

In response to this progressively more perilous world situation, people no longer are willing to accept mere pronouncements and promises about reducing the risk of nuclear war. A higher standard of performance is demanded of Government—specific accomplishments to reduce both the numbers and the spread of nuclear weapons. It is an altogether reasonable demand.

The inexcusable fact is that it has been more than 10 years since the United States and the Soviet Union have been able to ratify a nuclear arms control agreement. The Government of the United States must get off the dime. We must assume the initiative. We must pick up the gauntlet laid down by world opinion and by the insistent demands of our own people.

We must produce some specific and tangible progress in the struggle to reduce the risk of nuclear war. Our own people have grown distrustful that their leadership is truly and urgently committed to this end. We must allay those fears. As new leadership is assuming responsibility at the Department of State, there could not be a more appropriate time for the Senate at ask the President to clarify the administration's nuclear weapons policy.

It is not my intention to suggest that President Reagan has been completely inattentive or silent on the nuclear issue. In two significant policy statements—the zero option proposal for intermediate range nuclear forces issued on November 18, 1981, and the Strategic Arms Reduction Talks (START) proposal unveiled at Eureka College on May 9, 1982—the President has offered to go well beyond a freeze on nuclear arsenals. He has advocated the prohibition of United States and Soviet intermediate-range nuclear forces in Europe and significant reductions in United States and Soviet strategic force levels. My deep regret is that half of the President's term in office has elapsed and there is virtually no useful negotiation behind us on those two proposals. I support the President's efforts to create a zero option in Europe and a breakthrough in START. But—in my judgement—the pace and intensity of these efforts is disappointing. Indeed, there are rumors that this administration does not anticipate completion of negotiations on either proposal before 1985. It is my hope that the President can provide a clarification of his timetable and that his expectations are more ambitious than rumor would have it.

The administration has taken other actions which have created grave uncertainty about U.S. weapons policy.

U.S. nonproliferation efforts have changed with the relaxation of export restrictions affecting nuclear fuel cycle and reprocessing technology. Europe, Japan, Australia, and perhaps other countries will enjoy special exemptions from inspection standards which would otherwise be required under the 1978 Nuclear Non-Proliferation Act. They will also be permitted to utilize—under long-term contracts with the United States—plutonium manufactured from reprocessed fuel. Uranium enrichment technology may also be exported by the United States to non-nuclear-weapons states. Further, the United States appears ready to loosen its insistence on full international inspection safeguards for such countries as India, Brazil, Argentina, and South Africa. And it appears ready to relax pressure on nuclear exporting countries such as France, Germany, and Italy to require their customers to comply with the international inspection standards.

If the administration believes that these policies enhance the potential for nonproliferation then I believe that it should make its case more forthrightly than it has to date. I am not unaware of the arguments which are made in favor of a more active U.S. involvement in nuclear exports. It is argued that our increased leverage would permit us to implement more effective safeguards as the commercial nuclear power industry develops worldwide. It is argued that the United States is the only nation that has demonstrated a strong intent for the improvement of such safeguards. It is argued—by none other than the General Accounting Office—that the United States should keep up its activities in reprocessing and fuel enrichment so that it can develop the currently nonexistent technology for precise fuel cycle inventory control of such dangerous materials as plutonium. The administration should share its views on these important subjects in some detail. Its credibility as a leader in the struggle for nonproliferation is at stake. We must not be seen as giving up. If our intention is to develop better international safeguards by remaining a major player then our strategy for accomplishing this goal should be spelled out.

Mr. President, I am especially puzzled as to why a nation of laws like the United States should forgo opportunities to bring the principles of international law to bear on the arms control process. The United States has signed three major arms control agreements which remain unratified. Britain, the United States, and the U.S.S.R. signed the Threshold Test Ban Treaty (TTBT) in 1974. This agreement limits the size of underground nuclear bomb tests to 150 kilotons. In 1976, the same countries signed the Peaceful Nuclear Explosion Treaty (PNET), restricting also the size of bombs used for commercial purposes to 150 kilotons. In 1979, SALT II was signed. The President has not asked for ratification of any of these treaties, and he has decided to suspend negotiations which had been underway for some time toward a Comprehensive Test Ban Treaty (CTBT). I do not understand how there can ever be any hope for the arms control process when we throw years of useful negotiations into the wastebasket. While it is true that the United States has abided by the terms of the TTBT, the PNET, and SALT II to date, I can see no long-term advantage to the United States and the U.S.S.R. winking at one another over what ought to be a matter of law governing the behavior of our nations. Ratification of the two test ban treaties is long overdue. Negotiated under Nixon and Ford, observed by Carter, and establishing reasonable verification techniques including the possibility of on-site inspections, each treaty

requires equitable and mutual concessions. I also am convinced that a verifiable comprehensive test ban treaty could and should be negotiated and that such a treaty would also have a major positive impact on the arms control process. It is inconsistent to support START while opposing a ban on testing. Surely it is easier to verify a test ban treaty where a violation would produce a tell-tale seismic evidence than to verify a force reduction where the mere presence of MIRVed warheads on a missile in a silo could constitute a violation. Moreover, the CTBT would make a substantial contribution toward limiting the destabilization which comes from the deployment of new weapons systems.

Our continued compliance with SALT I and SALT II has been called into question. Indeed, both agreements have been characterized as fundamentally flawed. In addition, U.S. proposals for development of a ballistic missile defense capability, in violation of the ABM Treaty, are increasingly visible. A review of this entire area is needed.

Finally, Mr. President, the administration has formulated a defense guidance paper which has raised questions whether U.S. nuclear policy contemplates limited or protracted nuclear war and whether any circumstances justify the first use of nuclear weapons. It is my opinion that the outbreak of nuclear war cannot be limited because it would escalate in short order to an all-out exchange. To presume that disciplined communications and decisionmaking can prevail for any length of time in a nuclear holocaust is incredible, but I think the administration owes the American people an explanation.

The question of first use is more complex because it involves the credibility of NATO's nuclear deterrent against the possibility of Soviet aggression in Europe. It is too important a question to be left languishing in ambiguity. We should confront the issue head on so that both allies and potential adversaries know exactly what our policy is.

A most chilling development recently emerged from reported testimony of Defense Department personnel who have suggested that the use of tactical nuclear weapons ought to proceed under some kind of preclearance agreement. Such a suggestion makes my blood run cold. Surely we are entitled to have this misbegotten suggestion rejected out of hand or explained in some detail. My fervent hope is that the administration will repudiate it—period.

Mr. President, the United States has a solemn duty to exercise leadership in the struggle to reduce the risk of nuclear war. But we cannot do so in a sea of ambiguity about our policies and

our intentions. Nor can we inspire confidence if the pace of our activity is lackluster. Today I have introduced a resolution expressing the sense of the Senate that the President should submit to the Senate, at the earliest possible date, a comprehensive report on U.S. nuclear weapons policy. The American people and the world community deserve to know where we stand, where we intend to go, and how we intend to treat the agreements that have been signed but not ratified. The vague promises and pronouncements of the past must give way to a specific agenda aimed at tangible results implemented with a strong sense of urgency.

AMENDMENTS SUBMITTED FOR PRINTING

TEMPORARY INCREASE IN PUBLIC DEBT LIMIT

AMENDMENT NO. 2016

(Ordered to be printed and to lie on the table.)

Mr. QUAYLE (for himself, Mr. TSONGAS, Mr. ROTH, Mr. PROXMIER, Mr. CHAFFEE, Mr. SPECTER, Mr. GORTON, and Mr. MATTINGLY) submitted an amendment intended to be proposed by them to the joint resolution—House Joint Resolution 520—to provide for a temporary increase in the public debt limit.

PRICE SUPPORT PROGRAM FOR SUGAR

● Mr. QUAYLE. Mr. President, today Mr. TSONGAS and I are submitting and amendment to reduce the sugar price support program. Senators ROTH, PROXMIER, CHAFFEE, SPECTER, GORTON, and MATTINGLY have joined us as original cosponsors of this amendment. We intend to offer this proposal as an amendment to House Joint Resolution 520, the fiscal year 1983 debt ceiling bill.

Mr. President, there are a number of compelling reasons for reducing the sugar price support level as soon as possible. Our amendment would reduce the price support from 17 to 14 cents per pound as of October 1, 1982. October 1, 1982, is the date that the new 17-cent loan program goes into effect. Additionally, the USDA must announce new sugar import quotas by September 15, 1982. Since our amendment greatly facilitates the removal of these counterproductive and protectionist quotas, I believe that any change in the sugar program should be in place before this date.

More importantly, however, I believe the costs of this program on American consumers and the American food industry have gotten completely out of line and must be reduced immediately. The Congress has already recognized the urgency of reforming the tobacco and milk programs and has acted to moderate their spiraling costs. The

sugar program too has proven much more costly and inflationary than even its severest critics had anticipated. Just as with tobacco and milk, I believe the Congress should act responsibly to correct its mistakes.

Because of the way the sugar program has been administered, the price of domestic sugar now exceeds that of sugar purchased in the world market by 14.5 cents per pound. This means that American consumers, American bakers, American soft drink manufacturers, and American food processors are forced to pay more than \$3 billion in additional sugar costs per year. Since quotas were imposed on imported sugar in May, the price of domestic sugar has risen by 5 cents per pound.

Since the new sugar program was enacted last fall, the price of sugar in the United States has been driven up by over 50 percent. The inflationary impact of this program cannot be underestimated. At a time when the general rate of inflation has declined, the price of one of the most widely used foodstuffs has risen by one-half. The retail price of sugar is now higher in the United States than in any other countries except Japan and Denmark. How can we be serious about controlling inflation when we legislate price increases of this magnitude?

Some have argued that there are compelling economic and national security considerations which justify this inflationary price support program. Such arguments place a great strain on the credibility of those desperate enough to advance them. Mr. President, I would argue without hesitation that there is no justifiable economic rationale for protecting sugar growers in this country.

The United States has absolutely no comparative advantage in the production of sugar. Cane sugar growers in Colombia, Peru, Kenya, South Africa, Indonesia, Australia, and Honduras achieve much higher yields than those in the mainland United States. Hawaiian growers have higher yields than all these countries except Peru and Colombia, but must extend their harvest cycle to 2 years to achieve this advantage. Beet growers on three continents achieve as much as a 50-percent yield advantage over U.S. beet growers. In terms of cost, the United States is rated a high-cost producer, as growers in the Caribbean, South America, Australia, and Southeast Asia enjoy cost advantages of up to 40 percent over U.S. sugar.

I see no real reason why we should spend billions of dollars to protect an industry which has no real comparative advantage in world markets. Sugar is obviously not related to our national defense. Furthermore, our protectionist policy on sugar only serves to increase trade tensions with our major trading partners. A brief chronology of events following the im-

position of import quotas bears out the prospect that such protectionism will encourage other nations to retaliate against U.S. exports. I do not need to remind my colleagues that U.S. agricultural exports will be the first to suffer from a new wave of protectionism. Following are a few of the results of the imposition of sugar import quotas:

April 26, 1982: Trade Representative Bill Brock warns that sugar import quotas will "make it more difficult" to argue against trade barriers in Japan and the EEC.

May 5, 1982: President imposes restrictive import quotas.

May 14, 1982: EEC officials say sugar quotas will "help dispel the myth that our agriculture is more subsidized than in the U.S."

May 18, 1982: Japanese Foreign Minister Sakaruchi tells U.S. that Japan has virtually ruled out any immediate removal of import quotas on agricultural products, and says Japan would be quick to "point out Washington's recent imposition of sugar import quotas to counter any pressure by the U.S."

May 20, 1982: OAS Secretary General Orfila writes to President Reagan, projects a \$90 million revenue loss for OAS nations due to sugar quotas, and says quotas could "conceivably undermine some of the ambitious and innovative proposals you have so courageously outlined for the well-being of all citizens of the Americas."

May 21, 1982: Exporting members of the International Sugar Agreement issue proclamation stating that U.S. import quotas and "the Sugar Title Provisions of the U.S. Agriculture and Food Act of 1981 are inconsistent with objectives of the International Sugar Agreement . . ."

June 30, 1982: EEC raises possibility of import restrictions on corn gluten feed and cites indirect U.S. subsidy to gluten feed through U.S. sugar program's protection of corn wet milling industry.

July 14, 1982: EEC takes first step toward lodging a GATT case against the U.S. because of imposition of U.S. sugar import quotas. EEC complaint is that import quotas disrupt the world sugar market and contribute to depressed prices by restricting access to the U.S. market.

Although it is difficult to project the economic consequences if further restrictions on U.S. Exports are imposed, it is also difficult to escape the conclusion that U.S. agricultural exports are likely to be hit hardest. Last year we had a trade surplus in agricultural commodities of \$6.9 billion with Japan and almost \$6 billion with Europe. We sold over 2.5 billion dollars' worth of wheat and corn alone to the 10 leading sugar exporting nations of Latin America and Southeast Asia. Why should we allow sugar import quotas to imperil these valuable and well-established markets?

Mr. President, the time has come to reform this program before even more damage is done to both American consumers and American exporters. I believe my amendment is a step toward reducing the heavy burden placed on consumers and exporters by the generous sugar price supports. I fully intend

to offer this amendment as soon as the debt ceiling bill reaches the Senate floor, and urge my colleagues to support this modest but much needed reform.

Mr. President, I ask unanimous consent that my amendment be printed in full in the *RECORD*. I further ask unanimous consent that an explanation of this amendment and several recent newspaper articles discussing the sugar program also be printed in the *RECORD* in full.

There being no objection, the material was ordered to be printed in the *RECORD*, as follows:

AMENDMENT No. 2016

At the appropriate place in the bill insert the following new section:

Sec. . Paragraph (2) of section 201(h) of the Agriculture Act of 1949 (7 U.S.C. 1446(h)(2)) is amended to read as follows:

"(2) The Secretary shall support the 1982 crop of domestically grown sugarcane through nonrecourse loans at 14 cents per pound for raw sugarcane.

"(3)(A) Effective October 1, 1983, the Secretary shall support the price of domestically grown sugarcane through nonrecourse loans at such level as the Secretary determines appropriate, but not less than 14 cents per pound for raw cane sugar.

"(B) Notwithstanding subparagraph (A), the Secretary shall support the price of domestically grown sugarcane at a level not less than 17.5 cents per pound for raw cane sugar for the 1983 crop, at not less than 17.75 cents per pound for the 1984 crop, and at not less than 18 cents per pound for the 1985 crop, if the Secretary finds that by the exercise of his full authority to impose duties and import fees such support level for such crop would not likely result in the acquisition of significant quantities of sugar by the Commodity Credit Corporation.

"(4) Effective October 1, 1982, the Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines to be fair and reasonable in relation to the level of loans for sugarcane.

"(5) The Secretary shall announce the loan rate to be applicable during any fiscal year as far in advance of the beginning of that fiscal year as practicable consistent with the purposes of this subsection. Loans during any such fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of that fiscal year."

EXPLANATION OF SUGAR AMENDMENT

This Amendment is designed as a temporary, limited adjustment in the sugar program during the current period of abnormally low world sugar prices. It would establish a loan rate of 14 cents per pound for the 1982 crop year only. This will enable the Secretary to administer the program without a significant risk of budget outlays, through imposition of import fees and duties, but without having to resort to import quotas. For the 1983 crop year and succeeding years, the Amendment gives the Secretary limited discretion to establish a temporary loan rate below the levels specified in the Agriculture and Food Act of 1981—but no lower than 14 cents per pound. If the Secretary exercises his discretion to establish such a reduced loan rate, he is required by the Amendment to reinstate the higher loan rates specified in the 1981 Act

(a minimum of 17.5 cents per pound for the 1983 crop, 17.75 cents per pound for the 1984 crop, and 18 cents per pound for the 1985 crop) as soon as world prices return to a more normal level. Thus, the Amendment requires the Secretary to reestablish the higher loan rate whenever he can operate the loan program at that higher rate—supported by import fees and duties, but not quotas—without a significant risk that the higher support level will result in the acquisition of significant amounts of sugar by the Commodity Credit Corporation.

[From the New York Times, June 22, 1982]

THE SOUR POLITICS OF SUGAR

Congress has long been sweet on the sugar lobby, protecting domestic growers at the expense of consumers and foreign producers. In recent months, however, this incredibly wasteful program has become an embarrassment to all but the most diehard. Senators Quayle and Tsongas hope to take advantage of this change in mood, by cutting back on price supports and reducing the damage to United States trade partners in the Caribbean.

The best places to grow sugar are in the tropics, where labor is cheap and the weather amenable to cane. But such economic realities have never carried much weight with America's few thousand sugar growers or their friends in Congress. In normal times, a combination of fees and tariffs hold down imports and maintain the domestic price far above the world price.

Yet these are not normal times. Good crops have driven the world price so low that the maximum fee and tariff permitted by law is insufficient to keep the American price above the minimum set by Congress. And rather than add to the budget deficit by supporting the price with direct Government purchases, President Reagan decided in May to set quotas on imports.

The quotas promise to make a bad program terrible. They allow the Government to keep the domestic sugar price at triple the world price, adding some \$4 billion to America's sweetener bill. Equally important, they threaten the economy of the politically troubled Caribbean.

Panama and Guatemala—as well as Brazil—stand to lose hundreds of millions of dollars in sugar export earnings when world markets for their other exports are weak. And the Dominican Republic's sugar sales to the United States will fall by a third.

That figure actually understates the potential damage to an economy almost totally dependent on sugar for export earnings. By cutting the amount of foreign sugar purchased by the United States, the quotas force sugar exporters to scramble for other customers. In the two months since the quotas were announced, the price the Dominicans get for the three-fourths of their crop not sold in America has fallen 15 percent.

Senators Quayle and Tsongas would roll back the sugar price support level from 17.5 cents a pound to 14 cents for one year. We would rather see price supports eliminated entirely; there is no place in a healthy economy for a program that costs so much and benefits so few. But Quayle-Tsongas is a beginning, saving consumers over a billion dollars and eliminating the need to use quotas to support the domestic price.

[From the Indianapolis News, June 13, 1982]

SOME SWEET DEAL

Gliding over the polished floors at Versailles, expounding on the necessity for free trade, President Reagan had mud on his shoes.

His decision to impose quotas on sugar imports the month before leaving for the recent economic summit clung to him and left tracks of hypocrisy across his pleas against protectionism.

The President's decision was understandable, at least in terms of domestic politics. Sugar is the sand of international commodity markets: Plentiful and cheap. That's so, in part, because governments such as France subsidize production. To protect domestic sugar producers, America has slapped a countervailing duty on imports. And in his budget battle with Congress last year, Mr. Reagan won key votes by agreeing to sugar price supports.

Now that the price of sugar has plummeted, the bill for that horsetrading would cost the Treasury almost \$1 billion. So Mr. Reagan decided to bill the consumer instead by slapping on a quota. Sugar growers' joy will be costly to consumers: Estimates range from \$1 billion to \$3 billion a year.

Questions such as whether America should bother producing sugar—rather than other commodities buyers might want—don't seem to get asked. And Congress clearly hasn't the guts to rely upon the free market to which it theoretically pays homage. Lawmakers would prefer to gut the proposed Caribbean Basin plan, which had aimed at promoting economic growth through trade.

The President has said Caribbean sugar producers will receive special treatment under the quota program, but nations such as the Dominican Republic still are nervous. Sugar is the Dominicans' leading export, and it now will be subject to quotas as well as fees and duties.

At Versailles, of course, it was easier to point at the Japanese in self-righteous indignation over their trading practices. Mr. Reagan certainly did not come armed with what should have been a pledge to scuttle sugar supports entirely. The official summit communique didn't mention sugar, but we can't help hoping that behind closed doors, at least somebody did.

[From the Miami Herald, July 2, 1982]

SWEET AND SOUR

Sugar prices have tumbled on the world market, but don't expect to pay less at your neighborhood market. That's because the Reagan Administration unwisely has decided to play sugar daddy to domestic producers of sugar.

The United States is imposing an import quota of three million tons to keep domestic prices up. Consequently, consumers will pay an estimated \$1 billion more than they would if market prices prevailed.

The impact will be inflationary—and not just on coffee lovers who prefer two lumps instead of none. Sugar is present in such a wide variety of beverages and processed foods that it's inescapable.

Higher food prices are only the beginning of the problems that the Administration's sugar policies will cause. Taxpayers may be saddled with the cost of propping up prices as well. The Commodity Credit Corp. must pay if prices dip as expected.

Nor will that necessarily be the end of the Federal Government's outlays in further-

ance of its sugar policies. Outlays for foreign aid may have to be increased to make up for cutbacks in imports.

As pointed out by Secretary General Alejandro Orfila of the Organization of American States (OAS) in a letter to President Reagan, "Some 20 OAS countries ship sugar to the U.S. Market." American sugar policies, Mr. Orfila notes, can be expected to "have a profoundly negative impact on the smaller countries of the Caribbean Basin, precisely those most to be aided by the trade, investment, and financing initiatives previously announced by the Reagan Administration."

Why would the Administration adopt a policy so at odds with its stated economic goal of whipping inflation and its foreign-policy goal of helping the Caribbean and Central America? Is the decision just more evidence of the Administration's disarray?

Probably not. More likely it is evidence of the degree to which agricultural policy is shaped by interests adept at lobbying. Thus it happens that domestic producers of sugar and the commodity most injurious to Americans' health, tobacco, have fared well.

Meanwhile, producers of such beneficial products as corn, wheat, and soybeans have been staggering under the double whammy of prolonged high interest rates and a steep decline in prices. Now they're apt to suffer yet another blow: Many sugar-producing nations will be forced to reduce imports of American grains.

There is no sound economic reason for the United States to be a major producer of sugar. It can import all it needs cheaper. If the domestic industry can't compete on the world market, it should use its land for other crops or quit. It should not be sustained by artifices such as subsidies.

To help ameliorate the immediate problem, meanwhile, Congress ought to give sugar prompt attention when the session resumes July 12. Senators Paul Tsongas and Dan Quayle propose reducing price supports for sugar. Their proposal would be sweet relief for consumers and taxpayers.

[From the Wall Street Journal, July 20, 1982]

SUGAR-IMPORT QUOTA CONTROVERSY GROWS OVER BENEFITS TO BIG COMPANIES, GROWERS (By S. Karene Witcher)

Last May, in a twist to the government's already controversial sugar policy, President Reagan signed a proclamation to impose quotas on sugar imports.

That stroke of the pen touched off turmoil in the international sugar industry and marred the administration's much-vaunted free trade stance. It also ignited charges that a few big companies, large farmers and wealthy businessmen, such as the silver-trading Hunt brothers of Dallas, are benefiting from higher sugar prices at the expense of recession-battered American consumers. Many of those companies are publicly owned and some are controlled by foreign shareholders.

"The big benefactors are the big corporations," contends Nicholas Kominus, president of the U.S. Cane Sugar Refiners' Association, a Washington-based trade group of so-called independent refiners, or those without producing operations. The group depends heavily on imports and, not surprisingly, it opposes the sugar price support program, particularly quotas.

The quotas are supposed to raise the price of domestically produced sugar by limiting cheaper imports. That, in turn, should encourage U.S. growers and concerns that

process sugar to sell the sugar to commercial users rather than to the government, which has promised to buy it later this year at a guaranteed price of about 17 cents a pound. A world-wide sugar oversupply has depressed prices to about eight cents a pound, the lowest price in roughly two and a half years.

The administration agreed to purchase sugar as part of a price-support program enacted in December, but now it is balking at spending the hundreds of millions of dollars that could be needed to fulfill that obligation.

DOMINANT COMPANIES

According to the Agriculture Department, big companies, most of them publicly held or units of public companies, dominate sugar production in the U.S. They include such names as Gulf & Western Industries Inc., which has interests ranging from movie making to zinc production, and U.S. Sugar Corp., the biggest cane-sugar producer. Both companies have operations in Florida.

And in Hawaii, a group of companies known as the "Big Five" produce about 96 percent of the state's annual production. One of those companies is Theo. H. Davies & Co., a unit of Jardine Matheson & Co., a Hong Kong-based conglomerate. Only about 4 percent of the state's sugar is produced by individual farmers, Agriculture Department officials say.

In the beet-processing sector, industry sources say the Hunt brothers' Great Western Sugar Co. in Denver usually is at the top of the list as the biggest. While the Hunts don't grow any sugar, their companies process and refine sugar and higher sugar prices mean more income to split with growers who contract with such processor to supply sugar.

The Hunts acquired Great Western in 1975 and usually contract with about 2,500 growers in five states to produce beets, says Jack Fulton, the company's director of government relations and communications. He declined to say whether the company is profitable, saying "we don't release" financial information. But he did note that the quotas will "definitely be a plus" for Great Western in the longer term. Analysts, however, say the quotas means millions of dollars extra a year that Great Western will have to split with its growers. Contracts vary but usually about 60 percent of the proceeds from sugar sales go to beet growers.

And the sugar industry is attracting other big companies to its ranks. In March, C. G. Smith, Ltd., part of Barlow Rand Ltd., a large South African industrial concern, acquired Monitor Sugar Co., a closely held Bay City, Mich., beet processor. One source familiar with the transaction said Monitor is "profitable and the South Africans are coming in trying to make it more profitable." He added that the price-support program, which effectively puts a floor under sugar prices, was an added incentive.

ADDED REVENUE

Industry estimates of how much domestic sugar growers and processors stand to gain in added revenue from the quotas differ. Kim Badenhop, a sugar economist and partner of New York's sugar brokerage B. W. Dyer & Co., estimates that extra revenue to the domestic sugar industry conservatively at just over \$100 million a year. Others say the quotas mean hundreds of millions of dollars a year in extra revenue to growers and processors, based on current sugar

prices and expected production. Most analysts believe the quotas will be in effect for at least two years and prices will be maintained at the current levels at least.

Although the quotas and their higher prices are helping boost profits for some concerns, analysts note that other less-efficient producers, the added income probably will just moderate losses. For example, despite higher prices, sugar analysts expect continued losses from most Hawaiian sugar companies because of high production costs. And some sugar companies, Amstar Corp. for instance, are trimming operations. They blame lack of profitability. New York-based Amstar has closed a beet-processing plant and a cane sugar refinery in the past few days and plans to close another beet plant.

Meanwhile, consumer groups are protesting the quotas and some politicians are trying to introduce legislation to lower sugar price supports and eliminate quotas.

"In a period of rising unemployment and stagnating income it is unconscionable that the administration has imposed quotas," charges Stephen Brobeck, executive director of the Consumer Federation of America in Washington.

Some in the sugar industry argue that Mr. Brobeck's estimates are high, but he reckons the quotas (which have so far raised the price of a pound of sugar by about three cents) will add \$1 billion to the annual total sweetener bill of American consumers. As a rule of thumb, every one-cent increase a pound translates into a \$300 million a year rise in sweetener costs because higher sugar prices trigger increases in alternative sweeteners such as high fructose corn syrup. American consumers currently pay about double the world price of sugar.

Although analysts differ over how much money consumers will pay in added sweetener costs and how much additional income the domestic industry will receive because of the quotas, they do agree on one point: The main beneficiaries of higher sugar prices in the longer term are corn sweetener manufacturers. And they will gain millions of dollars in sales. Corn syrup usually sells at 10 percent to 20 percent discount to sugar and has been increasing its share of the sweetener market in recent years. It currently holds about 30 percent and analysts project that percentage will widen further as users turn to the less expensive corn syrup. As Nauman Batrakat, a sugar analyst at Smith Barney, Harris Upham & Co. puts it: Corn sweetener makers are "rubbing their hands in glee."

[From the New York Times, July 18, 1982]

YES, IT COSTS TOO MUCH

(By Nicholas Kominus)

H. L. Mencken may have had the sugar producer in mind when in an essay entitled "The Husbandman" he wrote: "When the going is good for him he robs the rest of us up to the extreme limit of our endurance; when the going is bad he comes bawling for help out of the public till."

In 1980, when the world price of sugar shot up, the nation's sugar producers did not hesitate to increase their own prices. As a result, they enjoyed record profits. But, as much as the producers enjoy riding the world market up, they hate riding it down. So last year they came to Washington, lobbying for help. Unfortunately, they got help—much help. The sugar program that emerged is dreadful.

The producers got the program, in part, by resorting to scare tactics. They argued that the program was needed to protect con-

sumers from a so-called "sugar OPEC." This was nonsense. Sugar, unlike petroleum, is produced in practically every nation of the world, and substitutes are available. At the time, some were impressed by the argument. But the recent drop in the world price of sugar from 44 to 8 cents a pound has put the "sugar OPEC" argument to rest.

Meanwhile, consumers are stuck with a program that is artificially forcing up the price of sugar, and thereby contributing to the disturbing reappearance of inflation. As the price of sugar goes up, it inflates the price of many processed foods and beverages.

When President Reagan implemented the current sugar price support program, he said, "I personally regret the necessity for signing these proclamations. The sugar program enacted by Congress to protect higher-cost domestic producers will result in higher costs for all American sugar consumers."

The program is, indeed, forcing American consumers to pay more for sugar than consumers in most of the other nations of the world.

Today, the price of raw sugar on the world market is around 8 cents a pound, a result of overproduction in the United States and other parts of the world. Despite producer attempts to discredit it, the world sugar market is not a dumping ground. It is a viable and important market, which accounts for as large a percent of total sugar trade as do the world markets for wheat, feed grains and soybeans.

The United States price, which is forced up by import quotas, duties and fees, is around 22 cents, or nearly three times higher than the world price. By artificially maintaining the United States price that high the program is costing consumers an estimated \$3 billion a year in higher sweetener costs.

That price tag becomes even more significant when it is measured against the small number of sugar producers. There are, in fact, fewer than 14,000 sugar producers. Thus, the cost of the \$3 billion program is an astounding \$215,000 per producer.

By comparison, the annual cost of the dairy program, in which 324,000 producers participate, is estimated to be \$11,250 per producer. The wheat program, in which 870,000 producers participate, is estimated to cost \$475 per producer. It is also interesting to note that the school lunch program costs \$113 a year per child, and that the food stamp program costs \$622 per participant.

The sugar producers enjoy these lopsided Government benefits without any strings attached. Unlike the other crop programs, they can produce all they want. In addition, huge sugar producers get to "play" with the taxpayers' money. Under the program, they can offer sugar to the Government as collateral for loans and these loans are expected to total around \$1 billion in the coming crop year. Producers can reinvest the loan money in money markets, as some have in the past, reaping windfalls from the spread between the low interest rates charged by the Government and the currently high market rates. Moreover, if producers decide to default, they pay no interest.

The sugar program is also proving to be a total embarrassment to the Reagan Administration, which has been forced to impose restrictive import quotas in order to avoid the possibility of the Government having to buy domestically produced sugar. The quotas have been a cause of no small irritation in the developing sugar nations, most

of which are in the Caribbean and Latin America. And the quotas have all but decimated the Administration's Caribbean Basin initiative.

More important, the quota problem transcends the sugar trade. It could have a serious impact upon our foreign trade generally. Sugar quotas will, as special trade representative William E. Brock said, "make it more difficult" to argue against trade barriers in the European Economic Community and Japan. As long as the quotas remain in force, every nation we have a trade problem with will gleefully point to them as an example of our transgressions.

It is ludicrous to jeopardize our \$42 billion agricultural export trade to overprotect a minor industry. The sugar beet and cane crops are produced on less than 1 percent of the nation's farms, and they account for less than 1 percent of crop acreage.

Ironically, the sugar program is pricing sugar out of the sweetener market. High sugar price supports are permitting the corn sweeteners to capture more of sugar's traditional markets. As a result, some sugar refineries and factories are closing.

In recent months, all Government programs have been re-examined, and Government benefits to millions of Americans have been reduced. Sugar and its producers should be no exception.

[From the New York Times, July 28, 1982]

BITTER PILL: PRICE SUPPORT FOR SUGAR

(By Dan Quayle)

WASHINGTON.—Sugar, how sweet it is. So sweet, in fact, that Americans consume an average of 125.6 pounds a year. Yet it is sweeter still for those who produce it, for they are ultimately responsible for pernicious legislation that is protectionist, inflationary and economically inefficient.

I am referring to the sugar support program and recently imposed quotas on sugar imports. These are programs that serve no useful purpose in an Administration committed to the promotion of free trade and the reduction of Government distortion of the marketplace.

Last fall, Congress sent President Reagan a four-year farm bill that he signed into law. This law guarantees domestic sugar growers a minimum market price by requiring the Government either to buy their sugar if it cannot be sold on the open market at the minimum level or to raise prices by other means.

Since the price of corn sweeteners is tied to that of sugar, over 99 percent of the sweetener market now has a minimum price set by the Government. In effect, the Government is punishing the American public for its sweet tooth by making the consumers pay higher prices than necessary.

At present, the Government is required to keep sugar prices above 19.88 cents a pound, yet the world price has now dropped to less than 7 cents a pound. Who pays for this 13-cent difference? Why who else? The American consumer.

The beneficiaries of this program are the 12,847 sugar producers, while 227 million American sugar consumers are left with an acerbic taste in their mouths and a hole in their pocketbooks.

Based on per capita consumption, each 1-cent-a-pound increase in the price of sugar adds at least \$300 million to the national sweetener bill. The present 13-cent difference between world prices and American prices means the sugar program could raise the American sweetener cost by almost \$4 billion annually.

In the past, Uncle Sam has been able to raise the price of sugar in American markets by imposing duties and fees on imported sugar, which has accounted for about 42 percent of our total consumption. When world prices drop below 10 cents a pound, even these duties and fees are unable to make up the difference between the support price and market price because Federal statutes limit the amount to be collected by such measures.

This spring the Government faced the predicament of either having to buy \$400 million to \$800 million in domestically grown sugar or having to find a way to keep American market prices artificially high, as the world market price of sugar was dropping below the necessary level of 10 cents.

On May 4, 1982, President Reagan signed a proclamation imposing quotas on imported sugar with the ostensible purpose of fattening domestic sugar prices enough to avoid having to make enormous purchases. In layman's language, import quotas simply spread the cost of the sugar-price support program to consumers and to foreign sugar producers.

At a time when this country is advocating free trade and badgering other countries to lower their trade barriers, the installment of quotas on imported sugar undercuts the basic free-trade stance and makes it harder to win greater access to foreign markets for American exports. Even William E. Brock, the American trade representative, said the quotas would "make it more difficult" to argue against trade barriers in Japan and the European Economic Community.

A return to protectionism will only encourage the Europeans, the Japanese and other trading partners to limit the access of American products to their markets. Such limitations would be especially costly to American agricultural exports.

The imposition of sugar quotas also threatens to sink the already listing Caribbean basin initiative. In the Dominican Republic, for example, about 10 percent of the population is employed in the sugar industry and its subsidiaries, and 95 percent of its sugar is sold to the United States. This accounts for over a third of its export earnings. Under the present quota system the country stands to lose more than \$136 million in 1982. Other countries that will be severely affected are Guatemala, Panama, Barbados, Colombia, Brazil, Thailand and the Philippines.

I do not believe that America's love for sugar should be punished by an inflationary and protectionist price support program. This program is costly to consumers, harmful to our efforts to preserve and expand free international trade and counterproductive to our programs of helping developing nations. It is a transparent contradiction of the commitment of this Administration to reduce Government distortion of the economy. It must be rescinded now before it does more damage to our economy and to the free-trade system this country stands by.

[From the Journal of Commerce, May 12, 1982]

SOURING ON SUGAR

U.S. trade officials will find it harder than ever to negotiate for greater access to international agricultural markets as a result of the decision taken last week to impose quotas on sugar imports.

The decision was made on perfectly practical grounds. Under the present—ill-considered—price support program, the Commodity

ty Credit Corp. was in danger of being forced to purchase as much as a billion dollars worth of U.S. sugar. The administration could hardly condone that with the present sorry state of the U.S. budget.

In a proclamation, which became effective Tuesday, President Reagan imposed country-by-country import quotas, allowing 220,000 short tons of sugar to be entered into the United States between May 11 and June 30. The quotas are based on exports to the United States over a seven-year period, dropping the highest and lowest years for each country and averaging the remaining five.

Under this calculation, the Dominican Republic gets a quota of 17.6 percent of U.S. sugar imports, Brazil gets 14.5 percent, the Philippines, 13.5 percent and Australia, 8.3 percent.

U.S. Trade Representative William Brock conceded recently that it will be more difficult for the United States to dismantle trade barriers in the European Community and Japan as a result of the move. The quota could prove a heaven-sent bargaining tool in their negotiations with the United States.

U.S. officials, although they are sheepish enough about the quotas, blame the heavily subsidized European Community beet sugar swamping world markets for the collapse of sugar prices, which has put the United States in this unfortunate quandary.

F. O. Licht estimates that beet sugar production in the European Community in the 1981-82 crop year should reach almost 16 million metric tons, up from 13 million in the previous year. This is almost half of the world's beet sugar output in a bumper crop year.

The introduction of quotas also threatens to make a mockery of the administration's Caribbean Initiative, which was designed to give preferential treatment to Caribbean exporters and encourage investment in the countries targeted for U.S. help.

The administration concluded that it had no choice but to apply the quotas as equitably as possible. That leaves such countries as Guatemala with a 4.8 percent quota, Panama with 2.9 percent and Costa Rica with 1.5 percent.

Agricultural Secretary John Block contends that the Caribbean nations will have a 1 percent larger share of the U.S. market with the quotas than they have without them and that they will be getting a higher price for their sugar.

Perhaps, but as the Caribbean Initiative begins the legislative process, the problems are likely to multiply. A House Ways and Means subcommittee last week tightened criteria for products eligible to be entered duty free and excluded a number of items, including footwear, luggage, handbags, work gloves, leather and belts. It also made provisions for a reduction in the free duty treatment on sugar from the Dominican Republic, Guatemala and Panama should that become necessary.

The administration has only itself to blame if it gets into tighter and tighter knots on the sugar question. It shouldn't have fallen for the support program in the first place.

Even the most free market-oriented administration loses its nerve when it comes to agriculture. We can understand why. But that loss of nerve, as events now prove, can be costly. Everyone will pay—the consumer as well as the exporter of other agricultural products. But above all, this country's trade relations—and its probity—will suffer.

[From the Wall Street Journal, July 20, 1982]

REAGAN'S CARIBBEAN PLAN IS COATED WITH SUGAR QUOTAS

(By Alejandro Orfila)

The present is an extremely difficult moment for the inter-American system. Political developments have seriously tested regional peacekeeping and our collective security mechanisms. And the severe economic decline of the past year casts a pall over the development process of this region, whose rates of growth were previously among the highest in the world.

Moreover, many of the problems on the regional agenda admit of no easy solution. It is evident that in the economic sphere the U.S., with its philosophy of free trade, has sought to provide creative and comprehensive responses to the dilemmas the members of the Organization of American States face in common. The Reagan administration's Caribbean Basin initiative is one proposal that demonstrated practical U.S. determination to help accelerate the development of smaller OAS nations through concrete trade and financial arrangements.

However, extraneous conditions are threatening to undermine the progressive development measures being proposed under the U.S. initiative for the Caribbean and Central America. In particular, one can cite those conditions that recently pressed the Reagan administration to impose quotas on imports of sugar.

Even while Latin America has sought to expand its trade horizons, world prices for commodities, such as sugar, coffee, bananas, meat and cotton—its principal exports—have gone down. As a result, the region is not earning the income it requires to offset high energy and debt-servicing costs.

With the imposition of U.S. quotas and the maintenance of high duty rates and import fees on sugar, however forced by unforeseeable or uncontrollable conditions, the short-term economic outlook for many Latin American countries has become more negative. Estimates indicate that under these new U.S. measures, Latin American exporters stand to lose about \$90 million over the rest of this year.

One specific feature of this new quota system is the extreme hardship it places specifically on smaller exporters. Normally, sugar is shipped in vessels of 10,000 to 12,000 tons; U.S. quotas for some countries are substantially smaller than a normal ship's cargo. In effect this results in a practical exclusion from the market, plus higher interest costs for exporters forced to leave sugar in warehouses until the next quarter.

It is important to underscore that some 20 OAS countries ship sugar to the U.S.; in 1980, a year of relatively high prices, this amounted to \$1.3 billion. In a normal year this total is reduced, as will be the case in 1982. This suggests that the nearly \$90 million loss in revenue to Latin America projected from mid-May 1982 through the end of this year may have a profoundly negative impact on the smaller countries of the Caribbean Basin, precisely those most likely to be aided by the trade, investment and financing initiatives previously announced by the Reagan administration. As an avowed and committed free trader, the U.S. finds itself in a difficult and untenable situation, at least in the eyes of Latin America and the Caribbean.

U.S. consumers and foreign exporters alike are being adversely hit by these new quotas imposed on imported sugar.

In addition, the sugar industry in Latin America is reeling from the steady and vast expansion of high fructose corn syrup into the world sweetener market (particularly in the U.S.), an expansion that has not yet been appreciably offset by the potential use of sugar cane for fuel alcohol.

This is the first time since 1974, moreover, that the U.S. import quotas on sugar have been reestablished. Whatever its weaknesses and failures, it should be noted that the spirit of the pre-1974 act did not entail making such quotas primarily a revenue mechanism for the U.S. Treasury, the situation that prevails now under the newly imposed quotas and with the maintenance of high duties and import fees.

It is true, of course, that the solution to the region's sugar crisis does not lie only in the hands of the importing countries. Within the producing countries, a more diversified use of sugar cane is essential for national economic well-being.

Most countries that export sugar are also net importers of oil. An integral use of sugar cane in a modern agro-industry energy system could help reduce this dependence on oil. A more efficient use of bagasse to co-generate electricity and alcohol would provide both liquid fuel and building blocks for sacro-chemical production. This diversified use could help stabilize world prices while not interfering with sugar's use as a food crop.

Yet even if long-range diversification of the sugar industry is essential for its future, the fact is that the recent imposition of quotas by the U.S. is having a disastrous effect on many OAS states. As matters now stand, the sole beneficiaries of these new quotas are U.S. growers. In the interest of hemispheric amity and of regional growth, objectives to which the U.S. has forcefully committed itself, means must be found to extend the benefits of this new U.S. system to Latin American exporters.

Given the overwhelmingly negative attitude in Latin America and the Caribbean toward these new U.S. measures, reconsideration of alternative policies is urgently required. Otherwise the prospects both for an economic turnaround in the region and for a near-term improvement in relations among OAS states can hardly be bright.

[From the Journal of Commerce, July 27, 1982]

CORN SWEETENER DEMAND EXPECTED TO INCREASE

(By Michelle Bolar)

Demand for corn sweeteners—high fructose corn syrup, in particular—is expected to increase during the remainder of this year and in 1983 as the price of domestic sugar rises.

The escalating price of domestic sugar was cited in a recent Drexel Burnham Lambert report as a major factor in making less expensive corn sweeteners a more attractive alternative to industrial users of sugar. The outlook for corn sweeteners was researched by the firm's new tropical commodities and consulting group, headed by Dennis Koutras, with input from food industry analyst Alan Greditor.

Domestic sugar prices have been climbing due to the imposition of sugar import quotas by President Reagan on May 11, after world sugar prices dropped to 8.48 cents per pound.

The quotas were imposed to limit imports of world raw sugar, create a greater demand for domestic sugar, and lift U.S. sugar to a

minimum support price—currently 19.88 cents per pound.

Monday, the spot price of refined cane sugar in 100-pound sacks was 33.60 cents per pound.

Conversely, Monday's spot price of 55 percent high fructose corn syrup was 13.82 cents per pound. (The 55 percent figure refers to the concentration of fructose. Considerably sweeter than the other grain derivatives—dextrose and corn syrup—HFCS is the most widely used corn sweetener in the food and beverage industry.)

With HFCS so much cheaper than refined sugar, the Drexel Burnham report argued, industries that predominantly use sugar will turn increasingly toward HFCS in a cost cutting effort.

In addition to the jump in domestic sugar prices, there are other variables in the anticipated industry crossover to corn sweeteners.

The Drexel Burnham study pointed out that forward coverage of sugar, purchased at depressed prices, was already expected to diminish as 1982 progressed. (Forward coverage refers to the physical inventories of a commodity allocated for future use.)

But with the current restriction on imports, Drexel Burnham warned, industrial users that relied on lower-priced world sugar to establish their forward requirements will be forced to dish out more cash for domestic sugar, unless they switch to a cheaper alternative.

The volume of world sugar on the futures market also has declined because of the import quotas, creating further headaches for commercial users of sugar, according to the report.

Industries frequently traded the world sugar contract in the futures market to hedge against possible purchases of sugar from sugar operators.

Yet "the use of the world sugar market for forward coverage of sugar requirements," the report explained, "will likely be considerably reduced since variable import quotas suggest that no assurance exists that forward purchased raws can actually be imported."

The Drexel Burnham study concluded that these factors have significant favorable ramifications for the corn sweetener outlook:

First, the price limit of HFCS, which is dictated by refined sugar quotations, will be increased. HFCS producers will be able to raise their prices and still be viable contenders against sugar producers.

Second, prices that industrial users pay for refined sugar over the near-term will likely exceed their previous expectations.

Third, the ability of industrial users to protect against subsequent cost increases is being curtailed as a result of reduced access to the world market.●

NOTICES OF HEARINGS

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Subcommittee on Public Lands and Reserved Water to consider S. 2818, to authorize the adjustment of the termination date of certain contracts for the sale of timber from national forest system lands and public lands; and S. 2805, to provide for the

orderly termination, extension, or modification of certain contracts for the sale of Federal timber, and for other purposes.

The hearings will be held on Monday, August 16, beginning at 9 a.m. and on Tuesday, August 17, beginning at 2 p.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Public Lands and Reserved Water, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding these hearings you may wish to contact Mr. Tony Bevinetto of the subcommittee staff at 224-5161.

ADDITIONAL STATEMENTS

SOCIETAL PROPERTY RIGHTS

● Mr. EAST. Mr. President, should we open our borders to the millions of people desiring to immigrate to the United States? Some of my libertarian and conservative friends think we should. A lot of elected officials, judging from congressional inactivity over the last decade, apparently agree.

A thought-provoking contribution to the immigration debate was offered by Robert W. Whitaker in an essay entitled "Societal Property Rights," published in the New Right Papers. I hope my colleagues will read this essay and reflect on this problem before we take up S. 2222, the Immigration Reform and Control Act of 1982.

I submit for the RECORD this essay by Robert W. Whitaker.

The essay follows:

SOCIETAL PROPERTY RIGHTS

(By Robert W. Whitaker)

Why is it that labor is worth so much more on one side of a border than on the other? This is a question basic to immigration policy. Is it merely the irrational greed of American workers which keeps our borders closed to the tens of millions of people from poor countries who would be willing to come here and work for less?

As a matter of fact, liberals, libertarians, and big businesses are in implicit agreement on this point. Liberals are generally opposed to enforcement of our immigration laws. Big business sees a great prospect for profit as represented by large-scale immigration of cheap labor. Libertarians believe in equal pay for equal work everywhere on earth. They believe that all labor of the same quality should be paid the same, so restricting the movement of labor between nations is immoral.

This reasoning can go pretty far. Some time back, a conservative magazine contained an article protesting the lax enforcement of U.S. immigration laws on the Rio Grande. A flood of letters poured in, most of them with a single theme: A border to keep people out of the United States is as immoral as the Berlin Wall, which keeps people in East Germany.

To equate the Berlin Wall with American immigration laws is to say that the rest of

the world has as much right to settle in the United States as East Germans have to emigrate. The point libertarians lose sight of is that immigration laws mean that we have something other people want. There are things in America, the product of Americans, which others would like to share. Some of these things are noneconomic, such as freedom. But we cannot share freedom by letting everybody on earth come here. Few free market economists would disagree with that statement. Yet our economic benefits are also the product of Americans, and free market economists quite seriously maintain that we have no right to keep them to ourselves.

Libertarians and free market economists generally believe that one obtains the highest level of production by following, insofar as possible, two principles. The first is that distribution of goods and services should be done by the market place, through supply and demand. Production, on the other side, is maximized by paying each person according to his contribution to production. But they restrict the definition of "contribution to production" to the three classical factors of production: land (including resources), labor (including skilled labor and management), and capital. If labor of the same quality is paid more in one place than in another, it represents an economic distortion.

According to pure free market economics, if wages for the same work are low in Calcutta, true economic theory requires that labor should be allowed to go elsewhere, until there is everywhere equal pay for equal work. Therefore, if Japanese workers are receiving more than Indian workers, they are getting the extra pay because they are exploiting somebody.

But whom? Whom is the Japanese worker exploiting? Is it capital? If Japan's investors were paid too little, the immense flow of capital into Japan from all over the world—including India—would stop. Is the Japanese worker exploiting management? There are firms all over the world who would like to have some Japanese managerial talent, and that managerial talent is perfectly free to leave. If it is exploited, why doesn't it go elsewhere? The reason is that, far from being exploited, managers in Japan do extremely well. Is it resources, then? Is Japan so rich in resources that the extra pay for workers there exploits vast mineral wealth for its benefits? Hardly. Japan does not have a tenth the resources per capita that India does.

Japanese workers receive more for their work because Japan is a productive society. Those who advocate unlimited immigration assume that all societies are equally productive, so the fact that Japan has a high living standard is a happenstance. If we assume the higher wage in a productive society is coincidental, then certainly an Indian has as much right to it as does a Japanese.

Free market economics, in other words, does not take into account contributions of the members of a society, not only as workers and savers, but as citizens.

Societal productivity requires, among other things, a resistance to demagoguery. There is real economic value in having a population in which those unemployed do not try to seize all property. But docility is not necessarily more desirable than constant rebelliousness. The enforced docility of the Franco government for its first two decades in Spain was almost as anti-Capitalist as it was anti-Communist, producing a suffocating system which resisted economic change and growth. Saudi Arabia, even if it

were perfectly safe from a Communist takeover, would not be a place for the building of an industrial society, despite popular docility. Popular docility breeds stagnation, and an industrial society requires steady change. The balance of change and political stability, an accomplishment of tremendous size, is something Western market economists take for granted. They assign productivity to what they call the factors of production, and see the environment for such productivity as a given.

Libertarians say that capital produces wealth, and therefore the capitalist has the right to the rewards. They say that labor produces wealth, and therefore labor has a right to the rewards. The Japanese society and body politic produce wealth, but libertarians insist that that wealth belongs to the world. Otherwise, they would have to admit that immigration restrictions are not mere "economic distortions," but a means of protecting a property right as valid as that of Mitsubishi stockholders.

The difference between wages paid in Calcutta and those paid in Tokyo is the result of something as real as interest rates, and as palpable as a blast furnace. Higher wages are not produced by a people as a result of their performance as laborers only or as investors only, but by their performance as voters and citizens. The societal performance of the people of Japan produces wealth, and the right to that wealth therefore accrues to the people of Japan.

If oil is discovered in Mexico, free market economists will differ with Marxists and liberals about which Mexicans have a right to that oil. Marxists will say that the oil belongs to the people of Mexico, free market economists will say it belongs to the owners of the land on which it was found, and liberals will say it belongs partly to the land owners, and partly to the Mexican people. But all agree on one point: Oil found in Mexico belongs to somebody in Mexico.

One may argue whether the productivity of Japan belongs more to the capitalists of Japan or to the Japanese workers. But by argument analogous to that on oil, it should belong to somebody in Japan. Yet free immigration libertarians are in the ridiculous position of saying that a people has a right to oil which happens to be discovered beneath their soil, but not to the productive environment they produce.

If an Indian laborer is able to make more money moving to Japan, it is because he is able to share the productivity of Japanese society and Japanese politics. By the same token, Mexicans can make more money in America because they are able to share the productivity provided by American society and American politics. Immigration restrictions reward a people for their performance as voters and citizens, a reward which is not only moral, but which makes good economic sense.

The reason for rewarding members of a productive society is the same as for rewarding any other productive activity. Workers acquire skills because skilled labor is paid more than unskilled. Rich people are rewarded for saving instead of spending, not because they deserve the rewards on some abstract moral plane, but because their savings buy capital with which we produce more wealth. For the same reason, the welfare check of a citizen of Dallas, Texas allows him to buy more than a full-time laborer in Tijuana, Mexico can earn. He is being paid for being a part of a productive society. A full-time laborer in Dallas earns several times what a full-time laborer, doing

the same work, in Tijuana earns. He is benefiting by what his society has accomplished, while his Mexican counterpart is paying for the fact that his society has a record of three centuries of demagogues and instability.

This disparity is often unfair. But the conservative economist has little to complain about. It is not fair for many wealthy people to receive the benefit of the fact that their ancestors saved money and worked hard. But every conservative economist will tell you very quickly how essential it is that we pay the dividends of those who inherited stock. He will explain that we must respect property rights, because, even if a particular person doesn't deserve them, it is dangerous to society to deprive him of those benefits. The present generation would see no need to save for their children if property rights are likely to be violated. Further, the expropriation of inherited property implies a threat to the security of all property.

But these same conservative economists never even consider that citizens of a productive body politic should be similarly rewarded.

The cost of ignoring societal property rights is the same as the cost of ignoring any other real property rights. To leave any factor of production out of economic theory is to court disaster. By preaching that only labor produces value, and therefore that interest on investments was evil, the London School of Economics (LSE) guaranteed poverty for most of the Third World for generations to come. India, desperately in need of capital, had leaders who, taught by LSE, refused to bring in that capital by simply allowing it to make money in India, instead devoting themselves to various socialist schemes to provide capital through the state. If societal property rights are left out of economic theory, underdeveloped countries miss a vital point: If they wish to succeed, they must copy not only the technical, but the societal and political methods of successful countries.

A refusal to recognize societal property rights can be equally destructive for a developed economy. If one wishes to stop all investment, one outlaws interest payments. If one wishes to destroy productive societal attitudes, one removes all the benefits provided by societal property rights. It is no accident that even the poorest Americans refuse to vote Communist or Socialist. Part of the reason is that every American shares to some extent in the benefits of American capitalism. These are not the terms in which such votes think. Rather, they are aware that even poor Americans are better off than they would be in other countries, and therefore choose to resist the appeal of radicals.

Clearly, politics is part of economics; society a factor of production. Workers in richer countries are being paid for the politics their country chooses to follow. Economists then have two alternatives. First, they can follow their present course, and wish away this uncomfortable fact of life. Second, they may simply consider politics, and the societal attitudes which produce those politics, another real factor of production, which must be paid for like any other factor of production.

If one considers politics to be something to be wished away by economic theory, all welfare payments are inexcusable. But if one believes that real-world economics must face real-world facts, one must notice that productive societies all make welfare payments to the poor. Such minimum public as-

sistance and relatively high wages are simply part of the price of maintaining a stable body politic today. Given this reality, the completely anti-welfare libertarian degenerates to the level of a liberal moralist: It is a fact, he admits, but it shouldn't be. Anyone who considers himself a realist, and who insists welfare is unnecessary in today's world, must first find a wealthy country where this payment is not required.

I wish, along with libertarians, that the political systems where I am willing to invest my money would stop making me pay taxes for welfare to some of the people who make up those countries. I wish, again with libertarians, that I could have the profits of Indian cheap labor and the safety for my investment provided by a Swiss political system. I wish, with liberals, that oil companies would give me oil free, and that new sources of oil would find and develop themselves while I am enjoying free oil. I wish I had a herd of shmoos. As bases for logical economic thought, all these wishes are precisely equal.

A free market economist I know was very impatient with an Indian socialist, and for good reason. The socialist was saying that, if he believed in the profit motive, he was justifying price-fixers and monopolist exploiters. To justify profits, the socialist said loudly, was to say that those who worked and exploited children in nineteenth century sweatshops were right to do so. My free market acquaintance tried to explain to the shouting ideologue that free market economics only justified some profits, and condemned outright price-fixers as completely as did any socialist. But the socialist ideologue was shouting, and would not listen.

A few days later, this same free market economist was shouting. He said, in effect, that my argument about social property rights would justify the British welfare state. He said I was trying to stop the free movement of labor all over the world, and, in effect, blamed my kind of thinking for the Berlin Wall. I tried to explain to him that the concept of societal property rights only justifies some welfare, and some immigration restrictions, and that it condemns a runaway welfare state as completely as does any other free market approach. But he was shouting, and would not listen.

The free market will take care of the British welfare state. Britain is in desperate straits because its political system is simply asking a higher price than the market will bear. Many people would like to invest money in Britain, but the cost, in taxes and economic restrictions, is too high, so they are going elsewhere. British talent is leaving the United Kingdom to go where their talents receive a due reward. The result is an increasing poverty, which results in the British electorate moving away from the stagnant policies of the past. The British political system, in short, is being forced, by competition, to become more competitive.

If Britain had the only society in the world, it could raise its taxes even higher, just as the only steel company in the world could charge almost anything it chose. The British Labour Party acts as if this were the case, and that taxes can be high as Britons choose without driving talent and capital away and leaving the country impoverished. This is not true, and Britons are being forced to lower taxes and economic restrictions because there are other societies competing for the same talent and resources.

But there are British libertarians who apply an equally illogical assumption: that Britain should have no taxes, and no wel-

fare. They are saying, in other words, that the United Kingdom should provide its productive environment free of charge. Germans, through taxes and high wages, charge money for investment in Germany. France charges money for investment there. Americans will not be surprised to learn that the Internal Revenue Service is still in action. But, say libertarians, Britain should ignore its competitors, and give investors a free lunch. Yet libertarians are also the people who wear buttons saying TANSTAAFL—"There ain't no such thing as a free lunch."

A steel mill can charge only what the market will bear. If there were an infinite number of steel mills, and an infinite number of users of steel, the price of the metal would be almost zero, because every mill would rather get something, however little, than nothing. Likewise, the United Kingdom cannot name its own price, because it is not the only productive location on earth. But it is equally absurd to ask that it charge nothing, because its competition is not infinite.

As a result, the principle of equal work for equal pay everywhere makes no sense at all, because work is not all there is to the person who produces it. However matter-of-fact it may be for a skilled worker in Italy to belong to a union dominated by Communists, that fact drives out investors and lowers the value of his work. If he were made aware of this fact, he would take a new look at this matter, and whether it should continue to be a fact. But so long as even conservative economists insist that politics has nothing to do with economics, and join with Marxists in insisting that unequal pay for equal work is the result of a plot, poor countries will concentrate, not on becoming productive, but on looking for the plot.

It might be added that no libertarian will put his money where his mouth is. I once asked a libertarian who was upset at the idea that labor should be worth more in El Paso than in Tijuana about where he would put his money. Not surprisingly, it turned out that he would never consider investing his money in Tijuana at the same rate of interest he would receive in El Paso. Capital, it turns out, is very different if it is invested in Mexico than when it is invested in Texas. There is nothing artificial about a national border when a libertarian's own capital crosses it.

Libertarian and "free market" theories imply the ideal of a single, free market world, in which the artificial restrictions imposed by separate political units are removed. I see such a unitary body politic as a monopoly demanding what its captive market will bear. Every libertarian expects the exclusive owner of any product to demand as much as he can for his product, without regard to the fact that, in the long run, his greed may reduce everybody's standard of living, including his own. A world state could set taxes at ninety percent or more, because the only choice any firm might have would be to pay the taxes or go out of business. But the libertarian/old rightist assumes that his world state would not act like the monopoly it is.

Marxists ignored competition. They therefore concluded that a single state-owned company would be the most productive, since it would provide the maximum economy of scale. Libertarian economics is based on a similar error. Ignoring competition between states, he concludes that a world state will provide minimum taxation and maximum competition. He scorns the social-

ist, who says that competition is not necessary to force companies to do their best, but he assumes that a single, world-wide electorate would not, sooner or later, behave like the societal monopoly it is.

In the real world, political separation limits the power of any one state over the free market within its borders. If taxes or wages rise too high, investors may choose to go elsewhere. Each society thereby receives the rewards its performance earns.

Against this competitive function, there is the argument that political separation leads to war. That is the thesis behind the United Nations. But the fact is that, throughout the twentieth century, no two democratic states have been at war with each other, though the League of Nations and the United Nations both presided over a world in which war was commonplace. It is not in artificial political unity, but in a movement against totalitarianism and authoritarianism, that the road to peace lies. In such a movement, neither the League nor the UN has ever pretended to take part. Popular rule and national sovereignty are the directions in which the world must move, in order to secure peace to the full extent that the limitations of human nature make it possible.

The New Right, therefore, is not only politically practical, but economically sound, in demanding the enforcement of immigration restrictions. By the same token, we do not advocate an end to welfare, though we do feel, as witness the competitive economic condition of the United States, that it has gone too far. We have no use for the United Nations as the way to peace, because it quite clearly has nothing to do with addressing the causes of war. All these policies dovetail into a rational, and a truly free market, political economy. ●

VOLUNTEER FIREFIGHTERS

● **Mr. SARBANES.** Mr. President, thousands of communities throughout the Nation enjoy the many benefits of necessary fire protection services because of the selfless efforts of volunteer firefighters.

On the Eastern Shore of my own State of Maryland the spirit of volunteerism is very strong, as men and women daily endanger their lives to protect the public safety. These public-spirited citizens provide essential services to protect lives and property that many local communities would otherwise be unable to offer.

Mr. President, I ask my colleagues to join me in recognizing the outstanding work performed by volunteer firefighters, and I ask that the editorial from the Easton Star-Democrat be inserted in the RECORD.

[From the Star-Democrat, July 16, 1982]

THANKING THE VOLUNTEERS

Fire companies throughout the Eastern Shore use the summer months to hold carnivals, flea markets and other fundraisers to complement government funds and private donations allocated to them.

The operation of Mid-Shore fire companies and ambulance squads through history is among the examples of volunteerism at its best. Members of the community, who work in other capacities to earn a living for themselves and their families, dedicate themselves to the community's safety by re-

sponding at a moment's notice to situations which often pose an immediate threat to their own safety. The service they provide is immeasurable. Their efforts are irreplaceable.

The activities staged by the fire companies are the perfect opportunity for the public to say thanks simply by participating. Small donations are required, but the return in recreational value is great. And it is a startlingly small price to pay to aid in the protection of the entire community.

Figure, for instance, that Talbot County provided the Easton Fire Company \$21,600 last year. Figure, for instance, that Talbot County provided all county fire companies a total of less than \$130,000 last year.

Talbot's fire companies and ambulance crews made a total of 2,356 calls last year. That comes to about \$55 dollars per call.

Now, figure that in Salisbury, where they have been paying firemen for some 30 years, the fire company and ambulance crew salaries came to \$888,000 last year. That's exclusive of operational costs.

Though particular situations, such as debt retirement and building upkeep, vary from company to company on the Mid-Shore, the debt of gratitude merely for the time volunteered by these individuals is immense.

Anything the public can do to help repay that debt is money well spent, and that goes for all communities on the Mid-Shore, not just in those where firemen and ambulance crewmen are especially busy. The actual cost of responding to a call is minor compared with that of maintaining fire and ambulance operations. The initial cost for equipment must be paid, and the equipment must be kept up-to-date and in good repair.

The volunteers spend additional hours keeping themselves in good tune and up-to-date on modern firefighting and rescue techniques.

So when you hear of activities sponsored by your local fire department, don't think it is just someone else trying to reach into your pocket. Think of it as cheap insurance that provides some family fun as well.

In the most literal sense, it is the least you can do. ●

SALISBURY, MD. CELEBRATES SESQUICENTENNIAL

● **Mr. SARBANES.** Mr. President, it is a great pleasure to recognize the 250th anniversary of the city of Salisbury. As a native of this great city, I fully share the pride of its citizens in witnessing this milestone event.

For 250 years the city of Salisbury has served as a remarkable example of a community working together for the common good. It has created an outstanding environment in which hard-working citizens raise their families.

I can remember as a young man working in my family's restaurant and attending Wicomico County Senior High School the values that my parents sought to teach their children—values fundamental to our democracy. These values are shared by the proud people of Salisbury.

I am confident that the next 250 years will prove to be years of further great achievement for the city of Salisbury.

Mr. President, I ask my colleagues to join us in saluting the city of Salisbury during its sesquicentennial celebration, and I ask that the article from the Baltimore Sun, as well as the 50-year-old articles from the Baltimore News published during the city's bicentennial celebration, be inserted in the RECORD as a tribute to the citizens of this jewel on Maryland's Eastern Shore.

[From the Baltimore (Md.) Sun, Aug. 8, 1982]

SALISBURY'S ANNIVERSARY IS CAUSE FOR CELEBRATION

(By Mary Corddry)

SALISBURY.—Salisbury's nine-day celebration of its 250th anniversary began with a flourish Friday when 34 visitors from Salisbury, Wiltshire, England, flew in from Baltimore.

The landing of the Northern Irish-built Shorts 330 commuter airplane, based here, with its British passengers was, in a sense, representative of what the Eastern Shore city has to celebrate.

Like surrounding towns that may look more Colonial, Salisbury has a deep sense of its Eighteenth Century roots, and the delegation from England was a personal affirmation of historic ties.

But unlike adjacent towns, Salisbury is no longer a quaint, bucolic village. It is a bustling and growing economic center that supports a busy airport and commuter airline that can accommodate guests from faraway places in a distinctly Twentieth Century way.

The connection to Salisbury, England, dates to the 1600s when the original owner of land at the head of the Wicomico River noted its similarity to the English city on the Avon River.

About 50 years later, in 1732, a small group of businessmen with surnames still common here recalled the association and got the General Assembly in Annapolis to pass, on August 8, a bill designating 15 acres to be blocked off in lots for a town. It is the 250th anniversary of that event that the British Salisburyans were invited to help commemorate.

The visitors will stay at local homes and be guests of honor at parades, a historical pageant, sports events, a crab feast and a dizzying schedule of dinners, luncheons, teas and other entertainment. They will also get to see just how far Salisbury has come in the last 250 years.

Salisbury, situated at the Shore's geographic center, is also its commercial center, with a burst of development in the last decade that led some experts to call it "the hottest place in the state."

From the time of Salisbury's founding, ambition rather than the good life seems to have been the driving force of the community's business and civic leaders.

There is little sign here of the early Americana, waterfowl, workboats or country estate life that "Eastern Shore" has come to mean. Salisbury is more likely to be represented by the steel skeleton of a multi-family housing project or shopping complex, or the innovative architecture of the \$28 million Peninsula General Hospital and its recently added oncology unit, which dominate the center of town.

In Salisbury, community pride is based more on progress than heritage, and progress is demonstrated no more dramatically anywhere than in the rapid growth of its air traffic in the last decade.

Richard A. Henson, of Hagerstown, who developed one of the first—and today, one of the biggest—commuter airlines in the nation, began his Allegheny Commuter service here in 1968 and contracts with what is now USAir. There are now 28 flights a day between Salisbury-Wicomico County Regional Airport and the Baltimore-Washington International and Washington National airports. It was Mr. Henson's commuter line that flew in the visitors from Salisbury, England.

The entire Henson line is based and maintained in expanded facilities at the Salisbury airport, so that in Maryland Salisbury is second only to BWI in air traffic. Salisbury has been described in aviation publications as "the model commuter city in the United States."

Salisbury's bicentennial celebration 50 years ago came during the heart of the Great Depression after a decade of the greatest growth in the town's history.

In a similar pattern, next week's celebration follows a boom in the 1970s during which, at one point, over 10 percent of the nonresidential construction in the state was under way in Salisbury.

"Building permits are behind this year," Robert L. Kiley, executive director of the Salisbury-Wicomico Economic Development Corporation, said last week. "The economic slowdown in the construction and real estate fields here are affected by the national slowdown. But retail sales are ahead of last year."

An all-out effort is in progress to bring new life into one of the town's weakest areas, its central business district.

The money in Salisbury is not brought in from elsewhere. It is "generated here and spent here," as Mr. Kiley put it, by doctors, lawyers, business and industry ranging from electronics to canning.

Most of the firms here are "as homegrown as the farm produce," Mr. Kiley said. "Economically this is still one of the healthiest spots in the state of Maryland."

Salisbury is healthy enough to have budgeted \$100,000 for this week's Sesqui-Bi-Centennial celebration. It was planned for over a year by an incorporated committee with "seed money" put up by the town, said David F. Rodgers, a local banker and chairman of the Sesqui-Bi-Centennial.

The celebration of Salisbury's founding in 1732 will be straight from the Americana of Norman Rockwell.

Yellow banners reading "City of Salisbury Sesqui-Bi-Centennial, 1732-1982" bedeck Salisbury like tinsel in December, and along Main Street some townspeople are growing beards to full thickness in the summer humidity for the first time since the nation's bicentennial six years ago.

About 280 people are rehearsing daily for a historical pageant to run nightly through next week before a 250-foot backdrop at the Wicomico Senior High School football stadium.

Among other things, the pageant will show how agriculture made a transition from general produce to the big broiler industry, the growth of Perdue Farms, Inc., which is headquartered in the town, and the dominance of corn and soybeans grown for the company's feed mills.

While the Perdue name is known to both the Pittsburgh pageant producers and members of the British delegation, Salisbury is not by a long shot a company town.

"This town has a totally diversified economy," Mr. Kiley said.

The small-town atmosphere of this week's celebration and the rural image conjured up

by the poultry industry are in sharp contrast to some of the more sophisticated ambitions of its business community.

Many of these ambitions emanate from the Greater Salisbury Committee which a few years ago launched an intensive effort to promote this town as the administrative headquarters for offshore oil exploration and development, a concept now dormant.

Another idea, to develop the airport into a training center for commuter pilots and maintenance personnel from all over the country, has been scaled down. A flight simulator for the Shorts 330, the first in the United States for training commuter airline pilots, was acquired with the help of the Maryland Department of Economic and Community Development. It is used mainly to train Henson pilots.

Many of the ideas of the Greater Salisbury Committee are tossed out like "trial balloons to see if they will catch the imagination here and beyond," said Frank H. Morris, a former Salisbury mayor and the new president of the Greater Salisbury Committee.

The committee is limited to 55 business and professional men who head their own firms. The committee "keeps good lines of communication open" with the Wicomico County Council and Salisbury mayor and Council "to make things happen," Mr. Morris said.

The British Salisburyans were invited last April by Mr. Rodgers during a five-day visit to the Wiltshire Salisbury.

The delegation from England includes Salisbury Mayor Beverley Head who, Mr. Rodgers said with some awe, wears in the full regalia of her office a gold medal bearing the founding date of her city—1264.

One of the visitor's dinner hostesses will be Bertha Adkins, a nationally prominent Republican during the Eisenhower years and Salisbury native who went to Salisbury, England, in 1932 to invite a delegation to the Shore town's bicentennial celebration that year. Mayors and civic leaders of the two cities have exchanged visits and hospitality ever since.

[From the Baltimore News, Aug. 9, 1932]

15,000 ON HAND AS SALISBURY OPENS BICENTENNIAL

SALISBURY, MD., Aug. 8.—Salisbury is 200 years old today. Ushered in last night by a religious and civic festival, witnessed by 15,000 of its own people and its neighbors, the city's six-day birthday party went into full swing today with the official welcoming of its most distinguished guest, Councilor J. Sidney Rambridge, Mayor of Salisbury, England.

In a garlanded court of honor set up along the main street of the town, State Comptroller William S. Gordy, Jr., chairman of the Bicentennial Commission, this afternoon was to declare the week of celebration open.

Governor Albert C. Ritchie will make the first address, bringing to the people of Salisbury the greeting of the entire State. At the same time he will officially greet Mayor Rambridge in the name of the Commonwealth.

The address of welcome will come from Mayor Wade H. Insley before Mayor Rambridge brings his greetings from the mother city.

OFFER SILVER TROPHY

He will offer a silver trophy sent by the citizens of the 700-year-old English township—and read greetings from Lord Arun-

dell of Wardour, head of an ancient Wilshire family with which Lord Baltimore, founder of Maryland, was connected.

Salisbury on its part will present the Councilor with the key to the city, encased in a sterling casket of symbolic design. The key and casket are to become the property of the people of Salisbury, England, but to the Mayor himself will be offered a rose pattern fruit bowl, personal trophy from the citizens of the Eastern Shore city.

TENNIS TOURNAMENT ON

Through the day the tennis tournament, inaugurated yesterday, will continue and in the evening the Bicentennial Band will give another of its concerts in the municipal park.

Tomorrow afternoon will see the arrival of the Maryland National Guard Air Squadron and at night a great historic and symphonic pageant will be staged in the vast natural amphitheatre of the park.

Success and significance of the carefully planned festival was augured last night when thousands thronged into gaily bedecked Salisbury to join in outdoor religious services and see the dedication of a spectacular new illuminated fountain.

CROWD AROUND LAKE

The great crowd lined the slopes above the park lake. Floodlights swept an improved stage and amplifiers carried music and words to the massed listeners. After a stirring concert from the Bicentennial Band, a joint choir from all the churches moved into place.

The Rev. J. N. Stewart of the Allen Memorial Baptist Church offered the invocation. Dr. Justin Wood of the Asbury Methodist Church conducted the anthems.

The evening sermon was delivered by Dr. Lewis S. Mudge, leader of the Presbyterian Church. The minister speaking on "The Church and the Nation," warned America against lawlessness, but said that those who speak of a present "wave of law-breaking" don't know what they're talking about.

He continued.

"The truth is that our fathers ate sour grapes and their children's teeth are set on edge. Many of those who assisted in the organization of the 13 original colonies selected what laws they would obey and what they would disobey.

"As their successors in wave after wave of immigration swept westward over the mountains, establishing new frontier after frontier they, too, frequently took with them such of our laws as they preferred and left the others behind.

"We have forgotten that the moral law must be at the heart of any stable social order."

LIGHT FOUNTAIN

At the conclusion of the service listeners turned their attention to where the great new fountain waited under its canvas, across the lake from the stage. All lights were abruptly darkened.

Miss Betty Springs Dryden cut a ribbon. Her father, F. H. Dryden, City Engineer, switched on fountain lights and, water simultaneously. Suddenly there shot up 30 feet into the air a great geyser of flame colored water.

The crowd cheered. Myriad smaller jets, rainbow-hued played beneath the geyser and between them tinted mists suffused the air.

For a long time the crowd stood cheering while the engineer made brilliant colored pictures with the fountain and the lights, the whole said to be one of the finest and

most spectacular in three States. During each three-minute cycle 14 changing color combinations transformed the playing waters, moving in intricate designs.

Guarded by a State trooper and escorted by his hostess, Mrs. A. J. Vander Bogart and her son, Hugh Vander Bogart, who arrived from New York yesterday, Mayor Rambridge joined in both religious and civic ceremonies. Though he made no formal public appearance, he was quietly welcomed by long lines of residents of Salisbury.

Mrs. Vander Bogart is the daughter of the late Governor E. E. Jackson and her home at Tony Tank is one of the traditional landmarks of the Eastern Shore.

There were two hard-fought tennis matches played in the second round of the tournament which is a feature of the celebration.

Charles T. Smith, Princess Anne, Md., defeated Levin L. Waters, also of Princess Anne, 7-5, 9-7.

In the other match Daniel Ellis of Lewes, Del., defeated J. W. Lewis of Chestertown, 8-6, 8-6.

HISTORICAL EPISODE FEATURE CELEBRATION AT SALISBURY

SALISBURY, Md. Aug. 9.—Two centuries of a community's development, from the conquest of primitive territory to visions of yet greater achievements to come, will be re-enacted here tonight as two-hundred-year-old Salisbury reviews its own history in symbolic pageantry.

Ten dramatic episodes of the pageant of growth, touching highlights of Salisbury history, will be unfolded in the natural amphitheatre of Municipal Park on the evening of the second day of the city's bicentennial fete.

The celebration was officially inaugurated yesterday afternoon with the welcoming of Councilor J. Sidney Rambridge, Mayor of Salisbury, England, who crossed an ocean to join in the ceremonies.

RITCHIE PARTICIPATES

Governor Ritchie, State Comptroller William S. Gordy, Jr., and Mayor Wade H. Insley participated.

Ms. Margaret Black Ross, pageant director, working with Dr. William J. Holloway, chairman, has woven past and future into a spectacle which 330 lineal descendants of the founders of Salisbury will portray tonight.

Thousands of visitors, first welcomed for preliminary services Sunday night and again present at the rites yesterday, and expected to crowd the banks of Park Lake tonight as the historic pageant moves into view.

Flood lights will illumine the stage, amplifiers will broadcast words, and stirring music will quicken the march of events.

COSTUMED DANCERS

Costumed dancers will offer a prologue to the first episode, the settlement of a new town. In this scene Indians will be seen at the first news of the white man's coming.

Capture and execution of "Ben" Allen, Tory, robber and pirate, will be the climax of the second episode.

In the interlude, the familiar tunes of the Civil War era will be played again in preparation for episode three, showing how Salisbury was made queen of Wicomico, formed of parts of the counties of Worcester and Somerset.

A piquant picture of an older time will be revived as "Jim" Jeams, the last town crier, relates the news of the day during the second interlude.

HONOR FOR JACKSON

Episode four will show the townspeople in a demonstration for Elihu E. Jackson at the time of his nomination as Governor of Maryland.

Drama of the World War area will make the fifth episode, reaching its climax when veterans return as a guard of honor for a gold star mother.

Progress, vision, courage and faith will attend Queen Salisbury, depicted by Miss Carolyn Waller, as she takes her place in the triumphal procession which will open the second half of the pageant.

Growth of agriculture, transportation, building and industry will be shown in the succeeding four sections.

In the dramatic finale, Salisbury, knowing the past, is to receive with Maryland and promise of the future.

Among the thousands of spectators who will observe the historic procession will be Mayor Rambridge and his party from England, city officials and other honored guests.

BOYS' DAY PLANNED

Salisbury is to be governed by youths tomorrow as a feature of "Boys' Day," a "Mayor" as well as "Magistrates" and "Firemen" having been appointed. In presenting a beautifully bound copy of the History of Salisbury to Governor Ritchie today the boys informed the Governor they would enforce a 100-year-old statute forbidding sale of cigars to minors, which they claim to have discovered, warning prospective purchasers and sellers they would be liable to jail sentences of "at least 10 minutes."

At noon today the Chamber of Commerce gave a luncheon in honor of Alfred Batt, president of the Chamber of Commerce of Salisbury, England, and the city's other British guests.

PRESENTS PAINTING

Mr. Batt presented the local chamber with an oil painting of Salisbury Cathedral, one of the most beautiful in England, and was the recipient of a desk set, the gift of the Salisbury, Md., body.

Among those at the luncheon were Mayor J. Sidney Rambridge of Salisbury, England, and his brother; the County Commissioners of Wicomico county and Mayor Insley.

The National Guard air squadron is scheduled to arrive for spectacular maneuvers during the afternoon. At the same time the tennis tournament, started Sunday afternoon, will continue.

Hundreds of former Salisburyans have made the bicentennial celebration the occasion for reunion with family and friends. The officials bear addresses as widely separated as Belfast, Ireland; Glasgow, Scotland, and Hollywood, California.

The streets are filled with music by day and by night, as great amplifiers, affixed to Main street lights, pour forth their festive airs.●

MEXICAN RESOURCES SHOULD BE USED TO EDUCATE ITS CHILDREN

● Mr. EAST. Mr. President, while the U.S. Supreme Court rules that illegal aliens are entitled to a free education in this country, the Mexican Government takes the more sensible position that Mexican resources should be used to educate Mexican children, according to a story entitled "Mexico Tightens Educational Restrictions," pub-

lished in the Laredo, Tex., Morning Times of July 11, 1982. I ask that this article be printed in the RECORD.

The article follows:

MEXICO TIGHTENS EDUCATION RESTRICTIONS
(By Becky Cavazos)

At a time when the U.S. Supreme Court has placed this nation in the position of responsibility over the education of all children, whether of U.S. or foreign birth, the government of Mexico has chosen to tighten its liberal spending on public education.

The government has taken an adverse position against Mexico residents who claim to have dual citizenship and has restricted the right to a public education to undisputed citizens of that republic. The change in policy in effect terminates previous sanctions on dual citizenship for educational purposes.

An order from the federal office of education in Mexico City has established new rules for the national school system to force children with dual citizenship to give up their claim to citizenship by foreign birth certificates or lose their right to a free public education in Mexico.

In the form of a federal mandate, the educational policies handed down to take immediate effect on all levels of the free public school system in Mexico, touches perhaps on every border community.

"The government of Mexico cannot be held responsible for educating children of foreign origin," said Dr. Ismael Villarreal de Pena, head of the first office of civil registry in Nuevo Laredo.

Villarreal said thousands of children in border communities claim citizenship in both the United States and Mexico, attested by certificates of birth in the U.S. and the rights of citizenship in Mexico by virtue of their parent's nationality.

According to the constitution of Mexico, all children of Mexico-born citizens have the rights of citizens in that country. The new ruling contradicts that constitutional right.

"The government of Mexico does not have the resources to educate children that are not Mexican citizens," Villarreal stated.

He said that with the country's current economic crisis, it would be unreasonable to allow U.S. citizens to occupy the classroom seats of Mexico citizens.

"Many don't want to be citizens . . . and under a free educational system they may be trained to be engineers, technologists and even doctors . . . and there's nothing we can do to keep them from leaving Mexico and going to the United States where they were born."

"The government does not have the money to educate foreigners," he reiterated.

Villarreal noted that it is a common practice for children with dual citizenship to receive a free public education in Mexico and return to the United States to continue their careers.

The official's concern echoes the government's sentiments towards the loss of benefits from educating a group of highly trained profesionistas, who as adults chose to take residence in the United States.

The director of the civil registry noted that it is illegal to file birth certificates in both countries, as the common practice when parents sign false affidavits in Mexico claiming that their U.S.-born children were born in the Republic of Mexico.

Although the new policy is now strictly enforced throughout the school system, its effects are felt only in the levels of transition.

A secondary level school professor and federal school inspector in Nuevo Laredo, Roberto Munoz, explained that certification of Mexican citizenship is required at the junction between the sixth grade level and the junior high or secundaria. This is also true when students complete the high school grades and wish to attend the preparatoria and later, the facultad or university level.

A check of the federal registry into dual citizenship is made and the student is forced to decide on which citizenship he prefers.

Under the new regulation, students without a certification of birth in Mexico do not receive certified accreditation of their studies and their course work is not transferable to the succeeding educational level.

When contacted this week at the Mexican Consulate here, Consul Miguel Najera Diaz was unaware of a change on the Mexico dual citizenship policy as it relates to education.

PROGRAM

Mr. BAKER. Mr. President, it appears that there is nothing else that can be done today. Members should know and will recall, I am sure, that I had hoped we could dispose of a number of amendments, at least to the extent of completing debate and stacking the votes until tomorrow. We have not done that. We have dispatched one amendment that was accepted. The committee amendments have been adopted en bloc, which is more than 100 committee amendments, with the exception of three, which have been specifically reserved. I regret that we could not go further with the bill today, but we simply could not. There was nothing else that could be done.

I reiterate the remark I made this morning during the opening, Mr. President: Members should be aware that this week on our agenda we have to finish the supplemental appropriations bill and the immigration bill in order to get to the debt limit bill next week—all in order to realize our desire to make the Senate recess schedule conform with that of the House.

I remind Senators once again that the recess schedule for the Senate is still August 27. It has not been changed to August 20. The memorandum that I sent around sometime ago, which the minority leader and I have discussed at some length on more than one occasion, was that if we could finish the "must" list of legislation between now and August 20, we would go out on the 20th, as will the House of Representatives.

That means we have to finish the supplemental. It means we have to do the immigration bill and the debt limit and any conference reports that are

available to the Senate prior to that time. That is a tall order.

Mr. President, Senators should be on notice that any night this week could be a late night. They should be on notice that this Saturday and next Saturday are potential days of business for the Senate. I do not say these things in any way to intimidate, which I could not if I wanted to—witness the fact that there are so many absentees today who paid absolutely no attention to my admonition. The only reason for reiterating these remarks at this time is to let Members know that either we do these things or we stay until the 27th or beyond to finish them. That is simply our responsibility and we shall do these things.

Once again, Mr. President, Senators should not set their plans in concrete for the week between the 20th and 27th of August. Members should be aware that this will be a tough 2 weeks ahead of us as we try to dispatch the balance of measures on the "must" list of legislation.

ORDER FOR RECORD TO REMAIN OPEN UNTIL 4:30 P.M. TODAY

Mr. BAKER. Mr. President, I ask unanimous consent that the RECORD remain open this afternoon until the hour of 4:30 p.m. for the introduction of bills and resolutions, and insertion of statements by Members.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL TOMORROW AT 10 A.M.

Mr. BAKER. Mr. President, I see no other Member seeking recognition. Therefore, I move, in accordance with the order previously entered, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to and, at 3:10 p.m., the Senate recessed until tomorrow, August 10, 1982, at 10 a.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate August 6, 1982, under authority of the order of the Senate of August 5, 1982:

THE JUDICIARY

Ross T. Roberts, of Missouri, to be U.S. district judge for the Western district of Missouri, vice John R. Gibson, elevated.

DEPARTMENT OF JUSTICE

Edward R. Camacho, of Guam, to be U.S. Marshal for the district of Guam for a term of 4 years vice Juan G. Blas, term expired.

MERIT SYSTEMS PROTECTION BOARD

Dennis M. Devaney, of Maryland, to be a Member of the Merit Systems Protection Board for a term expiring March 1, 1988, vice Ronald P. Wertheim, resigned.

HOUSE OF REPRESENTATIVES—Monday, August 9, 1982

The House met at 12 o'clock noon. The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious God, with all the uncertainties of life about us, we come before You and place our innermost needs. We ask that Your spirit will sustain those whose lives know anxiety or worry, and give comfort and strength to those who look to You for meaning in daily lives. Give us all the blessings of faith, hope, and love that we will approach our tasks mindful of our opportunities to be stewards of Your good purpose and witnesses to Your peace. In Your holy name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill and a joint resolution of the House of the following titles:

H.R. 1526. An act to amend the Accounting and Auditing Act of 1950 to require ongoing evaluations and reports on the adequacy of the systems of internal accounting and administrative control of each executive agency, and for other purposes; and

H.J. Res. 541. Joint resolution concerning the successful completion of the test flight phase of the Space Shuttle program.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2363. An act to amend the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

UNEMPLOYMENT COMPENSATION PROGRAM NEEDS TO BE MORE RESPONSIVE AND FLEXIBLE

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, it is no surprise to any of us that unemployment is on the upswing. But it will probably shock many people to learn that it is hitting—and hitting hard—

not only in the Detroit of America, but also in places like Wichita, Kans. Places like Wichita are usually not thought of as having high unemployment rates, but they do today and their people are hurting because of it.

In fact, because of the way our extended unemployment benefits program works, many of them are hurting more than people in similar situations in high unemployment States. In my home State of Kansas, the insured unemployment rate just recently crossed the 4-percent level which triggered "on" the extended benefits program, but in the city of Wichita unemployment has been at levels that would have triggered eligibility for nearly 5 months. Just because the city happens to be located in a State that has lower unemployment than needed to set off the trigger, is no reason that these people who are out of work should not be able to get badly needed benefits during prolonged periods of unemployment.

To straighten this out, I am today introducing legislation that would do two things. First, it would freeze the extended benefits program trigger percentage at 4 percent instead of increasing to 5 percent which is now scheduled in the next few weeks. Second, the bill would allow States, by enacting legislation of their own, to trigger in high unemployment "labor market areas" within the State when unemployment exceeds 5 percent within that area even when the State generally does not meet the criteria for extended benefits eligibility.

People are suffering in places like Wichita, and the suffering becomes worse and worse as more jobs are lost and being out of work drags on and on. Enactment of this legislation would at least give them the assurance of access to badly needed extended unemployment benefits.

TAX CUTS AND THE SCALES OF JUSTICE

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, yesterday Secretary Baldrige acknowledged what many of us have known for the past year, and that is that last year's tax cut for the wealthy was grossly excessive. It is bleeding the Treasury, causing the highest deficits in history.

Something must be done to plug the gap. What does the administration propose? The largest tax increase in history. And whom do they propose to

tax? The wealthy beneficiaries of last year's tax cut? Well, hardly.

They want to get more taxes from people who have to pay big hospital bills. They want to reduce medicare and Medicaid payments and cut back further on retirement benefits for America's elderly.

They have learned that the arithmetic of last year's experiment was grossly out of balance; but so were the scales of elemental justice. And they have not yet seemed able to learn that.

WORLD BANK LOAN TO HURT IRON ORE INDUSTRY IN MINNESOTA

(Mr. OBERSTAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBERSTAR. Mr. Speaker, tomorrow the Loan Board of the World Bank will make one of the most important loans in that institution's 37-year history. The Board will decide whether to approve an application from Brazil for a \$300 million loan at an 11-percent interest rate.

That loan will leverage an investment of \$6 billion to develop what is probably the world's largest iron ore deposit, some 35 billion tons of iron ore.

Brazil and a consortium of international lenders plan to sell that ore at 25 percent less on the world market than we can produce it in Minnesota and sell it at lower lake ports, in the Lake Erie steel-producing district.

At a time when mining in Minnesota and the Upper Peninsula of Michigan is at an all-time low, shut down tight, 90 percent of the iron ore miners are out of a job, the United States should not participate in the development of more surplus ore on the world market.

On behalf of the unemployed miners in northeastern Minnesota and the Upper Peninsula of Michigan, I have urged Treasury Secretary Regan to instruct the U.S. delegate to the World Bank to vote no on that loan.

NUCLEAR AGREEMENT WITH THE SOVIETS—A STEP TOWARD SANITY

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FINDLEY. Mr. Speaker, one morning in October 1945 I borrowed a

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

jeep from our 72d Seabee compound at Sasebo, Japan, and drove to nearby Nagasaki, where a few weeks before the U.S. Air Force had dropped the second atomic bomb.

My fellow Seabee and I put aside warnings about radiation contamination and rode throughout what was once a large city. Large steel beams were twisted like wet spaghetti. Except for a few gaunt structures at least a mile from the center of the blast, the rubble consisted of small chunks of masonry the size of a brick. Maybe I am the only Congressman to visit Nagasaki shortly after the blast.

As I have reflected on that desolate scene over the years, I mix gratitude to President Truman for ordering the bombing with a conviction that such instruments of destruction now have little military value.

I am grateful to Truman, because my Seabee unit was poised for what would have been a bloody invasion of Japan. His decision caused a lot of deaths, but it probably saved my life.

The bomb that leveled Nagasaki was a firecracker contrasted with even the smaller nuclear weapons of today.

But if Harry Truman could have seen firsthand what happened at Hiroshima, he probably would not have ordered the second bomb. He would have known that the impact of that one and only atomic blast was enough to end the war—and end the use of nuclear weapons.

What is needed now is a step toward sanity. We need a verifiable agreement with the Soviet Union to reduce the dangerous stockpile of nuclear weapons that now threatens the survival of civilization.

All we need, and all the Soviets need, is a sufficient inventory of nuclear weapons to give the other side pause—that is, to deter any nation from using these terrible instruments.

Both the United States and the Soviet Union have many times the inventory needed to establish that deterrence.

REDUCING THE DEFICIT—LET'S GET ON WITH IT

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, I regret the divisiveness and confusion that surrounds our efforts to formulate an effective policy at this critical time in our economic life. I cannot believe it a good political strategy for either party to work for anything but the necessary steps to improve the economy. A consensus about what is wrong should lead to corrective action, however heroic, not to ways to avoid responsibility or to affix the blame on someone else.

I personally believe the size of the potential deficit and the probable pre-

emption of available capital resources by the Government are at the center of the problem. I have heard of no course better designed to reduce these difficulties than the course we embarked on last year—direct action to reduce Government spending and the general level of taxation. Does anyone have a better suggestion than the outline contained in this year's budget? Why should we panic when we have a balanced plan and obviously have the capacity to carry it out?

The tax increases by whatever name you call them, do not reverse the thrust of last year's general tax reduction, but enhance compliance with existing law, and adjust taxation on a narrow base of businesses, some of which have had some forms of tax sanctuary. I hope the House will review the Senate bill carefully this week and attack tax avoidance while eliminating those changes which would have a more general impact. Twenty billion dollars is not too much to raise in this way when we are cutting programs by \$60 billion, and the two elements of deficit reduction should go forward in reassuring tandem. But they should go forward, or there will be plenty of blame to go around when our credibility as trustees of the Government's economic responsibility is being assessed by the electorate and future generations. It is not the time to squirm, cavil, retreat, or blame somebody else; it is time to act.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Wednesday, August 11, 1982.

REVISION OF TITLE 31, UNITED STATES CODE, "MONEY AND FINANCE"

Mr. SAM B. HALL, JR. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6128) to revise, codify, and enact without substantive change certain general and permanent laws related to money and finance as title 31, United States Code, "Money and Finance," as amended.

The Clerk read as follows:

H.R. 6128

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE 31, UNITED STATES CODE

SECTION 1. Certain general and permanent laws of the United States, related to money and finance, are revised, codified, and en-

acted as title 31, United States Code, "Money and Finance", as follows:

TITLE 31—MONEY AND FINANCE

SUBTITLE	Sec.
I. GENERAL.....	101
II. THE BUDGET PROCESS.....	1101
III. FINANCIAL MANAGEMENT.....	3101
IV. MONEY.....	5101
V. GENERAL ASSISTANCE ADMINISTRATION.....	6101
VI. MISCELLANEOUS.....	9101

SUBTITLE I—GENERAL

CHAPTER	Sec.
1. DEFINITIONS.....	101
3. DEPARTMENT OF THE TREASURY.....	301
5. OFFICE OF MANAGEMENT AND BUDGET.....	501
7. GENERAL ACCOUNTING OFFICE.....	701

CHAPTER 1—DEFINITIONS

Sec.
101. Agency.
102. Executive agency.
103. United States.
§ 101. Agency
In this title, "agency" means a department, agency, or instrumentality of the United States Government.
§ 102. Executive agency
In this title, "executive agency" means a department, agency, or instrumentality in the executive branch of the United States Government.
§ 103. United States
In this title, "United States", when used in a geographic sense, means the States of the United States and the District of Columbia.

CHAPTER 3—DEPARTMENT OF THE TREASURY

SUBCHAPTER I—ORGANIZATION

301. Department of the Treasury.
302. Treasury of the United States.
303. Bureau of Engraving and Printing.
304. Bureau of the Mint.
305. Federal Financing Bank.
306. Fiscal Service.
307. Office of the Comptroller of the Currency.
308. United States Customs Service.
309. Continuing in office.

SUBCHAPTER II—ADMINISTRATIVE

321. General authority of the Secretary.
322. Working capital fund.
323. Investment of operating cash.
324. Disposing and extending the maturity of obligations.
325. International affairs authorization.
326. Availability of appropriations for certain expenses.
327. Advancements and reimbursements for services.
328. Accounts and payments of former disbursing officials.
329. Limitations on outside activities.
330. Practice before the Department.
331. Reports.

SUBCHAPTER I—ORGANIZATION

§ 301. Department of the Treasury
(a) The Department of the Treasury is an executive department of the United States Government at the seat of the Government.
(b) The head of the Department is the Secretary of the Treasury. The Secretary is appointed by the President, by and with the advice and consent of the Senate.
(c) The Department has a Deputy Secretary of the Treasury appointed by the President, by and with the advice and consent of

the Senate. The Deputy Secretary shall carry out—

(1) duties and powers prescribed by the Secretary; and

(2) the duties and powers of the Secretary when the Secretary is absent or unable to serve or when the office of Secretary is vacant.

(d) The Department has an Under Secretary, an Under Secretary for Monetary Affairs, 2 Deputy Under Secretaries, and a Treasurer of the United States, appointed by the President, by and with the advice and consent of the Senate. The Department also has a Fiscal Assistant Secretary appointed by the Secretary. They shall carry out duties and powers prescribed by the Secretary. When appointing the Under Secretary, the President may designate the Under Secretary as Counselor. When appointing each Deputy Under Secretary, the President may designate the Deputy Under Secretary as an Assistant Secretary.

(e) The Department has 5 Assistant Secretaries appointed by the President, by and with the advice and consent of the Senate. The Assistant Secretaries shall carry out duties and powers prescribed by the Secretary. The Assistant Secretaries appointed under this subsection are in addition to the Assistant Secretaries appointed under subsection (d) of this section.

(f)(1) The Department has a General Counsel appointed by the President, by and with the advice and consent of the Senate. The General Counsel is the chief law officer of the Department. Without regard to those provisions of title 5 governing appointment in the competitive service, the Secretary may appoint not more than 5 Assistant General Counsels. The Secretary may designate one of the Assistant General Counsels to act as the General Counsel when the General Counsel is absent or unable to serve or when the office of General Counsel is vacant. The General Counsel and Assistant General Counsels shall carry out duties and powers prescribed by the Secretary.

(2) The President may appoint, by and with the advice and consent of the Senate, an Assistant General Counsel who shall be the Chief Counsel for the Internal Revenue Service. The Chief Counsel is the chief law officer for the Service and shall carry out duties and powers prescribed by the Secretary.

(g) The Department shall have a seal.

§302. Treasury of the United States

The United States Government has a Treasury of the United States. The Treasury is in the Department of the Treasury.

§303. Bureau of Engraving and Printing

(a) The Bureau of Engraving and Printing is a bureau in the Department of the Treasury.

(b) The head of the Bureau is the Director of the Bureau of Engraving and Printing appointed by the Secretary of the Treasury. The Director—

(1) shall carry out duties and powers prescribed by the Secretary; and

(2) reports directly to the Secretary.

§304. Bureau of the Mint

(a) The Bureau of the Mint is a bureau in the Department of the Treasury.

(b)(1) The head of the Bureau is the Director of the Mint. The Director is appointed by the President, by and with the advice and consent of the Senate. The term of the Director is 5 years. The President may remove the Director from office. On removal, the President shall send a message to the Senate giving the reasons for removal.

(2) The Director shall carry out duties and powers prescribed by the Secretary of the Treasury.

§305. Federal Financing Bank

The Federal Financing Bank, established under section 4 of the Federal Financing Bank Act of 1973 (12 U.S.C. 2283), is subject to the direction and supervision of the Secretary of the Treasury.

§306. Fiscal Service

(a) The Fiscal Service is a service in the Department of the Treasury.

(b) The head of the Fiscal Service is the Fiscal Assistant Secretary appointed under section 301(d) of this title.

(c) The Fiscal Service has a—

(1) Bureau of Government Financial Operations, having as its head a Commissioner of Government Financial Operations; and

(2) Bureau of the Public Debt, having as its head a Commissioner of the Public Debt.

(d) The Secretary of the Treasury may designate another officer of the Department to act as the Fiscal Assistant Secretary when the Fiscal Assistant Secretary is absent or unable to serve or when the office of Fiscal Assistant Secretary is vacant.

§307. Office of the Comptroller of the Currency

The Office of the Comptroller of the Currency, established under section 324 of the Revised Statutes (12 U.S.C. 1), is an office in the Department of the Treasury.

§308. United States Customs Service

The United States Customs Service, established under section 1 of the Act of March 3, 1927 (19 U.S.C. 2071), is a service in the Department of the Treasury.

§309. Continuing in office

When the term of office of an officer of the Department of the Treasury ends, the officer may continue to serve until a successor is appointed and qualified.

SUBCHAPTER II—ADMINISTRATIVE

§321. General authority of the Secretary

(a) The Secretary of the Treasury shall—

(1) prepare plans for improving and managing receipts of the United States Government and managing the public debt;

(2) carry out services related to finances that the Secretary is required to perform;

(3) issue warrants for money drawn on the Treasury consistent with appropriations;

(4) mint coins, engrave and print currency and security documents, and refine and assay bullion, and may strike medals;

(5) prescribe regulations that the Secretary considers best calculated to promote the public convenience and security, and to protect the Government and individuals from fraud and loss, that apply to anyone who may—

(A) receive for the Government, Treasury notes, United States notes, or other Government securities; or

(B) be engaged or employed in preparing and issuing those notes or securities;

(6) collect receipts;

(7) with a view to prosecuting persons, take steps to discover fraud and attempted fraud involving receipts and decide on ways to prevent and detect fraud; and

(8) maintain separate accounts of taxes received in each State, territory, and possession of the United States, and collection district, with each account listing—

(A) each kind of tax;

(B) the amount of each tax; and

(C) the money paid as pay and allowances to officers and employees of the Department collecting taxes in that State, territory, possession, or district.

(b) The Secretary may—

(1) prescribe regulations to carry out the duties and powers of the Secretary;

(2) delegate duties and powers of the Secretary to another officer or employee of the Department of the Treasury;

(3) transfer within the Department the records, property, officers, employees, and unexpended balances of appropriations, allocations, and amounts of the Department that the Secretary considers necessary to carry out a delegation made under clause (2) of this subsection;

(4) detail, in addition to details authorized under another law, not more than 6 officers and employees of the Department at any one time to enforce the laws related to the Department, except that of those 6 officers and employees not more than 4 officers and employees—

(A) paid from the appropriations for the collection of customs may be so detailed;

(B) paid from the appropriations for internal revenue may be so detailed; and

(C) paid from the appropriations for suppressing counterfeiting and other crimes may be so detailed;

(5) authorize, at rates and under conditions prescribed by the Secretary, the private use of telephone lines controlled by the Department when the use does not interfere with Department business; and

(6) buy arms and ammunition required by officers and employees of the Department in carrying out their duties and powers.

(c) Duties and powers of officers and employees of the Department are vested in the Secretary except duties and powers—

(1) vested by subchapter II of chapter 5 of title 5 in administrative law judges employed by the Secretary; and

(2) of the Comptroller of the Currency.

§322. Working capital fund

(a) The Department of the Treasury has a working capital fund. Amounts in the fund are available for expenses of operating and maintaining common administrative services of the Department that the Secretary of the Treasury, with the approval of the Director of the Office of Management and Budget, decides may be carried out more advantageously and more economically as central services. Amounts in the fund may total not more than \$1,000,000 at any time.

(b) Amounts in the fund remain available until expended. Amounts may be appropriated to the fund.

(c) The fund consists of—

(1) amounts appropriated to the fund;

(2) to the extent transferred to the fund by the Secretary, the reasonable value of supply inventories, equipment, and other assets and inventories on order for providing services out of amounts in the fund, less related liabilities and unpaid obligations;

(3) amounts received from the sale or exchange of property; and

(4) payments received for loss or damage to property of the fund.

(d) The fund shall be reimbursed, or credited with advance payments, from amounts available to the Department or from other sources, for supplies and services at rates that will equal the expenses of operation, including accrual of annual leave and the depreciation of plant and equipment. Amounts the Secretary decides are in excess of the needs of the fund shall be deposited at the end of each fiscal year in the Treasury as miscellaneous receipts.

§323. Investment of operating cash

(a) To manage United States cash, the Secretary of the Treasury may invest any

part of the operating cash of the Treasury for not more than 90 days. Investments may be made in obligations of—

- (1) depositaries maintaining Treasury tax and loan accounts secured by pledged collateral acceptable to the Secretary; and
 - (2) the United States Government.
- (b) Subsection (a) of this section does not—

- (1) require the Secretary to invest a cash balance held in a particular account; or
- (2) permit the Secretary to require the sale of obligations by a particular person, dealer, or financial institution.

(c) The Secretary shall consider the prevailing market in prescribing rates of interest for investments under subsection (a)(1) of this section.

§324. Disposing and extending the maturity of obligations

- (a) The Secretary of the Treasury may—
 - (1) dispose of obligations—
 - (A) acquired by the Secretary for the United States Government; or
 - (B) delivered by an executive agency; and
 - (2) make arrangements to extend the maturity of those obligations.

(b) The Secretary may dispose or extend the maturity of obligations under subsection (a) of this section in the way, in amounts, at prices (for cash, obligations, property, or a combination of cash, obligations, or property), and on conditions the Secretary considers advisable and in the public interest. However, the Secretary may not dispose of obligations of one issuer, held by the Secretary at one time, having on the date of disposal a total face or par value of more than \$1,000,000 or, if no-par obligations, a stated or book value of more than \$1,000,000.

(c) The authority under this section is in addition to authority under another law.

§325. International affairs authorization

(a) Under regulations prescribed by the Secretary of the Treasury, the Secretary may provide officers and employees of the Department of the Treasury carrying out international affairs duties and powers of the Department with allowances and benefits comparable to those provided under chapter 9 of title I of the Foreign Service Act of 1980 (22 U.S.C. 4081 et seq.).

(b) The following amounts may be appropriated to the Secretary for the fiscal year ending September 30, 1982:

- (1) not more than \$22,896,000 to carry out the international affairs duties and powers of the Department (including amounts for official functions and reception and representation expenses).

(2) not more than \$1,000,000 for increases in—

- (A) pay, under section 5382(c) and subchapter I of chapter 53 of title 5 (except section 5303), of officers and employees carrying out the duties and powers referred to in clause (1) of this subsection;

(B) departmental contributions attributable to those pay increases; and

- (C) allowances and benefits, because of cost of living increases, provided under subsection (a) of this section.

(c) Necessary amounts may be appropriated to the Secretary for each fiscal year beginning after September 30, 1982—

- (1) to carry out the international affairs duties and powers of the Department (including amounts for official functions and reception and representation expenses);

(2) for increases in—

- (A) pay, under section 5382(c) and subchapter I of chapter 53 of title 5 (except sec-

tion 5303), of officers and employees carrying out the duties and powers referred to in clause (1) of this subsection;

(B) departmental contributions attributable to those pay increases; and

- (C) allowances and benefits, because of cost of living increases, provided under subsection (a) of this section.

§326. Availability of appropriations for certain expenses

(a) Under regulations prescribed by the Secretary of the Treasury, an appropriation for the Department of the Treasury available to pay travel expenses also is available to pay expenses to attend meetings of organizations related to the function or activity for which the appropriation

(b) The Secretary may approve reimbursement to agents on protective missions for subsistence expenses authorized by law without regard to rates established under section 5702 of title 5.

§327. Advancements and reimbursements for services

(a) In this section, "service" includes service provided in—

- (1) disbursing and receiving amounts.
- (2) servicing bonds.
- (3) making accounts.
- (4) maintaining bank accounts.

(b) When the Secretary of the Treasury provides a service for an agency (except the Department of the Treasury) for which amounts have not been appropriated to the Department, the agency may advance for credit or reimburse the Department the amounts necessary to provide the service. Notwithstanding section 3302 of this title, amounts advanced or reimbursed may be credited to the appropriation of the Department that is current when the service is provided.

§328. Accounts and payments of former disbursing officials

(a) If a chief disbursing official or a director of a disbursing center of the Department of the Treasury dies, resigns, or leaves office, the deputy chief disbursing official or the deputy director of the disbursing center designated by the Secretary of the Treasury may continue the accounts and payments in the name of the former disbursing official or director through the last day of the 2d month after the month in which the death, resignation, or separation occurs. The accounts and payments shall be allowed, audited, and settled as provided by law. The Secretary shall honor checks signed in the name of the former disbursing official or director in the same way as if the former disbursing official or director had continued in office.

(b) Only the deputy chief or deputy director designated under subsection (a) of this section is liable for actions taken in the name of the former disbursing official under subsection (a).

§329. Limitations on outside activities

(a)(1) The Secretary of the Treasury and the Treasurer may not—

- (A) be involved in trade or commerce;
- (B) own any part of a vessel (except a pleasure vessel);
- (C) buy or hold as a beneficiary in trust public property;

(D) be involved in buying or disposing of obligations of a State or the United States Government; and

(E) personally take or use a benefit gained from conducting business of the Depart-

ment of the Treasury except as authorized by law.

(2) An officer violating this subsection shall be fined \$3,000, removed from office, and thereafter may not hold an office of the Government.

(3) An individual (except prosecutors) giving information leading to the prosecution and conviction of an individual violating this subsection shall receive \$1,500 of the fine when paid.

(b)(1) An officer or employee of the Department (except the Secretary or Treasurer) may not—

(A) carry on a trade or business in the funds, debts, or property of a State or the Government; and

(B) personally use a benefit gained from conducting business of the Department.

(2) An officer or employee violating this subsection shall be fined \$500 and removed from office.

§330. Practice before the Department

(a) Subject to section 500 of title 5, the Secretary of the Treasury may—

(1) regulate the practice of representatives of persons before the Department of the Treasury; and

(2) before admitting a representative to practice, require that the representative demonstrate—

- (A) good character;
- (B) good reputation;
- (C) necessary qualifications to enable the representative to provide to persons valuable service; and
- (D) competency to advise and assist persons in presenting their cases.

(b) After notice and opportunity for a proceeding, the Secretary may suspend or disbar from practice before the Department a representative who—

- (1) is incompetent;
- (2) is disreputable;
- (3) violates regulations prescribed under this section; or

(4) with intent to defraud, willfully and knowingly misleads or threatens the person being represented or a prospective person to be represented.

§331. Reports

(a) The Secretary of the Treasury shall submit to Congress each year an annual report. The report shall include—

- (1) a statement of the public receipts and public expenditures for the prior fiscal year;
- (2) estimates of public receipts and public expenditures for the current and next fiscal years;

(3) plans for improving and increasing public receipts to provide Congress with information on ways to raise amounts necessary to meet public expenditures;

(4) a statement of all contracts for supplies or services made by the Secretary during the prior fiscal year;

(5) a statement of appropriations expended to pay for miscellaneous claims not otherwise provided for;

(6) a statement on all payments made from the fund under section 3126 of this title for the prior fiscal year; and

(7) estimates of amounts for payment under section 1322(b) of this title.

(b)(1) On the first day of each regular session of Congress, the Secretary shall submit to Congress a report for the prior fiscal year on—

(A) the total and individual amounts of contingent liabilities and unfunded liabilities of the United States Government;

(B) as far as practicable, trust fund liabilities, liabilities of Government corporations,

indirect liabilities not included as a part of the public debt, and liabilities of insurance and annuity programs (including their actuarial status);

(C) collateral pledged and assets available (or to be realized) as security for the liabilities (separately noting Government obligations) and other assets specifically available to liquidate the liabilities of the Government; and

(D) the total amount in each category under clauses (A)-(C) of this paragraph for each agency.

(2) The report shall present the information required under paragraph (1) of this subsection in a concise way, with explanatory material (including an analysis of the significance of liabilities based on past experience and probable risk) the Secretary considers desirable.

(c) On the first day of each regular session of Congress, the Secretary shall submit to Congress a report for the prior fiscal year on the total amount of public receipts and public expenditures listing receipts, when practicable, by ports, districts, and States and the expenditures by each appropriation.

(d) The Secretary shall report to either House of Congress in person or in writing, as required, on matters referred to the Secretary by that House of Congress.

CHAPTER 5—OFFICE OF MANAGEMENT AND BUDGET SUBCHAPTER I—ORGANIZATION

- Sec.
501. Office of Management and Budget.
502. Officers.
503. Office of Information and Regulatory Affairs.

SUBCHAPTER II—ADMINISTRATIVE

521. Employees.
522. Necessary expenditures.

SUBCHAPTER I—ORGANIZATION §501. Office of Management and Budget

The Office of Management and Budget is an office in the Executive Office of the President.

§502. Officers

(a) The head of the Office of Management and Budget is the Director of the Office of Management and Budget. The Director is appointed by the President, by and with the advice and consent of the Senate. Under the direction of the President, the Director shall administer the Office.

(b) The Office has a Deputy Director of the Office of Management and Budget, appointed by the President, by and with the advice and consent of the Senate. The Deputy Director—

(1) shall carry out the duties and powers prescribed by the Director; and

(2) acts as the Director when the Director is absent or unable to serve or when the office of Director is vacant.

(c) The Office has 3 Assistant Directors who shall carry out the duties and powers prescribed by the Director.

(d) The Office may have not more than 6 additional officers, each of whom is appointed in the competitive service by the Director, with the approval of the President. Each additional officer shall carry out the duties and powers prescribed by the Director. The Director shall specify the title of each additional officer.

(e) When the Director and Deputy Director are absent or unable to serve or when the offices of Director and Deputy Director are vacant, the President may designate an officer of the Office to act as Director.

§503. Office of Information and Regulatory Affairs

The Office of Information and Regulatory Affairs, established under section 3503 of title 44, is an office in the Office of Management and Budget.

SUBCHAPTER II—ADMINISTRATIVE

§521. Employees

The Director of the Office of Management and Budget shall appoint and fix the pay of employees of the Office under regulations prescribed by the President.

§522. Necessary expenditures

The Director of the Office of Management and Budget may make necessary expenditures for the Office under regulations prescribed by the President.

779. Use of appropriations.

SUBCHAPTER I—DEFINITIONS AND GENERAL ORGANIZATION

§701. Definitions

In this chapter—

(1) "agency" includes the District of Columbia government but does not include the legislative branch or the Supreme Court.

(2) "appropriations" means appropriated amounts and includes, in appropriate context—

(A) funds;

(B) authority to make obligations by contract before appropriations; and

(C) other authority making amounts available for obligation or expenditure.

§702. General Accounting Office

(a) The General Accounting Office is an instrumentality of the United States Government independent of the executive departments.

(b) The head of the Office is the Comptroller General of the United States. The Office has a Deputy Comptroller General of the United States.

(c) The Administrator of General Services shall provide the Comptroller General with space in the General Accounting Office Building that the Comptroller General considers necessary for use by the Comptroller General.

(d) The Comptroller General may adopt a seal for the Office.

§703. Comptroller General and Deputy Comptroller General

(a)(1) The Comptroller General and Deputy Comptroller General are appointed by the President, by and with the advice and consent of the Senate.

(2) When a vacancy occurs in the office of Comptroller General or Deputy Comptroller General, a commission is established to recommend individuals to the President for appointment to the vacant office. The commission shall be composed of—

(A) the Speaker of the House of Representatives;

(B) the President pro tempore of the Senate;

(C) the majority and minority leaders of the House of Representatives and the Senate;

(D) the chairmen and ranking minority members of the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House; and

(E) when the office of Deputy Comptroller General is vacant, the Comptroller General.

(3) A commission established because of a vacancy in the office of the Comptroller General shall recommend at least 3 individuals. The President may ask the commission to recommend additional individuals.

(b) Except as provided in subsection (e) of this section, the term of the Comptroller General is 15 years. The Comptroller General may not be reappointed. The term of the Deputy Comptroller General expires on the date an individual is appointed Comptroller General. The Deputy Comptroller General may continue to serve until a successor is appointed.

(c) The Deputy Comptroller General—

(1) carries out duties and powers prescribed by the Comptroller General; and

(2) acts for the Comptroller General when the Comptroller General is absent or unable to serve or when the office of Comptroller General is vacant.

(d) The Comptroller General shall designate an officer or employee of the General Accounting Office to act as Comptroller General when the Comptroller General and Deputy Comptroller General are absent or unable to serve or when the offices of

Comptroller General and Deputy Comptroller General are vacant.

(e)(1) A Comptroller General or Deputy Comptroller General retires on becoming 70 years of age. Either may be removed at any time by—

(A) impeachment; or
(B) joint resolution of Congress, after notice and an opportunity for a hearing, only for—

(i) permanent disability;
(ii) inefficiency;
(iii) neglect of duty;
(iv) malfeasance; or
(v) a felony or conduct involving moral turpitude.

(2) A Comptroller General or Deputy Comptroller General removed from office under paragraph (1) of this subsection may not be reappointed to the office.

(f) The annual rate of basic pay of the—
(1) Comptroller General is equal to the rate for level II of the Executive Schedule; and

(2) Deputy Comptroller General is equal to the rate for level III of the Executive Schedule.

§704. Relationship to other laws

(a) To the extent applicable, all laws generally related to administering an agency apply to the Comptroller General.

(b) A copy of a record and a transcript from a record or proceeding of the Comptroller General, that the Comptroller General or Deputy Comptroller General certifies under seal, shall be admitted as evidence with the same effect as a copy or transcript referred to in section 1733 of title 28.

SUBCHAPTER II—GENERAL DUTIES AND POWERS

§711. General authority

The Comptroller General may—

(1) prescribe regulations to carry out the duties and powers of the Comptroller General;

(2) delegate the duties and powers of the Comptroller General to officers and employees of the General Accounting Office as the Comptroller General decides is necessary to carry out those duties and powers;

(3) regulate the practice of representatives of persons before the Office; and

(4) administer oaths to witnesses when auditing and settling accounts.

§712. Investigating the use of public money

The Comptroller General shall—

(1) investigate all matters related to the receipt, disbursement, and use of public money;

(2) estimate the cost to the United States Government of complying with each restriction on expenditures of a specific appropriation in a general appropriation law and report each estimate to Congress with recommendations the Comptroller General considers desirable;

(3) analyze expenditures of each executive agency the Comptroller General believes will help Congress decide whether public money has been used and expended economically and efficiently;

(4) make an investigation and report ordered by either House of Congress or a committee of Congress having jurisdiction over revenue, appropriations, or expenditures; and

(5) give a committee of Congress having jurisdiction over revenue, appropriations, or expenditures the help and information the committee requests.

§713. Audit of Internal Revenue Service and Bureau of Alcohol, Tobacco, and Firearms

(a) Under regulations of the Comptroller General, the Comptroller General shall audit the Internal Revenue Service and the Bureau of Alcohol, Tobacco, and Firearms, of the Department of the Treasury. An audit under this section does not affect a final decision of the Secretary of the Treasury under section 6406 of the Internal Revenue Code of 1954 (26 U.S.C. 6406).

(b)(1) To carry out this section and to the extent provided by and only subject to section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103)—

(A) returns and return information (as defined in section 6103(b) of the Internal Revenue Code of 1954 (26 U.S.C. 6103(b))) shall be made available to the Comptroller General; and

(B) records and property of, or used by, the Service or the Bureau, shall be made available to the Comptroller General.

(2) At least once every 6 months, the Comptroller General shall designate each officer and employee of the General Accounting Office by name and title to whom returns, return information, or records or property of the Service or the Bureau that can identify a particular taxpayer may be made available. Each designation or a certified copy of the designation shall be sent to the Committee on Finance of the Senate, the Committee on Ways and Means of the House of Representatives, the Committee on Governmental Affairs of the Senate, the Committee on Government Operations of the House, the Joint Committee on Taxation, the Commissioner of Internal Revenue, and the Director of the Bureau.

(3) Except as expressly provided by law, an officer or employee of the Office may make known information derived from a record or property of, or in use by, the Service or the Bureau that can identify a particular taxpayer only to another officer or employee of the Office whose duties or powers require that the record or property be made known.

§714. Audit of Financial Institutions Examination Council, Federal Reserve Board, Federal reserve banks, Federal Deposit Insurance Corporation, and Office of Comptroller of the Currency

(a) In this section, "agency" means the Financial Institutions Examination Council, the Federal Reserve Board, Federal reserve banks, the Federal Deposit Insurance Corporation, and the Office of the Comptroller of the Currency.

(b) Under regulations of the Comptroller General, the Comptroller General shall audit an agency, but may carry out an onsite examination of an open insured bank or bank holding company only if the appropriate agency has consented in writing. Audits of the Federal Reserve Board and Federal reserve banks may not include—

(1) transactions for or with a foreign central bank, government of a foreign country, or nonprivate international financing organization;

(2) deliberations, decisions, or actions on monetary policy matters, including discount window operations, reserves of member banks, securities credit, interest on deposits, and open market operations;

(3) transactions made under the direction of the Federal Open Market Committee; or

(4) a part of a discussion or communication among or between members of the Board of Governors and officers and employees of the Federal Reserve System related to clauses (1)–(3) of this subsection.

(c)(1) Except as provided in this subsection, an officer or employee of the General Accounting Office may not disclose information identifying an open bank, an open bank holding company, or a customer of an open or closed bank or bank holding company. The Comptroller General may disclose information related to the affairs of a closed bank or closed bank holding company identifying a customer of the closed bank or closed bank holding company only if the Comptroller General believes the customer had a controlling influence in the management of the closed bank or closed bank holding company or was related to or affiliated with a person or group having a controlling influence.

(2) An officer or employee of the Office may discuss a customer, bank, or bank holding company with an official of an agency and may report an apparent criminal violation to an appropriate law enforcement authority of the United States Government or a State.

(3) This subsection does not authorize an officer or employee of an agency to withhold information from a committee of Congress authorized to have the information.

(d)(1) To carry out this section, all records and property of or used by an agency, including samples of reports of examinations of a bank or bank holding company the Comptroller General considers statistically meaningful and workpapers and correspondence related to the reports shall be made available to the Comptroller General. The Comptroller General shall give an agency a current list of officers and employees to whom, with proper identification, records and property may be made available, and who may make notes or copies necessary to carry out an audit. An agency shall give the Comptroller General suitable and lockable offices and furniture, telephones, and access to copying facilities.

(2) Except for the temporary removal of workpapers of the Comptroller General that do not identify a customer of an open or closed bank or bank holding company, an open bank, or an open bank holding company, all workpapers of the Comptroller General and records and property of or used by an agency that the Comptroller General possesses during an audit, shall remain in the agency. The Comptroller General shall prevent unauthorized access to records or property.

§715. Audit of accounts and operations of the District of Columbia government

(a) In addition to the audit carried out under section 455 of the District of Columbia Self-Government and Governmental Reorganization Act (Public Law 93-198, 87 Stat. 803; D.C. Code, §47-117), the Comptroller General each year shall audit the accounts and operations of the District of Columbia government. An audit shall be carried out according to principles, under regulations, and in a way the Comptroller General prescribes. When prescribing the procedures to follow and the extent of the inspection of records, the Comptroller General shall consider generally accepted principles of auditing, including the effectiveness of accounting organizations and systems, internal audit and control, and related administrative practices.

(b) The Comptroller General shall submit each audit report to Congress and the Mayor and Council of the District of Columbia. The report shall include the scope of an audit, information the Comptroller General considers necessary to keep Congress, the

Mayor, and the Council informed of operations audited, and recommendations the Comptroller General considers advisable.

(c)(1) By the 90th day after receiving an audit report from the Comptroller General, the Mayor shall state in writing to the Council measures the District of Columbia government is taking to comply with the recommendations of the Comptroller General. A copy of the statement shall be sent to Congress.

(2) After the Council receives the statement of the Mayor, the Council may make available for public inspection the report of the Comptroller General and other material the Council considers pertinent.

(d) To carry out this section, records and property of or used by the District of Columbia government necessary to make an audit easier shall be made available to the Comptroller General. The Mayor shall provide facilities to carry out an audit.

§716. Availability of information and inspection of records

(a) Each agency shall give the Comptroller General information the Comptroller General requires about the duties, powers, activities, organization, and financial transactions of the agency. The Comptroller General may inspect an agency record to get the information. This subsection does not apply to expenditures made under section 3524 or 3526(e) of this title.

(b)(1) When an agency record is not made available to the Comptroller General within a reasonable time, the Comptroller General may make a written request to the head of the agency. The request shall state the authority for inspecting the records and the reason for the inspection. The head of the agency has 20 days after receiving the request to respond. The response shall describe the record withheld and the reason the record is being withheld. If the Comptroller General is not given an opportunity to inspect the record within the 20-day period, the Comptroller General may file a report with the President, the Director of the Office of Management and Budget, the Attorney General, the head of the agency, and Congress.

(2) Through an attorney the Comptroller General designates in writing, the Comptroller General may bring a civil action in the district court of the United States for the District of Columbia to require the head of the agency to produce a record—

(A) after 20 days after a report is filed under paragraph (1) of this subsection; and

(B) subject to subsection (d) of this section.

(3) The Attorney General may represent the head of the agency. The court may punish a failure to obey an order of the court under this subsection as a contempt of court.

(c)(1) Subject to subsection (d) of this section, the Comptroller General may subpoena a record of a person not in the United States Government when the record is not made available to the Comptroller General to which the Comptroller General has access by law or by agreement of that person from whom access is sought. A subpoena shall identify the record and the authority for the inspection and may be issued by the Comptroller General. The Comptroller General may have an individual serve a subpoena under this subsection by delivering a copy to the person named in the subpoena or by mailing a copy of the subpoena by certified or registered mail, return receipt requested, to the residence or principal place of business of the person. Proof of service is

shown by a verified return by the individual serving the subpoena that states how the subpoena was served or by the return receipt signed by the person served.

(2) If a person residing, found, or doing business in a judicial district refuses to comply with a subpoena issued under paragraph (1) of this subsection, the Comptroller General, through an attorney the Comptroller General designates in writing, may bring a civil action in that district court to require the person to produce the record. The court has jurisdiction of the action and may punish a failure to obey an order of the court under this subsection as a contempt of court.

(d)(1) The Comptroller General may not bring a civil action for a record withheld under subsection (b) of this section or issue a subpoena under subsection (c) of this section if—

(A) the record related to activities the President designates as foreign intelligence or counterintelligence activities;

(B) the record is specifically exempted from disclosure to the Comptroller General by a statute that—

(i) without discretion requires that the record be withheld from the Comptroller General;

(ii) establishes particular criteria for withholding the record from the Comptroller General; or

(iii) refers to particular types of records to be withheld from the Comptroller General; or

(C) by the 20th day after a report is filed under subsection (b)(1) of this section, the President or the Director certifies to the Comptroller General and Congress that a record could be withheld under section 552(b)(5) or (7) of title 5 and disclosure reasonably could be expected to impair substantially the operations of the Government.

(2) The President or the Director may not delegate certification under paragraph (1)(C) of this subsection. A certification shall include a complete explanation of the reasons for the certification.

(e)(1) The Comptroller General shall maintain the same level of confidentiality for a record made available under this section as is required of the head of the agency from which it is obtained. Officers and employees of the General Accounting Office are subject to the same statutory penalties for unauthorized disclosure or use as officers or employees of the agency.

(2) The Comptroller General shall keep information described in section 552(b)(6) of title 5 that the Comptroller General obtains in a way that prevents unwarranted invasions of personal privacy.

(3) This section does not authorize information to be withheld from Congress.

§717. Evaluating programs and activities of the United States Government

(a) In this section, "agency" means a department, agency, or instrumentality of the United States Government (except a mixed-ownership Government corporation) or the District of Columbia government.

(b) The Comptroller General shall evaluate the results of a program or activity the Government carries out under existing law—

(1) on the initiative of the Comptroller General;

(2) when either House of Congress orders an evaluation; or

(3) when a committee of Congress with jurisdiction over the program or activity requests the evaluation.

(c) The Comptroller General shall develop and recommend to Congress ways to evaluate a program or activity the Government carries out under existing law.

(d)(1) On request of a committee of Congress, the Comptroller General shall help the committee to—

(A) develop a statement of legislative goals and ways to assess and report program performance related to the goals, including recommended ways to assess performance, information to be reported, responsibility for reporting, frequency of reports, and feasibility of pilot testing; and

(B) assess program evaluations prepared by and for an agency.

(2) On request of a member of Congress, the Comptroller General shall give the member a copy of the material the Comptroller General compiles in carrying out this subsection that has been released by the committee for which the material was compiled.

§718. Availability of draft reports

(a) A draft report of an audit under section 714 of this title shall be submitted to the Financial Institutions Examination Council, the Federal Reserve Board, the Federal Deposit Insurance Corporation, or the Office of the Comptroller of the Currency for comment for 30 days.

(b)(1) The Comptroller General may submit a part of a draft report to an agency for comment for more than 30 days only if the Comptroller General decides, after a showing by the agency, that a longer period is necessary and likely to result in a more accurate report. The report may not be delayed because the agency does not comment within the comment period.

(2) When a draft report is submitted to an agency for comment, the Comptroller General shall make the draft report available on request to—

(A) either House of Congress, a committee of Congress, or a member of Congress if the report was begun because of a request of the House, committee, or member; or

(B) the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House of Representatives if the report was not begun because of a request of either House of Congress, a committee of Congress, or a member of Congress.

(3) This subsection is subject to statutory and executive order guidelines for handling and storing classified information and material.

(c) A final report of the Comptroller General shall include—

(1) a statement of significant changes of a finding, conclusion, or recommendation in an earlier draft report because of comments on the draft by an agency;

(2) a statement of the reasons the changes were made; and

(3) for a draft report submitted under subsection (a) of this section, written comments of the agency submitted during the comment period.

§719. Comptroller General reports

(a) At the beginning of each regular session of Congress, the Comptroller General shall report to Congress (and to the President when requested by the President) on the work of the Comptroller General. A report shall include recommendations on—

(1) legislation the Comptroller General considers necessary to make easier the prompt and accurate making and settlement of accounts; and

(2) other matters related to the receipt, disbursement, and use of public money the Comptroller General considers advisable.

(b)(1) The Comptroller General shall include in the report to Congress under subsection (a) of this section—

(A) a review of activities under sections 717(b)-(d) and 731(e)(2) of this title, including recommendations under section 717(c) of this title;

(B) information on carrying out duties and powers of the Comptroller General under clauses (A) and (C) of this paragraph, subsections (g) and (h) of this section, and sections 717, 731(e)(2), 734, 1112, and 1113 of this title; and

(C) the name of each officer and employee of the General Accounting Office assigned or detailed to a committee of Congress, the committee to which the officer or employee is assigned or detailed, the length of the period of assignment or detail, a statement on whether the assignment or detail is finished or continuing, and compensation paid out of appropriations available to the Comptroller General for the period of the assignment or detail that has been completed.

(2) In a report under subsection (a) of this section or in a special report to Congress when Congress is in session, the Comptroller General shall include recommendations on greater economy and efficiency in public expenditures.

(c) The Comptroller General shall report to Congress—

(1) specially on expenditures and contracts an agency makes in violation of law;

(2) on the adequacy and effectiveness of—

(A) administrative audits of accounts and claims in an agency; and

(B) inspections by an agency of offices and accounts of fiscal officials; and

(3) as frequently as practicable on audits carried out under sections 713 and 714 of this title.

(d) The Comptroller General shall report each year to the Committees on Finance and Governmental Affairs of the Senate, the Committees on Ways and Means and Government Operations of the House of Representatives, and the Joint Committee on Taxation. Each report shall include—

(1) procedures and requirements the Comptroller General, the Commissioner of Internal Revenue, and the Director of the Bureau of Alcohol, Tobacco, and Firearms, prescribe to protect the confidentiality of returns and return information made available to the Comptroller General under section 713(b)(1) of this title;

(2) the scope and subject matter of audits under section 713 of this title; and

(3) findings, conclusions, or recommendations the Comptroller General develops as a result of an audit under section 713 of this title, including significant evidence of inefficiency or mismanagement.

(e) The Comptroller General shall report on analyses carried out under section 712(3) of this title to the Committees on Governmental Affairs and Appropriations of the Senate, the Committees on Government Operations and Appropriations of the House, and the committees with jurisdiction over legislation related to the operation of each executive agency.

(f) The Comptroller General shall give the President information on expenditures and accounting the President requests.

(g) When the Comptroller General submits a report to Congress, the Comptroller General shall deliver copies of the report to—

(1) the Committees on Governmental Affairs and Appropriations of the Senate;

(2) the Committees on Government Operations and Appropriations of the House;

(3) a committee of Congress that requested information on any part of a program or activity of a department, agency, or instrumentality of the United States Government (except a mixed-ownership Government corporation) or the District of Columbia government that is the subject of any part of a report; and

(4) any other committee of Congress requesting a copy.

(h)(1) The Comptroller General shall prepare—

(A) each month a list of reports issued during the prior month; and

(B) at least once each year a list of reports issued during the prior 12 months.

(2) A copy of each list shall be sent to each committee of Congress and each member of Congress. On request, the Comptroller General promptly shall provide a copy of a report to a committee or member.

(i) On request of a committee of Congress, the Comptroller General shall explain to and discuss with the committee or committee staff a report the Comptroller General makes that would help the committee—

(1) evaluate a program or activity of an agency within the jurisdiction of the committee; or

(2) in its consideration of proposed legislation.

§720. Agency reports

(a) In this section, "agency" means a department, agency, or instrumentality of the United States Government (except a mixed-ownership Government corporation) or the District of Columbia government.

(b) When the Comptroller General makes a report that includes a recommendation to the head of an agency, the head of the agency shall submit a written statement on action taken on the recommendation by the head of the agency. The statement shall be submitted to—

(1) the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House of Representatives before the 61st day after the date of the report; and

(2) the Committees on Appropriations of both Houses of Congress in the first request for appropriations submitted more than 60 days after the date of the report.

SUBCHAPTER III—PERSONNEL

§731. General

(a) The Comptroller General may appoint, pay, assign, and remove officers (except the Deputy Comptroller General) and employees the Comptroller General decides are necessary to carry out the duties and powers of the General Accounting Office.

(b) The Comptroller General may establish for appropriate officers and employees a merit pay system consistent with section 5401(a) of title 5.

(c) The annual rate of basic pay of the General Counsel of the General Accounting Office is equal to the rate for level IV of the Executive Schedule.

(d) When a change in organization, management responsibility, or workload makes it necessary, the Comptroller General may fix the rate of basic pay of 5 positions at rates not more than the rate for level IV of the Executive Schedule.

(e) The Comptroller General may procure the services of experts and consultants under section 3109 of title 5, except that the services of not more than—

(1) 10 experts and consultants may be procured for not more than 3 years; and

(2) 10 experts and consultants may be procured permanently, temporarily, or intermittently to carry out sections 717(b)-(d) and 719(b)(1)(A) of this title at rates that are not more than the rate for level V of the Executive Schedule.

§732. Personnel management system

(a) The Comptroller General shall maintain a personnel management system. The Comptroller General may prescribe a regulation about the system only after notice and opportunity for public comment. A reprisal or threat of reprisal may not be made against an officer or employee of the General Accounting Office because of comments on a proposed regulation about the system.

(b) The personnel management system shall—

(1) include the principles of section 2301(b) of title 5;

(2) prohibit personnel practices prohibited under section 2302(b) of title 5;

(3) prohibit political activities prohibited under subchapter III of chapter 73 of title 5;

(4) ensure that officers and employees of the Office are appointed, promoted, and assigned only on the basis of merit and fitness, but without regard to those provisions of title 5 governing appointments and other personnel actions in the competitive service;

(5) give a preference to an individual eligible for a preference in the executive branch of the United States Government in a way and to an extent consistent with a preference given an individual in the executive branch; and

(6) provide that the Comptroller General shall fix the basic pay of officers and employees of the Office not fixed by law, consistent with section 5301(a) of title 5.

(c) Under the personnel management system—

(1) the Comptroller General shall publish a schedule of basic pay rates for officers and employees of the Office;

(2) except as provided in clause (4) of this subsection and section 733(a)(3)(A) of this title, the highest basic pay rate under the pay schedule may not be more than the highest basic rate for GS-15;

(3) except as provided in section 733(a)(3)(B) of this title, basic pay rates of officers and employees of the Office shall be adjusted at the same time and to the same extent as basic pay rates of the General Accounting Office are adjusted;

(4) the pay schedule for officers and employees of the Office may provide that the basic pay rates for not more than 100 positions may be at rates not more than the highest rate for GS-18, less the number of positions in the General Accounting Office Senior Executive Service under section 733 of this title (except positions included in the Service under section 733(c) of this title); and

(5) officers and employees of the Office are entitled to grade and basic pay retention consistent with subchapter VI of chapter 53 of title 5.

(d) The personnel management system shall provide—

(1) for a system to appraise the performance of officers and employees of the General Accounting Office that meets the requirements of section 4302 of title 5;

(2) that the Comptroller General has the same responsibility for performance appraisals under this subsection as the Director of the Office of Personnel Management has under section 4302 of title 5;

(3) for a reduction in grade or removal of an officer or employee because of unacceptable performance consistent with section 4303 of title 5;

(4) for other personnel actions consistent with chapter 75 of title 5; and

(5) a procedure for processing complaints and grievances not otherwise provided for under clauses (3) and (4) of this subsection or subsection (e) or (f)(1) of this section.

(e) The personnel management system shall provide—

(1) a procedure that ensures that each officer and employee of the General Accounting Office may form, join, or assist, or not form, join, or assist, an employee organization freely and without fear of penalty or reprisal; and

(2) for a labor-management relations program consistent with chapter 71 of title 5.

(f)(1) The personnel management system shall—

(A) provide that all personnel actions affecting an officer, employee, or applicant for employment be taken without regard to race, color, religion, age, sex, national origin, political affiliation, marital status, or handicapping condition; and

(B) include a minority recruitment program consistent with section 7201 of title 5.

(2) This subchapter and subchapter IV of this chapter do not affect a right or remedy of an officer, employee, or applicant for employment under a law prohibiting discrimination in employment in the Government on the basis of race, color, religion, age, sex, national origin, political affiliation, marital status, or handicapping condition. However, for officers, employees, or applicants in the General Accounting Office—

(A) the General Accounting Office Personnel Appeals Board has the same authority over oversight and appeals matters as an executive agency has over oversight and appeals matters; and

(B) the Comptroller General has the same authority over matters (except oversight and appeals) as an executive agency has over matters (except oversight and appeals).

(3) This section does not affect a lawful effort to achieve equal employment opportunity through affirmative action.

(g) An officer or employee of the General Accounting Office completing at least one year of continuous service under a nontemporary appointment under the personnel management system acquires a competitive status for appointment to a position in the competitive service for which the officer or employee is qualified.

§733. Senior Executive Service

(a) The Comptroller General may establish a General Accounting Office Senior Executive Service—

(1) meeting the requirements of section 3131 of title 5;

(2) providing requirements for positions consistent with section 3132(a)(2) of title 5;

(3) providing rates of basic pay—

(A) not more than the maximum rate or less than the minimum rate for the Senior Executive Service under section 5382 of title 5; and

(B) adjusted at the same time and to the same extent as rates in the Senior Executive Service under section 5382 of title 5 are adjusted;

(4) providing a performance appraisal system consistent with subchapter II of chapter 43 of title 5;

(5) allowing the Comptroller General to award ranks to officers and employees in the Office Senior Executive Service consistent with section 4507 of title 5;

(6) providing for removal consistent with section 3592 of title 5, and for removal or suspension consistent with section 7543 of title 5; and

(7) allowing the Comptroller General to pay performance awards to officers and employees of the Office Senior Executive Service consistent with section 5384 of title 5.

(b) Except as provided in subsection (a), the Comptroller General may apply any part of title 5 that applies to an applicant for or officer or employee in the Senior Executive Service under title 5 to the Office Senior Executive Service.

(c) The Office Senior Executive Service may include positions referred to in section 731(c), (d), or (e)(2) of this title.

(d) Section 732(b)(6), (c), (d)(1)–(4), and (e) of this title does not apply to the Office Senior Executive Service.

§734. Assignments and details to Congress

(a) The Comptroller General may assign or detail an officer or employee of the General Accounting Office to full-time continuous duty with a committee of Congress for not more than one year.

(b) A committee of the Senate or a joint committee of Congress for which the Secretary of the Senate disburses amounts shall reimburse the Comptroller General for the pay of each officer or employee of the Office for the time the officer or employee is assigned or detailed to the committee or joint committee.

§735. Relationship to other laws

(a) Except as provided in section 733(c) of this title, this subchapter and subchapter IV of this chapter do not affect sections 702(b), 703, 731(c)–(e), 772, 775(a) and (d) of this title.

(b) Except as specifically provided in this subchapter and subchapter IV of this chapter, those subchapters do not change the application of a law applicable to officers and employees of the General Accounting Office.

§736. Authorization of appropriations

Amounts necessary to carry out this subchapter and subchapter IV of this chapter may be appropriated to the Comptroller General.

SUBCHAPTER IV—PERSONNEL APPEALS BOARD

§751. Organization

(a) The General Accounting Office has a General Accounting Office Personnel Appeals Board. The Board is composed of 5 members appointed by the Comptroller General. An individual may be appointed only if the individual—

(1) has 3 years full-time or part-time experience in adjudicating or arbitrating personnel matters;

(2) is not a current or former officer or employee of the Office;

(3) has the demonstrated ability, background, training, and experience necessary to be qualified specially to serve on the Board; and

(4) demonstrates a capacity and willingness to devote sufficient time to dispose of cases in a timely way.

(b) The Comptroller General shall appoint members only—

(1) from a written list of candidates, submitted to the Comptroller General in a way and at the time the Comptroller General requires, by any organization the Comptroller General believes is composed primarily of individuals experienced in adjudicating or arbitrating personnel matters; and

(2) after the Comptroller General consults with organizations representing employees

of the Office and with any member of each committee of Congress, having legislative jurisdiction over the personnel management system maintained under section 732 of this title, whom the chairman of the committee designates.

(c) The term of a member of the Board is 3 years. A member may not be reappointed. An individual appointed to fill a vacancy occurring before the expiration of a term of office is appointed for the remainder of the term. However, if the unexpired part of a term is less than one year, the Comptroller General may appoint an individual for a 3-year term plus the unexpired part of the term. When the term of a member ends, the member may continue to serve until a successor takes office or for 6 months after the term expires, whichever is earlier.

(d) A member may be removed by a majority of the Board (except the member subject to removal) only for inefficiency, neglect of duty, or malfeasance in office. A member subject to removal shall be given notice and an opportunity for a hearing before the Board unless the member waives the opportunity in writing.

(e) While carrying out a member's duties (including travel), a member who is not an officer or employee of the United States Government is entitled to pay at a rate equal to the daily rate for GS-18. Each member is entitled to travel expenses and per diem allowances under section 5703 of title 5.

§752. Chairman and General Counsel

(a) The General Accounting Office Personnel Appeals Board shall select one of its members as Chairman. The Chairman is the chief executive and administrative officer of the Board.

(b)(1) The Comptroller General shall appoint as General Counsel of the Board an individual the Chairman selects. The General Counsel serves at the pleasure of the Chairman.

(2) The Chairman shall fix the pay of the General Counsel. The annual rate of basic pay of the General Counsel may be not more than the maximum rate for GS-15.

(3) The General Counsel shall—

(A) investigate an allegation about a prohibited personnel practice under section 732(b)(2) of this title to decide if there are reasonable grounds to believe the practice has occurred, exists, or will be taken by an officer or an employee of the General Accounting Office;

(B) investigate an allegation about a prohibited political activity under section 732(b)(3) of this title;

(C) investigate a matter under the jurisdiction of the Board if the Board or a member of the Board requests; and

(D) help the Board carry out its duties and powers.

§753. Duties and powers

(a) The General Accounting Office Personnel Appeals Board may consider and order corrective or disciplinary action in a case arising from—

(1) an officer or employee appeal about a removal, suspension for more than 14 days, reduction in grade or pay, or furlough of not more than 30 days;

(2) a prohibited personnel practice under section 732(b)(2) of this title;

(3) a prohibited political activity under section 732(b)(3) of this title;

(4) a decision of an appropriate unit of employees for collective bargaining;

(5) an election or certification of a collective bargaining representative;

(6) a matter appealable to the Board under the labor-management relations program under section 732(e)(2) of this title, including a labor practice prohibited under section 732(e)(1) of this title;

(7) an action involving discrimination prohibited under section 732(f)(1) of this title; and

(8) an issue about Office personnel the Comptroller General by regulation decides the Board shall resolve.

(b) The Board may delegate to a member or a panel of members the authority to act under subsection (a) of this section. A decision of a member or panel under subsection (a) is deemed to be a final decision of the Board unless the Board reconsiders the decision under subsection (c) of this section.

(c) On motion of a party or on its own initiative, the Board may reconsider a decision under subsection (a) of this section by the 30th day after the decision is made.

(d) The Board shall prescribe regulations—

(1) providing for officer and employee appeals consistent with sections 7701 and 7702 of title 5; and

(2) on the operating procedure of the Board.

§754. Action by the Comptroller General

When the Comptroller General has authority, the Comptroller General promptly shall carry out action the General Accounting Office Personnel Appeals Board orders under section 753 of this title.

§755. Judicial review

A person may apply for review of a final decision under section 753(a)(1)–(3), (6), or (7) of this title by filing a petition for review with the United States Court of Appeals for the District of Columbia Circuit or with the court of appeals of the United States for the circuit in which the person resides. Chapter 158 of title 28 applies to a review under this subchapter, except the petition for review shall be filed by the 30th day after the petitioner receives notice of the decision. The court shall set aside a final decision the court decides is—

(1) arbitrary, capricious, an abuse of discretion, or otherwise not consistent with law;

(2) not made consistent with required procedures; or

(3) unsupported by substantial evidence.

SUBCHAPTER V—ANNUITIES

§771. Definitions

In this subchapter—

(1) “dependent child” means an unmarried dependent child (including a stepchild or adopted child) who is—

(A) under 18 years of age; or

(B) incapable of self-support because of physical or mental disability.

(2) “surviving spouse” means a surviving spouse of an individual who was a Comptroller General or retired Comptroller General and the spouse—

(A) was married to the individual for at least 2 years immediately before the individual died; or

(B) has not remarried and is the parent of issue by the marriage.

(3) service as a Comptroller General equals the number of years and complete months an individual is Comptroller General.

§772. Annuity of the Comptroller General

(a) Except as provided in subsection (c) of this section, a Comptroller General serving a complete term as Comptroller General or who is retired for age under section

703(e)(1) of this title after serving at least 10 years is entitled to receive an annuity for life equal to the pay the Comptroller General is receiving on completion of the term or at the time of retirement. An annuity of a Comptroller General who completes a term before becoming 65 years of age is reduced by .25 percent for each complete month the Comptroller General is under 65 years of age.

(b) Except as provided in subsection (c) of this section, a Comptroller General becoming permanently disabled shall be retired and is entitled to receive an annuity for life equal to—

(1) the pay of the Comptroller General at the time of retirement if the Comptroller General served at least 10 years; or

(2) 50 percent of the pay if the Comptroller General served less than 10 years.

(c) A Comptroller General who, when appointed, is or has been subject to subchapter III of chapter 83 of title 5 remains subject to subchapter III unless the Comptroller General elects in writing to receive an annuity under this section. An election is irrevocable and must be made within 10 years and 60 days after the start of service as Comptroller General. A Comptroller General electing to receive an annuity under this section is entitled to a refund of the lump-sum credit to the account of the Comptroller General in the Civil Service Retirement and Disability Fund.

(d) A Comptroller General (except a Comptroller General remaining subject to subchapter III of chapter 83 of title 5) shall—

(1) deposit with the General Accounting Office for redeposit in the Treasury as miscellaneous receipts as a contribution to the annuity—

(A) 3.5 percent of the pay received as Comptroller General before deductions are made under clause (2)(A) of this subsection plus 3 percent interest compounded every December 31 on the amount to be deposited, if electing survivor benefits under this subchapter; or

(B) 8 percent of the pay received as Comptroller General before deductions are made under clause (2)(B) of this subsection plus 3 percent interest compounded every December 31 on the amount to be deposited, if not electing survivor benefits under this subchapter; and

(2) have—

(A) 3.5 percent of the pay received as Comptroller General deducted as a contribution to the annuity if electing survivor benefits under this subchapter; or

(B) 8 percent of the pay received as Comptroller General deducted as a contribution to the annuity if not electing survivor benefits under this subchapter.

(e) A Comptroller General receiving benefits under this section may not receive retirement or disability benefits under another law of the United States.

§773. Election of survivor benefits

(a) To provide survivor benefits, a Comptroller General may elect in writing to reduce the pay and annuity of the Comptroller General. An election shall be made within 6 months of taking office or, if an election is made under section 772(c) of this title, by the 60th day after making an election under section 772(c).

(b) A Comptroller General electing to provide survivor benefits shall—

(1) have 4.5 percent of the pay received as Comptroller General and annuity of the Comptroller General deducted; and

(2) deposit with the General Accounting Office for redeposit in the Treasury as miscellaneous receipts—

(A) 4.5 percent of the pay and annuity received as Comptroller General before the deductions begin;

(B) 4.5 percent of basic pay received as a member of Congress or for other civilian service on which a surviving spouse's annuity is computed under section 774(d) of this title; and

(C) 4 percent interest before January 1, 1948, and 4.5 percent interest after December 31, 1947, compounded every December 31, on amounts deposited.

(c) This subchapter does not prevent a surviving spouse or dependent child from receiving another annuity while receiving an annuity under section 774 of this title. However, service used in computing an annuity under section 774 may not be used in computing the other annuity.

§774. Survivor annuities

(a) In this section—

(1) “allowable military service” means honorable active service of not more than 5 years in an armed force (including service in the National Guard when ordered to active duty for the United States Government), when the service is not creditable in computing another annuity.

(2) “other prior allowable service” means civilian service as an officer or employee of the Government or District of Columbia government not covered by subsection (d)(1) of this section.

(3) “congressional employee” has the same meaning given that term in section 2107 of title 5.

(b) A survivor annuity shall be paid under this subchapter when a Comptroller General—

(1) makes an election under section 773 of this title;

(2) dies in office or while receiving an annuity under section 772 of this title;

(3) had at least 5 years of civilian service at death computed under subsections (a) and (d) of this section; and

(4) had deductions or deposits under section 773 of this title made for the last 5 years of civilian service.

(c) If the Comptroller General or retired Comptroller General is survived—

(1) only by a spouse, the surviving spouse shall receive an annuity computed under subsection (d) of this section beginning on the death of the Comptroller General or retired Comptroller General or when the spouse is 50 years of age, whichever is later;

(2) by a spouse and a dependent child, the surviving spouse shall receive an immediate annuity under subsection (d) of this section and each dependent child shall receive an immediate annuity equal to the smaller of—

(A) \$1,548; or

(B) \$4,644 divided by the number of dependent children; or

(3) only by a dependent child, each dependent child shall receive an immediate annuity equal to the smaller of—

(A) the annuity a surviving spouse would be entitled to receive under clause (2) of this subsection divided by the number of dependent children;

(B) \$1,860; or

(C) \$5,580 divided by the number of dependent children.

(d) The annuity of a surviving spouse is equal to—

(1) 1.25 percent of the average annual pay (based on the 3 years of highest pay re-

ceived as Comptroller General and other prior allowable service) times—

- (A) the number of years of—
 - (i) service as Comptroller General or a member of Congress; and
 - (ii) prior allowable military service; and
- (B) not more than 15 years of prior allowable service as a congressional employee; plus

(2) .75 percent of the average pay computed under clause (1) of this subsection times the number of years of other allowable service.

(e) A surviving spouse's annuity may not be more than 40 percent of the average annual pay computed under subsection (d)(1) of this section. If a Comptroller General does not make the deposit under section 773(b) of this title, a surviving spouse's annuity shall be credited with the service during which a deposit was not made, unless the spouse elects not to have the service credited. However, the annuity shall be reduced by 10 percent of the amount of the unpaid deposit, computed on the date the Comptroller General or retired Comptroller General dies.

§775. Refunds

(a) A Comptroller General separated from office before becoming entitled to receive an annuity under section 772 of this title is entitled to a lump-sum refund of the amount deducted from pay or deposited as a contribution under section 772, plus 3 percent interest on the amount compounded every December 31.

(b) A Comptroller General making an election under section 773 of this title who is separated from office before becoming entitled to an annuity under section 772 of this title is entitled to a lump-sum refund of the amount deducted under section 773 of this title, plus 4 percent interest before January 1, 1948, and 3 percent interest after December 31, 1947, compounded every December 31 until the separation date.

(c) A lump-sum refund of the amounts deducted under sections 772 and 773 of this title, plus interest of 4 percent before January 1, 1948, and 3 percent after December 31, 1947, compounded every December 31 until the date of death, shall be paid under subsection (d) of this section if—

(1) a Comptroller General dies in office before completing 5 years of civilian service under section 774 of this title or after completing 5 years of civilian service but without a survivor entitled to an annuity under section 774(b) and (c) of this title; or

(2) if a retired Comptroller General dies without a survivor entitled to an annuity under section 774(b) and (c) of this title.

(d) If a Comptroller General or retired Comptroller General dies before a refund is made under this section, the refund shall be paid in the following order of precedence:

(1) to a beneficiary the Comptroller General or retired Comptroller General designated in writing if the designation was received by the General Accounting Office before the death of the Comptroller General or retired Comptroller General.

(2) to a surviving spouse.

(3) to the children and to a descendant of a deceased child by representation.

(4) to the parents equally or, if only one surviving parent, to that survivor.

(5) to the executor or administrator of the estate of the Comptroller General or retired Comptroller General.

(6) to the next of kin that the General Counsel of the General Accounting Office decides is entitled to the refund under the laws of the domicile of the Comptroller

General or retired Comptroller General at the time of death.

(e) The General Counsel is not subject to section 771 (1) and (2) of this title when making a decision about a surviving spouse or child under subsection (c) or (d) of this section.

(f) If the annuities of all individuals entitled to survivor annuities under this subchapter end before the amount of annuities paid equals the amount deducted under sections 772 and 773 of this title, plus interest of 4 percent before January 1, 1948, and 3 percent after December 31, 1947, compounded every December 31 until the date of death, the remainder shall be paid under subsection (d) of this section.

§776. Payment of survivor benefits

(a) An annuity under section 774 of this title accrues monthly and is paid monthly on the first business day of the month after the month in which an annuity accrues.

(b)(1) A surviving spouse's annuity ends when the spouse remarries or dies.

(2) A dependent child's annuity ends when the child becomes 18 years of age, marries, or dies, whichever is earliest. However, if a child is not self-supporting because of a physical or mental disability, an annuity ends when the child recovers, marries, or dies.

(3) If a surviving spouse dies and a dependent child survives, the child's annuity is recomputed under section 774(c)(3) of this title.

(4) When a dependent child's annuity ends, the annuity of another dependent child is recomputed as if the child whose annuity has ended did not survive a Comptroller General or retired Comptroller General.

(c) An accrued annuity unpaid when the annuity of a survivor ends—

(1) for a reason except death, shall be paid to the survivor; and

(2) when a survivor dies, shall be paid in the following order of precedence:

(A) to the executor or administrator of the estate of the individual.

(B) if there is no executor or administrator, then after 30 days after the date of death, to an individual the General Counsel of the General Accounting Office decides is legally entitled to the payment.

(d)(1) A payment under subsection (c)(2)(B) of this section or section 775(d) of this title is a bar to recovery by another individual.

(2) A benefit under this section and sections 773-775 of this title is not assignable or subject to legal process.

§777. Annuity increases

(a) The Comptroller General shall compute—

(1) on January 1 of each year, or within a reasonable time after January 1, the percent change in the Consumer Price Index between June and December of the prior year; and

(2) on July 1 of each year, or within a reasonable time after July 1, the percent change in the Index between June of the same year and December of the prior year.

(b) If a percent change computed under subsection (a)(1) of this section indicates a rise in the Index, an annuity payable under this subchapter and beginning before March 2 shall increase on March 1 by the percent change computed under subsection (a)(1), adjusted to the nearest .1 percent. If a percent change computed under subsection (a)(2) of this section indicates a rise in the Index, an annuity payable under this subchapter and beginning before September 2

shall increase on September 1 by the percent change computed under subsection (a)(2), adjusted to the nearest .1 percent.

(c)(1) An increase under this section may not be more than an increase prescribed under section 8340(b) of title 5.

(2) An annuity under section 772 of this title may not be more than the basic pay of the Comptroller General.

§778. Dependency and disability decisions

The General Counsel of the General Accounting Office shall decide a question of dependency, disability, or dependency and disability under sections 773-776 of this title. A decision under this section is final.

§779. Use of appropriations

Annuities and refunds under this subchapter shall be paid by the Comptroller General from appropriations of the General Accounting Office.

SUBTITLE II—THE BUDGET PROCESS

CHAPTER	Sec.
11. THE BUDGET AND FISCAL, BUDGET, AND PROGRAM INFORMATION.....	1101
13. APPROPRIATIONS.....	1301
15. APPROPRIATION ACCOUNTING.....	1501
CHAPTER 11—THE BUDGET AND FISCAL, BUDGET, AND PROGRAM INFORMATION	

Sec.	
1101.	Definitions.
1102.	Fiscal year.
1103.	Budget ceiling.
1104.	Budget and appropriations authority of the President.
1105.	Budget contents and submission to Congress.
1106.	Supplemental budget estimates and changes.
1107.	Deficiency and supplemental appropriations.
1108.	Preparation and submission of appropriations requests to the President.
1109.	Current programs and activities estimates.
1110.	Year-ahead requests for authorizing legislation.
1111.	Improving economy and efficiency.
1112.	Fiscal, budget, and program information.
1113.	Congressional information.
1114.	Budget information on consulting services.

§1101. Definitions

In this chapter—

(1) "agency" includes the District of Columbia government but does not include the legislative branch or the Supreme Court.

(2) "appropriations" means appropriated amounts and includes, in appropriate context—

(A) funds;

(B) authority to make obligations by contract before appropriations; and

(C) other authority making amounts available for obligation or expenditure.

§1102. Fiscal year

The fiscal year of the Treasury begins on October 1 of each year and ends on September 30 of the following year. Accounts of receipts and expenditures required under law to be published each year shall be published for the fiscal year.

§1103. Budget ceiling

Congress reaffirms its commitment that budget outlays of the United States Government for a fiscal year may be not more than the receipts of the Government for that year.

§1104. Budget and appropriations authority of the President

(a) The President shall prepare budgets of the United States Government under section 1105 of this title and proposed deficiency and supplemental appropriations under section 1107 of this title. To the extent practicable, the President shall use uniform terms in stating the purposes and conditions of appropriations.

(b) Except as provided in this chapter, the President shall prescribe the contents and order of statements in the budget on expenditures and estimated expenditures and statements on proposed appropriations and information submitted with the budget and proposed appropriations. The President shall include with the budget and proposed appropriations information on personnel and other objects of expenditure in the way that information was included in the budget for fiscal year 1950. However, the requirement that information be included in the budget in that way may be waived or changed by joint action of the Committees on Appropriations of both Houses of Congress. This subsection does not limit the authority of a committee of Congress to request information in a form it prescribes.

(c) When the President makes a basic change in the form of the budget, the President shall submit with the budget information showing where items in the budget for the prior fiscal year are contained in the present budget. However, the President may change the functional categories in the budget only in consultation with the Committees on Appropriations and on the Budget of both Houses of Congress.

(d) The President shall develop programs and prescribe regulations to improve the compilation, analysis, publication, and dissemination of statistical information by executive agencies. The President shall carry out this subsection through the Administrator for the Office of Information and Regulatory Affairs in the Office of Management and Budget.

(e) Under regulations prescribed by the President, each agency shall provide information required by the President in carrying out this chapter. The President has access to, and may inspect, records of an agency to obtain information.

§1105. Budget contents and submission to Congress

(a) During the first 15 days of each regular session of Congress, the President shall submit a budget of the United States Government for the following fiscal year. Each budget shall include a budget message and summary and supporting information. The President shall include in each budget the following:

(1) information on activities and functions of the Government.

(2) when practicable, information on costs and achievements of Government programs.

(3) other desirable classifications of information.

(4) a reconciliation of the summary information on expenditures with proposed appropriations.

(5) except as provided in subsection (b) of this section, estimated expenditures and proposed appropriations the President decides are necessary to support the Government in the fiscal year for which the budget is submitted and the 4 fiscal years after that year.

(6) estimated receipts of the Government in the fiscal year for which the budget is submitted and the 4 fiscal years after that year under—

(A) laws in effect when the budget is submitted; and

(B) proposals in the budget to increase revenues.

(7) appropriations, expenditures, and receipts of the Government in the prior fiscal year.

(8) estimated expenditures and receipts, and appropriations and proposed appropriations, of the Government for the current fiscal year.

(9) balanced statements of the—

(A) condition of the Treasury at the end of the prior fiscal year;

(B) estimated condition of the Treasury at the end of the current fiscal year; and

(C) estimated condition of the Treasury at the end of the fiscal year for which the budget is submitted if financial proposals in the budget are adopted.

(10) essential information about the debt of the Government.

(11) other financial information the President decides is desirable to explain in practicable detail the financial condition of the Government.

(12) for each proposal in the budget for legislation that would establish or expand a Government activity or function, a table showing—

(A) the amount proposed in the budget for appropriation and for expenditure because of the proposal in the fiscal year for which the budget is submitted; and

(B) the estimated appropriation required because of the proposal for each of the 4 fiscal years after that year that the proposal will be in effect.

(13) an allowance for additional estimated expenditures and proposed appropriations for the fiscal year for which the budget is submitted.

(14) an allowance for unanticipated uncontrollable expenditures for that year.

(15) a separate statement on each of the items referred to in section 301(a)(1)-(5) of the Congressional Budget Act of 1974 (2 U.S.C. 632(a)(1)-(5)).

(16) the level of tax expenditures under existing law in the tax expenditures budget (as defined in section 3(a)(3) of the Congressional Budget Act of 1974 (2 U.S.C. 622(a)(3))) for the fiscal year for which the budget is submitted, considering projected economic factors and changes in the existing levels based on proposals in the budget.

(17) information on estimates of appropriations for the fiscal year following the fiscal year for which the budget is submitted for grants, contracts, and other payments under each program for which there is an authorization of appropriations for that following fiscal year when the appropriations are authorized to be included in an appropriation law for the fiscal year before the fiscal year in which the appropriation is to be available for obligation.

(18) a comparison of the total amount of budget outlays for the prior fiscal year, estimated in the budget submitted for that year, for each major program having relatively uncontrollable outlays with the total amount of outlays for that program in that year.

(19) a comparison of the total amount of receipts for the prior fiscal year, estimated in the budget submitted for that year, with receipts received in that year, and for each major source of receipts, a comparison of the amount of receipts estimated in that budget with the amount of receipts from that source in that year.

(20) an analysis and explanation of the differences between each amount compared

under clauses (18) and (19) of this subsection.

(21) a horizontal budget showing—

(A) the programs for meteorology and of the National Climate Program established under section 5 of the National Climate Program Act (15 U.S.C. 2904);

(B) specific aspects of the program of, and appropriations for, each agency; and

(C) estimated goals and financial requirements.

(22) a statement of budget authority, proposed budget authority, budget outlays, and proposed budget outlays, and descriptive information in terms of—

(A) a detailed structure of national needs that refers to the missions and programs of agencies (as defined in section 101 of this title); and

(B) the missions and basic programs.

(23) separate appropriation accounts for appropriations under the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.) and the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 801 et seq.).

(24) recommendations on the return of Government capital to the Treasury by a mixed-ownership corporation (as defined in section 9101(2) of this title) that the President decides are desirable.

(b) Estimated expenditures and proposed appropriations for the legislative branch and the judicial branch to be included in each budget under subsection (a)(5) of this section shall be submitted to the President before October 16 of each year and included in the budget by the President without change.

(c) The President shall recommend in the budget appropriate action to meet an estimated deficiency when the estimated receipts for the fiscal year for which the budget is submitted (under laws in effect when the budget is submitted) and the estimated amounts in the Treasury at the end of the current fiscal year available for expenditure in the fiscal year for which the budget is submitted, are less than the estimated expenditures for that year. The President shall make recommendations required by the public interest when the estimated receipts and estimated amounts in the Treasury are more than the estimated expenditures.

(d) When the President submits a budget or supporting information about a budget, the President shall include a statement on all changes about the current fiscal year that were made before the budget or information was submitted.

§1106. Supplemental budget estimates and changes

(a) Before July 16 of each year, the President shall submit to Congress a supplemental summary of the budget for the fiscal year for which the budget is submitted under section 1105(a) of this title. The summary shall include—

(1) for that fiscal year—

(A) substantial changes in or reappraisals of estimates of expenditures and receipts;

(B) substantial obligations imposed on the budget after its submission;

(C) current information on matters referred to in section 1105(a)(8) and (9)(B) and (C) of this title; and

(D) additional information the President decides is advisable to provide Congress with complete and current information about the budget and current estimates of the functions, obligations, requirements,

and financial condition of the United States Government;

(2) for the 4 fiscal years following the fiscal year for which the budget is submitted, information on estimated expenditures for programs authorized to continue in future years, or that are considered mandatory, under law; and

(3) for future fiscal years, information on estimated expenditures of balances carried over from the fiscal year for which the budget is submitted.

(b) Before April 11 and July 16 of each year, the President shall submit to Congress a statement of changes in budget authority requested, estimated budget outlays, and estimated receipts for the fiscal year for which the budget is submitted (including prior changes proposed for the executive branch of the Government) that the President decides are necessary and appropriate based on current information. The statement shall include the effect of those changes on the information submitted under section 1105(a)(1)-(14) and (b) of this title and shall include supporting information as practicable. The statement submitted before July 16 may be included in the information submitted under subsection (a)(1) of this section.

§1107. Deficiency and supplemental appropriations

The President may submit to Congress proposed deficiency and supplemental appropriations the President decides are necessary because of laws enacted after the submission of the budget or that are in the public interest. The President shall include the reasons for the submission of the proposed appropriations and the reasons the proposed appropriations were not included in the budget. When the total proposed appropriations would have required the President to make a recommendation under section 1105(c) of this title if they had been included in the budget, the President shall make a recommendation under that section.

§1108. Preparation and submission of appropriations requests to the President

(a) In this section (except subsections (b)(1) and (e)), "agency" means a department, agency, or instrumentality of the United States Government.

(b)(1) The head of each agency shall prepare and submit to the President each appropriation request for the agency. The request shall be prepared and submitted in the form prescribed by the President under this chapter and by the date established by the President. When the head of an agency does not submit a request by that date, the President shall prepare the request for the agency to be included in the budget or changes in the budget or as deficiency and supplemental appropriations. The President may change agency appropriation requests. Agency appropriation requests shall be developed from cost-based budgets in the way and at times prescribed by the President. The head of the agency shall use the cost-based budget to administer the agency and to divide appropriations or amounts.

(2) An officer or employee of an agency in the executive branch may submit to the President or Congress a request for legislation authorizing deficiency or supplemental appropriations for the agency only with the approval of the head of the agency.

(c) The head of an agency shall include with an appropriation request submitted to the President a report that the statement of obligations submitted with the request contains obligations consistent with section

1501 of this title. The head of the agency shall support the report with a certification of the consistency and shall support the certification with records showing that the amounts have been obligated. The head of the agency shall designate officials to make the certifications, and those officials may not delegate the duty to make the certifications. The certifications and records shall be kept in the agency—

(1) in a form that makes audits and reconciliations easy; and

(2) for a period necessary to carry out audits and reconciliations.

(d) To the extent practicable, the head of an agency shall—

(1) provide information supporting the agency's budget request for its missions by function and subfunction (including the mission of each organizational unit of the agency); and

(2) relate the agency's programs to its missions.

(e) Except as provided in subsection (f) of this section, an officer or employee of an agency (as defined in section 1101 of this title) may submit to Congress or a committee of Congress an appropriations estimate or request, a request for an increase in that estimate or request, or a recommendation on meeting the financial needs of the Government only when requested by either House of Congress.

(f) The Interstate Commerce Commission shall submit to Congress copies of budget estimates, requests, and information (including personnel needs), legislative recommendations, prepared testimony for congressional hearings, and comments on legislation at the same time they are sent to the President or the Office of Management and Budget. An officer of an agency may not impose conditions on or impair communication by the Commission with Congress, or a committee or member of Congress, about the information.

(g) Amounts available under law are available for field examinations of appropriation estimates. The use of the amounts is subject only to regulations prescribed by the appropriate standing committees of Congress.

§1109. Current programs and activities estimates

(a) Before November 11 of each year, the President shall submit to both Houses of Congress the estimated budget outlays and proposed budget authority that would be included in the budget for the following fiscal year if programs and activities of the United States Government were carried on during that year at the same level as the current fiscal year without a change in policy. The President shall state the estimated budget outlays and proposed budget authority by function and subfunction under the classifications in the budget summary table under the heading "Budget Authority and Outlays by Function and Agency", by major programs in each function, and by agency. The President also shall include a statement of the economic and program assumptions on which those budget outlays and budget authority are based, including inflation, real economic growth, and unemployment rates, program caseloads, and pay increases.

(b) The Joint Economic Committee shall review the estimated budget outlays and proposed budget authority and submit an economic evaluation of the budget outlays and budget authority to the Committees on the Budget of both Houses before January 1 of each year.

§1110. Year-ahead requests for authorizing legislation

A request to enact legislation authorizing new budget authority to continue a program or activity for a fiscal year shall be submitted to Congress before May 16 of the year before the year in which the fiscal year begins. If a new program or activity will continue for more than one year, the request must be submitted for at least the 1st and 2d fiscal years.

§1111. Improving economy and efficiency

To improve economy and efficiency in the United States Government, the President shall—

(1) make a study of each agency to decide, and may send Congress recommendations, on changes that should be made in—

(A) the organization, activities, and business methods of agencies;

(B) agency appropriations;

(C) the assignment of particular activities to particular services; and

(D) regrouping of services; and

(2) evaluate and develop improved plans for the organization, coordination, and management of the executive branch of the Government.

§1112. Fiscal, budget, and program information

(a) In this section, "agency" means a department, agency, or instrumentality of the United States Government except a mixed-ownership Government corporation.

(b) In cooperation with the Comptroller General, the Secretary of the Treasury and the Director of the Office of Management and Budget shall establish and maintain standard data processing and information systems for fiscal, budget, and program information for use by agencies to meet the needs of the Government, and to the extent practicable, of State and local governments.

(c) The Comptroller General—

(1) in cooperation with the Secretary, the Director of the Office of Management and Budget, and the Director of the Congressional Budget Office, shall establish, maintain, and publish standard terms and classifications for fiscal, budget, and program information of the Government, including information on fiscal policy, receipts, expenditures, programs, projects, activities, and functions;

(2) when advisable, shall report to Congress on those terms and classifications, and recommend legislation necessary to promote the establishment, maintenance, and use of standard terms and classifications by the executive branch of the Government; and

(3) in carrying out this subsection, shall give particular consideration to the needs of the Committees on Appropriations and on the Budget of both Houses of Congress; the Committee on Ways and Means of the House, the Committee on Finance of the Senate, and the Congressional Budget Office.

(d) Agencies shall use the standard terms and classifications published under subsection (c)(1) of this section in providing fiscal, budget, and program information to Congress.

(e) In consultation with the President, the head of each executive agency shall take actions necessary to achieve to the extent possible—

(1) consistency in budget and accounting classifications;

(2) synchronization between those classifications and organizational structure; and

(3) information by organizational unit on performance and program costs to support budget justifications.

(f) In cooperation with the Director of the Congressional Budget Office, the Comptroller General, and appropriate representatives of State and local governments, the Director of the Office of Management and Budget (to the extent practicable) shall provide State and local governments with fiscal, budget, and program information necessary for accurate and timely determination by those governments of the impact on their budgets of assistance of the United States Government.

§1113. Congressional information

(a) When requested by a committee of Congress having jurisdiction over receipts or appropriations, the President shall provide the committee with assistance and information.

(b) When requested by a committee of Congress, by the Comptroller General, or by the Director of the Congressional Budget Office, the Secretary of the Treasury, the Director of the Office of Management and Budget, and the head of each executive agency shall—

(1) provide information on the location and kind of available fiscal, budget, and program information;

(2) to the extent practicable, prepare summary tables of that fiscal, budget, and program information and related information the committee, the Comptroller General, or the Director of the Congressional Budget Office considers necessary; and

(3) provide a program evaluation carried out or commissioned by an executive agency.

(c) In cooperation with the Director of the Congressional Budget Office, the Secretary, and the Director of the Office of Management and Budget, the Comptroller General shall—

(1) establish and maintain a current directory of sources of, and information systems for, fiscal, budget, and program information and a brief description of the contents of each source and system;

(2) when requested, provide assistance to committees of Congress and members of Congress in obtaining information from the sources in the directory; and

(3) when requested, provide assistance to committees and, to the extent practicable, to members of Congress in evaluating the information obtained from the sources in the directory.

(d) To the extent they consider necessary, the Comptroller General and the Director of the Congressional Budget Office individually or jointly shall establish and maintain a file of information to meet recurring needs of Congress for fiscal, budget, and program information to carry out this section and sections 717 and 1112 of this title. The file shall include information on budget requests, congressional authorizations to obligate and expend, apportionment and reserve actions, and obligations and expenditures. The Comptroller General and the Director shall maintain the file and an index to the file so that it is easier for the committees and agencies of Congress to use the file and index through data processing and communications techniques.

(e)(1) The Comptroller General shall—

(A) carry out a continuing program to identify the needs of committees and members of Congress for fiscal, budget, and program information to carry out this section and section 1112 of this title;

(B) assist committees of Congress in developing their information needs;

(C) monitor recurring reporting requirements of Congress and committees; and

(D) make recommendations to Congress and committees for changes and improvements in those reporting requirements to meet information needs identified by the Comptroller General, to improve their usefulness to congressional users, and to eliminate unnecessary reporting.

(2) Before September 2 of each year, the Comptroller General shall report to Congress on—

(A) the needs identified under paragraph (1)(A) of this subsection;

(B) the relationship of those needs to existing reporting requirements;

(C) the extent to which reporting by the executive branch of the United States Government currently meets the identified needs;

(D) the changes to standard classifications necessary to meet congressional needs;

(E) activities, progress, and results of the program of the Comptroller General under paragraph (1)(B)-(D) of this subsection; and

(F) progress of the executive branch in the prior year.

(3) Before March 2 of each year, the Director of the Office of Management and Budget and the Secretary shall report to Congress on plans for meeting the needs identified under paragraph (1)(A) of this subsection, including—

(A) plans for carrying out changes to classifications to meet information needs of Congress;

(B) the status of information systems in the prior year; and

(C) the use of standard classifications.

§1114. Budget information on consulting services

(a) The head of each agency shall include in the budget justification for the agency submitted each year to the Committees on Appropriations of both Houses of Congress—

(1) amounts requested for consulting services;

(2) the appropriation accounts from which the amounts are to be paid; and

(3) a description of the need for the consulting services, including a list of the major programs requiring those services.

(b) The Inspector General or comparable official of each agency shall submit to Congress each year, with the budget justification for the agency, an evaluation of the progress of the agency in establishing effective management controls and improving the accuracy and completeness of the information provided to the Federal Procurement Data System on contracts for consulting services. If the agency does not have an Inspector General or comparable official, the head of the agency or officer or employee designated by the head of the agency shall submit the evaluation.

CHAPTER 13—APPROPRIATIONS

SUBCHAPTER I—GENERAL

Sec.

1301. Application.

1302. Determining amounts appropriated.

1303. Effect of changes in titles of appropriations.

1304. Judgments, awards, and compromise settlements.

1305. Miscellaneous permanent appropriations.

1306. Use of foreign credits.

1307. Public building construction.

1308. Telephone and metered services.

1309. Social security tax.

1310. Appropriations for private organizations.

SUBCHAPTER II—TRUST FUNDS AND REFUNDS

1321. Trust funds.

1322. Payments of unclaimed trust fund amounts and refund of amounts erroneously deposited.

1323. Trust funds for certain fees, donations, quasi-public amounts, and unearned amounts.

1324. Refund of internal revenue collections.

SUBCHAPTER III—LIMITATIONS, EXCEPTIONS, AND PENALTIES

1341. Limitations on expending and obligating amounts.

1342. Limitation on voluntary services.

1343. Buying and leasing passenger motor vehicles and aircraft.

1344. Passenger motor vehicle and aircraft use.

1345. Expenses of meetings.

1346. Commissions, councils, boards, and interagency and similar groups.

1347. Appropriations or authorizations required for agencies in existence for more than one year.

1348. Telephone installation and charges.

1349. Adverse personnel actions.

1350. Criminal penalty.

1351. Reports on violations.

SUBCHAPTER I—GENERAL

§1301. Application

(a) Appropriations shall be applied only to the objects for which the appropriations were made except as otherwise provided by law.

(b) The reappropriation and diversion of the unexpended balance of an appropriation for a purpose other than that for which the appropriation originally was made shall be construed and accounted for as a new appropriation. The unexpended balance shall be reduced by the amount to be diverted.

(c) An appropriation in a regular, annual appropriation law may be construed to be permanent or available continuously only if the appropriation—

(1) is for rivers and harbors, lighthouses, public buildings, or the pay of the Navy and Marine Corps; or

(2) expressly provides that it is available after the fiscal year covered by the law in which it appears.

(d) A law may be construed to make an appropriation out of the Treasury or to authorize making a contract for the payment of money in excess of an appropriation only if the law specifically states that an appropriation is made or that such a contract may be made.

§1302. Determining amounts appropriated

Except as specifically provided by law, the total amount appropriated in an appropriation law is determined by adding up the specific amounts or rates appropriated in each paragraph of the law.

§1303. Effect of changes in titles of appropriations

Expenditures for a particular object or purpose authorized by a law (and referred to in that law by the specific title previously used for the appropriation item in the appropriation law concerned) may be made from a corresponding appropriation item when the specific title is changed or eliminated from a later appropriation law.

§1304. Judgments, awards, and compromise settlements

(a) Necessary amounts are appropriated to pay final judgments, awards, compromise settlements, and interest and costs specified in the judgments or otherwise authorized by law when—

(1) payment is not otherwise provided for;

(2) payment is certified by the Comptroller General; and

(3) the judgment, award, or settlement is payable—

(A) under section 2414, 2517, 2672, or 2677 of title 28;

(B) under section 3723 of this title;

(C) under a decision of a board of contract appeals; or

(D) in excess of an amount payable from the appropriations of an agency for a meritorious claim under section 2733 or 2734 of title 10, section 715 of title 32, or section 203 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2473).

(b)(1) Interest may be paid from the appropriation made by this section—

(A) on a judgment of a district court under section 2411(b) of title 28, only when the judgment becomes final after review on appeal or petition by the United States Government, and then only from the date of filing of the transcript of the judgment with the Comptroller General through the day before the date of the mandate of affirmance; or

(B) on a judgment of the Court of Claims under section 2516(b) of title 28, only from the date of filing of the transcript of the judgment with the Comptroller General through the day before the date of the mandate of affirmance.

(2) Interest payable under this subsection in a proceeding reviewed by the Supreme Court is not allowed after the end of the term in which the judgment is affirmed.

(c)(1) A judgment or compromise settlement against the Government shall be paid under this section and sections 2414, 2517, and 2518 of title 28 when the judgment or settlement arises out of an express or implied contract made by—

(A) the Army and Air Force Exchange Service;

(B) the Navy Exchanges;

(C) the Marine Corps Exchanges;

(D) the Coast Guard Exchanges; or

(E) the Exchange Councils of the National Aeronautics and Space Administration.

(2) The Exchange making the contract shall reimburse the Government for the amount paid by the Government.

§1305. Miscellaneous permanent appropriations

Necessary amounts are appropriated for the following:

(1) to pay the proceeds of the personal estate of a United States citizen dying abroad to the legal representative of the deceased on proper demand and proof.

(2) to pay interest on the public debt under laws authorizing payment.

(3) to pay proceeds from derelict and salvage cases adjudged by the courts of the United States to salvors.

(4) to make payments required under contracts made under section 108 of the Housing and Community Development Act of 1974 (42 U.S.C. 5308) for the payment of interest on obligations guaranteed by the Secretary of Housing and Urban Development under section 108.

(5) to make payments required under contracts made under section 103(b) of the Housing Act of 1949 (42 U.S.C. 1453(b)) for projects or programs for which amounts

had been committed before January 1, 1975, and for which amounts have not been appropriated.

(6) to pay for the construction of buildings and expenses of the Smithsonian Institution, at 6 percent on the fund derived from the bequest of James Smithson.

§1306. Use of foreign credits

Foreign credits owed to or owned by the Treasury are not available for expenditure by agencies except as provided annually in general appropriation laws.

§1307. Public building construction

Amounts appropriated to construct public buildings remain available until completion of the work. When a building is completed and outstanding liabilities for the construction are paid, balances remaining shall revert immediately to the Treasury.

§1308. Telephone and metered services

Charges for telephone and metered services (such as gas, electricity, water, and steam) for a time period beginning in one fiscal year or allotment period and ending in another fiscal year or allotment period may be charged against the appropriation or allotment current at the end of the time period covered by the service.

§1309. Social security tax

Amounts made available for the compensation of officers and employees of the United States Government may be used to pay taxes imposed on an agency as an employer under chapter 21 of the Internal Revenue Code of 1954 (26 U.S.C. 3101 et seq.).

§1310. Appropriations for private organizations

(a) The Secretary of the Treasury shall credit an appropriation for a private organization to the appropriate fiscal official of the organization. The credit shall be carried on the accounts of—

(1) the Treasury; or

(2) a designated depository of the United States Government (except a national bank).

(b) The fiscal official may pay an amount out of the appropriation only on a check of the fiscal official—

(1) payable to the order of the person to whom payment is to be made; and

(2) that states the specific purpose for which the amount is to be applied.

(c)(1) The fiscal official may pay an amount of less than \$20 out of the appropriation on a check—

(A) payable to the order of the fiscal official; and

(B) that states the amount is to be applied to small claims.

(2) The fiscal official shall provide the Secretary or the designated depository on which the check is drawn with a certified list of the claims. The list shall state the kind and amount of each claim and the name of each claimant.

SUBCHAPTER II—TRUST FUNDS AND REFUNDS

§1321. Trust funds

(a) The following are classified as trust funds:

(1) Philippine special fund (customs duties).

(2) Philippine special fund (internal revenue).

(3) Unclaimed condemnation awards, Department of the Treasury.

(4) Naval reservation, Olango civil fund.

(5) Personal funds of deceased inmates, Naval Home.

(6) Return to deported aliens of passage money collected from steamship companies.

(7) Vocational rehabilitation, special fund.

(8) Library of Congress gift fund.

(9) Library of Congress trust fund, investment account.

(10) Library of Congress trust fund, income from investment account.

(11) Library of Congress trust fund, permanent loan.

(12) Relief and rehabilitation, Longshoremen's and Harbor Workers' Compensation Act.

(13) Cooperative work, Forest Service.

(14) Wages and effects of American seamen, Department of Commerce.

(15) Pension money, Saint Elizabeths Hospital.

(16) Personal funds of patients, Saint Elizabeths Hospital.

(17) National Park Service, donations.

(18) Purchase of lands, national parks, donations.

(19) Extension of winter-feed facilities of game animals of Yellowstone National Park, donations.

(20) Indian moneys, proceeds of labor, agencies, schools, and so forth.

(21) Funds of Federal prisoners.

(22) Commissary funds, Federal prisons.

(23) Pay of the Navy, deposit funds.

(24) Pay of Marine Corps, deposit funds.

(25) Pay of the Army, deposit fund.

(26) Preservation birthplace of Abraham Lincoln.

(27) Funds contributed for flood control, Mississippi River, its outlets and tributaries.

(28) Funds contributed for flood control, Sacramento River, California.

(29) Effects of deceased employees, Department of the Treasury.

(30) Money and effects of deceased patients, Public Health Service.

(31) Effects of deceased employees, Department of Commerce.

(32) Topographic survey of the United States, contributions.

(33) National Institutes of Health, gift fund.

(34) National Institutes of Health, conditional gift fund.

(35) Patients' deposits, United States Marine Hospital, Carville, Louisiana.

(36) Estates of deceased personnel, Department of the Army.

(37) Effects of deceased employees, Department of Interior.

(38) Fredericksburg and Spotsylvania County Battlefields memorial fund.

(39) Petersburg National Military Park fund.

(40) Gorgas memorial laboratory quotas.

(41) Contributions to International Boundary Commission, United States and Mexico.

(42) Salvage proceeds, American vessels.

(43) Wages due American seamen.

(44) Federal Industrial Institution for Women, contributions for chapel.

(45) General post fund, National Homes, Veterans' Administration.

(46) Repatriation of American seamen.

(47) Expenses, public survey work, general.

(48) Expenses, public survey work, Alaska.

(49) Funds contributed for improvement of roads, bridges, and trails, Alaska.

(50) Protective works and measures, Lake of the Woods and Rainy River, Minnesota.

(51) Washington redemption fund.

(52) Permit fund, District of Columbia.

(53) Unclaimed condemnation awards, National Capital Park and Planning Commission, District of Columbia.

(54) Unclaimed condemnation awards, Rock Creek and Potomac Parkway Commission, District of Columbia.

(55) Miscellaneous trust fund deposits, District of Columbia.

(56) Surplus fund, District of Columbia.

(57) Relief and rehabilitation, District of Columbia Workmen's Compensation Act.

(58) Inmates' fund, workhouse and reformatory, District of Columbia.

(59) Soldiers' Home, permanent fund.

(60) Chamber Music Auditorium, Library of Congress.

(61) Bequest of Gertrude Hubbard.

(62) Puerto Rico special fund (Internal Revenue).

(63) Miscellaneous trust funds, Department of State.

(64) Funds contributed for improvement of (name of river or harbor).

(65) Funds advanced for improvement of (name of river or harbor).

(66) Funds contributed for Indian projects.

(67) Miscellaneous trust funds of Indian tribes.

(68) Ship's stores profits, Navy.

(69) Completing Surveys within Railroad Land Grants.

(70) Memorial to Women of World War, contributions.

(71) Funds contributed for Memorial to John Ericsson.

(72) American National Red Cross Building, contributions.

(73) Estate of decedents, Department of State, Trust Fund.

(74) Funds due Incompetent Beneficiaries, Veterans' Administration.

(75) To promote the Education of the Blind (principal).

(76) Paving Government Road across Fort Sill Military Reservation, Okla.

(77) Bequest of William F. Edgar, Museum and Library, office of Surgeon General of the Army.

(78) Funds Contributed for Flood Control (name of river, harbor, or project).

(79) Matured obligations of the District of Columbia.

(80) To promote the education of the blind (interest).

(81) Soldiers' Home, interest account.

(82) Post-Vietnam Era Veterans Education Account, Veterans' Administration.

(83) United States Government life insurance fund, Veterans' Administration.

(84) Estates of deceased soldiers, United States Army.

(85) Teachers Retirement Fund Deductions, District of Columbia.

(86) Teachers Retirement Fund, Government Reserves, District of Columbia.

(87) Expenses of Smithsonian Institution Trust Fund (principal).

(88) Civil Service Retirement and Disability Fund.

(89) Canal Zone Retirement and Disability Fund.

(90) Foreign Service Retirement and Disability Fund.

(b) Amounts (except amounts received by the Comptroller of the Currency and the Federal Deposit Insurance Corporation) that are analogous to the funds named in subsection (a) of this section and are received by the United States Government as trustee shall be deposited in an appropriate trust fund account in the Treasury. Amounts accruing to these funds (except to the trust fund "Soldiers' Home, Permanent Fund") are appropriated to be disbursed in compliance with the terms of the trust. Expenditures from the trust fund "Soldiers'

Home, Permanent Fund" shall be made only under annual appropriations. Those appropriations are authorized to be made.

§1322. Payments of unclaimed trust fund amounts and refund of amounts erroneously deposited

(a) On September 30 of each year, the Secretary of the Treasury shall transfer to the Treasury trust fund receipt account "Unclaimed Moneys of Individuals Whose Whereabouts are Unknown" that part of the balance of a trust fund account named in section 1321(a)(1)-(82) of this title or an analogous trust fund established under section 1321(b) of this title that has been in the fund for more than one year and represents money belonging to individuals whose whereabouts are unknown. Subsequent claims to the transferred funds shall be paid from the account "Unclaimed Moneys of Individuals Whose Whereabouts are Unknown".

(b) Except as provided in subsection (c) of this section, necessary amounts are appropriated to the Secretary of the Treasury to make payments from—

(1) the Treasury trust fund receipt account "Unclaimed Moneys of Individuals Whose Whereabouts are Unknown"; and

(2) the United States Government account "Refund of Moneys Erroneously Received and Covered" and other collections erroneously deposited that are not properly chargeable to another appropriation.

(c)(1) The Secretary of the Treasury shall hold in perpetuity in the Treasury trust fund receipt account "Unclaimed Moneys of Individuals Whose Whereabouts are Unknown" the balance remaining after the final distribution of unclaimed Postal Savings System deposits under section 1(a) of the Act of August 13, 1971 (Public Law 92-117, 85 Stat. 337). The Secretary shall use the balance to pay claims for Postal Savings System deposits without regard to the State law or the law of other jurisdictions of deposit about the disposition of unclaimed or abandoned property.

(2) Necessary amounts may be appropriated without fiscal year limitation to the trust fund receipt account to pay claims for deposits when the balance in the account is not sufficient to pay the claims because of payments made under paragraph (1) of this subsection.

§1323. Trust funds for certain fees, donations, quasi-public amounts, and unearned amounts

(a) Amounts from the following sources held in checking accounts of disbursing officials shall be deposited in the Treasury to the appropriate trust fund receipt accounts:

(1) unearned money, lands (Department of the Interior).

(2) reentry permit fees (Department of Justice).

(3) naturalization fees (Department of Justice).

(4) registry fees (Department of Justice).

(b) Amounts deposited under subsection (a) of this section are appropriated for refunds. Earned parts of those amounts shall be transferred and credited to the appropriate receipt fund accounts.

(c) Donations, quasi-public amounts, and unearned amounts shall be deposited in the Treasury as trust funds and are appropriated for disbursement under the terms of the trusts when the donation or amount is—

(1) administered by officers and employees of the United States Government; and

(2) carried in checking accounts of disbursing officials or others required to ac-

count to the Comptroller General (except clerks and marshals of the United States district courts).

§1324. Refund of internal revenue collections

(a) Necessary amounts are appropriated to the Secretary of the Treasury for refunding internal revenue collections as provided by law, including payment of—

(1) claims for prior fiscal years; and

(2) accounts arising under—

(A) "Allowance or drawback (Internal Revenue)";

(B) "Redemption of stamps (Internal Revenue)";

(C) "Refunding legacy taxes, Act of March 30, 1928";

(D) "Repayment of taxes on distilled spirits destroyed by casualty"; and

(E) "Refunds and payments of processing and related taxes".

(b) Disbursements may be made from the appropriation made by this section only for—

(1) refunds to the limit of liability of an individual tax account; and

(2) refunds due from credit provisions of the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) enacted before January 1, 1978.

SUBCHAPTER III—LIMITATIONS, EXCEPTIONS, AND PENALTIES

§1341. Limitations on expending and obligating amounts

(a)(1) An officer or employee of the United States Government or of the District of Columbia government may not—

(A) make or authorize an expenditure or obligation exceeding an amount available in an appropriation or fund for the expenditure or obligation; or

(B) involve either government in a contract or obligation for the payment of money before an appropriation is made unless authorized by law.

(2) This subsection does not apply to a corporation getting amounts to make loans (except paid in capital amounts) without legal liability of the United States Government.

(b) An article to be used by an executive department in the District of Columbia that could be bought out of an appropriation made to a regular contingent fund of the department may not be bought out of another amount available for obligation.

§1342. Limitation on voluntary services

An officer or employee of the United States Government or of the District of Columbia government may not accept voluntary services for either government or employ personal services exceeding that authorized by law except for emergencies involving the safety of human life or the protection of property. This section does not apply to a corporation getting amounts to make loans (except paid in capital amounts) without legal liability of the United States Government.

§1343. Buying and leasing passenger motor vehicles and aircraft

(a) In this section, buying a passenger motor vehicle or aircraft includes a transfer of the vehicle or aircraft between agencies.

(b) An appropriation may be expended to buy or lease passenger motor vehicles only—

(1) for the use of—

(A) the President;

(B) the secretaries to the President; or

(C) the heads of executive departments listed in section 101 of title 5; or

(2) as specifically provided by law.

(c)(1) Except as specifically provided by law, an agency may use an appropriation to buy a passenger motor vehicle (except a bus or ambulance) only at a total cost (except costs required only for transportation) that—

(A) includes the price of systems and equipment the Administrator of General Services decides is incorporated customarily in standard passenger motor vehicles completely equipped for ordinary operation;

(B) includes the value of a vehicle used in exchange;

(C) is not more than the maximum price established by the agency having authority under law to establish a maximum price; and

(D) is not more than the amount specified in a law.

(2) Additional systems and equipment may be bought for a passenger motor vehicle if the Administrator decides the purchase is appropriate. The price of additional systems or equipment is not included in deciding whether the cost of the vehicle is within a maximum price specified in a law.

(d) An appropriation (except an appropriation for the armed forces) is available to buy, maintain, or operate an aircraft only if the appropriation specifically authorizes the purchase, maintenance, or operation.

(e) This section does not apply to—

(1) buying, maintaining, and repairing passenger motor vehicles by the United States Capitol Police;

(2) buying, maintaining, and repairing vehicles necessary to carry out projects to improve, preserve, and protect rivers and harbors; or

(3) leasing, maintaining, repairing, or operating motor passenger vehicles necessary in the field work of the Department of Agriculture.

§1344. Passenger motor vehicle and aircraft use

(a) Except as specifically provided by law, an appropriation may be expended to maintain, operate, and repair passenger motor vehicles or aircraft of the United States Government that are used only for an official purpose. An official purpose does not include transporting officers or employees of the Government between their domiciles and places of employment except—

(1) medical officers on out-patient medical service; and

(2) officers or employees performing field work requiring transportation between their domiciles and places of employment when the transportation is approved by the head of the agency.

(b) This section does not apply to a motor vehicle or aircraft for the official use of—

(1) the President;

(2) the heads of executive departments listed in section 101 of title 5; or

(3) principal diplomatic and consular officials.

§1345. Expenses of meetings

Except as specifically provided by law, an appropriation may not be used for travel, transportation, and subsistence expenses for a meeting. This section does not prohibit—

(1) an agency from paying the expenses of an officer or employee of the United States Government carrying out an official duty; and

(2) the Secretary of Agriculture from paying necessary expenses for a meeting called by the Secretary for 4-H Boys and Girls Clubs as part of the cooperative extension work of the Department of Agriculture.

§1346. Commissions, councils, boards, and interagency and similar groups

(a) Except as provided in this section—

(1) public money and appropriations are not available to pay—

(A) the pay or expenses of a commission, council, board, or similar group, or a member of that group;

(B) expenses related to the work or the results of work or action of that group; or

(C) for the detail or cost of personal services of an officer or employee from an executive agency in connection with that group; and

(2) an accounting or disbursing official, absent a special appropriation to pay the account or charge, may not allow or pay an account or charge related to that group.

(b) Appropriations of an executive agency are available for the expenses of an interagency group conducting activities of interest common to executive agencies when the group includes a representative of the agency. The representatives receive no additional pay because of membership in the group. An officer or employee of an executive agency not a representative of the group may not receive additional pay for providing services for the group.

(c) Subject to section 1347 of this title, this section does not apply to—

(1) commissions, councils, boards, or similar groups authorized by law;

(2) courts-martial or courts of inquiry of the armed forces; or

(3) the contingent fund related to foreign relations at the disposal of the President.

§1347. Appropriations or authorizations required for agencies in existence for more than one year

(a) An agency in existence for more than one year may not use amounts otherwise available for obligation to pay its expenses without a specific appropriation or specific authorization by law. If the principal duties and powers of the agency are substantially the same as or similar to the duties and powers of an agency established by executive order, the agency established later is deemed to have been in existence from the date the agency established by the order came into existence.

(b) Except as specifically authorized by law, another agency may not use amounts available for obligation to pay expenses to carry out duties and powers substantially the same as or similar to the principal duties and powers of an agency that is prohibited from using amounts under this section.

§1348. Telephone installation and charges

(a)(1) Except as provided in this section, appropriations are not available to install telephones in private residences or for tolls or other charges for telephone service from private residences.

(2) Under regulations of the Secretary of State, appropriations may be used to install and pay for the use of telephones in residences owned or leased by the United States Government in foreign countries for the use of the Foreign Service. Subsection (b) of this section applies to long-distance calls made on those telephones.

(b) Appropriations of an agency are available to pay charges for a long-distance call if required for official business and the voucher to pay for the call is sworn to by the head of the agency. Appropriations of an executive agency are available only if the head of the agency also certifies that the call is necessary in the interest of the Government.

(c) Under regulations prescribed by the Secretary of the Army on recommendation of the Chief of Engineers, not more than \$30,000 may be expended each fiscal year to install and use in private residences telephones required for official business in constructing and operating locks and dams for navigation, flood control, and related water uses.

§1349. Adverse personnel actions

(a) An officer or employee of the United States Government or of the District of Columbia government violating section 1341(a) or 1342 of this title shall be subject to appropriate administrative discipline including, when circumstances warrant, suspension from duty without pay or removal from office.

(b) An officer or employee who willfully uses or authorizes the use of a passenger motor vehicle or aircraft owned or leased by the United States Government (except for an official purpose authorized by section 1344 of this title) or otherwise violates section 1344 shall be suspended without pay by the head of the agency. The officer or employee shall be suspended for at least one month, and when circumstances warrant, for a longer period or summarily removed from office.

§1350. Criminal penalty

An officer or employee of the United States Government or of the District of Columbia government knowingly and willfully violating section 1341(a) or 1342 of this title shall be fined not more than \$5,000, imprisoned for not more than 2 years, or both.

§1351. Reports on violations

If an officer or employee of an executive agency or an officer or employee of the District of Columbia government violates section 1341(a) or 1342 of this title, the head of the agency or the Mayor of the District of Columbia, as the case may be, shall report immediately to the President and Congress all relevant facts and a statement of actions taken.

- 1552. Procedure for appropriation accounts available for definite periods.
- 1553. Availability of appropriation accounts to pay obligations.
- 1554. Review of appropriation accounts.
- 1555. Withdrawal of unobligated balances of appropriations for indefinite periods.
- 1556. Comptroller General reports on appropriation accounts.
- 1557. Authorization to exempt.

SUBCHAPTER I—GENERAL

- §1501. Documentary evidence requirement for Government obligations

(a) An amount shall be recorded as an obligation of the United States Government only when supported by documentary evidence of—

(1) a binding agreement between an agency and another person (including an agency) that is—

(A) in writing, in a way and form, and for a purpose authorized by law; and

(B) executed before the end of the period of availability for obligation of the appropriation or fund used for specific goods to be delivered, real property to be bought or leased, or work or service to be provided;

(2) a loan agreement showing the amount and terms of repayment;

(3) an order required by law to be placed with an agency;

(4) an order issued under a law authorizing purchases without advertising—

(A) when necessary because of a public emergency;

(B) for perishable subsistence supplies; or

(C) within specific monetary limits;

(5) a grant or subsidy payable—

(A) from appropriations made for payment of, or contributions to, amounts required to be paid in specific amounts fixed by law or under formulas prescribed by law;

(B) under an agreement authorized by law; or

(C) under plans approved consistent with and authorized by law;

(6) a liability that may result from pending litigation;

(7) employment or services of persons or expenses of travel under law;

(8) services provided by public utilities; or

(9) other legal liability of the Government against an available appropriation or fund.

(b) A statement of obligations provided to Congress or a committee of Congress by an agency shall include only those amounts that are obligations consistent with subsection (a) of this section.

§1502. Balances available

(a) The balance of an appropriation or fund limited for obligation to a definite period is available only for payment of expenses properly incurred during the period of availability or to complete contracts properly made within that period of availability and obligated consistent with section 1501 of this title. However, the appropriation or fund is not available for expenditure for a period beyond the period otherwise authorized by law.

(b) A provision of law requiring that the balance of an appropriation or fund be returned to the general fund of the Treasury at the end of a definite period does not

affect the status of lawsuits or rights of action involving the right to an amount payable from the balance.

§1503. Comptroller General reports of amounts for which no accounting is made

The Comptroller General shall make a special report each year to Congress on recommendations for changes in laws, that the Comptroller General believes may be in the public interest, about amounts—

(1) for which no accounting is made to the Comptroller General; and

(2) that are in—

(A) accounts of the United States Government; or

(B) the custody of an officer or employee of the Government if the Government is financially concerned.

SUBCHAPTER II—APPORTIONMENT

§1511. Definition and application

(a) In this subchapter, "appropriations" means—

(1) appropriated amounts;

(2) funds; and

(3) authority to make obligations by contract before appropriations.

(b) This subchapter does not apply to—

(1) amounts (except amounts for administrative expenses) available—

(A) for price support and surplus removal of agricultural commodities; and

(B) under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c);

(2) a corporation getting amounts to make loans (except paid in capital amounts) without legal liability on the part of the United States Government; and

(3) the Senate, the House of Representatives, a committee of Congress, a member, officer, employee, or office of either House of Congress, or the Office of the Architect of the Capitol or an officer or employee of that Office.

§1512. Apportionment and reserves

(a) Except as provided in this subchapter, an appropriation available for obligation for a definite period shall be apportioned to prevent obligation or expenditure at a rate that would indicate a necessity for a deficiency or supplemental appropriation for the period. An appropriation for an indefinite period and authority to make obligations by contract before appropriations shall be apportioned to achieve the most effective and economical use. An apportionment may be reapportioned under this section.

(b)(1) An appropriation subject to apportionment is apportioned by—

(A) months, calendar quarters, operating seasons, or other time periods;

(B) activities, functions, projects, or objects; or

(C) a combination of the ways referred to in clauses (A) and (B) of this paragraph.

(2) The official designated in section 1513 of this title to make apportionments shall apportion an appropriation under paragraph (1) of this subsection as the official considers appropriate. Except as specified by the official, an amount apportioned is available for obligation under the terms of the appropriation on a cumulative basis unless reapportioned.

(c)(1) In apportioning or reapportioning an appropriation, a reserve may be established only—

(A) to provide for contingencies;

(B) to achieve savings made possible by or through changes in requirements or greater efficiency of operations; or

(C) as specifically provided by law.

(2) A reserve established under this subsection may be changed as necessary to

carry out the scope and objectives of the appropriation concerned. When an official designated in section 1513 of this title to make apportionments decides that an amount reserved will not be required to carry out the objectives and scope of the appropriation concerned, the official shall recommend the rescission of the amount in the way provided in chapter 11 of this title for appropriation requests. Reserves established under this section shall be reported to Congress as provided in the Impoundment Control Act of 1974 (2 U.S.C. 681 et seq.).

(d) An apportionment or a reapportionment shall be reviewed at least 4 times a year by the official designated in section 1513 of this title to make apportionments.

§1513. Officials controlling apportionments

(a) The official having administrative control of an appropriation available to the legislative branch, the judicial branch, the United States International Trade Commission, or the District of Columbia government that is required to be apportioned under section 1512 of this title shall apportion the appropriation in writing. An appropriation shall be apportioned not later than the later of the following:

(1) 30 days before the beginning of the fiscal year for which the appropriation is available; or

(2) 30 days after the date of enactment of the law by which the appropriation is made available.

(b)(1) The President shall apportion in writing an appropriation available to an executive agency (except the Commission) that is required to be apportioned under section 1512 of this title. The head of each executive agency to which the appropriation is available shall submit to the President information required for the apportionment in the form and the way and at the time specified by the President. The information shall be submitted not later than the later of the following:

(A) 40 days before the beginning of the fiscal year for which the appropriation is available; or

(B) 15 days after the date of enactment of the law by which the appropriation is made available.

(2) The President shall notify the head of the executive agency of the action taken in apportioning the appropriation under paragraph (1) of this subsection not later than the later of the following:

(A) 20 days before the beginning of the fiscal year for which the appropriation is available; or

(B) 30 days after the date of enactment of the law by which the appropriation is made available.

(c) By the first day of each fiscal year, the head of each executive department of the United States Government shall apportion among the major organizational units of the department the maximum amount to be expended by each unit during the fiscal year out of each contingent fund appropriated for the entire year for the department. Each amount may be changed during the fiscal year only by written direction of the head of the department. The direction shall state the reasons for the change.

(d) An appropriation apportioned under this subchapter may be divided and subdivided administratively within the limits of the apportionment.

(e) This section does not affect the initiation and operation of agricultural price support programs.

§1514. Administrative division of apportionments

(a) The official having administrative control of an appropriation available to the legislative branch, the judicial branch, the United States International Trade Commission, or the District of Columbia government, and, subject to the approval of the President, the head of each executive agency (except the Commission) shall prescribe by regulation a system of administrative control not inconsistent with accounting procedures prescribed under law. The system shall be designed to—

(1) restrict obligations or expenditures from each appropriation to the amount of apportionments or reapportionments of the appropriation; and

(2) enable the official or the head of the executive agency to fix responsibility for an obligation or expenditure exceeding an apportionment or reapportionment.

(b) To have a simplified system for administratively dividing appropriations, the head of each executive agency (except the Commission) shall work toward the objective of financing each operating unit, at the highest practical level, from not more than one administrative division for each appropriation affecting the unit.

§1515. Authorized apportionments necessitating deficiency or supplemental appropriations

(a) An appropriation required to be apportioned under section 1512 of this title may be apportioned on a basis that indicates a necessity for a deficiency or supplemental appropriation to the extent necessary to permit payment of pay increases for prevailing rate employees whose pay is fixed and adjusted under subchapter IV of chapter 53 of title 5.

(b)(1) Except as provided in subsection (a) of this section, an official may make, and the head of an executive agency may request, an apportionment under section 1512 of this title that would indicate a necessity for a deficiency or supplemental appropriation only when the official or agency head decides that the action is required because of—

(A) a law enacted after submission to Congress of the estimates for an appropriation that requires an expenditure beyond administrative control; or

(B) an emergency involving the safety of human life, the protection of property, or the immediate welfare of individuals when an appropriation that would allow the United States Government to pay, or contribute to, amounts required to be paid to individuals in specific amounts fixed by law or under formulas prescribed by law, is insufficient.

(2) If an official making an apportionment decides that an apportionment would indicate a necessity for a deficiency or supplemental appropriation, the official shall submit immediately a detailed report of the facts to Congress. The report shall be referred to in submitting a proposed deficiency or supplemental appropriation.

§1516. Exemptions

An official designated in section 1513 of this title to make apportionments may exempt from apportionment—

(1) a trust fund or working fund if an expenditure from the fund has no significant effect on the financial operations of the United States Government;

(2) a working capital fund or a revolving fund established for intragovernmental operations;

(3) receipts from industrial and power operations available under law; and

(4) appropriations made specifically for—
(A) interest on, or retirement of, the public debt;

(B) payment of claims, judgments, refunds, and drawbacks;

(C) items the President decides are of a confidential nature;

(D) payment under a law requiring payment of the total amount of the appropriation to a designated payee; and

(E) grants to the States under the Social Security Act (42 U.S.C. 301 et seq.).

§1517. Prohibited obligations and expenditures

(a) An officer or employee of the United States Government or of the District of Columbia government may not make or authorize an expenditure or obligation exceeding—

(1) an apportionment; or

(2) the amount permitted by regulations prescribed under section 1514(a) of this title.

(b) If an officer or employee of an executive agency or of the District of Columbia government violates subsection (a) of this section, the head of the executive agency or the Mayor of the District of Columbia, as the case may be, shall report immediately to the President and Congress all relevant facts and a statement of actions taken.

§1518. Adverse personnel actions

An officer or employee of the United States Government or of the District of Columbia government violating section 1517(a) of this title shall be subject to appropriate administrative discipline including, when circumstances warrant, suspension from duty without pay or removal from office.

§1519. Criminal penalty

An officer or employee of the United States Government or of the District of Columbia government knowingly and willfully violating section 1517(a) of this title shall be fined not more than \$5,000, imprisoned for not more than 2 years, or both.

SUBCHAPTER III—TRANSFERS AND REIMBURSEMENTS

§1531. Transfers of functions and activities

(a) The balance of an appropriation available and necessary to finance or discharge a function or activity transferred or assigned under law within an executive agency or from one executive agency to another may be transferred to and used—

(1) by the organizational unit or agency to which the function or activity was transferred or assigned; and

(2) for a purpose for which the appropriation was originally available.

(b) The head of the executive agency determines the amount that, with the approval of the President, is necessary to be transferred when the transfer or assignment of the function or activity is within the agency. The President determines the amount necessary to be transferred when the transfer or assignment of the function or activity is from one executive agency to another.

(c) A balance transferred under this section is—

(1) credited to an applicable existing or new appropriation account;

(2) merged with the amount in an account to which the balance is credited; and

(3) with the amount with which the balance is merged, accounted for as one amount.

(d) New appropriation accounts may be established to carry out subsection (c)(1) of this section.

§1532. Withdrawal and credit

An amount available under law may be withdrawn from one appropriation account and credited to another or to a working fund only when authorized by law. Except as specifically provided by law, an amount authorized to be withdrawn and credited is available for the same purpose and subject to the same limitations provided by the law appropriating the amount. A withdrawal and credit is made by check and without a warrant.

§1533. Transfers of appropriations for salaries and expenses to carry out national defense responsibilities

An appropriation of an executive agency for salaries and expenses is available to carry out national defense responsibilities assigned to the agency under law. A transfer necessary to carry out this section may be made between appropriations or allocations within the executive agency. An allocation may not be made to an executive agency that can carry out with its regular personnel a defense activity assigned to it by using the authority of this section to realign its regular programs.

§1534. Adjustments between appropriations

(a) An appropriation available to an agency may be charged at any time during a fiscal year for the benefit of another appropriation available to the agency to pay costs—

(1) when amounts are available in both the appropriation to be charged and the appropriation to be benefited; and

(2) subject to limitations applicable to the appropriations.

(b) Amounts paid under this section are charged on a final basis during, or as of the close of, the fiscal year to the appropriation benefited. The appropriation charged under subsection (a) of this section shall be appropriately credited.

§1535. Agency agreements

(a) The head of an agency or major organizational unit within an agency may place an order with a major organizational unit within the same agency or another agency for goods or services if—

(1) amounts are available;

(2) the head of the ordering agency or unit decides the order is in the best interest of the United States Government;

(3) the agency or unit to fill the order is able to provide the ordered goods or services; and

(4) the head of the agency decides ordered goods or services cannot be provided as conveniently or cheaply by a commercial enterprise.

(b) Notwithstanding subsection (a)(3) of this section, the Secretary of Defense, the Secretary of a military department of the Department of Defense, the Secretary of Transportation in carrying out duties and powers related to aviation and the Coast Guard, the Secretary of the Treasury, the Administrator of General Services, and the Administrator of the Maritime Administration may place orders under this section for goods and services that an agency or unit filling the order may be able to provide or procure by contract.

(c) Payment shall be made promptly by check on the written request of the agency or unit filling the order. Payment may be in advance or on providing the goods or services ordered and shall be for any part of the

estimated or actual cost as determined by the agency or unit filling the order. A bill submitted or a request for payment is not subject to audit or certification in advance of payment. Proper adjustment of amounts paid in advance shall be made as agreed to by the heads of the agencies or units on the basis of the actual cost of goods or services provided.

(d) An order placed or agreement made under this section obligates an appropriation of the ordering agency or unit. The amount obligated is debited to the extent that the agency or unit filling the order has not incurred obligations, before the end of the period of availability of the appropriation, in—

(1) providing goods or services; or
(2) making an authorized contract with another person to provide the requested goods or services.

(e) This section does not—

(1) authorize orders to be placed for goods or services to be provided by convict labor; or

(2) affect other laws about working funds.

§1536. Crediting payments from purchases between executive agencies

(a) An advance payment made on an order under section 1535 of this title is credited to a special working fund that the Secretary of the Treasury considers necessary to be established. Except as provided in this section, any other payment is credited to the appropriation or fund against which charges were made to fill the order.

(b) An amount paid under section 1535 of this title may be expended in providing goods or services or for a purpose specified for the appropriation or fund credited. Where goods are provided from stocks on hand, the amount received in payment is credited so as to be available to replace the goods unless—

(1) another law authorizes the amount to be credited to some other appropriation or fund; or

(2) the head of the executive agency filling the order decides that replacement is not necessary, in which case, the amount received is deposited in the Treasury as miscellaneous receipts.

(c) This section does not affect other laws about working funds.

§1537. Services between the United States Government and the District of Columbia government

(a) To prevent duplication and to promote efficiency and economy, an officer or employee of—

(1) the United States Government may provide services to the District of Columbia government; and

(2) the District of Columbia government may provide services to the United States Government.

(b)(1) Services under this section shall be provided under an agreement—

(A) negotiated by officers and employees of the 2 governments; and

(B) approved by the Director of the Office of Management and Budget and the Mayor of the District of Columbia.

(2) Each agreement shall provide that the cost of providing the services shall be borne in the way provided in subsection (c) of this section by the government to which the services are provided at rates or charges based on the actual cost of providing the services.

(3) To carry out an agreement made under this subsection, the agreement may provide for the delegation of duties and powers of officers and employees of—

(A) the District of Columbia government to officers and employees of the United States Government; and

(B) the United States Government to officers and employees of the District of Columbia government.

(c) In providing services under an agreement made under subsection (b) of this section—

(1) costs incurred by the United States Government may be paid from appropriations available to the District of Columbia government officer or employee to whom the services were provided; and

(2) costs incurred by the District of Columbia government may be paid from amounts available to the United States Government officer or employee to whom the services were provided.

(d) When requested by the Director of the United States Secret Service, the Chief of the Metropolitan Police shall assist the Secret Service and the Executive Protective Service on a non-reimbursable basis in carrying out their protective duties under section 302 of title 3 and section 3056 of title 18.

SUBCHAPTER IV—CLOSING ACCOUNTS

§1551. Definitions and application

(a) In this subchapter—

(1) an obligated balance of an appropriation account as of the end of a fiscal year is the amount of unliquidated obligations applicable to the appropriation less amounts collectible as repayments to the appropriation.

(2) an unobligated balance is the difference between the obligated balance and the total unexpended balance.

(b) This subchapter does not apply to—

(1) appropriations for the District of Columbia government; or

(2) appropriations to be disbursed by the Secretary of the Senate or the Clerk of the House of Representatives.

§1552. Procedure for appropriation accounts available for definite periods

(a) Each appropriation account available for obligation for a definite period is closed as follows:

(1) The obligated balance is transferred on September 30th of the 2d fiscal year after the period of availability ends to an appropriation account of the agency responsible for paying the obligation. Amounts transferred from all appropriation accounts for the same general purpose are merged in the account for paying obligations.

(2) The unobligated balance is withdrawn at the end of the period of availability for obligation and reverts to the Treasury or, if derived only from a special or trust fund and not otherwise provided, reverts to the fund from which derived. The withdrawal shall be made not later than the November 15 occurring after the period of availability ends. When the head of the agency decides that part of a withdrawn unobligated balance is required to pay obligations and make adjustments, that part may be restored to the appropriate account.

(b) Collections authorized to be credited to an appropriation, but not received before the transfer of the obligated balance under subsection (a)(1) of this section, are credited to the account into which the obligated balance was transferred. However, collections made by the Comptroller General for other agencies may be deposited in the Treasury as miscellaneous receipts.

(c) A withdrawal made under subsection (a)(2) of this section is accounted for and reported as of the fiscal year in which the ap-

propriation concerned expires for obligation.

(d) The obligated balance of an appropriation made available for obligation for a definite period under a discontinued appropriation heading may be merged at the end of the 2d complete fiscal year after the fiscal year for which an appropriation is available for obligation—

(1) in the appropriation accounts provided under subsection (a) of this section; or

(2) in other accounts established under this subchapter for discontinued appropriations of the agency responsible for paying the obligations.

§1553. Availability of appropriation accounts to pay obligations

(a) Each appropriation account established under section 1552 of this title is accounted for separately and remains available until expended to pay obligations chargeable against any appropriation from which the account is derived.

(b) Under regulations prescribed by the Comptroller General, obligations under subsection (a) of this section may be paid without prior action of the Comptroller General. However, this subchapter does not—

(1) relieve the Comptroller General of the duty to make decisions requested under law; or

(2) affect the authority of the Comptroller General to settle claims and accounts.

§1554. Review of appropriation accounts

(a) The head of each agency shall review at least once a fiscal year each appropriation account established for the agency under section 1552 of this title. If the undisbursed balance is more than the obligated balance in the account, the excess shall be withdrawn in the way provided in section 1552(a)(2) of this title. If the obligated balance is more than the undisbursed balance, the excess may be restored to the account in an amount that is not more than the remaining unobligated balances of the appropriations available for the same general purposes. Before restoring an amount, the head of the agency shall make a report on the restoration as may be required by the President.

(b) The review required under subsection (a) of this section shall be made as of the end of each fiscal year. A withdrawal or restoration under this section shall be made not later than December 31 of the following fiscal year. However, a withdrawal or restoration is accounted for and reported as of the close of the fiscal year to which the review relates. A review made as of any other date for which a withdrawal or restoration is made after December 31 shall be accounted for and reported as transactions of the fiscal year in which made.

§1555. Withdrawal of unobligated balances of appropriations for indefinite periods

(a) An unobligated balance of an appropriation for an indefinite period shall be withdrawn in the way provided in section 1552(a)(2) of this title when the head of the agency concerned decides that the purposes for which the appropriation was made have been carried out or when no disbursement is made against the appropriation for 2 consecutive fiscal years.

(b) An amount of an appropriation withdrawn under this section may be restored to the applicable appropriation account to pay obligations and to settle accounts.

§1556. Comptroller General reports on appropriation accounts

(a) In carrying out audit responsibilities, the Comptroller General shall report on operations under this subchapter to—

- (1) the head of the agency concerned;
- (2) the Secretary of the Treasury; and
- (3) the President.

(b) A report under this section shall include an appraisal of unpaid obligations under appropriation accounts established under section 1552 of this title. By the 30th day after receiving a report, the head of the agency concerned shall carry out actions required by section 1554 of this title that the report shows is necessary.

§1557. Authorization to exempt

A provision of an appropriation law may exempt an appropriation from this subchapter and fix the period for which the appropriation remains available for expenditure.

3103.	Notes.
3104.	Certificates of indebtedness and Treasury bills.
3105.	Savings bonds and savings certificates.
3106.	Retirement and savings bonds.
3107.	Increasing interest rates and investment yields on retirement bonds.
3108.	Prohibition against circulation privilege.
3109.	Tax and loss bonds.
3110.	Sale of obligations of governments of foreign countries.
3111.	New issue used to buy, redeem, or refund outstanding obligations.
3112.	Sinking fund for retiring and canceling bonds and notes.
3113.	Accepting gifts.

SUBCHAPTER II—ADMINISTRATIVE

3121.	Procedure.
3122.	Banks and trust companies as depositaries.
3123.	Payment of obligations and interest on the public debt.
3124.	Exemption from taxation.
3125.	Relief for lost, stolen, destroyed, mutilated, or defaced obligations.
3126.	Losses and relief from liability related to redeeming savings bonds and notes.
3127.	Credit to officers, employees, and agents for stolen Treasury notes.
3128.	Proof of death to support payment.
3129.	Appropriation to pay expenses.

SUBCHAPTER I—BORROWING AUTHORITY

§3101. Public debt limit

(a) In this section, the current redemption value of an obligation issued on a discount basis and redeemable before maturity at the option of its holder is deemed to be the face amount of the obligation.

(b) The face amount of obligations issued under this chapter and the face amount of obligations whose principal and interest are

guaranteed by the United States Government (except guaranteed obligations held by the Secretary of the Treasury) may not be more than \$400,000,000,000 outstanding at one time, subject to changes periodically made in that amount as provided by law through the congressional budget process described in Rule XLIX of the Rules of the House of Representatives or otherwise.

(c) The face amount of beneficial interests and participations (except those held by their issuer) issued under section 302(c) of the National Housing Act (12 U.S.C. 1717(c)) from July 1, 1967, through June 30, 1968, and outstanding at any time shall be included in the amount taken into account in deciding whether the face amount requirement of subsection (b) of this section has been exceeded. This subsection does not require a change in the budgetary accounting for beneficial interests and participations.

§3102. Bonds

(a) With the approval of the President, the Secretary of the Treasury may borrow on the credit of the United States Government amounts necessary for expenditures authorized by law and may issue bonds of the Government for the amounts borrowed and may buy, redeem, and make refunds under section 3111 of this title. The Secretary may issue bonds authorized by this section to the public and to Government accounts at any annual interest rate and prescribe conditions under section 3121 of this title. However, the face amount of bonds issued under this section and held by the public with interest rates of more than 4.25 percent a year may not be more than \$70,000,000,000.

(b) The Secretary shall offer the bonds authorized under this section first as a popular loan under regulations of the Secretary that allow the people of the United States as nearly as possible an equal opportunity to participate in subscribing to the offered bonds. However, the bonds may be offered in a way other than as a popular loan when the Secretary decides the other way is in the public interest.

(c)(1) When the Secretary decides it is in the public interest in making a bond offering under this section, the Secretary may—

(A) make full allotments on receiving applications for smaller amounts of bonds to subscribers applying before the closing date the Secretary sets for filing applications;

(B) reject or reduce allotments on receiving applications filed after the closing date or for larger amounts;

(C) reject or reduce allotments on receiving applications from incorporated banks and trust companies for their own account and make full allotments or increase allotments to other subscribers; and

(D) prescribe a graduated scale of allotments.

(2) The Secretary shall prescribe regulations applying to all popular loan subscribers similarly situated governing a reduction or increase of an allotment under paragraph (1) of this subsection.

(d) The Secretary may make special arrangements for subscriptions from members of the armed forces. However, bonds issued to those members must be the same as other bonds of the same issue.

(e) The Secretary may dispose of any part of a bond offering not taken and may prescribe the price and way of disposition.

§3103. Notes

(a) With the approval of the President, the Secretary of the Treasury may borrow

on the credit of the United States Government amounts necessary for expenditures authorized by law and may issue notes of the Government for the amounts borrowed and may buy, redeem, and make refunds under section 3111 of this title. The Secretary may prescribe conditions under section 3121 of this title. Notwithstanding section 3121(a)(5) of this title, the payment date of each series of notes issued shall be at least one year but not more than 10 years from the date of issue.

(b) The Government may redeem any part of a series of notes before maturity by giving at least 4 months' notice but not more than one year's notice.

(c) The holder of a note of one series issued under this section with the same issue date as another series of notes issued under this section may convert, at par value, a note of the holder for a note of the other series.

§3104. Certificates of indebtedness and Treasury bills

(a) The Secretary of the Treasury may borrow on the credit of the United States Government amounts necessary for expenditures authorized by law and may buy, redeem, and make refunds under section 3111 of this title. For amounts borrowed, the Secretary may issue—

(1) certificates of indebtedness of the Government; and

(2) Treasury bills of the Government.

(b) The Secretary may prescribe conditions for issuing certificates of indebtedness and Treasury bills under section 3121 of this title and conditions under which the certificates and bills may be redeemed before maturity. Notwithstanding section 3121(a)(5) of this title, the payment date of certificates of indebtedness and Treasury bills may not be more than one year after the date of issue.

(c) Treasury bills issued under this section may not be accepted before maturity to pay principal or interest on obligations of governments of foreign countries that are held by the United States Government.

§3105. Savings bonds and savings certificates

(a) With the approval of the President, the Secretary of the Treasury may issue savings bonds and savings certificates of the United States Government and may buy, redeem, and make refunds under section 3111 of this title. Proceeds from the bonds and certificates shall be used for expenditures authorized by law. Savings bonds and certificates may be issued on an interest-bearing basis, on a discount basis, or on an interest-bearing and discount basis. Savings bonds shall mature not more than 20 years from the date of issue. Savings certificates shall mature not more than 10 years from the date of issue. The difference between the price paid and the amount received on redeeming a savings bond or certificate is interest under the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.).

(b)(1) Except as provided in paragraph (2) of this subsection, the interest rate on, and the issue price of, savings bonds and savings certificates and the conditions under which they may be redeemed may not give an investment yield of more than 5.5 percent a year compounded semiannually. The investment yield on a series E savings bond shall be at least 4 percent a year compounded semiannually beginning on the first day of the month beginning after the date of issuance of the bond and ending on the last day of the month before the date of redemption.

(2) With the approval of the President, the Secretary may fix the investment yield for savings bonds at any percent a year compounded semiannually. However, the total of the increases in the yield that are effective for a 6-month period may not be more than one percent a year compounded semiannually.

(3) With the approval of the President, the Secretary may prescribe regulations providing that owners of series E and H savings bonds may keep the bonds after maturity or after a period beyond maturity during which the bonds have earned interest and continue to earn interest at rates consistent with paragraph (1) of this subsection. However, series E and H savings bonds earning a higher rate of interest before the regulations are prescribed shall continue to earn a higher rate of interest consistent with paragraph (1).

(c) The Secretary may prescribe for savings bonds and savings certificates issued under this section—

(1) the form and amount of an issue and series;

(2) the way in which they will be issued;

(3) the conditions, including restrictions on transfer, to which they will be subject;

(4) conditions governing their redemption;

(5) their sales price and denominations (expressed in terms of the maturity value);

(6) a way to evidence payments for or on account of them and to provide for the exchange of savings certificates for savings bonds; and

(7) the maximum amount issued in a year that may be held by one person.

(d) The Secretary may authorize financial institutions to make payments to redeem savings bonds and savings notes. A financial institution may be a paying agent only if the institution—

(1) is incorporated under the laws of the United States, a State, the District of Columbia, or a territory or possession of the United States;

(2) in the usual course of business accepts, subject to withdrawal, money for deposit or the purchase of shares;

(3) is under the supervision of a banking authority of the jurisdiction in which it is incorporated;

(4) has a regular office to do business; and

(5) is qualified under regulations prescribed by the Secretary in carrying out this subsection.

(e)(1) The Secretary may prescribe a way in which a check issued to an individual (except a trust or estate) as a refund for taxes imposed under subtitle A of the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) may become a series E savings bond. However, a check may become a bond only if the claim for a refund is filed by the last day prescribed by law for filing the return (determined without any extensions) for the taxable year for which the refund is made. The Secretary may prescribe the time and way in which the check becomes a bond.

(2) A bond issued under this subsection is deemed to be a series E bond issued under this section, except that the bond shall bear an issue date of the first day of the first month beginning after the close of the taxable year for which the bond is issued. The Secretary also may provide that a bond issued to joint payees may be redeemed by either payee alone.

§3106. Retirement and savings bonds

(a) With the approval of the President, the Secretary of the Treasury may issue retirement and savings bonds of the United States Government and may buy, redeem,

and make refunds under section 3111 of this title. The proceeds from the bonds shall be used for expenditures authorized by law. Retirement and savings bonds may be issued only on a discount basis. The maturity period of the bonds shall be at least 10 years from the date of issue but not more than 30 years from the date of issue. The difference between the price paid and the amount received on redeeming a bond is interest under the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.).

(b) The issue price of retirement and savings bonds and the conditions under which they may be redeemed may give an investment yield of not more than 5 percent a year compounded semiannually. With the approval of the President, the Secretary may allow owners of retirement and savings bonds to keep the bonds after maturity and continue to earn interest on them at rates that are consistent with the rate of investment yield provided by retirement and savings bonds.

(c) Section 3105(c)(1)–(5) of this title applies to this section. Sections 3105(c)(6) and (d) and 3126 of this title apply to this section to the extent consistent with this section. The Secretary may prescribe the maximum amount of retirement and savings bonds issued under this section in a year that may be held by one person. However, the maximum amount shall be at least \$3,000.

§3107. Increasing interest rates and investment yields on retirement bonds

With the approval of the President, the Secretary of the Treasury may increase by regulation the interest rate or investment yield on an offering of bonds issued under this chapter that are described in sections 405(b) and 409(a) of the Internal Revenue Code of 1954 (26 U.S.C. 405(b), 409(a)). The increased yield shall be for interest accrual periods specified in the regulations so that the interest rate or investment yield on the bonds for those periods is consistent with the interest rate or investment yield on a new offering of those bonds.

§3108. Prohibition against circulation privilege

An obligation issued under sections 3102–3104(a)(1) and 3105–3107 of this title may not bear the circulation privilege.

§3109. Tax and loss bonds

(a) The Secretary of the Treasury may issue tax and loss bonds of the United States Government and may buy, redeem, and make refunds under section 3111 of this title. The proceeds of the tax and loss bonds shall be used for expenditures authorized by law. Tax and loss bonds are nontransferable except as provided by the Secretary, bear no interest, and shall be issued in amounts needed to allow persons to comply with section 832(e) of the Internal Revenue Code of 1954 (26 U.S.C. 832(e)). The Secretary may prescribe the amount of tax and loss bonds and the conditions under which the bonds will be issued as required by section 832(e).

(b) For a taxable year in which amounts are deducted from the mortgage guaranty account referred to in section 832(e)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 832(e)(3)), an amount of tax and loss bonds bought under section 832(e)(2) of the Internal Revenue Code of 1954 (26 U.S.C. 832(e)(2)) shall be redeemed for the amount deducted from the account. The amount redeemed shall be applied as necessary to pay taxes due because of the inclusion under section 832(b)(1)(E) of the Internal Revenue

Code of 1954 (26 U.S.C. 832(b)(1)(E)) of amounts in gross income. The Secretary also may prescribe additional ways to redeem the bonds.

§3110. Sale of obligations of governments of foreign countries

(a) With the approval of the President, the Secretary of the Treasury may sell obligations of the government of a foreign country when the obligations were acquired under—

(1) the First Liberty Bond Act and matured before June 16, 1947;

(2) the Second Liberty Bond Act and matured before October 16, 1938; or

(3) section 7(a) of the Victory Liberty Loan Act.

(b) The Secretary may prescribe the conditions and frequency for receiving payment under obligations of a government of a foreign country acquired under the laws referred to in subsection (a) of this section. A sale of an obligation acquired under those Acts shall at least equal the purchase price and accrued interest. The proceeds of obligations sold under this section and payments received from governments on the principal of their obligations shall be used to redeem or buy (for not more than par value and accrued interest) bonds of the United States Government issued under this chapter. If those bonds cannot be redeemed or bought, the Secretary shall redeem or buy other outstanding interest-bearing obligations of the Government that are subject to redemption or which can be bought at not more than par value and accrued interest.

§3111. New issue used to buy, redeem, or refund outstanding obligations

An obligation may be issued under this chapter to buy, redeem, or refund, at or before maturity, outstanding bonds, notes, certificates of indebtedness, Treasury bills, or savings certificates of the United States Government. Under regulations of the Secretary of the Treasury, money received from the sale of an obligation and other money in the general fund of the Treasury may be used in making the purchases, redemptions, or refunds.

§3112. Sinking fund for retiring and canceling bonds and notes

(a) The Department of the Treasury has a sinking fund for retiring bonds and notes issued under this chapter. Amounts in the fund are appropriated for payment of bonds and notes at maturity or for their redemption or purchase before maturity by the Secretary of the Treasury. The fund is available until all the bonds and notes are retired.

(b) For each fiscal year, an amount is appropriated equal to—

(1) the interest that would have been payable during the fiscal year for which the appropriation is made on the bonds and notes bought, redeemed, or paid out of the fund during that or prior years;

(2) 2.5 percent of the total amount of bonds and notes issued under the First Liberty Bond Act, the Second Liberty Bond Act, the Third Liberty Bond Act, the Fourth Liberty Bond Act, and the Victory Liberty Loan Act and outstanding on July 1, 1920, less an amount equal to the par amount of obligations of governments of foreign countries that the United States Government held on July 1, 1920; and

(3) 2.5 percent of the total amount expended after June 29, 1933, from appropriations made or authorized in sections 301 and

302 of the Emergency Relief and Construction Act of 1932.

(c) The Secretary may prescribe the price and conditions for paying, redeeming, and buying bonds and notes under this section. The average cost of bonds and notes bought under this section may not be more than par value and accrued interest. Bonds and notes bought, redeemed, or paid out of the sinking fund must be canceled and retired and may not be reissued.

§3113. Accepting gifts

(a) To provide the people of the United States with an opportunity to make gifts to the United States Government to be used to reduce the public debt—

(1) the Secretary of the Treasury may accept for the Government a gift of—

(A) money made only on the condition that it be used to reduce the public debt;

(B) an obligation of the Government included in the public debt made only on the condition that the obligation be canceled and retired and not reissued; and

(C) other intangible personal property made only on the condition that the property is sold and the proceeds from the sale used to reduce the public debt; and

(2) the Administrator of General Services may accept for the Government a gift of tangible property made only on the condition that it be sold and the proceeds from the sale be used to reduce the public debt.

(b) The Secretary and the Administrator each may reject a gift under this section when the rejection is in the interest of the Government.

(c) The Secretary and the Administrator shall convert a gift either of them accepts under subsection (a)(1)(C) or (2) of this section to money on the best terms available. If a gift accepted under subsection (a) of this section is subject to a gift or inheritance tax, the Secretary or the Administrator may pay the tax out of the proceeds of the gift or the proceeds of the redemption or sale of the gift.

(d) The Treasury has an account into which money received as gifts and proceeds from the sale or redemption of gifts under this section shall be deposited. The Secretary shall use the money in the account to pay at maturity, or to redeem or buy before maturity, an obligation of the Government included in the public debt. An obligation of the Government that is paid, redeemed, or bought with money from the account shall be canceled and retired and may not be reissued. Money deposited in the account is appropriated and may be expended to carry out this section.

(e)(1) The Secretary shall redeem a direct obligation of the Government bearing interest or sold on a discount basis on receiving it when the obligation—

(A) is given to the Government;

(B) becomes the property of the Government under the conditions of a trust; or

(C) is payable on the death of the owner to the Government (or to an officer of the Government in the officer's official capacity).

(2) If the gift or transfer to the Government is subject to a gift or inheritance tax, the Secretary shall pay the tax out of the proceeds of redemption.

SUBCHAPTER II—ADMINISTRATIVE

§3121. Procedure

(a) In issuing obligations under sections 3102-3104 of this title, the Secretary of the Treasury may prescribe—

(1) whether an obligation is to be issued on an interest-bearing basis, a discount

basis, or an interest-bearing and discount basis;

(2) regulations on the conditions under which the obligation will be offered for sale, including whether it will be offered for sale on a competitive or other basis;

(3) the offering price and interest rate;

(4) the method of computing the interest rate;

(5) the dates for paying principal and interest;

(6) the form and denominations of the obligations; and

(7) other conditions.

(b)(1) Under conditions prescribed by the Secretary, an obligation issued under this chapter and redeemable on demand of the owner or holder may be used to pay the United States Government for taxes imposed by it.

(2) An obligation of the Government issued after March 3, 1971, under law may not be redeemed before its maturity to pay a tax imposed by the Government in an amount more than the fair market value of the obligation at the time of its redemption. This paragraph does not apply to a Treasury bill issued under section 3104 of this title.

(c) Under conditions prescribed by the Secretary, an obligation authorized by this chapter may be issued in exchange for an obligation of an agency whose principal and interest are unconditionally guaranteed by the Government at or before maturity.

(d) Under conditions prescribed by the Secretary, the Secretary may issue registered bonds in exchange for and instead of coupon bonds that have been or may be issued. The registered bonds shall be similar in all respects to the registered bonds issued under a law authorizing the issue of coupon bonds offered for exchange.

(e) A decision of the Secretary about an issue of obligations under sections 3102-3104 of this title is final.

(f) The Secretary may accept voluntary services in carrying out the sale of public debt obligations.

§3122. Banks and trust companies as depositaries

(a) The Secretary of the Treasury may designate incorporated banks and trust companies as depositaries for any part of proceeds of an obligation issued under this chapter. The Secretary may prescribe the conditions under which deposits may be made under this section, including the interest rate on amounts deposited and security requirements.

(b) The Secretary may designate a bank or trust company that is a depositary under subsection (a) of this section as a fiscal agent of the United States Government in selling and delivering bonds and certificates of indebtedness issued by the Government.

§3123. Payment of obligations and interest on the public debt

(a) The faith of the United States Government is pledged to pay, in legal tender, principal and interest on the obligations of the Government issued under this chapter.

(b) The Secretary of the Treasury shall pay interest due or accrued on the public debt. As the Secretary considers expedient, the Secretary may pay in advance interest on the public debt by a period of not more than one year, with or without a rebate of interest on the coupons.

(c)(1) The Secretary may issue a bond, note, or certificate of indebtedness authorized under this chapter whose principal and interest are payable in a foreign currency

stated in the bond, note, or certificate. The Secretary may dispose of the bonds, notes, and certificates at a price that is at least par value without complying with section 3102(b)-(d) of this title.

(2) In determining the dollar amount of bonds, notes, and certificates of indebtedness that may be issued under this chapter, the dollar equivalent of the amount of bonds, notes, and certificates payable in a foreign currency is determined by the par of the exchange value on the date of issue of the bonds, notes, or certificates as published by the Secretary under section 5151 of this title.

(3) The Secretary may designate depositaries in foreign countries in which any part of the proceeds of bonds, notes, or certificates of indebtedness payable in the foreign currency may be deposited.

§3124. Exemption from taxation

(a) Stocks and obligations of the United States Government are exempt from taxation by a State or political subdivision of a State. The exemption applies to each form of taxation that would require the obligation, the interest on the obligation, or both, to be considered in computing a tax, except—

(1) a nondiscriminatory franchise tax or another nonproperty tax instead of a franchise tax, imposed on a corporation; and

(2) an estate or inheritance tax.

(b) The tax status of interest on obligations and dividends, earnings, or other income from evidences of ownership issued by the Government or an agency and the tax treatment of gain and loss from the disposition of those obligations and evidences of ownership is decided under the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.). An obligation that the Federal Housing Administration had agreed, under a contract made before March 1, 1941, to issue at a future date, has the tax exemption privileges provided by the authorizing law at the time of the contract. This subsection does not apply to obligations and evidences of ownership issued by the District of Columbia, a territory or possession of the United States, or a department, agency, instrumentality, or political subdivision of the District, territory, or possession.

§3125. Relief for lost, stolen, destroyed, mutilated, or defaced obligations

(a) In this section, "obligation" means a direct obligation of the United States Government issued under law for valuable consideration, including bonds, notes, certificates of indebtedness, Treasury bills, and interim certificates issued for an obligation.

(b) The Secretary of the Treasury may provide relief for the loss, theft, destruction, mutilation, or defacement of an obligation identified by number and description.

(c)(1) An indemnity bond is required as a condition of relief if the obligation is payable to bearer or assigned so as to become payable to bearer and is not proven clearly to have been destroyed. The Secretary may prescribe for the indemnity bond the form, amount, and surety or security requirements.

(2) Relief for interest coupons claimed to have been attached to an obligation may be provided only if the Secretary is satisfied that the coupons have not been paid and are destroyed or will not become the basis of a valid claim against the Government.

§3126. Losses and relief from liability related to redeeming savings bonds and notes

(a) Under regulations prescribed by the Secretary of the Treasury, a loss resulting from a payment related to redeeming a savings bond or savings note shall be replaced out of the fund established by section 2 of the Government Losses in Shipment Act (40 U.S.C. 722). A Federal reserve bank, a paying agent allowed to make payments in redeeming a bond or note, or an officer or employee of the Department of the Treasury is relieved from liability to the United States Government for the loss when the Secretary decides that the loss did not result from the fault or negligence of the bank, paying agent, officer, or employee. The Secretary shall relieve the bank, agent, officer, or employee from liability when the Secretary decides that written notice of liability or potential liability has not been given to the bank, agent, officer, or employee by the Government within 10 years from the date of the erroneous payment. However, the Secretary may not relieve a paying agent of an assumed unconditional liability to the Government.

(b) Section 3 of the Government Losses in Shipment Act (40 U.S.C. 723) (related to finality of decisions of the Secretary) applies to a decision of the Secretary made under this section. A recovery or repayment of a loss for which replacement is made out of the fund shall be credited to the fund and is available for the purposes for which the fund was established.

§3127. Credit to officers, employees, and agents for stolen Treasury notes

When an officer, employee, or agent of the United States Government authorized to receive, redeem, or cancel Treasury notes receives or pays a note that was stolen and put in circulation after it had been received or redeemed by an officer, employee, or agent authorized to receive or redeem the note, the Secretary of the Treasury may allow the officer, employee, or agent receiving or paying the stolen note a credit for the amount of the note. The Secretary may allow the credit only if the Secretary is satisfied that the note was received or paid in good faith and in exercising ordinary prudence.

§3128. Proof of death to support payment

A finding of death made by an officer or employee of the United States Government authorized by law to make the finding is sufficient proof of death to allow credit in the accounts of a Federal reserve bank or accountable official of the Department of the Treasury in a case involving the transfer, exchange, reissue, redemption, or payment of obligations of the Government, including obligations guaranteed by the Government for which the Secretary of the Treasury acts as transfer agent.

§3129. Appropriation to pay expenses

(a) Amounts to pay necessary expenses (including rent) for an issue of obligations authorized under this chapter are appropriated to the Secretary of the Treasury. However, the amount appropriated under this section may not be more than—

(1) .2 percent of the amount of bonds and notes authorized under this chapter;

(2) .1 percent of the amount of certificates of indebtedness authorized under section 3104 of this title; and

(3) .1 percent of the amount of certificates of indebtedness authorized under the First Liberty Bond Act.

(b) An appropriation under this section is available for obligation only through the

end of the fiscal year after the fiscal year in which the issue was made. During a period for which an appropriation for a specified amount is made for expenses for which this section makes an appropriation for an unspecified amount, only the appropriation for the specified amount is available for obligation.

CHAPTER 33—DEPOSITING, KEEPING, AND PAYING MONEY

SUBCHAPTER I—DEPOSITS AND DEPOSITARIES

- Sec.
3301. General duties of the Secretary of the Treasury.
3302. Custodians of money.
3303. Designation of depositaries.
3304. Transfers of public money from depositaries.
3305. Audits of depositaries.

SUBCHAPTER II—PAYMENTS

3321. Disbursing authority in the executive branch.
3322. Disbursing officials.
3323. Warrants.
3324. Advances.
3325. Vouchers.
3326. Waiver of requirements for warrants and advances.
3327. General authority to issue checks and other drafts.
3328. Paying checks and drafts.
3329. Withholding checks to be sent to foreign countries.
3330. Payment of Veterans' Administration checks for the benefit of individuals in foreign countries.
3331. Substitute checks.
3332. Checks payable to financial organizations designated by Government officers and employees.
3333. Relief for payments made without negligence.

SUBCHAPTER III—MISCELLANEOUS

3341. Sale of Government warrants, checks, drafts, and obligations.
3342. Check cashing and exchange transactions.
3343. Check forgery insurance fund.

SUBCHAPTER I—DEPOSITS AND DEPOSITARIES

§3301. General duties of the Secretary of the Treasury

(a) The Secretary of the Treasury shall—
(1) receive and keep public money;
(2) take receipts for money paid out by the Secretary;

(3) give receipts for money deposited in the Treasury;

(4) endorse warrants for receipts for money deposited in the Treasury;

(5) submit the accounts of the Secretary to the Comptroller General every 3 months, or more often if required by the Comptroller General; and

(6) submit to inspection at any time by the Comptroller General of money in the possession of the Secretary.

(b) Except as provided in section 3326 of this title, an acknowledgment for money deposited in the Treasury is not valid if the Secretary does not endorse a warrant as required by subsection (a)(4) of this section.

§3302. Custodians of money

(a) Except as provided by another law, an official or agent of the United States Government having custody or possession of public money shall keep the money safe without—

- (1) lending the money;
(2) using the money;

(3) depositing the money in a bank; and

(4) exchanging the money for other amounts.

(b) An official or agent of the Government receiving money for the Government from any source shall deposit the money in the Treasury as soon as practicable without deduction for any charge or claim.

(c) A person having custody or possession of public money, including a disbursing official having public money not for current expenditure, shall deposit the money without delay, but not later than the 30th day after the custodian receives the money, in the Treasury or with a depositary designated by the Secretary of the Treasury under law. The Secretary or a depositary receiving a deposit shall issue duplicate receipts for the money deposited. The original receipt is for the Secretary and the duplicate is for the custodian.

(d) An official or agent not complying with subsection (b) of this section may be removed from office. The official or agent may be required to forfeit to the Government any part of the money held by the official or agent and to which the official or agent may be entitled.

(e) An official or agent of the Government having custody or possession of public money shall keep an accurate entry of each amount of public money received, transferred, and paid.

(f) When authorized by the Secretary, an official or agent of the Government having custody or possession of public money, or performing other fiscal agent services, may be allowed necessary expenses to collect, keep, transfer, and pay out public money and to perform those services. However, money appropriated for those expenses may not be used to employ or pay officers and employees of the Government.

§3303. Designation of depositaries

(a) The Secretary of the Treasury designates depositaries of money as provided in this section and under other law.

(b) When necessary to carry out the business of the United States Government and under conditions the Secretary decides are necessary, the Secretary may designate depositaries in foreign countries and in territories and possessions of the United States to receive deposits of public money. The Secretary shall give preference to United States financial institutions the Secretary decides are safe and able to give the service required.

§3304. Transfers of public money from depositaries

The Secretary of the Treasury may transfer public money in the possession of a depositary—

- (1) to the Treasury; and
(2) if the Secretary believes the safety of the public money and convenience require it, to another depositary.

§3305. Audits of depositaries

The Secretary of the Treasury, or an officer, employee, or agent designated by the Secretary, may audit a depositary of public money. For uniformity and accuracy in accounts and safety of public money, an individual conducting an audit shall audit a depositary's—

- (1) books;
(2) accounts;
(3) returns; and
(4) public money on hand and the way the money is kept.

SUBCHAPTER II—PAYMENTS

§3321. Disbursing authority in the executive branch

(a) Except as provided in this section or another law, only officers and employees of the Department of the Treasury designated by the Secretary of the Treasury as disbursing officials may disburse public money available for expenditure by an executive agency.

(b) For economy and efficiency, the Secretary may delegate the authority to disburse public money to officers and employees of other executive agencies.

(c) The head of each of the following executive agencies shall designate personnel of the agency as disbursing officials to disburse public money available for expenditure by the agency:

(1) United States Marshal's Office.
(2) military departments of the Department of Defense (except for disbursements for departmental pay and expenses in the District of Columbia).

(d) On request of the Secretary and with the approval of the head of an executive agency referred to in subsection (c) of this section, facilities of the agency may be used to assist in disbursing public money available for expenditure by another executive agency.

§3322. Disbursing officials

(a) The Secretary of the Treasury shall transfer public money to a disbursing official only by draft or warrant written on the Treasury. A disbursing official shall—

(1) deposit public money as required by section 3302 of this title; and
(2) draw public money from the Treasury or a depository only—

(A) as necessary to make payments; and
(B) payable to persons to whom payment is to be made.

(b) A disbursing official is not liable for an overpayment provided under a United States Government bill of lading or transportation request when the overpayment is caused by the—

(1) use of improper transportation rates or classifications; or
(2) failure to deduct the proper amount under—

(A) a land grant law; or
(B) an equalization or other agreement.

§3323. Warrants

(a) Except as provided in section 3326 of this title, the Secretary of the Treasury may pay out money only against a warrant. A warrant shall be—

(1) authorized by law;
(2) signed by the Secretary; and
(3) countersigned by the Comptroller General.

(b)(1) A disbursing official shall send to the Secretary with a warrant a certificate under section 3526 of this title, or a requisition for an advance. The certificate or requisition shall state the appropriation to which the payment is to be charged.

(2) The Secretary shall return the certificate or requisition to the Comptroller General with the date and amount endorsed on the certificate or requisition.

(c) A requisition for the payment of money on an audited account or for depositing money in the Treasury is not required.

(d) The Secretary and the Comptroller General shall charge to the appropriate appropriation in their books any money paid by a warrant.

§3324. Advances

(a) Except as provided in this section, a payment under a contract to provide a serv-

ice or deliver an article for the United States Government may not be more than the value of the service already provided or the article already delivered.

(b) An advance of public money may be made only if it is authorized by—

(1) a specific appropriation or other law; or

(2) the President to be made to—
(A) a disbursing official if the President decides the advance is necessary to carry out—

(i) the duties of the official promptly and faithfully; and

(ii) an obligation of the Government; or
(B) an individual serving in the armed forces at a distant station if the President decides the advance is necessary to disburse regularly pay and allowances.

(c) Before the Secretary of the Treasury acts on a requisition for an advance, the Comptroller General shall act on the requisition under section 3522 of this title. The Comptroller General does not countersign a requisition for an advance.

(d) The head of an agency may pay in advance from appropriations available for the purpose—

(1) to the Secretary of the Army, charges for messages sent by the Secretary of the Army for the head of the agency, including charges for—

(A) payment of tolls of commercial carriers;

(B) leasing facilities for sending messages; and

(C) installing and maintaining facilities for sending messages; and

(2) charges for a publication printed or recorded in any way for the auditory or visual use of the agency.

§3325. Vouchers

(a) A disbursing official in the executive branch of the United States Government shall—

(1) disburse money only as provided by a voucher certified by—

(A) the head of the executive agency concerned; or

(B) an officer or employee of the executive agency having written authorization from the head of the agency to certify vouchers;

(2) examine a voucher if necessary to decide if it is—

(A) in proper form;

(B) certified and approved; and

(C) computed correctly on the facts certified; and

(3) except for the correctness of computations on a voucher, be held accountable for carrying out clauses (1) and (2) of this subsection.

(b) Subsection (a) of this section does not apply to disbursements of a military department of the Department of Defense, except for disbursements for departmental pay and expenses in the District of Columbia.

(c) On request, the Secretary of the Treasury may provide to the appropriate officer or employee of the United States Government a list of persons receiving periodic payments from the Government. When certified and in proper form, the list may be used as a voucher on which the Secretary may disburse money.

§3326. Waiver of requirements for warrants and advances

(a) When the Secretary of the Treasury and the Comptroller General decide that, with sufficient safeguards, existing procedures may be changed to simplify, improve, and economize the control and accounting

of public money, they may prescribe joint regulations for waiving any part of the requirements in effect on September 12, 1950, that—

(1) warrants be issued and countersigned for the receipt, retention, and disbursement of public money and trust funds; and

(2) amounts be requisitioned and advanced to accountable officials.

(b) Regulations of the Secretary and the Comptroller General may provide for the payment of vouchers by authorized disbursing officials by checks drawn on the general fund of the Treasury. However, the regulations shall provide for appropriate action (including suspension or withdrawal of authority to make payments) against a delinquent disbursing official for any reason related to the official's accounts.

§3327. General authority to issue checks and other drafts

The Secretary of the Treasury may issue a check or other draft on public money in the Treasury to pay an obligation of the United States Government. When the Secretary decides it is convenient to a public creditor and in the public interest, the Secretary may designate a depository to issue a check or other draft on public money held by the depository to pay an obligation of the Government. As directed by the Secretary, each depository shall report to the Secretary on public money paid and received by the depository.

§3328. Paying checks and drafts

(a)(1) Except as provided in sections 3329 and 3330 of this title, a check drawn on the Treasury may be paid at any time. However, if the Secretary of the Treasury is on notice of a question of law or fact about the check when the check is presented, the Secretary shall defer payment until the Comptroller General settles the question.

(2) When the Secretary decides it is appropriate, the Secretary may transfer—

(A) the amount of an unpaid check drawn on the Treasury from the account on which it was drawn to a consolidated account of the Treasury available for paying checks; and

(B) an amount available, but not required, for paying checks drawn on the Treasury to the appropriate receipt account.

(b)(1) If a check issued by a disbursing official and drawn on a designated depository is not paid by the last day of the fiscal year after the fiscal year in which the check was issued, the amount of the check is—

(A) withdrawn from the account with the depository; and

(B) deposited in the Treasury for credit to a consolidated account of the Treasury.

(2) A claim for the proceeds of an unpaid check under this subsection may be paid from a consolidated account by a check drawn on the Treasury on settlement by the Comptroller General.

(c) A limitation imposed on a claim against the United States Government under section 3702 of this title does not apply to an unpaid check drawn on the Treasury or a designated depository.

(d) With the approval of the Comptroller General, the Secretary may prescribe regulations the Secretary decides are necessary to carry out subsections (a)-(c) of this section.

(e)(1) The Secretary shall prescribe regulations on—

(A) enforcing the speedy presentation of Government drafts;

(B) paying drafts, including the place of payment; and

(C) paying drafts if presentment is not made as required.

(2) Regulations prescribed under paragraph (1) of this subsection shall prevent, as far as may be practicable, Government drafts from being used or placed in circulation as paper currency or a medium of exchange.

§3329. Withholding checks to be sent to foreign countries

(a) The Secretary of the Treasury shall prohibit a check or warrant drawn on public money from being sent to a foreign country from the United States or from a territory or possession of the United States when the Secretary decides that postal, transportation, or banking facilities generally, or local conditions in the foreign country, do not reasonably ensure that the payee—

- (1) will receive the check or warrant; and
- (2) will be able to negotiate it for full value.

(b)(1) If a check or warrant is prohibited from being sent to a foreign country under subsection (a) of this section, the drawer shall hold the check or warrant until the end of the calendar quarter after the date of the check or warrant.

(2) The Secretary may release the check or warrant for delivery during the calendar quarter after the date of the check or warrant if the Secretary decides that conditions have changed to ensure reasonably that the payee—

- (A) will receive the check or warrant; and
- (B) will be able to negotiate it for full value.

(3) Unless the Secretary otherwise directs, the drawer shall send at the end of the calendar quarter after the date of the check or warrant the—

- (A) withheld check or warrant to the drawee; and
- (B) report to the Secretary on—
 - (i) the name and address of the payee;
 - (ii) the date, number, and amount of the check or warrant; and
 - (iii) the account on which the check or warrant was drawn.

(4) The drawee shall transfer the amount of a withheld check or warrant from the account of the drawer to the special deposit account "Secretary of the Treasury, Proceeds of Withheld Foreign Checks". The check or warrant shall be marked "Paid into Withheld Foreign Check Account". After that time, the drawee shall send all withheld checks and warrants to the Comptroller General. The Comptroller General shall credit the accounts of the drawer and drawee.

(c) The Secretary may pay an amount deposited in the special account under subsection (b)(4) of this section with a check drawn on the account when—

- (1) a person claiming payment satisfies the Secretary of the right to the amount of the check or warrant (or satisfies the Administrator of Veterans' Affairs if the claim represents a payment under laws carried out by the Administrator); and

(2) the Secretary is reasonably ensured that the person—

- (A) will receive the check or warrant; and
- (B) will be able to negotiate it for full value.

(d) This section and section 3330 of this title—

- (1) apply to a check or warrant whose delivery may be withheld under Executive Order 8389;

(2) do not affect a requirement for a license for delivering and paying a check in payment of a claim under subsection (c) of

this section when a license is required by law to authorize delivery and payment; and

(3) do not affect a check or warrant issued for the payment of pay or goods bought by the United States Government in a foreign country.

§3330. Payment of Veterans' Administration checks for the benefit of individuals in foreign countries

(a)(1) A check is deemed to be issued for sending to a foreign country and subject to this section and section 3329 of this title if the check is—

- (A) drawn on public money;
- (B) for benefits under laws carried out by the Administrator of Veterans' Affairs; and
- (C) to be sent to a person in the United States or a territory or possession of the United States, and the person is legally responsible for the care of an individual in a foreign country.

(2) The Administrator shall notify the Secretary of the Treasury of each check described under paragraph (1) of this subsection.

(3) The Administrator may exempt a check from paragraph (1) of this subsection if the application of paragraph (1) would reduce, discontinue, or deny benefits for the care of a dependent of an individual in a foreign country.

(b) When the amount of checks (representing payments to an individual under laws carried out by the Administrator) transferred under section 3329(b)(4) of this title equals \$1,000, the amounts of additional checks (except checks under contracts of insurance) payable to the individual under those laws shall be deposited in the Treasury as miscellaneous receipts. An amount transferred under section 3329(b)(4) or deposited as miscellaneous receipts is deemed to be payment for all purposes to the individual entitled to payment.

(c) If the payee of a check for pension, compensation, or emergency officers' retirement pay under laws carried out by the Administrator dies while the amount of the check is in the special deposit account, the amount is payable (subject to section 3329 of this title and this section) as follows:

(1) after the death of the veteran, to the surviving spouse, or, if there is no surviving spouse, to children of the veteran under 18 years of age at the time of the veteran's death.

(2) after the death of the surviving spouse, to children of the spouse under 18 years of age at the time of the spouse's death.

(3) after the death of an apportionee of a part of the veteran's pension, compensation, or emergency officers' retirement pay but before all of the apportioned amount is paid to the veteran, the apportioned amount not paid.

(4) in any other case, only to the extent necessary to reimburse a person for burial expenses.

(d)(1) A payment may be made under subsection (c) of this section only if a claim for payment is—

(A) filed with the Administrator by the end of the first year after the date of the death of the individual entitled to payment; and

(B) completed by submitting the necessary evidence by the 6th month after the date the Administrator requests the evidence.

(2) Payment shall include only amounts due at the time of death under ratings or decisions existing at the time of the death.

§3331. Substitute checks

(a) In this section, "original check"—

- (1) means an order for the payment of money—

- (A) payable on demand;
- (B) that does not bear interest;
- (C) drawn by an authorized disbursing official or agent of the United States Government; and

(D) the amount of which is deposited with the Treasury or another account available for payment; and

(2) does not include coins and currency of the Government.

(b) When the Secretary of the Treasury is satisfied that an original check is lost, stolen, destroyed in any part, or is so defaced that the value to the owner or holder is impaired, the Secretary may issue a substitute check to the owner or holder of the original check. Except as provided in subsection (c) of this section, the substitute check is payable from the amount available to pay the original check.

(c) When the Secretary is satisfied that an original check drawn on a depository in a foreign country or a territory or possession of the United States is lost, stolen, destroyed in part, or is so defaced that its value to the owner or holder is impaired, the drawer of the original check (or another official designated by the Secretary with the approval of the head of the agency on whose behalf the original check was issued) may issue to the owner or holder of the check a substitute check. The drawer or official shall issue the substitute check by the last day of the fiscal year after the fiscal year in which the original check was issued—

- (1) using the current date; and
- (2) drawn on the account of the drawer of the original check or another account available for payment of the substitute.

(d) A substitute check issued under this section—

(1) may be paid only if the original check has not been paid;

(2) shall include information necessary to identify the original check;

(3) that is drawn on the Treasury—

- (A) is deemed to be an original check; and
- (B) is paid under the same conditions as the original check; and

(4) does not relieve a disbursing or certifying official from liability to the Government for payment resulting from erroneously issuing the original check.

(e) Before issuing a substitute check under this section, the Secretary may require the owner or holder of the original check to agree to indemnify the Government with security in the form and amount the Secretary decides is necessary.

§3332. Checks payable to financial organizations designated by Government officers and employees

(a) In this section, "financial organization" means a bank, savings and loan association or similar institution, or a credit union chartered by the United States Government or a State.

(b) An officer or employee of an agency may designate in writing not more than 3 financial organizations to which a payment of pay of the officer or employee shall be sent and the amount to be sent to each organization. The head of the agency shall authorize a disbursing official to issue a check payable to each of the organizations in the amount designated for—

- (1) credit to the checking account of the officer or employee;

(2) deposit of savings for the officer or employee; or

(3) buying shares for the officer or employee.

(c) An agency is not reimbursed for the cost of issuing one check requested by an officer or employee under subsection (b) of this section. However, a financial organization (except a financial organization designated by an officer or employee of either House of Congress) shall reimburse the agency for the cost of each additional check issued. The check for which the agency is not reimbursed is the check in the largest amount.

(d) If more than one officer or employee making a designation under this section designates the same financial organization, the head of the agency may authorize a disbursing official to issue a check payable to the organization for the total amount designated by the officers and employees, accompanied by a schedule stating the amount to be credited to the account of each officer and employee.

(e) Payment by the Government by more than one check, issued under this section and properly endorsed, is complete payment of the amount due to the officer or employee requesting payment.

(f) On the written request of a person to whom payment is to be made, this section may be applied to any class of recurring payments.

(g) The Secretary of the Senate shall prescribe regulations for the Senate in carrying out this section. With the approval of the Committee on House Administration of the House of Representatives, the Clerk of the House shall prescribe regulations for the House in carrying out this section. The Secretary of the Treasury shall prescribe regulations for all other agencies in carrying out this section.

§3333. Relief for payments made without negligence

(a)(1) The Secretary of the Treasury is not liable for a payment made by the Secretary or depositary in due course and without negligence, of a—

(A) check, draft, or warrant drawn on the Treasury or the depositary; and

(B) debt obligation guaranteed or assumed by the United States Government.

(2) The Comptroller General shall credit the accounts of the Treasury or the depositary for the payment.

(b) This section does not relieve another individual from civil or criminal liability for a check, draft, warrant, or debt obligation of the Government.

SUBCHAPTER III—MISCELLANEOUS

§3341. Sale of Government warrants, checks, drafts, and obligations

(a) A disbursing official of the United States Government may sell a Government warrant, check, draft, or obligation not the property of the official at a premium, or dispose of the proceeds of the warrant, check, draft, or obligation, only if the official deposits the premium and the proceeds in the Treasury or with a depositary for the credit of the Government.

(b) A disbursing official violating subsection (a) of this section shall be dismissed immediately.

§3342. Check cashing and exchange transactions

(a) A disbursing official of the United States Government may—

(1) cash and negotiate negotiable instruments payable in United States currency or currency of a foreign country;

(2) exchange United States currency, coins, and negotiable instruments and currency, coins, and negotiable instruments of foreign countries; and

(3) cash checks drawn on the Treasury to accommodate United States citizens in a foreign country, but only if—

(A) satisfactory banking facilities are not available in the foreign country; and

(B) a check is presented by the payee who is a United States citizen.

(b) A disbursing official may act under subsection (a)(1) and (2) of this section only for—

(1) an official purpose;

(2) personnel of the Government;

(3) a veteran hospitalized or living in an institution operated by an agency;

(4) a contractor, or personnel of a contractor, carrying out a Government project; and

(5) personnel of an authorized agency not part of the Government that operates with an agency of the Government.

(c)(1) An amount held by the disbursing official that is available for expenditure may be used to carry out subsection (a) of this section with the approval of the head of the agency having jurisdiction over the amount.

(2) The head of an agency having jurisdiction over a disbursing official may offset, within the same fiscal year, a deficiency resulting from a transaction under subsection (a) of this section with a gain from a transaction under subsection (a). A gain in the account of a disbursing official not used to offset deficiencies under subsection (a) shall be deposited in the Treasury as miscellaneous receipts.

(3) Amounts necessary to adjust for deficiencies in the account of a disbursing official because of transactions under subsection (a) of this section are authorized to be appropriated.

(d) The Secretary of the Treasury and, with the approval of the Secretary, the head of an agency having jurisdiction over a disbursing official, may issue regulations to carry out this section. However, under conditions the Secretary decides are necessary, the Secretary may delegate to the head of an agency the authority to issue regulations applying to a disbursing official that is an officer or employee of the agency.

§3343. Check forgery insurance fund

(a) The Department of the Treasury has a special deposit revolving fund, the "Check Forgery Insurance Fund". Amounts may be appropriated to the Fund. The Fund consists of amounts—

(1) appropriated to the Fund; and

(2) received under subsection (d) of this section.

(b) The Secretary of the Treasury shall pay from the Fund to a payee or special endorsee of a check drawn on the Treasury or a depositary designated by the Secretary the amount of the check without interest if—

(1) the check was lost or stolen without the fault of the payee or a holder that is a special endorsee and whose endorsement is necessary for further negotiation;

(2) the check was negotiated later and paid by the Secretary or a depositary on a forged endorsement of the payee's or special endorsee's name;

(3) the payee or special endorsee has not participated in any part of the proceeds of the negotiation or payment; and

(4) recovery from the forger, a transferee, or a party on the check after the forgery has been or may be delayed or unsuccessful.

(c) Notwithstanding section 1306 of this title, a check drawn on a designated depositary may be paid in the currency of a foreign country when the appropriate accountable official authorizes payment in that currency.

(d) The Secretary shall deposit immediately to the credit of the Fund an amount recovered from a forger or a transferee or party on the check. However, currency of a foreign country recovered because of a forged check drawn on a designated depositary shall be credited to the Fund or to the foreign currency fund that was charged when payment was made under subsection (b) of this section to the payee or special endorsee.

(e) This section does not relieve—

(1) a forger from civil or criminal liability; or

(2) a transferee or party on a check after the forgery from liability—

(A) on the express or implied warranty of prior endorsements of the transferee or party; or

(B) to refund amounts to the Secretary.

3543. Postponing a distress warrant proceeding.

3544. Rights and remedies of the United States Government reserved.

3545. Civil action to recover money.

SUBCHAPTER I—GENERAL

§3501. Definition

In this chapter, "executive agency" does not include (except in section 3513 of this title) a corporation, agency, or instrumentality subject to chapter 91 of this title.

SUBCHAPTER II—ACCOUNTING REQUIREMENTS, SYSTEMS, AND INFORMATION

§3511. Prescribing accounting requirements and developing accounting systems

(a) The Comptroller General shall prescribe the accounting principles, standards, and requirements that the head of each executive agency shall observe. Before prescribing the principles, standards, and requirements, the Comptroller General shall consult with the Secretary of the Treasury and the President on their accounting, financial reporting, and budgetary needs, and shall consider the needs of the heads of the other executive agencies.

(b) Requirements prescribed under subsection (a) of this section shall—

(1) provide for suitable integration between the accounting process of each executive agency and the accounting of the Department of the Treasury;

(2) allow the head of each agency to carry out section 3512 of this title; and

(3) provide a method of—

(A) integrated accounting for the United States Government;

(B) complete disclosure of the results of the financial operations of each agency and the Government; and

(C) financial information and control the President and Congress require to carry out their responsibilities.

(c) Consistent with subsections (a) and (b) of this section—

(1) the authority of the Comptroller General continues under section 205(b) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(b)); and

(2) the Comptroller General may prescribe the forms, systems, and procedures that the judicial branch of the Government (except the Supreme Court) shall observe.

(d) The Comptroller General, the Secretary, and the President shall conduct a continuous program for improving accounting and financial reporting in the Government.

§3512. Executive agency accounting systems

(a) The head of each executive agency shall establish and maintain systems of accounting and internal controls that provide—

(1) complete disclosure of the financial results of the activities of the agency;

(2) adequate financial information the agency needs for management purposes;

(3) effective control over, and accountability for, assets for which the agency is responsible, including internal audit;

(4) reliable accounting results that will be the basis for—

(A) preparing and supporting the budget requests of the agency;

(B) controlling the carrying out of the agency budget; and

(C) providing financial information the President requires under section 1104(e) of this title; and

(5) suitable integration of the accounting of the agency with the central accounting and reporting responsibilities of the Secretary of the Treasury under section 3513 of this title.

(b) To assist in preparing a cost-based budget under section 1108(b) of this title and consistent with principles and standards the Comptroller General prescribes, the head of each executive agency shall maintain the accounts of the agency on an accrual basis to show the resources, liabilities, and costs of operations of the agency. An accounting system under this subsection shall include monetary property accounting records.

(c) The Comptroller General shall—

(1) cooperate with the head of each executive agency in developing an accounting system for the agency; and

(2) approve the system when the Comptroller General considers it to be adequate and in conformity with the principles, standards, and requirements prescribed under section 3511 of this title.

(d) The Comptroller General shall review the accounting systems of each executive agency. The results of a review shall be available to the head of the executive agency, the Secretary, and the President. The Comptroller General shall report to Congress on a review when the Comptroller General considers it proper.

§3513. Financial reporting and accounting system

(a) The Secretary of the Treasury shall prepare reports that will inform the President, Congress, and the public on the financial operations of the United States Government. The reports shall include financial information the President requires. The head of each executive agency shall give the Secretary reports and information on the financial conditions and operations of the agency the Secretary requires to prepare the reports.

(b) The Secretary may—

(1) establish facilities necessary to prepare the reports; and

(2) reorganize the accounting functions and procedures and financial reports of the Department of the Treasury to develop an effective and coordinated system of accounting and financial reporting in the Department that will integrate the accounting results for the Department and be the operating center for consolidating accounting results of other executive agencies with accounting results of the Department.

(c) The Comptroller General shall—

(1) cooperate with the Secretary in developing and establishing the reporting and accounting system under this section; and

(2) approve the system when the Comptroller General considers it to be adequate and in conformity with the principles, standards, and requirements prescribed under section 3511 of this title.

§3514. Discontinuing certain accounts maintained by the Comptroller General

The Comptroller General may discontinue an agency appropriation, expenditure, limitation, receipt, or personal ledger account maintained by the Comptroller General when the Comptroller General believes that the accounting system and internal controls of the agency will allow the Comptroller General to carry out the functions related to the account.

SUBCHAPTER III—AUDITING AND SETTLING ACCOUNTS

§3521. Audits by agencies

(a) Each account of an agency shall be audited administratively before being submitted to the Comptroller General. The head of each agency shall prescribe regulations for conducting the audit and designate a place at which the audit is to be conducted. However, a disbursing official of an executive agency may not administratively audit vouchers for which the official is responsible. With the consent of the Comptroller General, the head of the agency may waive any part of an audit.

(b) The head of an agency may prescribe a statistical sampling procedure to audit vouchers of the agency when the head of the agency decides economies will result from using the procedure. The Comptroller General—

(1) may prescribe the maximum amount of a voucher that may be audited under this subsection; and

(2) in reviewing the accounting system of the agency, shall evaluate the adequacy and effectiveness of the procedure.

(c) A disbursing or certifying official acting in good faith under subsection (b) of this section is not liable for a payment or certification of a voucher not audited specifically because of the procedure prescribed under subsection (b) if the official and the head of the agency carry out diligently collection action the Comptroller General prescribes.

(d) Subsections (b) and (c) of this section do not—

(1) affect the liability, or authorize the relief, of a payee, beneficiary, or recipient of an illegal, improper, or incorrect payment; or

(2) relieve a disbursing or certifying official, the head of an agency, or the Comptroller General of responsibility in carrying out collection action against a payee, beneficiary, or recipient.

§3522. Making and submitting accounts

(a)(1) Unless the Comptroller General decides the public interest requires that an account be made more frequently, each disbursing official shall make a quarterly account. An official or agent of the United States Government receiving public money not authorized to be kept as pay of the official or agent shall make a monthly account of the money.

(2) An official or agent of the Government receiving public money shall make an account of public money received by the official or agent according to the appropriation from which the money was advanced.

(b)(1) A monthly account shall be submitted to the appropriate official in the District of Columbia by the 10th day after the end of the month covered by the account. The official shall submit the account to the Comptroller General by the 20th day after receiving the account.

(2) An account (except a monthly account) shall be submitted to the appropriate official in the District of Columbia by the 20th day after the end of the period covered by the account. The official shall submit the account to the Comptroller General by the 60th day after receiving the account.

(3) Notwithstanding paragraphs (1) and (2) of this subsection, an account of the armed forces shall be submitted to the Comptroller General by the 60th day after the account is received. However, during a war or national emergency and for 18 months after the war or emergency ends, an account shall be submitted to the Comptroller General by the 90th day after the account is received.

(4) Notwithstanding paragraphs (1) and (2) of this subsection, an account of a disbursing official of the Department of Justice shall be submitted to the Comptroller General by the 80th day after the account is received.

(c) An official shall give evidence of compliance with subsection (b) of this section if an account is not received within a reasonable time after the time required by subsection (b).

(d) The head of an agency may require other returns or reports about the agency that the public interest requires.

(e)(1) The Comptroller General shall disapprove a requisition for an advance of money if an account from which the advance is to be made is not submitted to the

Comptroller General within the time required by subsection (b) of this section. The Comptroller General may disapprove the request for another reason related to the condition of an account of the official for whom the advance is requested. However, the Secretary of the Treasury may overrule the decision of the Comptroller General on the sufficiency of the other reasons.

(2) The Secretary may extend the time requirements of subsection (b) (1) and (2) of this section for submitting an account to the proper official in the District of Columbia or waive a condition of delinquency only when there is, or is likely to be, a manifest physical difficulty in complying with those requirements. If an account is not submitted to the Comptroller General on time under subsection (b), an order of the President or, if the President is ill or not in the District of Columbia, the Secretary is required to authorize an advance.

§3523. General audit authority of the Comptroller General

(a) Except as specifically provided by law, the Comptroller General shall audit the financial transactions of each agency. In deciding on auditing procedures and the extent to which records are to be inspected, the Comptroller General shall consider generally accepted auditing principles, including the effectiveness of accounting organizations and systems, internal audit and control, and related administrative practices of each agency.

(b) The Comptroller General shall audit the Architect of the Capitol at times the Comptroller General considers appropriate. Section 716 of this title applies to the Architect in conducting the audit. The Comptroller General shall report the results of the audit to Congress. Each report shall be printed as a Senate document.

(c)(1) When the Comptroller General decides an audit shall be conducted at a place at which the records of an executive agency or the Architect of the Capitol are usually kept, the Comptroller General may require the head of the agency or the Architect to keep any part of an account of an accountable official or of a record required to be submitted to the Comptroller General. The Comptroller General may require records be kept under conditions and for a period of not more than 10 years specified by the Comptroller General. However, the Comptroller General and the head of the agency or the Architect may agree on a longer period.

(2) The Comptroller General and the head of an agency in the legislative or judicial branch of the United States Government (except the Architect) may agree to apply this subsection to the agency.

§3524. Auditing expenditures approved without vouchers

(a)(1) The Comptroller General may audit expenditures, accounted for only on the approval, authorization, or certificate of the President or an official of an executive agency, to decide if the expenditure was authorized by law and made. Records and related information shall be made available to the Comptroller General in conducting the audit.

(2) The Comptroller General may release the results of the audit or disclose related information only to the President or head of the agency, or, if there is an unresolved discrepancy, to the Committee on Governmental Affairs of the Senate, the Committee on Government Operations of the House of Representatives, and the committees of

Congress having legislative or appropriation oversight of the expenditure.

(b) Before December 1 of each year, the Director of the Office of Management and Budget shall submit a report listing each account that may be subject to this section to the Committees on the Budget and Appropriations of both Houses of Congress, the Committee on Governmental Affairs, and to the Committee on Government Operations, and to the Comptroller General.

(c) The President may exempt from this section a financial transaction about sensitive foreign intelligence or foreign counterintelligence activities or sensitive law enforcement investigations if an audit would expose the identifying details of an active investigation or endanger investigative or domestic intelligence sources involved in the investigation. The exemption may apply to a class or category of financial transactions.

(d) This section does not—

(1) apply to expenditures under section 102, 103, 105(d) (1), (3), or (5), or 106(b) (2) or (3) of title 3; or

(2) affect authority under section 8(b) of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403j(b)).

(e) Information about a financial transaction exempt under subsection (c) of this section or a financial transaction under section 8(b) of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403j(b)) may be reviewed by the Permanent Select Committee on Intelligence of the House and the Select Committee on Intelligence of the Senate.

(f) Subsections (a)(1) and (d)(1) of this section may be superseded only by a law enacted after April 3, 1980, specifically repealing or amending this section.

§3525. Auditing nonappropriated fund activities

(a) The Comptroller General may audit—

(1) the operations and accounts of each nonappropriated fund and related activities authorized or operated by the head of an executive agency to sell goods or services to United States Government personnel and their dependents;

(2) accounting systems and internal controls of the fund and related activities; and

(3) internal or independent audits or reviews of the fund and related activities.

(b) The head of each executive agency promptly shall provide the Comptroller General with—

(1) a copy of the annual report of a nonappropriated fund and related activities subject to this section when the Comptroller General—

(A) requires a report for a designated class of each fund and related activities having gross sales receipts of more than \$100,000 a year; or

(B) specifically requests a report for another fund and related activities; and

(2) a statement on the yearly financial operations, financial condition, and cash flow and other yearly information about the fund and related activities that the head of the agency and the Comptroller General agree on if the information is not included in the annual report.

(c) Records and property of a fund and related activities subject to this section shall be made available to the Comptroller General to the extent the Comptroller General considers necessary.

§3526. Settlement of accounts

(a) The Comptroller General shall settle all accounts of the United States Government and supervise the recovery of all debts finally certified by the Comptroller General as due the Government.

(b) A decision of the Comptroller General under section 3529 of this title is conclusive on the Comptroller General when settling the account containing the payment.

(c)(1) The Comptroller General shall settle an account of an accountable official within 3 years after the date the Comptroller General receives the account. A copy of the certificate of settlement shall be provided the official.

(2) The settlement of an account is conclusive on the Comptroller General after 3 years after the account is received by the Comptroller General. However, an amount may be charged against the account after the 3-year period when the Government has or may have lost money because the official acted fraudulently or criminally.

(3) A 3-year period under this subsection is suspended during a war.

(4) This subsection does not prohibit—

(A) recovery of public money illegally or erroneously paid;

(B) recovery from an official of a balance due the Government under a settlement within the 3-year period; or

(C) an official from clearing an account of questioned items as prescribed by law.

(d) On settling an account of the Government, the balance certified by the Comptroller General is conclusive on the executive branch of the Government. On the initiative of the Comptroller General or on request of an individual whose accounts are settled or the head of the agency to which the account relates, the Comptroller General may change the account within a year after settlement. The decision of the Comptroller General to change the account is conclusive on the executive branch.

(e) When an amount of money is expended under law for a treaty or relations with a foreign country, the President may—

(1) authorize the amount to be accounted for each year specifically by settlement of the Comptroller General when the President decides the amount expended may be made public; or

(2) make, or have the Secretary of State make, a certificate of the amount expended if the President decides the amount is not to be accounted for specifically. The certificate is a sufficient voucher for the amount stated in the certificate.

(f) The Comptroller General shall keep all settled accounts, vouchers, certificates, and related papers until they are disposed of as prescribed by law.

(g) This subchapter does not prohibit the Comptroller General from suspending an item in an account to get additional evidence or explanations needed to settle an account.

§3527. General authority to relieve accountable officials and agents from liability

(a) Except as provided in subsection (b) of this section, the Comptroller General may relieve a present or former accountable official or agent of an agency responsible for the physical loss or deficiency of public money, vouchers, checks, securities, or records, or may authorize reimbursement from an appropriation or fund available for the activity in which the loss or deficiency occurred for the amount of the loss or deficiency paid by the official or agent as restitution, when—

(1) the head of the agency decides that—

(A) the official or agent was carrying out official duties when the loss or deficiency occurred, or the loss or deficiency occurred because of an act or failure to act by a subordinate of the official or agent; and

(B) the loss or deficiency was not the result of fault or negligence by the official or agent;

(2) the loss or deficiency was not the result of an illegal or incorrect payment; and

(3) the Comptroller General agrees with the decision of the head of the agency.

(b)(1) The Comptroller General shall relieve a disbursing official of the armed forces responsible for the physical loss or deficiency of public money, vouchers, or records, or shall authorize reimbursement, from an appropriation or fund available for reimbursement, of the amount of the loss or deficiency paid by or for the official as restitution, when—

(A) the Secretary of Defense or the appropriate Secretary of the military department of the Department of Defense decides that the official was carrying out official duties when the loss or deficiency occurred;

(B) the loss or deficiency was not the result of an illegal or incorrect payment; and

(C) the loss or deficiency was not the result of fault or negligence by the official.

(2) The finding of the Secretary involved is conclusive on the Comptroller General.

(c) On the initiative of the Comptroller General or written recommendation of the head of an agency, the Comptroller General may relieve a present or former disbursing official of the agency responsible for a deficiency in an account because of an illegal, improper, or incorrect payment, and credit the account for the deficiency, when the Comptroller General decides that the payment was not the result of bad faith or lack of reasonable care by the official. However, the Comptroller General may deny relief when the Comptroller General decides the head of the agency did not carry out diligently collection action under procedures prescribed by the Comptroller General.

(d)(1) When the Comptroller General decides it is necessary to adjust the account of an official or agent granted relief under subsection (a) or (c) of this section, the amount of the relief shall be charged—

(A) to an appropriation specifically provided to be charged; or

(B) if no specific appropriation, to the appropriation or fund available for the expense of the accountable function when the adjustment is carried out.

(2) Subsection (c) of this section does not—

(A) affect the liability, or authorize the relief, of a payee, beneficiary, or recipient of an illegal, improper, or incorrect payment; or

(B) relieve an accountable official, the head of an agency, or the Comptroller General of responsibility in carrying out collection action against a payee, beneficiary, or recipient.

(e) Relief provided under this section is in addition to relief provided under another law.

§3528. Responsibilities and relief from liability of certifying officials

(a) A certifying official certifying a voucher is responsible for—

(1) information stated in the certificate, voucher, and supporting records;

(2) the computation of a certified voucher under this section and section 3325 of this title;

(3) the legality of a proposed payment under the appropriation or fund involved; and

(4) repaying a payment—

(A) illegal, improper, or incorrect because of an inaccurate or misleading certificate;

(B) prohibited by law; or

(C) that does not represent a legal obligation under the appropriation or fund involved.

(b) The Comptroller General may relieve a certifying official from liability when the Comptroller General decides that—

(1) the certification was based on official records and the official did not know, and by reasonable diligence and inquiry could not have discovered, the correct information; or

(2)(A) the obligation was incurred in good faith;

(B) no law specifically prohibited the payment; and

(C) the United States Government received value for payment.

(c) The Comptroller General shall relieve a certifying official from liability for an overpayment—

(1) to a common carrier under section 3726 of this title when the Comptroller General decides the overpayment occurred only because the administrative audit before payment did not verify transportation rates, freight classifications, or land-grant deductions; or

(2) provided under a Government bill of lading or transportation request when the overpayment was the result of using improper transportation rates or classifications or the failure to deduct the proper amount under a land-grant law or agreement.

(d) This section does not apply to disbursements of a military department of the Department of Defense, except disbursements for departmental pay and expenses in the District of Columbia.

§3529. Requests for decisions of the Comptroller General

(a) A disbursing or certifying official or the head of an agency may request a decision from the Comptroller General on a question involving—

(1) a payment the disbursing official or head of the agency will make; or

(2) a voucher presented to a certifying official for certification.

(b) The Comptroller General shall issue a decision requested under this section.

§3530. Adjusting accounts

(a) An appropriation or fund currently available for the expense of an accountable function shall be charged with an amount necessary to adjust an account of an accountable official or agent when—

(1) necessary to adjust the account for a loss to the United States Government resulting from the fault or negligence of the official or agent; and

(2) the head of the agency decides the loss is uncollectable.

(b) An adjustment does not affect the personal financial liability of an official or agent for the loss.

(c) The Comptroller General shall prescribe regulations to carry out subsection (a) of this section.

(d) Under procedures prescribed by the Comptroller General, the head of an agency may charge the net amount of unpaid and overpaid balances in individual pay accounts against the appropriation for the fiscal year in which the balances occurred and from which the accounts were payable. The net amount shall be credited to and paid from the corresponding appropriation for the next fiscal year.

§3531. Property returns

(a) The head of an executive department—

(1) shall certify to the Comptroller General a charge against an official or agent entrusted with public property for the department resulting from a loss to the United States Government from the property because of fault of the official or agent; and

(2) may not forward the property to the Comptroller General.

(b)(1) A certificate under subsection (a) of this section shall state—

(A) the condition of the property;

(B) that the official or agent has had a reasonable opportunity to be heard but has not been relieved of liability; and

(C) that the certificate includes all charges not certified previously.

(2) The effect of information in the certificate is the same as if the Comptroller General had discovered the information when auditing the account. The Comptroller General shall charge the appropriate account for the amount of the loss.

(c) Except as provided in subsection (a) of this section, this section does not affect the way a property return is made or liability for property is decided.

§3532. Notification of account deficiencies

An accounting official discovering a deficiency in an account of an official of the United States Government having custody of public money shall notify the head of the agency having jurisdiction of the official of the kind and amount of the deficiency.

SUBCHAPTER IV—COLLECTION

§3541. Distress warrants

(a) When an official receiving public money before it is paid to the Treasury or a disbursing or certifying official of the United States Government does not submit an account or pay the money as prescribed by law, the Comptroller General shall make the account for the official and certify to the Secretary of the Treasury the amount due the Government.

(b) The Secretary shall issue a distress warrant against the official stating the amount due from the official and any amount paid. The warrant shall be directed to the marshal of the district in which the official resides. If the Secretary intends to take and sell the property of an official that is located in a district other than where the official resides, the warrant shall be directed to the marshal of the district in which the official resides and the marshal of the district in which the property is located.

§3542. Carrying out distress warrants

(a) A marshal carrying out a distress warrant issued under section 3541 of this title shall seize the personal property of the official and sell the property after giving 10 days notice of the sale. Notice shall be given by posting an advertisement of the property to be sold in at least 2 public places in the town and county in which the property was taken or the town and county in which the owner of the property resides. If the property does not satisfy the amount due under the warrant, the official may be sent to prison until discharged by law.

(b)(1) The amount due under a warrant is a lien on the real property of the official from the date the distress warrant is issued. The lien shall be recorded in the office of the clerk of the appropriate district court until discharged under law.

(2) If the personal property of the official is not enough to satisfy a distress warrant, the marshal shall sell real property of the official after advertising the property for at least 3 weeks in at least 3 public places in the county or district where the property is

located. A buyer of the real property has valid title against all persons claiming under the official.

(c) The official shall receive that part of the proceeds of a sale remaining after the distress warrant is satisfied and the reasonable costs and charges of the sale are paid.

§3543. Postponing a distress warrant proceeding

(a) A distress warrant proceeding may be postponed for a reasonable time if the Secretary of the Treasury believes the public interest will not be harmed by the postponement.

(b)(1) A person adversely affected by a distress warrant issued under section 3541 of this title may bring a civil action in a district court of the United States. The complaint shall state the kind and extent of the harm. The court may grant an injunction to stay any part of a distress warrant proceeding required by the action after the person applying for the injunction gives a bond in an amount the court prescribes for carrying out a judgment.

(2) An injunction under this subsection does not affect a lien under section 3542(b)(1) of this title. The United States Government is not required to answer in a civil action brought under this subsection.

(3) If the court dissolves the injunction on a finding that the civil action for the injunction was brought only for delay, the court may increase the interest rate imposed on amounts found due against the complainant to not more than 10 percent a year. The judge may grant or dissolve an injunction under this subsection either in or out of court.

(c) A person adversely affected by a refusal to grant an injunction or by dissolving an injunction under subsection (b) of this section may petition a judge of a circuit court of appeals in which the district is located or the Supreme Court justice allotted to that circuit by giving the judge or justice a copy of the proceeding held before the district judge. The judge or justice may grant an injunction or allow an appeal if the judge or justice finds the case requires it.

§3544. Rights and remedies of the United States Government reserved

This subchapter does not affect a right or remedy the United States Government has by law to recover a tax, debt, or demand.

§3545. Civil action to recover money

The Attorney General shall bring a civil action to recover an amount due to the United States Government on settlement of the account of a person accountable for public money when the person neglects or refuses to pay the amount to the Treasury. Any commission of that person and interest of 6 percent a year from the time the money is received by the person until repaid to the Treasury shall be added to the amount due on the account. The commission is forfeited when judgment is obtained.

CHAPTER 37—CLAIMS

SUBCHAPTER I—GENERAL

Sec.
3701. Definitions.

3702. Authority of the Comptroller General to settle claims.

SUBCHAPTER II—CLAIMS OF THE UNITED STATES GOVERNMENT

3711. Collection and compromise.

3712. Time limitations for presenting certain claims of the Government.

3713. Priority of Government claims.

3714. Keeping money due States in default.

3715. Buying real property of a debtor.

SUBCHAPTER III—CLAIMS AGAINST THE UNITED STATES GOVERNMENT

3721. Claims of personnel of agencies and the District of Columbia government for personal property damage or loss.

3722. Claims of officers and employees at Government penal and correctional institutions.

3723. Small claims for privately owned property damage or loss.

3724. Claims for damages caused by the Federal Bureau of Investigation.

3725. Claims of non-nationals for personal injury or death in a foreign country.

3726. Payment for transportation.

3727. Assignments of claims.

3728. Setoff against judgment.

3729. False claims.

3730. Civil actions for false claims.

3731. False claims procedure.

SUBCHAPTER I—GENERAL

§3701. Definitions

In this chapter—

(1) "executive or legislative agency" means a department, agency, or instrumentality in the executive or legislative branch of the United States Government.

(2) "military department" means the Departments of the Army, Navy, and Air Force.

(3) "uniformed services" means the Army, Navy, Air Force, Marine Corps, Coast Guard, the Commissioned Corps of the National Oceanic and Atmospheric Administration, and the Commissioned Corps of the Public Health Service.

§3702. Authority of the Comptroller General to settle claims

(a) Except as provided in this chapter or another law, the Comptroller General shall settle all claims of or against the United States Government. A claim that was not administratively examined before submission to the Comptroller General shall be examined by 2 officers or employees of the General Accounting Office independently of each other.

(b)(1) A claim against the Government presented under this section must contain the signature and address of the claimant or an authorized representative. The claim must be received by the Comptroller General within 6 years after the claim accrues except—

(A) as provided in this chapter or another law; or

(B) a claim of a State, the District of Columbia, or a territory or possession of the United States.

(2) When the claim of a member of the armed forces accrues during war or within 5 years before war begins, the claim must be presented to the Comptroller General within 5 years after peace is established or within the period provided in clause (1) of subsection, whichever is later.

(3) The Comptroller General shall return a claim not received in the time required under this subsection with a copy of this subsection and no further communication is required.

(c) A claim on a check or warrant that the records of the Comptroller General or the Secretary of the Treasury show as being paid must be presented to the Comptroller General or the Secretary within 6 years after the check or warrant was issued.

(d) The Comptroller General shall report to Congress on a claim against the Government that is timely presented under this

section that may not be adjusted by using an existing appropriation, and that the Comptroller General believes Congress should consider for legal or equitable reasons. The report shall include recommendations of the Comptroller General.

SUBCHAPTER II—CLAIMS OF THE UNITED STATES GOVERNMENT

§3711. Collection and compromise

(a) The head of an executive or legislative agency—

(1) shall try to collect a claim of the United States Government for money or property arising out of the activities of, or referred to, the agency;

(2) may compromise a claim of the Government of not more than \$20,000 (excluding interest) that has not been referred to another executive or legislative agency for further collection action; and

(3) may suspend or end collection action on a claim referred to in clause (2) of this subsection when it appears that no person liable on the claim has the present or prospective ability to pay a significant amount of the claim or the cost of collecting the claim is likely to be more than the amount recovered.

(b) The Comptroller General has the same authority that the head of the agency has under subsection (a) of this section when the claim is referred to the Comptroller General for further collection action. Only the Comptroller General may compromise a claim arising out of an exception the Comptroller General makes in the account of an accountable official.

(c)(1) The head of an executive or legislative agency may not act under subsection (a)(2) or (3) of this section on a claim that appears to be fraudulent, false, or misrepresented by a party with an interest in the claim, or that is based on conduct in violation of the antitrust laws.

(2) The Secretary of Transportation may not compromise for less than \$250 a penalty under section 6 of the Act of March 2, 1893 (45 U.S.C. 6), section 4 of the Act of April 14, 1910 (45 U.S.C. 13), section 9 of the Act of February 17, 1911 (45 U.S.C. 34), and section 25(h) of the Interstate Commerce Act (49 U.S.C. 26(h)).

(d) A compromise under this section is final and conclusive unless gotten by fraud, misrepresentation, presenting a false claim, or mutual mistake of fact. An accountable official is not liable for an amount paid or for the value of property lost or damaged if the amount or value is not recovered because of a compromise under this section.

(e) The head of an executive or legislative agency acts under—

(1) regulations prescribed by the head of the agency; and

(2) standards that the Attorney General and the Comptroller General may prescribe jointly.

§3712. Time limitations for presenting certain claims of the Government

(a) Except as provided in this subsection, the United States Government must bring a civil action to enforce the liability of an endorser, transferor, depository, or fiscal agent on a forged or unauthorized signature or endorsement on, or a change in, a check or warrant issued by the Secretary of the Treasury, the United States Postal Service, or a disbursing official or agent within 6 years after the check or warrant is presented to the drawee of the check or warrant for payment unless, within that period, written notice of the claim is given to the endorser,

transferor, depository, or fiscal agent. The period for bringing a civil action or giving notice is extended for 180 days if a claim is received under section 3702(c) of this title.

(b) Notwithstanding subsection (a) of this section, a civil action may be brought within 2 years after the claim is discovered when an endorser, transferor, depository, or fiscal agent fraudulently conceals the claim from an officer or employee of the Government entitled to bring the civil action.

(c) The Comptroller General shall credit the appropriate account of the Treasury for the amount of a check or warrant for which a civil action cannot be brought because notice was not given within the time required under subsection (a) of this section if the failure to give notice was not the result of negligence of the Secretary.

(d) The Government waives all claims against a person arising from dual pay from the Government if the dual pay is not reported to the Comptroller General for collection within 6 years from the last date of a period of dual pay.

§3713. Priority of Government claims

(a)(1) A claim of the United States Government shall be paid first when—

(A) a person indebted to the Government is insolvent and—

(i) the debtor without enough property to pay all debts makes a voluntary assignment of property;

(ii) property of the debtor, if absent, is attached; or

(iii) an act of bankruptcy is committed; or

(B) the estate of a deceased debtor, in the custody of the executor or administrator, is not enough to pay all debts of the debtor.

(2) This subsection does not apply to a case under title 11.

(b) A representative of a person or an estate (except a trustee acting under title 11) paying any part of a debt of the person or estate before paying a claim of the Government is liable to the extent of the payment for unpaid claims of the Government.

§3714. Keeping money due States in default

The Secretary of the Treasury shall keep the necessary amount of money the United States Government owes a State when the State defaults in paying principal or interest on investments in stocks or bonds the State issues or guarantees and that the Government holds in trust. The money shall be used to pay the principal or interest or reimburse, with interest, money the Government advanced for interest due on the stocks or bonds.

§3715. Buying real property of a debtor

The head of an agency for whom a civil action is brought against a debtor of the United States Government may buy real property of the debtor at a sale on execution of the real property of the debtor resulting from the action. The head of the agency may not bid more for the property than the amount of the judgment for which the property is being sold, and costs. The marshal of the district in which the sale is held shall transfer the property to the Government.

SUBCHAPTER III—CLAIMS AGAINST THE UNITED STATES GOVERNMENT

§3721. Claims of personnel of agencies and the District of Columbia government for personal property damage or loss

(a) In this section—

(1) "agency" does not include a nonappropriated fund activity or a contractor with the United States Government.

(2) "head of an agency" means—

(A) for a military department, the Secretary of the military department;

(B) for the Department of Defense (except the military departments), the Secretary of Defense; and

(C) for another agency, the head of the agency.

(3) "settle" means consider, determine, adjust, and dispose of a claim by disallowance or by complete or partial allowance.

(b) The head of an agency may settle and pay not more than \$15,000 for a claim against the Government made by a member of the uniformed services under the jurisdiction of the agency or by an officer or employee of the agency for damage to, or loss of, personal property incident to service. A claim allowed under this subsection may be paid in money or the personal property replaced in kind.

(c)(1) The head of an agency may settle and pay not more than \$40,000 for a claim against the Government made by a member of the uniformed services under the jurisdiction of the agency or by an officer or employee of the agency for damage to, or loss of, personal property in a foreign country that was incurred after December 30, 1978, incident to service, and—

(A)(i) the member, officer, or employee was evacuated from the country after December 30, 1978, on a recommendation or order of the Secretary of State or other competent authority that was made in responding to an incident of political unrest or hostile act by people in that country; and

(ii) the damage or loss resulted from the evacuation, incident, or hostile act; or

(B) the damage or loss resulted from a hostile act directed against the Government or its members, officers, or employees.

(2) On paying a claim under this subsection, the Government is subrogated for the amount of the payment to a right or claim that the claimant may have against the foreign country for the damage or loss for which the Government made the payment.

(3) Amounts may be obligated or expended for claims under this subsection only to the extent provided in advance in appropriation laws.

(d) The Mayor of the District of Columbia may settle and pay a claim against the District of Columbia government made by an officer or employee of the District of Columbia government to the same extent the head of an agency may settle and pay a claim under this section.

(e) A claim may not be allowed under this section if the personal property damage or loss occurred at quarters occupied by the claimant in a State or the District of Columbia that were not assigned or provided in kind by the United States Government or the District of Columbia government.

(f) A claim may be allowed under this section only if—

(1) the claim is substantiated;

(2) the head of the agency decides that possession of the property was reasonable or useful under the circumstances; and

(3) no part of the loss was caused by any negligent or wrongful act of the claimant or an agent or employee of the claimant.

(g) A claim may be allowed under this section only if it is presented in writing within 2 years after the claim accrues. However, if a claim under subsection (b) of this section accrues during war or an armed conflict in which an armed force of the United States is involved, or has accrued within 2 years before war or an armed conflict begins, and for cause shown, the claim must be presented within 2 years after the cause no longer

exists or after the war or armed conflict ends, whichever is earlier. An armed conflict begins and ends as stated in a concurrent resolution of Congress or a decision of the President.

(h) The head of the agency—

(1) may settle and pay a claim made by the surviving spouse, child, parent, or brother or sister of a dead member, officer, or employee if the claim is otherwise payable under this section; and

(2) may settle and pay the claims by the survivors only in the following order:

(A) the spouse's claim.

(B) a child's claim.

(C) a parent's claim.

(D) a brother's or sister's claim.

(i) Notwithstanding a contract, the representative of a claimant may not receive more than 10 percent of a payment of a claim made under this section for services related to the claim. A person violating this subsection shall be fined not more than \$1,000.

(j) The President may prescribe policies to carry out this section (except subsection (b)) to the extent that subsection (b) applies to the military departments, the Department of Defense, and the Coast Guard. Subject to those policies, the head of each agency shall prescribe regulations to carry out this section.

(k) Settlement of a claim under this section is final and conclusive.

§3722. Claims of officers and employees at Government penal and correctional institutions

(a) The Attorney General may settle and pay not more than \$1,000 in any one case for a claim made by an officer or employee at a United States Government penal or correctional institution for damage to, or loss of, personal property incident to employment.

(b) A claim may not be allowed under this section if the loss occurred at quarters occupied by the claimant that were not assigned or provided in kind by the Government.

(c) A claim may be allowed only if—

(1) no part of the loss was caused by any negligent or wrongful act of the claimant or an agent or employee of the claimant;

(2) the Attorney General decides that possession of the property was reasonable or useful under the circumstances; and

(3) it is presented in writing within one year after it accrues.

(d) A claim may be paid under this section only if the claimant accepts the amount of the settlement in complete satisfaction of the claim.

(e) Necessary amounts are authorized to be appropriated to carry out this section.

§3723. Small claims for privately owned property damage or loss

(a) The head of an agency (except a military department of the Department of Defense or the Coast Guard) may settle a claim for not more than \$1,000 for damage to, or loss of, privately owned property that—

(1) is caused by the negligence of an officer or employee of the United States Government acting within the scope of employment; and

(2) may not be settled under chapter 171 of title 28.

(b) A claim under this section may be allowed only if it is presented to the head of the agency within one year after it accrues.

(c) A claim under this section may be paid as provided in section 1304 of this title only if the claimant accepts the amount of the

settlement in complete satisfaction of the claim against the Government.

§3724. Claims for damages caused by the Federal Bureau of Investigation

(a) The Attorney General may settle, for not more than \$500 in any one case, a claim for personal injury, death, or damage to, or loss of, privately owned property, caused by the Director or an Assistant Director, inspector, or special agent of the Federal Bureau of Investigation acting within the scope of employment that may not be settled under chapter 171 of title 28. An officer or employee of the United States Government may not present a claim arising during the scope of employment. A claim may be allowed only if it is presented to the Attorney General within one year after it accrues.

(b) The Attorney General shall certify to Congress a settlement under this section for payment out of an appropriation that may be made to pay the settlement. The Attorney General shall include a brief statement on the type of the claim, the amount claimed, and the amount of the settlement.

(c) A claim may be paid under this section only if the claimant accepts the amount of the settlement in complete satisfaction of the claim against the Government.

§3725. Claims of non-nationals for personal injury or death in a foreign country

(a) The Secretary of State may settle, for not more than \$1,500 in any one case, a claim for personal injury or death of an individual not a national of the United States in a foreign country in which the United States exercises privileges of extraterritoriality when the injury or death is caused by an officer, employee, or agent of the United States Government (except of a military department of the Department of Defense or the Coast Guard). An officer or employee of the Government may not present a claim. A claim under this section may be allowed only if it is presented to the Secretary within one year after it accrues.

(b) The Secretary shall certify to Congress a settlement under this section for payment out of an appropriation that may be made to pay the settlement. The Secretary shall include a brief statement on the type of the claim, the amount claimed, and the amount of the settlement.

(c) A claim may be paid under this section only if the claimant accepts the amount of the settlement in complete satisfaction of the claim against the Government.

§3726. Payment for transportation

(a) A carrier or freight forwarder presenting a bill for transporting an individual or property for the United States Government shall be paid before the Administrator of General Services conducts an audit. A claim under this section shall be allowed only if it is received by the Administrator not later than 3 years (excluding time of war) after the later of the following dates:

(1) accrual of the claim;

(2) payment for the transportation is made;

(3) refund for an overpayment for the transportation is made; or

(4) a deduction under subsection (b) of this section is made.

(b) Not later than 3 years (excluding time of war) after the time a bill is paid, the Government may deduct from an amount subsequently due a carrier or freight forwarder an amount paid on the bill that was greater than the rate allowed under—

(1) a lawful tariff on file with the Interstate Commerce Commission, the Civil Aer-

onautics Board, the Federal Maritime Commission, or a State transportation authority; or

(2) sections 10721-10724 of title 49 or an equivalent arrangement or an exemption.

(c) Under regulations the head of an agency prescribes that conform with standards the Secretary of the Treasury and the Comptroller General prescribe jointly, a bill under this section may be paid before the transportation is completed notwithstanding section 3324 of this title when a carrier or freight forwarder issues the usual document for the transportation. Payment for transportation ordered but not provided may be recovered by deduction or other means.

(d)(1) A carrier or freight forwarder may request the Comptroller General to review the action of the Administrator if the request is received not later than 6 months (excluding time of war) after the Administrator acts or within the time stated in subsection (a) of this section, whichever is later.

(2) This section does not prevent the Comptroller General from conducting an audit under chapter 35 of this title.

§3727. Assignments of claims

(a) In this section, "assignment" means—

(1) a transfer or assignment of any part of a claim against the United States Government or of an interest in the claim; or

(2) the authorization to receive payment for any part of the claim.

(b) An assignment may be made only after a claim is allowed, the amount of the claim is decided, and a warrant for payment of the claim has been issued. The assignment shall specify the warrant, must be made freely, and must be attested to by 2 witnesses. The person making the assignment shall acknowledge it before an official who may acknowledge a deed, and the official shall certify the assignment. The certificate shall state that the official completely explained the assignment when it was acknowledged. An assignment under this subsection is valid for any purpose.

(c) Subsection (b) of this section does not apply to an assignment to a financing institution of money due or to become due under a contract providing for payments totaling at least \$1,000 when—

(1) the contract does not forbid an assignment;

(2) unless the contract expressly provides otherwise, the assignment—

(A) is for the entire amount not already paid;

(B) is made to only one party, except that it may be made to a party as agent or trustee for more than one party participating in the financing; and

(C) may not be reassigned; and

(3) the assignee files a written notice of the assignment and a copy of the assignment with the contracting official or the head of the agency, the surety on a bond on the contract, and any disbursing official for the contract.

(d) During a war or national emergency proclaimed by the President or declared by law and ended by proclamation or law, a contract with the Department of Defense, the General Services Administration, the Department of Energy (when carrying out duties and powers formerly carried out by the Atomic Energy Commission), or other agency the President designates may provide, or may be changed without consideration to provide, that a future payment under the contract to an assignee is not subject to reduction or setoff. A payment subse-

quently due under the contract (even after the war or emergency is ended) shall be paid to the assignee without a reduction or setoff for liability of the assignor—

(1) to the Government independent of the contract; or

(2) because of renegotiation, fine, penalty (except an amount that may be collected or withheld under, or because the assignor does not comply with, the contract), taxes, social security contributions, or withholding or failing to withhold taxes or social security contributions, arising from, or independent of, the contract.

(e)(1) An assignee under this section does not have to make restitution of, refund, or repay the amount received because of the liability of the assignor to the Government that arises from or is independent of the contract.

(2) The Government may not collect or reclaim money paid to a person receiving an amount under an assignment or allotment of pay or allowances authorized by law when liability may exist because of the death of the person making the assignment or allotment.

§3728. Setoff against judgment

(a) The Comptroller General shall withhold paying that part of a judgment against the United States Government presented to the Comptroller General that is equal to a debt the plaintiff owes the Government.

(b) The Comptroller General shall—

(1) discharge the debt if the plaintiff agrees to the setoff and discharges a part of the judgment equal to the debt; or

(2)(A) withhold payment of an additional amount the Comptroller General decides will cover legal costs of bringing a civil action for the debt if the plaintiff denies the debt or does not agree to the setoff; and

(B) have a civil action brought if one has not already been brought.

(c) If the Government loses a civil action to recover a debt or recovers less than the amount the Comptroller General withholds under this section, the Comptroller General shall pay the plaintiff the balance and interest of 6 percent for the time the money is withheld.

§3729. False claims

A person not a member of an armed force of the United States is liable to the United States Government for a civil penalty of \$2,000, an amount equal to 2 times the amount of damages the Government sustains, because of the act of that person and costs of the civil action, if the person—

(1) knowingly presents, or causes to be presented, to an officer or employee of the Government or a member of an armed force a false or fraudulent claim for payment or approval;

(2) knowingly makes, uses, or causes to be made or used, a false record or statement to get a false or fraudulent claim paid or approved;

(3) conspires to defraud the Government by getting a false or fraudulent claim allowed or paid;

(4) has possession, custody, or control of public property or money used, or to be used, in an armed force and, intending to defraud the Government or willfully to conceal the property, delivers, or causes to be delivered, less property than the amount for which the person receives a certificate or receipt;

(5) authorized to make or deliver a document certifying receipt of property used, or to be used, in an armed force and, intending to defraud the Government, makes or deliv-

ers the receipt without completely knowing that the information on the receipt is true; or

(6) knowingly buys, or receives as a pledge of an obligation or debt, public property from a member of an armed force who lawfully may not sell or pledge the property.

§3730. Civil actions for false claims

(a) The Attorney General diligently shall investigate a violation under section 3729 of this title. If the Attorney General finds that a person has violated or is violating section 3729, the Attorney General may bring a civil action under this section against the person. The person may be arrested and bail set for an amount of not more than \$2,000 and 2 times the amount of damages sworn to in an affidavit of the Attorney General.

(b)(1) A person may bring a civil action for a violation of section 3729 of this title for the person and for the United States Government. The action shall be brought in the name of the Government. The district courts of the United States have jurisdiction of the action. Trial is in the judicial district within whose jurisdictional limits the person charged with a violation is found or the violation occurs. An action may be dismissed only if the court and the Attorney General give written consent and their reasons for consenting.

(2) A copy of the complaint and written disclosure of substantially all material evidence and information the person possesses shall be served on the Government under rule 4 of the Federal Rules of Civil Procedure (28 App. U.S.C.). The Government may proceed with the action by entering an appearance by the 60th day after being notified. The person bringing the action may proceed with the action if the Government—

(A) by the end of the 60-day period does not enter, or gives written notice to the court of intent not to enter, the action; or

(B) does not proceed with the action with reasonable diligence within 6 months after entering an appearance, or within additional time the court allows after notice.

(3) If the Government proceeds with the action, the action is conducted only by the Government. The Government is not bound by an act of the person bringing the action.

(4) Unless the Government proceeds with the action, the court shall dismiss an action brought by the person on discovering the action is based on evidence or information the Government had when the action was brought.

(c)(1) If the Government proceeds with an action, the person bringing the action may receive an amount the court decides is reasonable for disclosing evidence or information the Government did not have when the action was brought. The amount may not be more than 10 percent of the proceeds of the action or settlement of a claim and shall be paid out of those proceeds.

(2) If the Government does not proceed with an action, the person bringing the action or settling the claim may receive an amount the court decides is reasonable for collecting the civil penalty and damages. The amount may not be more than 25 percent of the proceeds of the action or settlement and shall be paid out of those proceeds. The person may also receive an amount for reasonable expenses the court finds to have been necessarily incurred and costs awarded against the defendant.

(d) The Government is not liable for expenses a person incurs in bringing an action under this section.

§3731. False claims procedure

(a) A subpoena requiring the attendance of a witness at a trial or hearing conducted under section 3730 of this title may be served at any place in the United States.

(b) A civil action under section 3730 of this title must be brought within 6 years from the date the violation is committed.

SUBCHAPTER V—MISCELLANEOUS

5151. Conversion of currency of foreign countries.
5152. Value of United States money holdings in international institutions.
5153. Counterfeit currency.
5154. State taxation.
5155. Providing engraved plates of portraits of deceased members of Congress.

SUBCHAPTER I—MONETARY SYSTEM

§5101. Decimal system

United States money is expressed in dollars, dimes or tenths, cents or hundredths, and mills or thousandths. A dime is a tenth of a dollar, a cent is a hundredth of a dollar, and a mill is a thousandth of a dollar.

§5102. Standard weight

The standard troy pound of the National Bureau of Standards of the Department of Commerce shall be the standard used to ensure that the weight of United States coins conforms to specifications in section 5112 of this title.

§5103. Legal tender

United States coins and currency (including Federal reserve notes and circulating

notes of Federal reserve banks and national banks) are legal tender for all debts. Foreign gold or silver coins are not legal tender for debts.

SUBCHAPTER II—GENERAL AUTHORITY

§5111. Minting and issuing coins, medals, and numismatic items

(a) The Secretary of the Treasury—

- (1) shall mint and issue coins described in section 5112 of this title in amounts the Secretary decides are necessary to meet the needs of the United States;

- (2) may prepare national medal dies and strike national and other medals if it does not interfere with regular minting operations but may not prepare private medal dies;

- (3) may prepare and distribute numismatic items; and

- (4) may mint coins for a foreign country if the minting does not interfere with regular minting operations, and shall prescribe a charge for minting the foreign coins equal to the cost of the minting (including labor, materials, and the use of machinery).

(b) The Department of the Treasury has a coinage metal fund and a coinage profit fund. The Secretary may use the coinage metal fund to buy metal to mint coins. The Secretary shall credit the coinage profit fund with the amount by which the nominal value of the coins minted from the metal exceeds the cost of the metal. The Secretary shall charge the coinage profit fund with waste incurred in minting coins and the cost of distributing the coins. The Secretary shall deposit in the Treasury as miscellaneous receipts excess amounts in the coinage profit fund.

(c) The Secretary may make contracts on conditions the Secretary decides are appropriate and in the public interest to acquire equipment, manufacturing facilities, patents, patent rights, technical knowledge and assistance, and materials necessary to produce rapidly an adequate supply of coins referred to in section 5112(a)(1)-(4) of this title.

(d)(1) The Secretary may prohibit or limit the exportation, melting, or treatment of United States coins when the Secretary decides the prohibition or limitation is necessary to protect the coinage of the United States.

(2) A person knowingly violating an order or license issued or regulation prescribed under paragraph (1) of this subsection, shall be fined not more than \$10,000, imprisoned not more than 5 years, or both.

(3) Coins exported, melted, or treated in violation of an order or license issued or regulation prescribed, and metal resulting from the melting or treatment, shall be forfeited to the United States Government. The powers of the Secretary and the remedies available to enforce forfeitures are those provided in part II of subchapter C of chapter 75 of the Internal Revenue Code of 1954 (26 U.S.C. 7321 et seq.).

§5112. Denominations, specifications, and design of coins

(a) The Secretary of the Treasury may mint and issue only the following coins:

- (1) a dollar coin that is 1.043 inches in diameter and weighs 8.1 grams.

- (2) a half dollar coin that is 1.205 inches in diameter and weighs 11.34 grams.

- (3) a quarter dollar coin that is 0.955 inch in diameter and weighs 5.67 grams.

- (4) a dime coin that is 0.705 inch in diameter and weighs 2.268 grams.

(5) a 5-cent coin that is 0.835 inch in diameter and weighs 5 grams.

(6) except as provided under subsection (c) of this section, a one-cent coin that is 0.75 inch in diameter and weighs 3.11 grams.

(b) The dollar, half dollar, quarter dollar, and dime coins are clad coins with 3 layers of metal. The 2 identical outer layers are an alloy of 75 percent copper and 25 percent nickel. The inner layer is copper. The outer layers are metallurgically bonded to the inner layer and weigh at least 30 percent of the weight of the coin. The 5-cent coin is an alloy of 75 percent copper and 25 percent nickel. In minting 5-cent coins, the Secretary shall use bars that vary not more than 2.5 percent from the percent of nickel required. Except as provided under subsection (c) of this section, the one-cent coin is an alloy of 95 percent copper and 5 percent zinc. The specifications for alloys are by weight.

(c) The Secretary may prescribe the weight and the composition of copper and zinc in the alloy of the one-cent coin that the Secretary decides are appropriate when the Secretary decides that a different weight and alloy of copper and zinc are necessary to ensure an adequate supply of one-cent coins to meet the needs of the United States.

(d)(1) United States coins have the inscription "In God We Trust". The obverse side of each coin has the inscription "Liberty". The reverse side of each coin has the inscriptions "United States of America" and "E Pluribus Unum" and a designation of the value of the coin. The design on the reverse side of the dollar, half dollar, and quarter dollar is an eagle. The eagle on the reverse side of the dollar is the symbolic eagle of Apollo 11 landing on the moon. The obverse side of the dollar has the likeness of Susan B. Anthony. The coins have an inscription of the year of minting or issuance. However, to prevent or alleviate a shortage of a denomination, the Secretary may inscribe coins of the denomination with the year that was last inscribed on coins of the denomination.

(2) The Secretary shall prepare the devices, models, hubs, and dies for coins, emblems, devices, inscriptions, and designs authorized under this chapter. The Secretary may adopt and prepare new designs or models of emblems or devices that are authorized in the same way as when new coins or devices are authorized. The Secretary may change the design or die of a coin only once within 25 years of the first adoption of the design, model, hub, or die for that coin. The Secretary may procure services under section 3109 of title 5 in carrying out this paragraph.

(e) Notwithstanding section 5111(a)(1) of this title and subsections (a) and (b) of this section, the Secretary may mint and issue not more than 150,000,000 dollar coins that—

(1) are 1.5 inches in diameter and weigh 24.592 grams;

(2) have 2 identical outer layers of an alloy of 80 percent silver and 20 percent copper that are metallurgically bonded to an inner layer of an alloy of silver and copper;

(3) contain 9.837 grams of silver and 14.755 grams of copper;

(4) have the likeness of Dwight David Eisenhower on the obverse side;

(5) have the inscription of a year decided by the Secretary; and

(6) except as provided in this paragraph, have the inscriptions and designs provided

for the dollar in subsection (d)(1) of this section.

(f)(1) Notwithstanding this section and section 5111(a)(1) of this title, the Secretary shall mint and issue, in quantities the Secretary decides are necessary to meet public demand (but not more than 10,000,000) half dollar coins that—

(A) are 30.61 millimeters in diameter and weigh 12.5 grams;

(B) are an alloy of 90 percent silver and 10 percent copper;

(C) have a design on each side of the coin, decided by the Secretary, symbolizing the two hundred and fiftieth anniversary of the birth of George Washington; and

(D) have a designation of the value of the coin and an inscription of the year "1982" and the words "Liberty", "In God We Trust", "United States of America", and "E Pluribus Unum".

(2) The Secretary shall sell the coins minted under this subsection to the public at a price equal to the cost of minting and distributing the coins (including labor, materials, dies, use of machinery, promotion, and overhead expenses) plus a surcharge of not more than 20 percent of the cost. The Secretary shall deposit an amount equal to the surcharge received under this paragraph in the Treasury to be used only to reduce the national debt.

(3) The Secretary may not mint coins under this subsection after December 31, 1983.

(4) Amounts necessary to carry out this subsection may be appropriated.

§5113. Tolerances and testing of coins

(a) The Secretary of the Treasury may prescribe reasonable manufacturing tolerances for specifications in section 5112 of this title (except for specifications that are limits) for the dollar, half dollar, quarter dollar, and dime coins. The weight of the 5-cent coin may vary not more than 0.194 gram. The weight of the one-cent coin may vary not more than 0.13 gram.

(b) The Secretary shall keep a record of the kind, number, and weight of each group of coins minted and test a number of the coins separately to determine if the coins conform to the weight specified in section 5112(a) of this title. If the coins tested do not conform, the Secretary—

(1) shall weigh each coin of the group separately and deface the coins that do not conform and cast them into bars for reminting; or

(2) may remelt the group of coins.

§5114. Engraving and printing currency and security documents

(a) The Secretary of the Treasury shall engrave and print United States currency and bonds of the United States Government and currency and bonds of United States territories and possessions from intaglio plates on plate printing presses the Secretary selects. However, other security documents and checks may be printed by any process the Secretary selects. Engraving and printing shall be carried out within the Department of the Treasury if the Secretary decides the engraving and printing can be carried out as cheaply, perfectly, and safely as outside the Department.

(b) United States currency has the inscription "In God We Trust" in a place the Secretary decides is appropriate. Only the portrait of a deceased individual may appear on United States currency and securities. The name of the individual shall be inscribed below the portrait.

(c) The Secretary may make a contract for a period of not more than 4 years to manu-

facture distinctive paper for United States currency and securities. To promote competition among manufacturers of the distinctive paper, the Secretary may split the award for the manufacture of the paper between the 2 bidders with the lowest prices a pound. When the Secretary decides that it is necessary to operate more than one mill to manufacture distinctive paper, the Secretary may—

(1) employ individuals temporarily at rates of pay equivalent to the rates of pay of regular employees; and

(2) charge the pay of the temporary employees to the appropriation available for manufacturing distinctive paper.

§5115. United States currency notes

(a) The Secretary of the Treasury may issue United States currency notes. The notes—

(1) are payable to bearer; and

(2) shall be in a form and in denominations of at least one dollar that the Secretary prescribes.

(b) The amount of United States currency notes outstanding and in circulation—

(1) may not be more than \$300,000,000; and

(2) may not be held or used for a reserve.

§5116. Buying and selling gold and silver

(a)(1) With the approval of the President, the Secretary of the Treasury may—

(A) buy and sell gold in the way, in amounts, at rates, and on conditions the Secretary considers most advantageous to the public interest; and

(B) buy the gold with any direct obligations of the United States Government or United States coins and currency authorized by law, or with amounts in the Treasury not otherwise appropriated.

(2) Amounts received from the purchase of gold are an asset of the general fund of the Treasury. Amounts received from the sale of gold shall be deposited in the general fund of the Treasury.

(b)(1) The Secretary shall buy silver mined from natural deposits in the United States, or in a territory or possession of the United States, that is brought to a United States mint or assay office within one year after the month in which the ore from which it is derived was mined. The Secretary shall pay \$1.25 a fine troy ounce for the silver. The Secretary may use the coinage metal fund under section 5111(b) of this title to buy silver under this subsection.

(2) The Secretary may sell or use Government silver to mint coins, except silver transferred to stockpiles established under the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.). The Secretary shall sell silver under conditions the Secretary considers appropriate for at least \$1.292929292 a fine troy ounce.

§5117. Transferring gold and gold certificates

(a) All right, title, and interest, and every claim of the Board of Governors of the Federal Reserve System, a Federal reserve bank, and a Federal reserve agent, in and to gold is transferred to and vests in the United States Government to be held in the Treasury. Payment for the transferred gold is made by crediting equivalent amounts in dollars in accounts established in the Treasury under the 15th paragraph of section 16 of the Federal Reserve Act (12 U.S.C. 467). Gold not in the possession of the Government shall be held in custody for the Government and delivered on the order of the Secretary of the Treasury. The Board of

Governors, Federal reserve banks, and Federal reserve agents shall give instructions and take action necessary to ensure that the gold is so held and delivered.

(b) The Secretary shall issue gold certificates against gold transferred under subsection (a) of this section. The Secretary may issue gold certificates against other gold held in the Treasury. The Secretary may prescribe the form and denominations of the certificates. The amount of outstanding certificates may be not more than the value (for the purpose of issuing those certificates, of 42 and two-ninths dollars a fine troy ounce) of the gold held against gold certificates. The Secretary shall hold gold in the Treasury equal to the required dollar amount as security for gold certificates issued after January 29, 1934.

(c) With the approval of the President, the Secretary may prescribe regulations the Secretary considers necessary to carry out this section.

§5118. Gold clauses and consent to sue

(a) In this section—

(1) "gold clause" means a provision in or related to an obligation alleging to give the obligee a right to require payment in—

(A) gold;

(B) a particular United States coin or currency; or

(C) United States money measured in gold or a particular United States coin or currency.

(2) "public debt obligation" means a domestic obligation issued or guaranteed by the United States Government to repay money or interest.

(b) The United States Government may not pay out or deliver any gold coin. A person lawfully holding United States coins and currency may present the coins and currency to the Secretary of the Treasury for exchange (dollar for dollar) for other United States coins and currency that may be lawfully held. The Secretary shall make the exchange under regulations prescribed by the Secretary.

(c)(1) The Government withdraws its consent given to anyone to assert against the Government, its agencies, or its officers, employees, or agents, a claim—

(A) on a gold clause public debt obligation or interest on the obligation;

(B) for United States coins or currency; or

(C) arising out of the surrender, requisition, seizure, or acquisition of United States coins or currency, gold, or silver involving the effect or validity of a change in the metallic content of the dollar or in a regulation about the value of money.

(2) Paragraph (1) of this subsection does not apply to a proceeding in which no claim is made for payment or credit in an amount greater than the face or nominal value in dollars of public debt obligations or United States coins or currency involved in the proceeding.

(3) Except when consent is not withdrawn under this subsection, an amount appropriated for payment on public debt obligations and for United States coins and currency may be expended only dollar for dollar.

(d)(1) In this subsection, "obligation" means any obligation (except United States currency) payable in United States money.

(2) An obligation issued containing a gold clause or governed by a gold clause is discharged on payment (dollar for dollar) in United States coin or currency that is legal tender at the time of payment. This paragraph does not apply to an obligation issued after October 27, 1977.

§5119. Redemption and cancellation of currency

(a) Except to the extent authorized in regulations the Secretary of the Treasury prescribes with the approval of the President, the Secretary may not redeem United States currency (including Federal reserve notes and circulating notes of Federal reserve banks and national banks) in gold. However, the Secretary shall redeem gold certificates owned by the Federal reserve banks at times and in amounts the Secretary decides are necessary to maintain the equal purchasing power of each kind of United States currency. When redemption in gold is authorized, the redemption may be made only in gold bullion bearing the stamp of a United States mint or assay office in an amount equal at the time of redemption to the currency presented for redemption.

(b)(1) Except as provided in subsection (c)(1) of this section, the following are public debts bearing no interest:

(A) gold certificates issued before January 30, 1934.

(B) silver certificates.

(C) notes issued under the Act of July 14, 1890 (ch. 708, 26 Stat. 289).

(D) Federal Reserve notes for which payment was made under section 4 of the Old Series Currency Adjustment Act.

(E) United States currency notes, including those issued under section 1 of the Act of February 25, 1862 (ch. 33, 12 Stat. 345), the Act of July 11, 1862 (ch. 142, 12 Stat. 532), the resolution of January 17, 1863 (P.R. 9; 12 Stat. 822), section 2 of the Act of March 3, 1863 (ch. 73, 12 Stat. 710), or section 5115 of this title.

(2) The Secretary shall redeem from the general fund of the Treasury and cancel and destroy currency referred to in paragraph (1) of this subsection when the currency is presented to the Secretary.

(c)(1) The Secretary may determine the amount of the following United States currency that will not be presented for redemption because the currency has been destroyed or irretrievably lost:

(A) circulating notes of Federal reserve banks and national banks issued before July 1, 1929, for which the United States Government has assumed liability.

(B) outstanding currency referred to in subsection (b)(1) of this section.

(2) When the Secretary makes a determination under this subsection, the Secretary shall reduce the amount of that currency outstanding by the amount the Secretary determines will not be redeemed and credit the appropriate receipt account.

(d) To provide a historical collection of United States currency, the Secretary may withhold from cancellation and destruction and transfer to a special account one piece of each design, issue, or series of each denomination of each kind of currency (including circulating notes of Federal reserve banks and national banks) after redemption. The Secretary may make appropriate entries in Treasury accounts because of the transfers.

§5120. Obsolete, mutilated, and worn coins and currency

(a)(1) The Secretary of the Treasury shall melt obsolete and worn United States coins withdrawn from circulation. The Secretary may use the metal from melting the coins for reminting or may sell the metal. The Secretary shall account for the following in the coinage metal fund under section 5111(b) of this title:

(A) obsolete and worn coins and the metal from melting the coins.

(B) proceeds from the sale of the metal.

(C) losses incurred in the sale of the metal.

(D) losses incurred because of the difference between the face value of the coins melted and the coins minted from the metal.

(2) The Secretary shall reimburse the coinage metal fund for losses under paragraph (1)(C) and (D) of this subsection out of amounts in the coinage profit fund under section 5111(b) of this title.

(b) The Secretary shall—

(1) cancel and destroy (by a secure process) obsolete, mutilated, and worn United States currency withdrawn from circulation; and

(2) dispose of the residue of the currency and notes.

(c) The Comptroller General shall audit the cancellation and destruction of United States currency and the accounting of the cancellation and destruction. Records the Comptroller General considers necessary to make an effective audit easier shall be made available to the Comptroller General.

§5121. Refining, assaying, and valuation of bullion

(a) The Secretary of the Treasury shall—

(1) melt and refine bullion;

(2) as required, assay coins, metal, and bullion;

(3) cast gold and silver bullion deposits into bars; and

(4) cast alloys into bars for minting coins.

(b) A person owning gold or silver bullion may deposit the bullion with the Secretary to be cast into fine, standard fineness, or unrefined bars weighing at least 5 troy ounces. When practicable, the Secretary shall weigh the bullion in front of the depositor. The Secretary shall give the depositor a receipt for the bullion stating the description and weight of the bullion. When the Secretary has to melt the bullion or remove base metals before the value of the bullion can be determined, the weight is the weight after the melting or removal of the metals. The Secretary may refuse a deposit of gold bullion if the deposit is less than \$100 in value or the bullion is so base that it is unsuitable for the operations of the Bureau of the Mint.

(c) When the gold and silver are combined in bullion that is deposited and either the gold or silver is so little that it cannot be separated economically, the Secretary may not pay the depositor for the gold or silver that cannot be separated.

(d)(1) Under conditions prescribed by the Secretary, a person may exchange unrefined bullion for fine bars when—

(A) gold and silver are combined in the bullion in proportions that cannot be economically refined; or

(B) necessary supplies of acids cannot be procured at reasonable rates.

(2) The charge for refining in an exchange under this subsection may be not more than the charge imposed in an exchange of unrefined bullion for refined bullion.

(e) The Secretary shall prepare bars for payment of deposits. The Secretary shall stamp each bar with a designation of the weight and fineness of the bar and a symbol the Secretary considers suitable to prevent fraudulent imitation of the bar.

§5122. Payment to depositors

(a) The Secretary of the Treasury shall determine the fineness, weight, and value of each deposit and bar under section 5121 of

this title. The value and the amount of charges under subsection (b) of this section shall be based on the fineness and weight of the bullion. The Secretary shall give the depositor a statement of the charges and the net amount of the deposit to be paid in money or bars of the same species of bullion as that deposited.

(b) The Secretary shall impose a charge equal to the average cost of material, labor, waste, and use of machinery of a United States mint or assay office for—

- (1) melting and refining bullion;
- (2) using copper as an alloy when bullion deposited is above standard;
- (3) separating gold and silver combined in the bullion; and
- (4) preparing bars.

(c) The Secretary shall pay to the depositor or to a person designated by the depositor money or bars equivalent to the bullion deposited as soon as practicable after the value of the deposit is determined. If demanded, the Secretary shall pay depositors in the order in which the bullion is deposited with the Secretary. However, when there is an unavoidable delay in determining the value of a deposit, the Secretary shall pay subsequent depositors. When practicable and convenient, the Secretary shall pay depositors in the denominations requested by the depositor. After the depositor is paid, the bullion is the property of the United States Government.

(d) To allow the Secretary to pay depositors with as little delay as possible, the Secretary shall keep in the mints and assay offices, when possible, money and bullion the Secretary decides are convenient and necessary.

SUBCHAPTER III—BUREAU OF THE MINT

§5131. Organization

(a) The Bureau of the Mint has—

- (1) a United States mint at Philadelphia, Pennsylvania.
- (2) a United States mint at Denver, Colorado.
- (3) a United States assay office at New York, New York.
- (4) a United States assay office at San Francisco, California.

(b) The Secretary of the Treasury shall carry out duties and powers related to refining and assaying bullion, minting coins, striking medals, and numismatic items at the mints and assay offices, except that only bars may be made at the assay offices. However, until the Secretary decides that the mints are adequate for minting and striking an ample supply of coins and medals, the Secretary may use any facility of the Bureau to mint coins and strike medals and to store coins and medals.

(c) Each mint and the assay office at New York have a superintendent and an assayer appointed by the President, by and with the advice and consent of the Senate. The mint at Philadelphia has an engraver appointed by the President, by and with the advice and consent of the Senate.

(d) Laws on mints, officers and employees of mints, and punishment of offenses related to mints and minting coins apply to assay offices, as applicable.

(e) The Secretary shall operate, maintain, and have custody of, the mint at Philadelphia. However, the Administrator of General Services shall make repairs and improvements to the mint.

§5132. Administrative

(a)(1) Except as provided in this chapter, the Secretary of the Treasury shall deposit

in the Treasury as miscellaneous receipts amounts the Secretary receives from the operations of the Bureau of the Mint. However, amounts from numismatic items shall be reimbursed to the current appropriation used to pay the cost of preparing and selling the items. The Secretary may not use amounts the Secretary receives from profits on minting coins or from charges on gold or silver bullion under section 5122 of this title to pay officers and employees. The Secretary shall pay the costs of the mints and assay offices not provided for in this subsection out of appropriations.

(2) Not more than \$54,706,000 may be appropriated to the Secretary for the fiscal year ending September 30, 1982, to pay costs of the mints and assay offices.

(b) To the extent the Secretary decides is necessary, the Secretary may use amounts received from depositors for refining bullion and the proceeds from the sale of byproducts (including spent acids from surplus bullion recovered in refining processes) to pay the costs of refining the bullion (including labor, material, waste, and loss on the sale of sweeps). The Secretary may not use amounts appropriated for the mints and assay offices to pay those costs.

(c) The Secretary shall make an annual report at the end of each fiscal year on the operation of the Bureau.

§5133. Settlement of accounts

(a) The Secretary of the Treasury shall—

- (1) charge the superintendent of each mint and the assay office at New York and the officer in charge of the assay office at San Francisco with the amount in weight of standard metal of bullion the superintendent or officer receives from the Secretary;
- (2) credit each superintendent and the officer with the amount in weight of coins, clippings, and other bullion the superintendent or officer returns to the Secretary; and
- (3) charge separately to each superintendent and the officer, who shall account for, copper to be used in the alloy of gold and silver bullion.

(b) At least once a year, the Secretary shall settle the accounts of the superintendents and the officer in charge. At settlement, each superintendent and the officer shall return to the Secretary coins, clippings, and other bullion in their possession with a statement of bullion received and returned since the last settlement (including bullion returned for settlement). The Secretary shall—

- (1) audit the accounts and statements of each superintendent and the officer;
- (2) allow each superintendent the waste of precious metals, within limitations prescribed by the Secretary, that the Secretary decides is necessary for refining and minting; and
- (3) allow the officer the waste, within the limitations prescribed for refining, that the Secretary decides is necessary in casting fine gold and silver bars, except that the waste allowance may not apply to deposit operations.

(c) After settlement, the Secretary shall compare the amount of gold and silver bullion and coins on hand with the total liabilities of the mints and assay offices. The Secretary also shall make a statement of the ordinary expense account.

(d) The Secretary shall procure for each mint and assay office a series of standard weights corresponding to the standard troy pound of the National Bureau of Standards of the Department of Commerce. The series shall include a one pound weight and multi-

ples and subdivisions of one pound from .01 grain to 25 pounds. At least once a year, the Secretary shall test the weights normally used in transactions at the mints and assay offices against the standard weights.

SUBCHAPTER IV—BUREAU OF ENGRAVING AND PRINTING

§5141. Operation of the Bureau

(a) The Secretary of the Treasury shall prepare and submit to the President an annual business-type budget for the Bureau of Engraving and Printing.

(b)(1) The Secretary shall maintain in the Bureau an integrated accounting system with internal controls that—

(A) ensures adequate control over assets and liabilities of the Bureau of Engraving and Printing Fund described in section 5142 of this title;

(B) develops accurate production costs to enable the Bureau to recover those costs on the basis of the work requisitioned;

(C) provides for replacement of capitalized equipment and other fixed assets by maintaining adequate depreciation reserves based on original cost or appraised values;

(D) discloses the financial condition and operations of the Fund on an accrual basis of accounting; and

(E) provides information for the prior fiscal year on the annual budget of the Bureau.

(2) The accounting system shall conform to principles and standards prescribed by the Comptroller General to carry out this subsection. The Comptroller General may review the system to ensure conformity to the principles and standards and its effectiveness of operation.

(c) An officer or employee in the clerical-mechanical service of the Bureau assigned to an established shift or tour of duty at least half of which occurs between 6 p.m. and 6 a.m. is entitled to pay for the regular 40-hour week (except when on leave) at a rate of pay 15 percent higher than the day rate for the same work.

§5142. Bureau of Engraving and Printing Fund

(a) The Department of the Treasury has a Bureau of Engraving and Printing Fund. Amounts—

(1) in the Fund are available to operate the Bureau of Engraving and Printing;

(2) in the Fund remain available until expended; and

(3) may be appropriated to the Fund.

(b) The Fund consists of—

(1) property and physical assets (except buildings and land) acquired by the Bureau;

(2) all amounts received by the Bureau; and

(3) proceeds from the disposition of property and assets acquired by the Fund.

(c) The capital of the Fund consists of—

(1) amounts appropriated to the Fund;

(2) physical assets of the Bureau (except buildings and land) as of the close of business June 30, 1951; and

(3) all payments made after June 30, 1974, under section 5143 of this title at prices adjusted to permit buying capital equipment and to provide future working capital.

(d) The Secretary shall deposit each fiscal year, in the Treasury as miscellaneous receipts, amounts accruing to the Fund in the prior fiscal year that the Secretary decides are in excess of the needs of the Fund. However, the Secretary may use the excess amounts to restore capital of the Fund reduced by the difference between the

charges for services of the Bureau and the cost of providing those services.

(e) The Secretary shall maintain a special deposit account in the Treasury for the Fund. The Secretary shall credit the account with amounts appropriated to the Fund and receipts of the Bureau without depositing the receipts in the Treasury as miscellaneous receipts.

§5143. Payment for services

The Secretary of the Treasury shall impose charges for Bureau of Engraving and Printing services the Secretary provides to an agency. The charges shall be in amounts the Secretary considers adequate to cover the costs of the services (including administrative costs related to providing the services). The agency shall pay promptly bills submitted by the Secretary.

§5144. Providing impressions of portraits and vignettes

The Secretary of the Treasury may provide impressions from an engraved portrait or vignette in the possession of the Bureau of Engraving and Printing. An impression shall be provided—

- (1) at the request of—
 - (A) a member of Congress;
 - (B) a head of an agency;
 - (C) an art association; or
 - (D) a library; and
- (2) for a charge and under conditions the Secretary decides are necessary to protect the public interest.

SUBCHAPTER V—MISCELLANEOUS

§5151. Conversion of currency of foreign countries

(a) In this section—

- (1) "buying rate" means the buying rate in the market in New York, New York, for cable transfers payable in the currency of a foreign country to be converted.

(2) when merchandise is exported on a day that banks are generally closed in New York, the buying rate at noon on the last prior business day is deemed to be the buying rate at noon on the day the merchandise is exported.

(b) The value of coins of a foreign country expressed in United States money is the value of the pure metal of the standard coin of the foreign country. The Secretary of the Treasury shall estimate the values of standard coins of the country quarterly and publish the values on the first day of January, April, July, and October of each year.

(c) Except as provided in this section, conversion of currency of a foreign country into United States currency for assessment and collection of duties on merchandise imported into the United States shall be made at values published by the Secretary under subsection (b) of this section for the quarter in which the merchandise is exported.

(d) If the Secretary has not published a value for the quarter in which the merchandise is exported, or if the value published by the Secretary varies by at least 5 percent from a value measured by the buying rate at noon on the day the merchandise is exported, the conversion of the currency of the foreign country shall be made at a value—

- (1) equal to the buying rate at noon on the day the merchandise is exported; or
- (2) prescribed by regulation of the Secretary for the currency that is equal to the first buying rate certified for that currency by the Federal Reserve Bank of New York under subsection (e) of this section in the quarter in which the merchandise is exported, but only if the buying rate at noon on the day the merchandise is exported varies less than 5 percent from the buying rate first certified.

(e) The Federal Reserve Bank of New York shall decide the buying rate and certify the rate to the Secretary. The Secretary shall publish the rate at times and to the extent the Secretary considers necessary. In deciding the buying rate, the Bank may—

- (1) consider the last ascertainable transactions and quotations (direct or through exchange of other currencies); and
- (2) if there is no buying rate, calculate the rate from—

(A) actual transactions and quotations in demand or time bills of exchange; or

(B) the last ascertainable transactions and quotations outside the United States in or for exchange payable in United States currency or foreign currency.

§5152. Value of United States money holdings in international institutions

The Secretary of the Treasury shall maintain the value in terms of gold of the holdings of United States money of the International Bank for Reconstruction and Development, the Inter-American Development Bank, the International Development Association, and the Asian Development Bank to the extent provided in the articles of agreement of those institutions. Amounts necessary to maintain the value may be appropriated. Amounts appropriated under this section remain available until expended.

§5153. Counterfeit currency

Disbursing officials of the United States Government and officers of national banks shall stamp or mark the word "counterfeit", "altered", or "worthless" on counterfeit notes intended to circulate as currency that are presented to them. An official or officer wrongfully stamping or marking an item of genuine United States currency (including a Federal reserve note or a circulating note of Federal reserve banks and national banks) shall redeem the currency at face value when presented.

§5154. State taxation

A State or a territory or possession of the United States may tax United States coins and currency (including Federal reserve notes and circulating notes of Federal reserve banks and national banks) as money on hand or on deposit in the same way and at the same rate that the State, territory, or possession taxes United States coins and currency circulating within its jurisdiction. This section does not affect a law taxing national banks.

§5155. Providing engraved plates of portraits of deceased members of Congress

On conditions the Secretary of the Treasury decides, the Secretary may send an engraved plate of a portrait of a deceased Senator or Representative to an heir or legal representative of such a Senator or Representative.

CHAPTER 53—MONETARY TRANSACTIONS

SUBCHAPTER I—CREDIT AND MONETARY EXPANSION

Sec. 5301. Buying obligations of the United States Government.

5302. Stabilizing exchange rates and arrangements.

5303. Reserved coins and currencies of foreign countries.

5304. Regulations.

SUBCHAPTER II—RECORDS AND REPORTS ON MONETARY INSTRUMENTS TRANSACTIONS

5311. Declaration of purpose.

5312. Definitions and application.

5313. Reports on domestic coins and currency transactions.

5314. Records and reports on foreign financial agency transactions.

5315. Reports on foreign currency transactions.

5316. Reports on exporting and importing monetary instruments.

5317. Search and forfeiture of monetary instruments.

5318. Compliance and exemptions.

5319. Availability of reports.

5320. Injunctions.

5321. Civil penalties.

5322. Criminal penalties.

SUBCHAPTER I—CREDIT AND MONETARY EXPANSION

§5301. Buying obligations of the United States Government

(a) The President may direct the Secretary of the Treasury to make an agreement with the Federal reserve banks and the Board of Governors of the Federal Reserve System when the President decides that the foreign commerce of the United States is affected adversely because—

(1) the value of coins and currency of a foreign country compared to the present standard value of gold is depreciating;

(2) action is necessary to regulate and maintain the parity of United States coins and currency;

(3) an economic emergency requires an expansion of credit; or

(4) an expansion of credit is necessary so that the United States Government and the governments of other countries can stabilize the value of coins and currencies of a country.

(b) Under an agreement under subsection (a) of this section, the Board shall permit the banks (and the Board is authorized to permit the banks notwithstanding another law) to agree that the banks will—

(1) conduct through each entire specified period open market operations in obligations of the United States Government or corporations in which the Government is the majority stockholder; and

(2) buy directly and hold an additional \$3,000,000,000 of obligations of the Government for each agreed period, unless the Secretary consents to the sale of the obligations before the end of the period.

(c) With the approval of the Secretary, the Board may require Federal reserve banks to take action the Secretary and Board consider necessary to prevent unreasonable credit expansion.

§5302. Stabilizing exchange rates and arrangements

(a)(1) The Department of the Treasury has a stabilization fund. The fund is available to carry out this section, section 18 of the Bretton Woods Agreement Act (22 U.S.C. 286e-3), and section 3 of the Special Drawing Rights Act (22 U.S.C. 286o), and for investing in obligations of the United States Government those amounts in the fund the Secretary of the Treasury, with the approval of the President, decides are not required at the time to carry out this section. Proceeds of sales and investments, earnings, and interest shall be paid into the fund and are available to carry out this section. However, the fund is not available to pay administrative expenses.

(2) Subject to approval by the President, the fund is under the exclusive control of the Secretary, and may not be used in a way that direct control and custody pass from the President and the Secretary. Decisions

of the Secretary are final and may not be reviewed by another officer or employee of the Government.

(b) Consistent with the obligations of the Government in the International Monetary Fund on orderly exchange arrangements and a stable system of exchange rates, the Secretary or an agency designated by the Secretary, with the approval of the President, may deal in gold, foreign exchange, and other instruments of credit and securities the Secretary considers necessary. However, a loan or credit to a foreign entity or government of a foreign country may be made for more than 6 months in any 12-month period only if the President gives Congress a written statement that unique or emergency circumstances require the loan or credit be for more than 6 months.

(c)(1) By the 30th day after the end of each month, the Secretary shall give the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate a detailed financial statement on the stabilization fund showing all agreements made or renewed, all transactions occurring during the month, and all projected liabilities.

(2) The Secretary shall report each year to the President and Congress on the operation of the fund.

(d) A repayment of any part of the first subscription payment of the Government to the International Monetary Fund, previously paid from the stabilization fund, shall be deposited in the Treasury as a miscellaneous receipt.

§ 5303. Reserved coins and currencies of foreign countries

An agency may use coins and currencies of a foreign country the United States Government holds that are or may be reserved for a specific program or activity of an agency. The agency shall reimburse the Treasury from appropriations and shall replace the coins and currencies when they are needed for the program or activity for which they were reserved originally.

§ 5304. Regulations

With the approval of the President, the Secretary of the Treasury may prescribe regulations—

(1) to carry out section 5301 of this title; and

(2) the Secretary considers necessary to carry out section 5302 of this title.

SUBCHAPTER II—RECORDS AND REPORTS ON MONETARY INSTRUMENTS TRANSACTIONS

§ 5311. Declaration of purpose

It is the purpose of this subchapter (except section 5315) to require certain reports or records where they have a high degree of usefulness in criminal, tax, or regulatory investigations or proceedings.

§ 5312. Definitions and application

(a) In this subchapter—

(1) "financial agency" means a person acting for a person (except for a country, a monetary or financial authority acting as a monetary or financial authority, or an international financial institution of which the United States Government is a member) as a financial institution, bailee, depository trustee, or agent, or acting in a similar way related to money, credit, securities, gold, or a transaction in money, credit, securities, or gold.

(2) "financial institution" means—

(A) an insured bank (as defined in section 3(h) of the Federal Deposit Insurance Act (12 U.S.C. 1813(h)));

(B) a commercial bank or trust company;

(C) a private banker;

(D) an agency or branch of a foreign bank in the United States;

(E) an insured institution (as defined in section 401(a) of the National Housing Act (12 U.S.C. 1724(a)));

(F) a thrift institution;

(G) a broker or dealer registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.);

(H) a broker or dealer in securities or commodities;

(I) an investment banker or investment company;

(J) a currency exchange;

(K) an issuer, redeemer, or cashier of travelers' checks, checks, money orders, or similar instruments;

(L) an operator of a credit card system;

(M) an insurance company;

(N) a dealer in precious metals, stones, or jewels;

(O) a pawnbroker;

(P) a loan or finance company;

(Q) a travel agency;

(R) a licensed sender of money;

(S) a telegraph company;

(T) an agency of the United States Government or of a State or local government carrying out a duty or power of a business described in this clause (2); or

(U) another business or agency carrying out a similar, related, or substitute duty or power the Secretary of the Treasury prescribes.

(3) "monetary instruments" means—

(A) United States coins and currency; and

(B) as the Secretary may prescribe by regulation, coins and currency of a foreign country, travelers' checks, bearer negotiable instruments, bearer investment securities, bearer securities, stock on which title is passed on delivery, and similar material.

(4) "person", in addition to its meaning under section 1 of title 1, includes a trustee, a representative of an estate and, when the Secretary prescribes, a governmental entity.

(5) "United States" means the States of the United States, the District of Columbia, and, when the Secretary prescribes by regulation, the Commonwealth of Puerto Rico, a territory or possession of the United States, or a military or diplomatic establishment.

(b) In this subchapter—

(1) "domestic financial agency" and "domestic financial institution" apply to an action in the United States of a financial agency or institution.

(2) "foreign financial agency" and "foreign financial institution" apply to an action outside the United States of a financial agency or institution.

§ 5313. Reports on domestic coins and currency transactions

(a) When a domestic financial institution is involved in a transaction for the payment, receipt, or transfer of United States coins or currency (or other monetary instruments the Secretary of the Treasury prescribes), in an amount, denomination, or amount and denomination, or under circumstances the Secretary prescribes by regulation, the institution and any other participant in the transaction the Secretary may prescribe shall file a report on the transaction at the time and in the way the Secretary prescribes. A participant acting for another person shall make the report as the agent or bailee of the person and identify the person for whom the transaction is being made.

(b) The Secretary may designate a domestic financial institution as an agent of the

United States Government to receive a report under this section. However, the Secretary may designate a domestic financial institution that is not insured, chartered, examined, or registered as a domestic financial institution only if the institution consents. The Secretary may suspend or revoke a designation for a violation of this subchapter or a regulation under this subchapter (except a violation of section 5315 of this title or a regulation prescribed under section 5315), section 411 of the National Housing Act (12 U.S.C. 1730d), or section 21 of the Federal Deposit Insurance Act (12 U.S.C. 1829b).

(c)(1) A person (except a domestic financial institution designated under subsection (b) of this section) required to file a report under this section shall file the report—

(A) with the institution involved in the transaction if the institution was designated;

(B) in the way the Secretary prescribes when the institution was not designated; or

(C) with the Secretary.

(2) The Secretary shall prescribe—

(A) the filing procedure for a domestic financial institution designated under subsection (b) of this section; and

(B) the way the institution shall submit reports filed with it.

§ 5314. Records and reports on foreign financial agency transactions

(a) Considering the need to avoid impeding or controlling the export or import of monetary instruments and the need to avoid burdening unreasonably a person making a transaction with a foreign financial agency, the Secretary of the Treasury shall require a resident or citizen of the United States or a person in, and doing business in, the United States, to keep records, file reports, or keep records and file reports, when the resident, citizen, or person makes a transaction or maintains a relation for any person with a foreign financial agency. The records and reports shall contain the following information in the way and to the extent the Secretary prescribes:

(1) the identity and address of participants in a transaction or relationship.

(2) the legal capacity in which a participant is acting.

(3) the identity of real parties in interest.

(4) a description of the transaction.

(b) The Secretary may prescribe—

(1) a reasonable classification of persons subject to or exempt from a requirement under this section or a regulation under this section;

(2) a foreign country to which a requirement or a regulation under this section applies if the Secretary decides applying the requirement or regulation to all foreign countries is unnecessary or undesirable;

(3) the magnitude of transactions subject to a requirement or a regulation under this section;

(4) the kind of transaction subject to or exempt from a requirement or a regulation under this section; and

(5) other matters the Secretary considers necessary to carry out this section or a regulation under this section.

(c) A person shall be required to disclose a record required to be kept under this section or under a regulation under this section only as required by law.

§ 5315. Reports on foreign currency transactions

(a) Congress finds that—

(1) moving mobile capital can have a significant impact on the proper functioning of the international monetary system;

(2) it is important to have the most feasible current and complete information on the kind and source of capital flows, including transactions by large United States businesses and their foreign affiliates; and

(3) additional authority should be provided to collect information on capital flows under section 5(b) of the Trading With the Enemy Act (50 App. U.S.C. 5(b)) and section 8 of the Bretton Woods Agreement Act (22 U.S.C. 286f).

(b) In this section, "United States person" and "foreign person controlled by a United States person" have the same meanings given those terms in section 7(f)(2) (A) and (C), respectively, of the Securities and Exchange Act of 1934 (15 U.S.C. 78g(f)(2)(A), (C)).

(c) The Secretary of the Treasury shall prescribe regulations consistent with subsection (a) of this section requiring reports on foreign currency transactions conducted by a United States person or a foreign person controlled by a United States person. The regulations shall require that a report contain information and be submitted at the time and in the way, with reasonable exceptions and classifications, necessary to carry out this section.

§ 5316. Reports on exporting and importing monetary instruments

(a) Except as provided in subsection (c) of this section, a person or an agent or bailee of the person shall file a report under subsection (b) of this section when the person, agent, or bailee knowingly—

(1) transports or has transported monetary instruments of more than \$5,000 at one time—

(A) from a place in the United States to or through a place outside the United States; or

(B) to a place in the United States from or through a place outside the United States; or

(2) receives monetary instruments of more than \$5,000 at one time transported into the United States from or through a place outside the United States.

(b) A report under this section shall be filed at the time and place the Secretary of the Treasury prescribes. The report shall contain the following information to the extent the Secretary prescribes:

(1) the legal capacity in which the person filing the report is acting.

(2) the origin, destination, and route of the monetary instruments.

(3) when the monetary instruments are not legally and beneficially owned by the person transporting the instruments, or if the person transporting the instruments personally is not going to use them, the identity of the person that gave the instruments to the person transporting them, the identity of the person who is to receive them, or both.

(4) the amount and kind of monetary instruments transported.

(5) additional information.

(c) This section or a regulation under this section does not apply to a common carrier of passengers when a passenger possesses a monetary instrument, or to a common carrier of goods if the shipper does not declare the instrument.

§ 5317. Search and forfeiture of monetary instruments

(a) The Secretary of the Treasury may apply to a court of competent jurisdiction

for a search warrant when the Secretary reasonably believes a monetary instrument is being transported and a report on the instrument under section 5316 of this title has not been filed or contains a material omission or misstatement. The Secretary shall include a statement of information in support of the warrant. On a showing of probable cause, the court may issue a search warrant for a designated person or a designated or described place or physical object. This subsection does not affect the authority of the Secretary under another law.

(b) A monetary instrument being transported may be seized and forfeited to the United States Government when a report on the instrument under section 5316 of this title has not been filed or contains a material omission or misstatement. A monetary instrument transported by mail or a common carrier, messenger, or bailee is being transported under this subsection from the time the instrument is delivered to the United States Postal Service, common carrier, messenger, or bailee through the time it is delivered to the addressee, intended recipient, or agent of the addressee or intended recipient without being transported further in, or taken out of, the United States.

§ 5318. Compliance and exemptions

The Secretary of the Treasury may (except under section 5315 of this title and regulations prescribed under section 5315)—

(1) delegate duties and powers under this subchapter to an appropriate supervising agency;

(2) require a class of domestic financial institutions to maintain appropriate procedures to ensure compliance with this subchapter and regulations prescribed under this subchapter; and

(3) prescribe an appropriate exemption from a requirement under this subchapter and regulations prescribed under this subchapter. The Secretary may revoke an exemption by actually or constructively notifying the parties affected. A revocation is effective during judicial review.

§ 5319. Availability of reports

The Secretary of the Treasury shall make information in a report filed under section 5313, 5314, or 5316 of this title available to an agency on request of the head of the agency. The report shall be available for a purpose consistent with those sections or a regulation prescribed under those sections. However, a report and records of reports are exempt from disclosure under section 552 of title 5.

§ 5320. Injunctions

When the Secretary of the Treasury believes a person has violated, is violating, or will violate this subchapter or a regulation prescribed or order issued under this subchapter, the Secretary may bring a civil action in the appropriate district court of the United States or appropriate United States court of a territory or possession of the United States to enjoin the violation or to enforce compliance with the subchapter, regulation, or order. An injunction or temporary restraining order shall be issued without bond.

§ 5321. Civil penalties

(a)(1) A domestic financial institution, and a partner, director, officer, or employee of a domestic financial institution, willfully violating this subchapter or a regulation prescribed under this subchapter (except section 5315 of this title or a regulation prescribed under section 5315) is liable to the United States Government for a civil penal-

ty of not more than \$1,000. For a violation of section 5318(2) of this title or a regulation prescribed under section 5318(2), a separate violation occurs for each day the violation continues and at each office, branch, or place of business at which a violation occurs or continues.

(2) The Secretary of the Treasury may impose an additional civil penalty on a person not filing a report, or filing a report containing a material omission or misstatement, under section 5316 of this title or a regulation prescribed under section 5316. A civil penalty under this paragraph may not be more than the amount of the monetary instrument for which the report was required. A civil penalty under this paragraph is reduced by an amount forfeited under section 5317(b) of this title.

(3) A person not filing a report under a regulation prescribed under section 5315 of this title or not complying with an injunction under section 5320 of this title enjoining a violation of, or enforcing compliance with, section 5315 or a regulation prescribed under section 5315, is liable to the Government for a civil penalty of not more than \$10,000.

(b) The Secretary may bring a civil action to recover a civil penalty under subsection (a)(1) or (2) of this section that has not been paid.

(c) The Secretary may remit any part of a forfeiture under section 5317(b) of this title or civil penalty under subsection (a)(2) of this section.

§ 5322. Criminal penalties

(a) A person willfully violating this subchapter or a regulation prescribed under this subchapter (except section 5315 of this title or a regulation prescribed under section 5315) shall be fined not more than \$1,000, imprisoned for not more than one year, or both.

(b) A person willfully violating this subchapter or a regulation prescribed under this subchapter (except section 5315 of this title or a regulation prescribed under section 5315), while violating another law of the United States or as part of a pattern of illegal activity involving transactions of more than \$100,000 in a 12-month period, shall be fined not more than \$500,000, imprisoned for not more than 5 years, or both.

(c) For a violation of section 5318(2) of this title or a regulation prescribed under section 5318(2), a separate violation occurs for each day the violation continues and at each office, branch, or place of business at which a violation occurs or continues.

6101.	Definitions.
6102.	Program information requirements.
6103.	Access to computer information system.
6104.	Catalog of Federal domestic assistance programs.

6105. Authorization of appropriations.

§ 6101. Definitions

In this chapter—

(1) "administering office" means the lowest unit of an agency responsible for managing a domestic assistance program.

(2) "agency" has the same meaning given that term in section 551(1) of title 5.

(3) "assistance"—

(A) means the transfer of anything of value for a public purpose of support or stimulation authorized by a law of the United States, including—

(i) financial assistance;

(ii) United States Government facilities, services, and property; and

(iii) expert and technical information; and

(B) does not include conventional public information services or procurement of property or services for the direct benefit or use of the Government.

(4) "domestic assistance program"—

(A) means assistance from an agency for—

(i) a State;

(ii) the District of Columbia;

(iii) a territory or possession of the United States;

(iv) a county;

(v) a city;

(vi) a political subdivision or instrumentality of a governmental authority listed in subclauses (i)–(v) of this clause (A);

(vii) a domestic corporation;

(viii) a domestic institution; and

(ix) an individual of the United States; and

(B) does not include a department, agency, or instrumentality of the Government.

§ 6102. Program information requirements

(a) The Director of the Office of Management and Budget shall prepare and maintain information on domestic assistance programs. The information on each domestic assistance program shall include the following:

(1) identification of the program by—

(A) title;

(B) authorizing law;

(C) administering office; and

(D) an identifying number assigned by the Director.

(2) a description of the—

(A) program;

(B) objectives of the program;

(C) types of activities financed under the program;

(D) eligibility requirements;

(E) formulas governing distribution of amounts;

(F) types of assistance;

(G) uses, and restrictions on the use, of assistance; and

(H) duties of recipients under the program.

(3) financial information, including the—

(A) amounts appropriated for the current fiscal year or, if unavailable, the amounts requested by the President and the amounts obligated; and

(B) average amounts of awards made in past years.

(4) identification of information contacts, including the administering office and regional and local offices with their addresses and telephone numbers.

(5) a general description of—

(A) the application requirements and procedures; and

(B) to the extent practical, an estimate of the time required to process the application.

(b) On request of the Director, an agency shall give to the Director current informa-

tion on all domestic assistance programs administered by the agency. The Director shall incorporate on a regular basis all relevant information received.

(c) The Director—

(1) shall ensure that information and catalogs under this chapter are made available to the public at reasonable prices; and

(2) may develop information services to assist State and local governments in identifying and obtaining sources of assistance.

§ 6103. Access to computer information system

(a) The Director of the Office of Management and Budget shall maintain a computerized information system providing access to the information described in section 6102 of this title.

(b) To the greatest extent practicable, the Director shall provide for the widespread availability of the information by available computer terminals.

(c) When the Director decides the efficiency of the information system under subsection (a) of this section requires it, the Director may make contracts with private organizations to obtain computer time-sharing services, including—

(1) computer telecommunications networks;

(2) computer software; and

(3) associated services.

§ 6104. Catalog of Federal domestic assistance programs

(a) The Director of the Office of Management and Budget shall prepare and publish each year a catalog of domestic assistance programs.

(b) In a form selected by the Director, the catalog shall contain—

(1) all substantive information on domestic assistance programs that is in the system under section 6102(a) of this title at the time the catalog is prepared;

(2) information the Director decides may be helpful to a potential applicant for or beneficiary of assistance; and

(3) a detailed index.

(c) When the Director decides it is necessary, the Director shall prepare and publish—

(1) supplements to the catalog; and

(2) specialized compilations by function of information in the catalog.

(d) The Director may distribute a catalog without cost to each—

(1) Member of Congress;

(2) department, agency, and instrumentality of the United States Government;

(3) State;

(4) general purpose unit of a local government;

(5) Indian tribe recognized by the United States Government;

(6) depository library of Government publications; and

(7) depository designated by the Director.

§ 6105. Authorization of appropriations

Not more than \$—, —, — may be appropriated for the fiscal year ending September 30, 19—, to carry out this chapter.

CHAPTER 63—USING PROCUREMENT CONTRACTS AND GRANT AND COOPERATIVE AGREEMENTS

Sec.

6301. Purposes.

6302. Definitions.

6303. Using procurement contracts.

6304. Using grant agreements.

6305. Using cooperative agreements.

6306. Authority to vest title in tangible personal property for research.

6307. Interpretative guidelines and exemptions.

6308. Use of multiple relationships for different parts of jointly financed projects.

§ 6301. Purposes

The purposes of this chapter are to—

(1) promote a better understanding of United States Government expenditures and help eliminate unnecessary administrative requirements on recipients of Government awards by characterizing the relationship between executive agencies and contractors, States, local governments, and other recipients in acquiring property and services and in providing United States Government assistance;

(2) prescribe criteria for executive agencies in selecting appropriate legal instruments to achieve—

(A) uniformity in their use by executive agencies;

(B) a clear definition of the relationships they reflect; and

(C) a better understanding of the responsibilities of the parties to them; and

(3) promote increased discipline in selecting and using procurement contracts, grant agreements, and cooperative agreements, maximize competition in making procurement contracts, and encourage competition in making grants and cooperative agreements.

§ 6302. Definitions

In this chapter—

(1) "executive agency" does not include a mixed-ownership Government corporation.

(2) "grant agreement" and "cooperative agreement" do not include an agreement under which is provided only—

(A) direct United States Government cash assistance to an individual;

(B) a subsidy;

(C) a loan;

(D) a loan guarantee; or

(E) insurance.

(3) "local government" means a unit of government in a State, a local public authority, a special district, an intrastate district, a council of governments, a sponsor group representative organization, an interstate entity, or another instrumentality of a local government.

(4) "other recipient" means a person or recipient (except a State or local government) authorized to receive United States Government assistance or procurement contracts and includes a charitable or educational institution.

(5) "State" means a State of the United States, the District of Columbia, a territory or possession of the United States, an agency or instrumentality of a State, and a multi-State, regional, or interstate entity having governmental duties and powers.

§ 6303. Using procurement contracts

An executive agency shall use a procurement contract as the legal instrument reflecting a relationship between the United States Government and a State, a local government, or other recipient when—

(1) the principal purpose of the instrument is to acquire (by purchase, lease, or barter) property or services for the direct benefit or use of the United States Government; or

(2) the agency decides in a specific instance that the use of a procurement contract is appropriate.

§ 6304. Using grant agreements

An executive agency shall use a grant agreement as the legal instrument reflect-

ing a relationship between the United States Government and a State, a local government, or other recipient when—

(1) the principal purpose of the relationship is to transfer a thing of value to the State or local government or other recipient to carry out a public purpose of support or stimulation authorized by a law of the United States instead of acquiring (by purchase, lease, or barter) property or services for the direct benefit or use of the United States Government; and

(2) substantial involvement is not expected between the executive agency and the State, local government, or other recipient when carrying out the activity contemplated in the agreement.

§ 6305. Using cooperative agreements

An executive agency shall use a cooperative agreement as the legal instrument reflecting a relationship between the United States Government and a State, a local government, or other recipient when—

(1) the principal purpose of the relationship is to transfer a thing of value to the State, local government, or other recipient to carry out a public purpose of support or stimulation authorized by a law of the United States instead of acquiring (by purchase, lease, or barter) property or services for the direct benefit or use of the United States Government; and

(2) substantial involvement is expected between the executive agency and the State, local government, or other recipient when carrying out the activity contemplated in the agreement.

§ 6306. Authority to vest title in tangible personal property for research

The head of an executive agency may vest title in tangible personal property in a nonprofit institution of higher education or in a nonprofit organization whose primary purpose is conducting scientific research—

(1) when the property is bought with amounts provided under a procurement contract, grant agreement, or cooperative agreement with the institution or organization to conduct basic or applied scientific research;

(2) when the head of the agency decides the vesting furthers the objectives of the agency;

(3) without further obligation to the United States Government; and

(4) under conditions the head of the agency considers appropriate.

§ 6307. Interpretative guidelines and exemptions

The Director of the Office of Management and Budget may—

(1) issue supplementary interpretative guidelines to promote consistent and efficient use of procurement contracts, grant agreements, and cooperative agreements; and

(2) exempt a transaction or program of an executive agency from this chapter.

§ 6308. Use of multiple relationships for different parts of jointly financed projects

This chapter does not require an executive agency to establish only one relationship between the United States Government and a State, a local government, or other recipient on a jointly financed project involving amounts from more than one program or appropriation when different relationships would otherwise be appropriate for different parts of the project.

CHAPTER 65—INTERGOVERNMENTAL COOPERATION

Sec.

6501. Definitions.

6502. Information on grants received.

6503. Transfer and deposit requirements.

6504. Use of existing State or multimember agency to administer grant programs.

6505. Authority to provide specialized or technical services.

6506. Development assistance.

6507. Congressional review of grant programs.

6508. Studies and reports.

§ 6501. Definitions

In this chapter—

(1) "assistance" means the transfer of anything of value for a public purpose of support or stimulation that is—

(A) authorized by a law of the United States;

(B) provided by the law of the United States Government through grant or contractual arrangements (including technical assistance programs providing assistance by loan, loan guarantee, or insurance); and

(C) not an annual payment by the United States Government to the District of Columbia government under section 502 of the District of Columbia Self-Government and Governmental Reorganization Act (Public Law 93-198, 87 Stat. 813, D.C. Code, § 47-3406).

(2) "comprehensive planning" includes, to the extent directly related to area needs or needs of a unit of general local government—

(A) preparation, as a guide for governmental policies and action, of general plans on—

(i) the pattern and intensity of land use;

(ii) providing public facilities (including transportation facilities) and other governmental services; and

(iii) the effective development and use of human and natural resources;

(B) long-range physical and fiscal plans for an action referred to in subclause (A) of this clause (2);

(C) a program for capital improvements and other major expenditures based on their relative urgency, and definitive financing plans for the expenditures in the earlier years of the program;

(D) coordination of related plans and activities of States and local governments and agencies concerned; and

(E) preparation of regulatory and administrative measures to support the items referred to in subclauses (A)-(D) of this clause (2).

(3) "executive agency" does not include a mixed-ownership Government corporation.

(4)(A) "grant" (except as provided in subclause (C) of this clause (4)) means money, or property provided instead of money, that is paid or provided by the United States Government under a fixed annual or total authorization, to a State, to a local government, or to a beneficiary under a plan or program administered by a State or a local government that is subject to approval by an executive agency, if the authorization—

(i) requires the State or local government to expend non-Government money as a condition of receiving money or property from the United States Government; or

(ii) specifies directly, or establishes by means of a formula, the amount that may be provided to the State or local government, or the amount to be allotted for use in each State by the State, local government, and beneficiaries.

(B) "grant" (except as provided in subclause (C) of this clause (4)) also means money, or property provided instead of money, that is paid or provided by the United States Government to a private, nonprofit community organization eligible

to receive amounts under the Community Services Block Grant Act (42 U.S.C. 9901 et seq.).

(C) "grant" does not include—

(i) shared revenue;

(ii) payment of taxes;

(iii) payment instead of taxes;

(iv) a loan or repayable advance;

(v) surplus property or surplus agricultural commodities provided as surplus property;

(vi) a payment under a research and development procurement contract or grant awarded directly and on similar terms to all qualifying organizations; or

(vii) a payment to a State or local government as complete reimbursement for costs incurred in paying benefits or providing services to persons entitled to them under a law of the United States.

(5) "head of a State agency" includes the designated delegate of the head of the agency.

(6) "local government" means a unit of general local government, a school district, or other special district established under State law.

(7) "special-purpose unit of local government" means a special district, public-purpose local government of a State except a school district.

(8) "State" means a State of the United States, the District of Columbia, a territory or possession of the United States, and an agency or instrumentality of a State but does not mean a local government of a State.

(9) "unit of general local government" means a county, city, town, village, or other general purpose political subdivision of a State.

§ 6502. Information on grants received

On request of a chief executive officer of a State, a State legislature, or an official designated by either of them, an executive agency carrying out a grant program to States and local governments shall provide the requesting officer or legislature with written information on the purpose and amounts of grants provided to the State or local government.

§ 6503. Transfer and deposit requirements

(a) Consistent with program purposes and regulations of the Secretary of the Treasury, the head of an executive agency carrying out a grant program shall schedule the transfer of grant money to minimize the time elapsing between transfer of the money from the Treasury and the disbursement by a State, whether disbursement occurs before or after the transfer. A State is not accountable for interest earned on grant money pending its disbursement for program purposes.

(b) A State may not be required by a law or regulation of the United States to deposit grant money received by it in a separate bank account. However, a State shall account for grant money made available to the State as United States Government grant money in the accounts of the State. The head of the State agency concerned shall make periodic authenticated reports to the head of the appropriate executive agency on the status and the application of the money, the liabilities and obligations on hand, and other information required by the head of the executive agency. Records related to the grant received by the State shall be made available to the head of the

executive agency and the Comptroller General for auditing.

§ 6504. Use of existing State or multi-member agency to administer grant programs

Notwithstanding a law of the United States providing that one State agency or multi-member agency must be established or designated to carry out or supervise the administration of a grant program, the head of the executive agency carrying out the program may, when requested by the executive or legislative authority of the State responsible for the organizational structure of a State government—

(1) waive the one State agency or multi-member agency provision on an adequate showing that the provision prevents the establishment of the most effective and efficient organizational arrangement within the State government; and

(2) approve another State administrative structure or arrangement after deciding that the objectives of the law authorizing the grant program will not be endangered by using another State structure or arrangement.

§ 6505. Authority to provide specialized or technical services

(a) The President may prescribe statistical and other studies and compilations, development projects, technical tests and evaluations, technical information, training activities, surveys, reports, documents, and other similar services that an executive agency is especially competent and authorized by law to provide. The services prescribed must be consistent with and further the policy of the United States Government of relying on the private enterprise system to provide services reasonably and quickly available through ordinary business channels.

(b) The head of an executive agency may provide services prescribed by the President under this section to a State or local government when—

(1) written request is made by the State or local government; and

(2) payment of pay and all other identifiable costs of providing the services is made to the executive agency by the State or local government making the request.

(c) Payment received by an executive agency for providing services under this section shall be deposited to the credit of the principal appropriation from which the cost of providing the services has been paid or will be charged.

(d) The authority under this section is in addition to authority under another law in effect on October 16, 1968.

§ 6506. Development assistance

(a) The economic and social development of the United States and the achievement of satisfactory levels of living depend on the sound and orderly development of urban and rural areas. When urbanization proceeds rapidly, the sound and orderly development of urban communities depends to a large degree on the social and economic health and the sound development of smaller communities and rural areas.

(b) The President shall prescribe regulations governing the formulation, evaluation, and review of United States Government programs and projects having a significant impact on area and community development (including programs and projects providing assistance to States and localities) to serve most effectively the basic objectives of subsection (a) of this section. The regulations shall provide for the consideration of concurrently achieving the following specific

objectives and, to the extent authorized by law, reasoned choices shall be made between the objectives when they conflict:

(1) appropriate land uses for housing, commercial, industrial, governmental, institutional, and other purposes.

(2) wise development and conservation of all natural resources.

(3) balanced transportation systems, including highway, air, water, pedestrian, mass transit, and other means to move people and goods.

(4) adequate outdoor recreation and open space.

(5) protection of areas of unique natural beauty and historic and scientific interest.

(6) properly planned community facilities (including utilities for supplying power, water, and communications) for safely disposing of wastes, and for other purposes.

(7) concern for high standards of design.

(c) To the extent possible, all national, regional, State, and local viewpoints shall be considered in planning development programs and projects of the United States Government or assisted by the Government. State and local government objectives and the objectives of regional organizations shall be considered within a framework of national public objectives expressed in laws of the United States. Available projections of future conditions in the United States and needs of regions, States, and localities shall be considered in plan formulation, evaluation, and review.

(d) To the maximum extent possible and consistent with national objectives, assistance for development purposes shall be consistent with and further the objectives of State, regional, and local comprehensive planning. Consideration shall be given to all developmental aspects of our total national community, including housing, transportation, economic development, natural and human resources development, community facilities, and the general improvement of living environments.

(e) To the maximum extent practicable, each executive agency carrying out a development assistance program shall consult with and seek advice from all other significantly affected executive agencies in an effort to ensure completely coordinated programs. To the extent possible, systematic planning required by individual United States Government programs (such as highway construction, urban renewal, and open space) shall be coordinated with and, to the extent authorized by law, made part of comprehensive local and areawide development planning.

(f) When a law of the United States provides that both a special-purpose unit of local government and a unit of general local government are eligible to receive a loan or grant, the head of an executive agency shall make the loan or grant to the unit of general local government instead of the special-purpose unit of local government in the absence of substantial reasons to the contrary.

(g) The President may designate an executive agency to prescribe regulations to carry out this section.

§ 6507. Congressional review of grant programs

(a) The committees of Congress having jurisdiction over a grant program authorized by a law of the United States without a specified expiration date for the program shall study the program. The committees may conduct studies separately or jointly and shall report the results of their findings to their respective Houses of Congress not later than the end of each period specified

in subsection (b) of this section. The committees shall give special attention to—

(1) the extent to which the purposes of the grants have been met;

(2) the extent to which the objective of the program can be carried on without further assistance;

(3) whether a change in the purpose, direction, or administration of the original program, or in procedures and requirements applicable to the program, should be made; and

(4) the extent to which the program is adequate to meet the growing and changing needs that it was designed to support.

(b)(1) A study under subsection (a) of this section of a grant program authorized by a law of the United States enacted before October 16, 1968, shall be conducted before the end of each 4th calendar year after the year during which a study of the program was last conducted under this section.

(2) A study under subsection (a) of this section of a grant program authorized by a law of the United States enacted after October 16, 1968, shall be conducted before the end of the 4th calendar year after the year of enactment of the law and before the end of each 4th calendar year thereafter.

§ 6508. Studies and reports

(a)(1) When requested by a committee of Congress having jurisdiction over a grant program, the Comptroller General shall study the program. The study shall include a review of—

(A) the extent to which—

(i) the program conflicts with or duplicates other grant programs; and

(ii) more effective, efficient, economical, and uniform administration of the program may be achieved by changing the requirements and procedures applicable to it; and

(B) budgetary, accounting, reporting, and administrative procedures of the program.

(2) The Comptroller General shall submit to Congress a report on a study made under this subsection and any recommendations. To the extent practicable, a report on an expiring program shall be submitted in the year before the year in which a program ends.

(b)(1) When requested by a committee of Congress having jurisdiction over a grant program, the Advisory Commission on Intergovernmental Relations shall study the intergovernmental relations aspects of the program, including—

(A) the impact of the program on the structural organization of States and local governments and on Federal-State-local fiscal relations; and

(B) the coordination of administration of the program by the United States Government and State and local governments.

(2) The Commission shall submit to the committee requesting the study and to Congress a report and any recommendations.

§ 6701. Definitions and application

(a) In this chapter—

(1) "entitlement period" means each one-year period beginning on October 1, 1981, and October 1, 1982.

(2) "finding of discrimination" means a decision by the Secretary of the Treasury about a complaint described in section 6721(b) of this title, a decision by a State or local administrative agency, or other information (under regulations prescribed by the Secretary) that it is more likely than not that a State government or unit of general local government has not complied with section 6716(a) or (b) of this title.

(3) "holding of discrimination" means a holding by a United States court, a State court, or an administrative law judge appointed under section 3105 of title 5, that a State government or unit of general local government expending amounts received under this chapter has—

(A) excluded a person in the United States from participating in, denied the person the benefits of, or subjected the person to discrimination under, a program or activity because of race, color, national origin, or sex; or

(B) violated a prohibition against discrimination described in section 6716(b) of this title.

(4) "income" means the total money income received from all sources as determined by the Secretary of Commerce for general statistical purposes.

(5) "unit of general local government" means—

(A) a county, township, city, or political subdivision of a county, township, or city, that is a unit of general local government as determined by the Secretary of Commerce for general statistical purposes;

(B) except under sections 6708(b), 6709, 6711, and 6712(a) (2) and (3) of this title, the recognized governing body of an Indian tribe or Alaskan native village that carries out substantial governmental duties and powers; and

(C) except under this section and sections 6702, 6703, and 6705-6713(c) (1) of this title, the office of the separate law enforcement officer under section 6710 of this title.

(6) "State and local taxes" means taxes imposed by a State government or unit of general local government or other political subdivision of the State government for public purposes (except employee and employer assessments and contributions to finance retirement and social insurance systems and other special assessments for cap-

ital outlay) as determined by the Secretary of Commerce for general statistical purposes.

(7) "township" includes an equivalent political subdivision having different designations as determined on the same basis used by the Secretary of Commerce for general statistical purposes.

(b) In a State in which a unit of general local government (except a county government) is the next level of government below the State government, the geographic area of the unit of general local government is deemed to be a county area in the State, and the unit of general local government is deemed to be a county government. However, this subsection does not apply to a county area of a State not governed by a county government that has at least 2 units of general local government.

(c) When the entire geographic area of a unit of general local government is located in a larger entity, the unit of general local government is deemed to be located in the larger entity. When only part of the geographic area of a unit is located in a larger entity, each part is deemed to be located in the larger entity and to be a separate unit of general local government in determining allocations under this chapter. Except as provided in regulations of the Secretary of the Treasury, the Secretary shall allocate amounts based on the ratio of the estimated population of the part to the population of the unit of general local government.

(d) When a boundary line change, a State statutory or constitutional change, a governmental reorganization, or other circumstance results in the application of subsections (a) (5) and (7), (b), and (c) of this section and sections 6708-6712 of this title in a way that does not carry out the purposes of this section and sections 6702, 6703, and 6705-6713(c) (1) of this title, the Secretary shall apply subsections (a) (5) and (7), (b), and (c) and sections 6708-6712 under regulations of the Secretary in a way that is consistent with those purposes.

(e) In this chapter, the District of Columbia is deemed to be—

- (1) a State; and
- (2) a county area having one unit of general local government.

§ 6702. Payments to governments

(a) Each unit of general local government is entitled to an amount equal to any amount allocated to the government under this chapter for each entitlement period. Each State government shall be paid an amount equal to any allocation made for each entitlement period. The Secretary of the Treasury shall pay each amount out of the State and Local Government Fiscal Assistance Trust Fund under section 6703 of this title.

(b) Except as provided under regulations of the Secretary, the Secretary shall determine allocations under this chapter for an entitlement period by the first day of the 3d month before the beginning of the period. The Secretary shall pay each amount under this section in installments. An installment shall be paid at least once a quarter by the 5th day after the end of the quarter. The Secretary initially may estimate the amount of each installment.

(c) The Secretary shall adjust a payment under this chapter to a State government or unit of general local government to the extent that a prior payment to the government was more or less than the amount required to be paid. However, the Secretary may increase or decrease a payment to the government only when the Secretary or the

government demands the increase or decrease within one year after the end of the entitlement period for which the payment was made.

(d) The Secretary may reserve a percentage (of not more than 0.5 percent) of the amount under this section for an entitlement period for a State government and all units of general local government in the State when the Secretary considers the reserve is necessary to ensure the availability of sufficient amounts to pay adjustments after the final allocation of amounts among the units of general local government in the State.

§ 6703. State and Local Government Fiscal Assistance Trust Fund

(a) The Department of the Treasury has a State and Local Government Fiscal Assistance Trust Fund. The Secretary of the Treasury personally is the trustee of the Trust Fund. Amounts in the Trust Fund—

(1) except as provided in this chapter, may be used only for payments to State governments and units of general local government under this chapter; and

(2) remain available until expended.

(b) The Trust Fund consists of amounts appropriated to the Trust Fund. The following amounts may be appropriated to the Trust Fund:

(1) \$2,300,000,000 for each entitlement period to pay amounts allocated to State governments for that period under section 6705 of this title.

(2) \$4,566,700,000 for each entitlement period to pay entitlement amounts allocated to units of general local government for that period under sections 6708-6710 of this title.

(c) The Secretary shall transfer to the general fund of the Treasury amounts in the Trust Fund the Secretary decides are not necessary for payments to State governments and units of general local government under this chapter.

§ 6704. Qualifications

(a) Under regulations of the Secretary of the Treasury, a State government or unit of general local government qualifies for payment under this chapter for an entitlement period only after establishing to the satisfaction of the Secretary that—

(1) the government will establish a trust fund in which the government will deposit all payments received;

(2) the government will use amounts in the trust fund (including interest) during a reasonable period provided in the regulations of the Secretary;

(3) the government will expend the payments received under laws and procedures applicable to the expenditure of revenues of the government;

(4) if at least 25 percent of the pay of individuals employed by the government in a public employee occupation is paid out of the trust fund, individuals in the occupation any part of whose pay is paid out of the trust fund will receive pay at least equal to the prevailing rate of pay for individuals employed in similar public employee occupations by the government;

(5) if at least 25 percent of the costs of a construction project are paid out of the trust fund, laborers and mechanics employed by contractors or subcontractors on the project will receive pay at least equal to the prevailing rate of pay for similar construction in the locality as determined by the Secretary of Labor under the Act of March 3, 1931 (known as the Davis-Bacon Act) (40 U.S.C. 276a et seq.), and the Secre-

tary of Labor shall act on labor standards under this clause in a way that is consistent with Reorganization Plan No. 14 of 1950 (64 Stat. 1267) and section 2 of the Act of June 13, 1934 (40 U.S.C. 276c);

(6) the government will use accounting, audit, and fiscal procedures conforming to guidelines prescribed by the Secretary of the Treasury (after the Secretary consults with the Comptroller General);

(7) after reasonable notice to the government, the government will make available to the Secretary of the Treasury and the Comptroller General, with the right to inspect, records the Secretary reasonably requires to review compliance with this chapter or the Comptroller General reasonably requires to review compliance and operations under section 6723(b) of this title; and

(8) the government will make reports the Secretary of the Treasury reasonably requires, in addition to the annual reports required under section 6724(b) of this title.

(b) A unit of general local government shall give the chief executive officer of the State in which the government is located an opportunity for review and comment before establishing compliance with subsection (a) of this section.

(c)(1) When the Secretary of the Treasury decides that a State government or unit of general local government has not complied substantially with subsection (a) of this section or regulations prescribed under subsection (a), the Secretary shall notify the government. The notice shall state that if the government does not take corrective action by the 60th day after the date the government receives the notice, the Secretary will withhold additional payments to the government for the current entitlement period and later entitlement periods until the Secretary is satisfied that the government—

(A) has taken the appropriate corrective action; and

(B) will comply with subsection (a) of this section and regulations prescribed under subsection (a).

(2) Before giving notice under paragraph (1) of this subsection, the Secretary shall give the chief executive officer of the State or unit of general local government reasonable notice and an opportunity for a proceeding.

(3) The Secretary may make a payment to the government notified under paragraph (1) of this subsection only when the Secretary is satisfied that the government—

(A) has taken the appropriate corrective action; and

(B) will comply with subsection (a) of this section and regulations prescribed under subsection (a).

§ 6705. State government allocations

For each entitlement period for which an amount is appropriated under section 6703(b)(1) of this title, the Secretary of the Treasury shall allocate to each State government out of the amount appropriated an amount bearing the same ratio to the amount appropriated as the amount allocated to the State under section 6707 of this title bears to the total amount allocated to States under section 6707. However, the Secretary may pay the amount allocated to the State government only when the Secretary determines (under regulations prescribed by the Secretary) that the State government has declined to receive or has refunded to the United States Government an amount available to the State government under any United States Government categorical grant program identified under the regula-

tions that is equal to the amount allocated. The Secretary shall transfer from the State and Local Government Fiscal Assistance Trust Fund to the general fund of the Treasury an amount allocated to a State government but not paid under this section.

§ 6706. Reductions in State government allocations

(a)(1) Except as provided in this section, the Secretary of the Treasury shall reduce the amount allocated to a State government under section 6705 of this title for an entitlement period by the amount by which—

(A) 50 percent of the total amount the State government transfers from its own sources to units of general local government in the State during the 24-month period ending on the last day of the last fiscal year of the State for which relevant information is available on the first day of the entitlement period to which the allocation applies; is less than

(B) 50 percent of the similar total amount for the 24-month period ending the day before the beginning of the 24-month period described in clause (A) of this paragraph.

(2) In applying this subsection, the amount by which the Secretary reduces an amount allocated to a State government for an entitlement period is, in a later entitlement period, an amount transferred by the State government from its own sources to units of general local government during the period to which the reduction applies.

(b) When a State government satisfies the Secretary that after June 29, 1972, the State government assumed responsibility for a category of expenditures that before July 1, 1972, was the responsibility of local governments in the State, the Secretary shall reduce the total amount under subsection (a)(1)(B) of this section to the extent that increased State government expenditures from its own sources for the category have replaced corresponding amounts that the State government transferred to units of general local government during the 24-month period under subsection (a)(1)(B).

(c)(1) When a State government satisfies the Secretary that after June 29, 1972, at least one unit of general local government in the State was given new taxing authority, the Secretary shall reduce the total amount under subsection (a)(1)(B) of this section to the extent of the larger of an amount equal to the—

(A) taxes collected by the units of general local government under the new taxing authority; or

(B) loss of revenue to the State government because of the new taxing authority.

(2) The Secretary may consider under paragraph (1)(A) of this subsection an amount collected because of new taxing authority that is an increase in the tax rate under a previously authorized kind of tax only when the State government has decreased a related State tax.

(d) When the State government satisfies the Secretary that during a part of the 24-month period under subsection (a)(1)(A) of this section the United States Government has assumed responsibility for a category of expenditures for which the State government transferred amounts that (but for this subsection) would be included in the total amount taken into account under subsection (a)(1)(B) of this section, the Secretary shall reduce the total amount under subsection (a)(1)(B) to the extent that increased Government expenditures have replaced corresponding amounts that the State government had transferred to units of general local government during the period under subsection (a)(1)(B).

(e) When the Secretary believes that a reduction of an amount allocated to a State government is required under this section, the Secretary shall give the State government reasonable notice and opportunity for a proceeding. If the Secretary decides that a reduction is required, the Secretary shall—

(1) determine the amount of the reduction;

(2) notify the chief executive officer of the State of the determination; and

(3) withhold the amount of the reduction from payments to the State government under this chapter.

(f) On the day a reduction under this section in an amount allocated to a State government is final, the Secretary shall transfer an amount equal to the reduction from the State and Local Government Fiscal Assistance Trust Fund to the general fund of the Treasury.

(g) The Secretary shall prescribe regulations to carry out this section.

§ 6707. State allocations for units of general local government

(a) For each entitlement period, the Secretary of the Treasury shall allocate to each State out of the amount authorized for the period under section 6703(b)(2) of this title an amount bearing the same ratio to the amount authorized as the amount allocated to the State under this section bears to the total amount allocated to all States under this section. The Secretary shall—

(1) determine the amount allocated to the State under subsection (b) or (c) of this section and allocate the larger amount to the State; and

(2) allocate the amount allocated to the State to units of general local government in the State under sections 6708-6710 of this title.

(b)(1) The amount allocated to a State under this subsection for an entitlement period is the amount bearing the same ratio to \$5,300,000,000 as—

(A) the population of the State, multiplied by the general tax effort factor of the State (determined under paragraph (2) of this subsection), multiplied by the relative income factor of the State (determined under paragraph (3) of this subsection); bears to

(B) the sum of the products determined under subclause (A) of this paragraph for all States.

(2) The general tax effort factor of a State for an entitlement period is—

(A) the net amount of State and local taxes of the State collected during the years used by the Secretary of Commerce in the most recent Bureau of the Census general determination of State and local taxes made before the beginning of the entitlement period; divided by

(B) the total income of individuals, as determined by the Secretary of Commerce for national income accounts purposes, attributed to the State for the same years.

(3) The relative income factor of a State is a fraction in which—

(A) the numerator is the per capita income of the United States; and

(B) the denominator is the per capita income of the State.

(c) The amount allocated to a State under this subsection for an entitlement period is the amount the State would receive if—

(1) \$1,166,666,667 were allocated among the States on the basis of population by allocating to each State an amount bearing the same ratio to the total amount to be al-

located as the population of the State bears to the population of all States;

(2) \$1,166,666,667 were allocated among the States on the basis of population inversely weighted for per capita income, by allocating to each State an amount bearing the same ratio to the total amount to be allocated as—

(A) the population of the State, multiplied by a fraction in which—

(i) the numerator is the per capita income of all States; and

(ii) the denominator is the per capita income of the State; bears to

(B) the sum of the products determined under subclause (A) of this clause (2) for all States;

(3) \$900,000,000 were allocated among the States on the basis of income tax collections by allocating to each State an amount bearing the same ratio to the total amount to be allocated as the income tax amount of the State (determined under subsection (d)(1) of this section) bears to the total amount of the income tax amounts of all States;

(4) \$900,000,000 were allocated among the States on the basis of general tax effort by allocating to each State an amount bearing the same ratio to the total amount to be allocated as the general tax effort amount of the State (determined under subsection (d)(2) of this section) bears to the total amount of the general tax effort amounts of all States; and

(5) \$1,166,666,667 were allocated among the States on the basis of urbanized population by allocating to each State an amount bearing the same ratio to the total amount to be allocated as the urbanized population of the State bears to the urbanized population of all States. In this clause, "urbanized population" means the population of an area consisting of a central city or cities of at least 50,000 inhabitants and the surrounding closely settled area for the city or cities considered as an urbanized area by the Secretary of Commerce for general statistical purposes.

(d)(1) The income tax amount of a State for an entitlement period is 15 percent of the net amount collected during the calendar year ending before the beginning of the entitlement period from the tax imposed on the income of individuals by the State and described as a State income tax under section 164(a)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 164(a)(3)). The income tax amount for an entitlement period shall be at least one percent but not more than 6 percent of the United States Government individual income tax liability attributed to the State for the taxable years ending during the last calendar year ending before the beginning of the entitlement period. The Secretary of the Treasury shall determine the Government income tax liability attributed to the State on the same basis as the Secretary determines that liability for general statistical purposes.

(2) The general tax effort amount of a State for an entitlement period is the amount determined by multiplying—

(A) the net amount of State and local taxes of the State collected during the years used by the Secretary of Commerce in the most recent Bureau of the Census general determination of State and local taxes made before the beginning of the entitlement period; by

(B) the general tax effort factor of the State determined under subsection (b)(2) of this section.

§ 6708. County area and county government allocations

(a)(1) The Secretary of the Treasury first shall allocate among the county areas in the State the amount allocated to the State for an entitlement period under section 6707 of this title. Each county area shall receive an amount bearing the same ratio to the amount allocated to the State as—

(A) the population of the county area, multiplied by the general tax effort factor of the county area (determined under paragraph (2) of this subsection), multiplied by the relative income factor of the county area (determined under paragraph (3) of this subsection); bears to

(B) the sum of the products determined under clause (A) of this paragraph for all county areas in the State.

(2) The general tax effort factor of a county area for an entitlement period is—

(A) the amount of the adjusted taxes of the county government and units of general local government in the county area; divided by

(B) the total income attributed to the county area.

(3) The relative income factor of a county area is a fraction in which—

(A) the numerator is the per capita income of the State in which the area is located; and

(B) the denominator is the per capita income of the county area.

(b) The Secretary shall allocate to the county government an amount out of the amount allocated to the county area under subsection (a) of this section bearing the same ratio to the amount allocated to the county area as the adjusted taxes of the county government bears to the adjusted taxes of the county government and all other units of general local government in the county area.

(c) When a county area includes an Indian tribe or Alaskan native village having a recognized governing body carrying out substantial governmental duties and powers, the Secretary shall allocate to the tribe or village an amount out of the amount allocated to the county area under subsection (a) of this section bearing the same ratio to the amount allocated to the county area as the population of the tribe or village bears to the population of the county area. The Secretary shall allocate an amount to the tribe or village before allocating an amount to the county government under subsection (b) of this section. The Secretary shall reduce the amount to be allocated to the county government under subsection (b) by an amount allocated under this subsection.

§ 6709. Other local government allocations

(a)(1) After allocating an amount to a county government under section 6708 of this title, the Secretary of the Treasury shall allocate the amount remaining for allocation in a county area among the units of general local government (except the county government and township governments) in the county area. Each of those units of general local government shall receive an amount bearing the same ratio to the total amount to be allocated to the units of general local government as—

(A) the population of the unit of general local government, multiplied by the general tax effort factor of the unit of general local government (determined under paragraph (2) of this subsection), multiplied by the relative income factor of the unit of general local government (determined under paragraph (4) of this subsection); bears to

(B) the sum of the products determined under clause (A) of this paragraph for all units of the general local government.

(2) The general tax effort factor of a unit of general local government for an entitlement period is—

(A) the taxes imposed by the unit of general local government for public purposes (except employee and employer assessments and contributions to finance retirement and social insurance systems and other special assessments for capital outlay) determined by the Secretary of Commerce for general statistical purposes and adjusted (under regulations of the Secretary of the Treasury) to exclude amounts properly allocated to education expenses; divided by

(B) the total income attributed to the unit of general local government.

(3) The Secretary of the Treasury shall include that part of sales taxes transferred to a unit of general local government that are imposed by a county government in a geographic area of a unit of general local government as taxes of the unit of general local government under paragraph (2) of this subsection when—

(A) the county government transfers any part of the revenue from the taxes to the unit of general local government without specifying the purpose for which the unit of general local government may expend the revenue; and

(B) the chief executive officer of the State notifies the Secretary that the taxes satisfy the requirements of this paragraph.

(4) The relative income factor of a unit of general local government is a fraction in which—

(A) the numerator is the per capita income of the county area in which the unit of general local government is located; and

(B) the denominator is the per capita income of the geographic area of the unit of general local government.

(b) When a county area includes at least one township government, the Secretary of the Treasury shall set aside for allocation to township governments in the county area an amount out of the amount allocated to the county area under section 6708(a) of this title bearing the same ratio to the amount allocated to the county area as the total adjusted taxes of all township governments in the county area bears to the total adjusted taxes of the county government, the township governments, and other units of general local government in the county area. The amount for allocation to a township government is set aside before an amount is allocated to a unit of general local government under subsection (a) of this section. The Secretary shall allocate an amount to the township government on the same basis as the Secretary allocates an amount to a unit of general local government under subsection (a). The Secretary shall reduce the amount of the allocation to other units of general local government under subsection (a) by the amount set aside for allocation under this subsection.

(c) When the Secretary of the Treasury decides that information available for a county area for an entitlement period is inadequate in allocating an amount under subsection (a) or (b) of this section for a unit of general local government (except a county government) with a population below a number (of not more than 500) prescribed for the county area by the Secretary, the Secretary may apply subsection (a) or (b) by allocating to the unit of general local government an amount bearing the same ratio to the total amount to be allocated

ed under subsection (a) or (b) for the entitlement period as the population of the unit of general local government in the county area receiving an amount allocated under subsection (a) or (b). When the Secretary allocates an amount under this subsection, the Secretary shall reduce the total amount to be allocated under subsection (a) or (b) to other units of general local government in the county area for the entitlement period by the amount allocated under this subsection.

§ 6710. Separate law enforcement officer allocations for Louisiana

(a) Except as provided in subsection (d) of this section—

(1) the office of the separate law enforcement officer for—

(A) a county area in Louisiana (except the parishes of East Baton Rouge and Orleans) shall receive for each entitlement period an amount equal to 15 percent of the amount the county area government would receive for the period but for this section; and

(B) the parish of East Baton Rouge shall receive for each entitlement period an amount equal to 7.5 percent of the total amount of the amounts the governments of Baton Rouge, Baker, and Zachary, Louisiana, would receive for the period but for this section; and

(2) the parish of Orleans, Louisiana, shall receive for each entitlement period an additional amount equal to 7.5 percent of the amount the parish otherwise would receive.

(b) Except as provided in subsection (d) of this section, the Secretary of the Treasury shall reduce—

(1) the amount allocated to a county area government in Louisiana for an entitlement period by an amount equal to 50 percent of the amount allocated to the office of the separate law officer for the county area for the period; and

(2) in applying clause (1) of this subsection to the parish of East Baton Rouge, the amounts allocated to the governments of Baton Rouge, Baker, and Zachary, Louisiana, for an entitlement period by an amount equal to 3.75 percent of the amount each government would receive for the period but for this subsection.

(c) For each entitlement period for which an amount is appropriated under section 6703(b)(1) of this title, the Secretary shall reduce the amount allocated to the Louisiana government under section 6705 of this title by an amount equal to the total reductions under subsection (b) of this section of amounts allocated to county area governments in Louisiana for the period. In this subsection—

(1) reductions in the amounts allocated to the governments of Baton Rouge, Baker, and Zachary, Louisiana, under subsection (b) are deemed reductions in the amounts allocated to county area governments; and

(2) the amount allocated to the parish of Orleans, Louisiana, is deemed to have been reduced by the additional amount received under subsection (a)(2) of this section.

(d) For an entitlement period for which an amount under section 6703(b)(1) of this title is not appropriated—

(1) the percentage under subsection (a)(1)(A) of this section is 13.5 percent;

(2) the percentages under subsections (a)(1)(B) and (b)(2) of this section are 6.75 percent;

(3) the Secretary shall disregard the percentage under subsection (b)(1) of this section; and

(4) subsections (a)(2) and (c) of this section do not apply.

§ 6711. State variation of local government allocations

(a) A State government may provide by law for the allocation of amounts among county areas or units of general local government (except county governments) in the State on the basis of population multiplied by the general tax effort factors or relative income factors of the county areas or units of general local government (determined under sections 6708(a) and 6709(a) and (b) of this title), or a combination of those factors. A State government providing for a variation on an allocation formula provided under section 6708(a) or 6709(a) or (b) shall notify the Secretary of the Treasury of the variation by the 30th day before the beginning of the first entitlement period in which the variation applies. A variation shall—

(1) provide for allocating the total amount allocated under section 6708(a) or 6709(a) or (b) of this title;

(2) apply uniformly in the State; and

(3) apply only to entitlement periods beginning before October 1, 1983.

(b) A variation by a State government under this section may apply only when the Secretary certifies that the variation complies with this section. The Secretary may certify a variation only when the Secretary is notified of the variation at least 30 days before the first entitlement period in which the variation applies.

§ 6712. Adjustments of local government allocations

(a)(1) Subject to paragraphs (2) and (3) of this subsection, the per capita amount allocated to a county area or unit of general local government (except a county government) in a State for an entitlement period shall be at least 20 percent but not more than 145 percent of the amount allocated to the State under section 6707 of this title, divided by the State population.

(2) The amount allocated to a unit of general local government for an entitlement period may be not more than 50 percent of the amount of the—

(A) adjusted taxes of the unit of general local government; and

(B) transfers (except transfers under this chapter) of revenue to the unit of general local government from another government as a share in financing, or a reimbursement for, the carrying out of governmental duties and powers, as determined by the Secretary of Commerce for general statistical purposes.

(3) When the amount allocated to a unit of general local government (except a county government, an Indian tribe, or an Alaskan native village) for an entitlement period would be less than \$200 but for this paragraph or is waived by the governing authority of the unit of general local government, the Secretary of the Treasury shall add the amount for that period to the amount allocated to the county government in the county area in which the unit of general local government is located, instead of paying the amount allocated to the unit of general local government. The Secretary shall add the amount of allocation waived by a governing body of an Indian tribe or an Alaskan native village to the amount allocated to the county government in the county area in which the tribe or village is located.

(b) When the Secretary makes an adjustment in an amount allocated to a county area or unit of general local government, the Secretary shall make adjustments in the following order:

(1) under subsection (a)(1) of this section.

(2) under subsection (a)(2) of this section.

(3) under subsection (a)(3) of this section.

(4) under section 6710 of this title.

(c) The Secretary shall adjust the amounts allocated to county areas and units of general local government to bring the amounts into compliance with subsection (a)(1) of this section. The Secretary shall make adjustments in the amounts allocated to county areas before adjusting amounts allocated to units of general local government.

(d)(1) When the Secretary makes a reduction under subsection (a)(2) of this section in the amount allocated to a unit of general local government, the amount of the reduction—

(A) if a unit of general local government (except a county government), shall be added to the amount allocated to the county government in which the unit of general local government is located; and

(B) if a county government, shall be reallocated under subsection (e) of this section.

(2) When a county government may not receive an additional amount under paragraph (1)(A) of this subsection because of subsection (a) of this section, the Secretary shall reallocate the amount of the reduction under subsection (e) of this section.

(e) The Secretary shall reallocate an amount referred to in subsection (d)(1)(B) or (2) of this section—

(1) by adding the amount to the amounts allocated to units of general local government in the State to the extent the units of general local government may receive the additional amount after adjustments under subsection (a) of this section; and

(2) if a unit of general local government may not receive the reallocated amount because of subsection (a) of this section, by allocating the amount among units of general local government in the State on a prorated basis.

§ 6713. Information used in allocation formulas

(a) Except as provided in this section, the Secretary of the Treasury shall use the most recent available information provided by the Secretary of Commerce to determine an allocation under this chapter. When the Secretary of the Treasury decides that the information is not current or complete enough to provide for a fair allocation, the Secretary of the Treasury may use additional information (including information based on estimates) as provided under regulations of the Secretary of the Treasury.

(b) The Secretary of the Treasury shall determine population on the same basis that the Secretary of Commerce determines resident population for general statistical purposes. The Secretary of the Treasury shall request the Secretary of Commerce to adjust the population information provided to the Secretary of the Treasury as soon as practicable to include a reasonable estimate of the number of resident individuals not counted in the 1980 census or revisions of the census. The Secretary of the Treasury shall use the estimates in determining allocations for the entitlement period beginning after the Secretary of the Treasury receives the estimates. The Secretary of the Treasury shall adjust population information to reflect adjustments made under section 118 of the Act of October 1, 1980 (Public Law 96-369, 94 Stat. 1357).

(c) The Secretary of the Treasury may not—

(1) in determining an allocation for an entitlement period, use information on tax collections for years more recent than the years used by the Secretary of Commerce in the most recent Bureau of the Census general determination of State and local taxes made before the beginning of that period; and

(2) consider a change in information used to determine an allocation for a period of 60 months when the change—

(A) results from a major disaster declared by the President under section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141); and

(B) reduces the amount of an allocation.

§ 6714. Public hearings

(a)(1) A State government or unit of general local government expending payments received under this chapter shall hold at least one public hearing for each fiscal period of the government at which persons are given an opportunity to present written and oral views on the possible uses of the payments. The government shall give adequate notice of the hearing and hold the hearing at least 7 calendar days before presenting its budget to the governmental authority responsible for enacting the budget.

(2) A State government or unit of general local government expending payments under this chapter shall hold at least one public hearing on the proposed use of the payment in relation to its entire budget. At the hearing, persons shall be given an opportunity to provide written and oral views to the governmental authority responsible for enacting the budget and to ask questions about the entire budget and the relation of the payment to the entire budget. The government shall hold the hearing at a time and a place that allows and encourages public attendance and participation.

(3) A State government or unit of general local government holding a hearing required under this subsection or by the budget process of the government shall try to provide senior citizens and senior citizen organizations with an opportunity to present views at the hearing before the government makes a final decision on the use of the payment.

(b)(1) By the 10th day before a hearing required under subsection (a)(2) of this section is held, a State government or unit of general local government shall—

(A) make available for inspection by the public at the principal office of the government a statement of the proposed use of the payment and a summary of the proposed budget of the government; and

(B) publish in at least one newspaper of general circulation the proposed use of the payment with the summary of the proposed budget and a notice of the time and place of the hearing.

(2) By the 30th day after adoption of the budget under State or local law, the government shall—

(A) make available for inspection by the public at the principal office of the government a summary of the adopted budget, including the proposed use of the payment; and

(B) publish in at least one newspaper of general circulation a notice that the information referred to in clause (A) of this paragraph is available for inspection.

(c) Under regulations of the Secretary of the Treasury, a requirement—

(1) under subsection (a)(1) of this section may be waived when the cost of the requirement would be unreasonably burdensome in relation to the amount allocated to the

State government or unit of general local government to amounts available for payment under this chapter;

(2) under subsection (a)(2) of this section may be waived if the budget process required under the applicable State or local law or charter provisions—

(A) ensures the opportunity for public attendance and participation contemplated by subsection (a) of this section; and

(B) includes a hearing on the proposed use of a payment received under this chapter in relation to the entire budget of the government; and

(3) under subsections (b) (1)(B) and (2)(B) of this section may be waived if the cost of publishing the information would be unreasonably burdensome in relation to the amount allocated to the government to amounts available for payment under this chapter, or when publication is otherwise impracticable.

(d) When the Secretary is satisfied that the State government or unit of general local government will provide adequate notice of the proposed use of a payment received under this chapter, the 10-day period under subsection (b)(1) of this section may be changed to the greatest extent necessary to comply with applicable State or local law.

(e) The Secretary shall prescribe regulations for applying this section to State governments and units of general local government that do not adopt budgets.

§ 6715. Prohibition on using payments to influence legislation

A State government or unit of general local government may not use a part of a payment received under this chapter for activities intended to influence legislation about this chapter. Dues paid by a government to a national or State association are deemed not to have been paid from payments received under this chapter.

§ 6716. Prohibited discrimination

(a) No person in the United States shall be excluded from participating in, be denied the benefits of, or be subject to discrimination under, a program or activity of a State government or unit of general local government because of race, color, national origin, or sex when the government receives a payment under this chapter.

(b) The following prohibitions and exemptions also apply to a program or activity of a State government or unit of general local government when the government receives a payment under this chapter:

(1) a prohibition against discrimination because of age under the Age Discrimination Act of 1975 (42 U.S.C. 6101 et seq.).

(2) a prohibition against discrimination against an otherwise qualified handicapped individual under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

(3) a prohibition against discrimination because of religion, or an exemption from that prohibition, under the Civil Rights Act of 1964 (42 U.S.C. 2000a et seq.) or title VIII of the Act of April 11, 1968 (known as the Civil Rights Act of 1968) (42 U.S.C. 3601 et seq.).

(c)(1) Subsection (a) and (b) of this section do not apply when the government shows, by clear and convincing evidence, that a payment received under this chapter is not used to pay for any part of the program or activity.

(2) Subsection (b)(2) of this section does not apply to construction projects begun before January 1, 1977.

(d) The Secretary of the Treasury shall try to make agreements with heads of agen-

cies of the United States Government and State agencies to investigate noncompliance with this section. An agreement shall—

(1) describe the cooperative efforts to be taken (including sharing civil rights enforcement personnel and resources) to obtain compliance with this section; and

(2) provide for notifying immediately the Secretary of actions brought by the United States Government or State agencies against a State government or unit of general local government alleging a violation of a civil rights law or a regulation prescribed under a civil rights law.

§ 6717. Discrimination proceedings

(a) By the 10th day after the Secretary of the Treasury makes a finding of discrimination or receives a holding of discrimination about a State government or unit of general local government, the Secretary shall submit a notice of noncompliance to the government. The notice shall state the basis of the finding or holding.

(b) The State government or unit of general local government may present evidence informally to the Secretary within 30 days after the Secretary submits a notice of noncompliance to the government. Except as provided in subsection (e) of this section, the government may present evidence on whether—

(1) a person in the United States has been excluded or denied benefits of, or discriminated against under, the program or activity of the government, in violation of section 6716(a) of this title;

(2) the program or activity of the government violated a prohibition described in section 6716(b) of this title; and

(3) a part of that program or activity has been paid for with a payment received under this chapter.

(c) By the end of the 30-day period under subsection (b) of this section, the Secretary shall decide whether the State government or unit of general local government has not complied with section 6716(a) or (b) of this title, except when the government has made a compliance agreement under section 6719 of this title. When the Secretary decides that the government has not complied, the Secretary shall suspend payments to the government under this chapter unless by the 10th day after the decision the government—

(1) makes a compliance agreement under section 6719 of this title; or

(2) requests a proceeding under subsection (d)(1) of this section.

(d)(1) A proceeding requested under subsection (c)(2) of this section shall begin by the 30th day after the Secretary receives a request for the proceeding. The hearing shall be before an administrative law judge appointed under section 3105 of title 5. By the 30th day after the beginning of the proceeding, the judge shall issue a preliminary decision based on the record at the time on whether the State government or unit of general local government is likely to prevail in showing compliance with section 6716(a) or (b) of this title.

(2) When the administrative law judge decides at the end of a proceeding under paragraph (1) of this subsection that the State government or unit of general local government has—

(A) not complied with section 6716(a) or (b) of this title, the judge may order payments to the government under this chapter terminated; or

(B) complied with section 6716(a) or (b) of this title, a suspension under section

6718(a)(1)(A) of this title shall be discontinued promptly.

(3) An administrative law judge may not issue a preliminary decision that the government is not likely to prevail when the judge has issued a decision described in paragraph (2)(A) of this subsection.

(e) In a proceeding under subsections (b)-(d) of this section on a program or activity of a State government or unit of general local government about which a holding of discrimination has been made, the Secretary or administrative law judge may consider only whether a payment under this chapter was used to pay for any part of the program or activity. The holding is conclusive. If the holding is reversed by an appellate court, the Secretary or judge shall end the proceeding.

§ 6718. Suspension and termination of payments in discrimination proceedings

(a)(1) The Secretary of the Treasury shall suspend payment under this chapter to a State government or unit of general local government—

(A) if an administrative law judge appointed under section 3105 of title 5 issues a preliminary decision in a proceeding under section 6717(d)(1) of this title that the government is not likely to prevail in showing compliance with section 6716(a) and (b) of this title;

(B) except as provided in section 6717(d)(2)(B) of this title, when the administrative law judge decides at the end of the proceeding that the government has not complied with section 6716(a) or (b) of this title, unless the government makes a compliance agreement under section 6719 of this title by the 30th day after the decision; or

(C) when required under section 6717(c) of this title.

(2) Except as provided in section 6717(d)(2) of this title, a suspension already ordered under paragraph (1)(A) of this subsection continues in effect when the administrative law judge makes a decision under paragraph (1)(B) of this subsection.

(b) When a holding of discrimination is reversed by an appellate court, a suspension or termination of payments in a proceeding about the holding shall be discontinued.

(c) The Secretary may resume payment to a State government or unit of general local government of payments suspended by the Secretary only—

(1) at the time and under the conditions stated in—

(A) the approval by the Secretary of a compliance agreement under section 6719(a)(1) of this title; or

(B) a compliance agreement under section 6719(a) of this title;

(2) when the government complies completely with an order of a United States court, a State court, or administrative law judge that covers all matters raised in a notice of noncompliance submitted by the Secretary under section 6717(a) of this title;

(3) when a United States court, a State court, or an administrative law judge decides (including a judge in a proceeding under section 6717(d)(1) of this title), that the government has complied with section 6716(a) and (b) of this title; or

(4) when a suspension is discontinued under subsection (b) of this section.

(d) Compliance by the government under subsection (c) of this section may include paying restitution to the person injured because the government did not comply with section 6716(a) or (b) of this title.

(e) The Secretary may resume payment to a State government or unit of general local

government of payments terminated under section 6717(d)(2) of this title only when the decision resulting in the termination is reversed by an appellate court.

§ 6719. Compliance agreements

(a) A compliance agreement is an agreement—

(1) approved by the Secretary of the Treasury between the governmental authority responsible for prosecuting a claim or complaint that is the basis of a holding of discrimination and the chief executive officer of the State government or unit of general local government that has not complied with section 6716(a) or (b) of this title; or

(2) between the Secretary and the chief executive officer.

(b) A compliance agreement—

(1) shall state the conditions the State government or unit of general local government has agreed to comply with that would satisfy the obligations of the government under section 6716(a) and (b) of this title;

(2) shall cover each matter that has been found not to comply, or would not comply, with section 6716(a) or (b) of this title; and

(3) may be a series of agreements that dispose of those matters.

(c) The Secretary shall submit a copy of the compliance agreement to each person who filed a complaint referred to in section 6721(b) of this title, or, if an agreement under subsection (a)(1) of this section, each person who filed a complaint with a governmental authority, about a failure to comply with section 6716(a) or (b) of this title. The Secretary shall submit the copy by the 15th day after an agreement is made. However, when the Secretary approves an agreement under subsection (a)(1) of this section after the agreement is made, the Secretary may submit the copy by the 15th day after approval of the agreement.

§ 6720. Enforcement by the Attorney General of prohibitions on discrimination

The Attorney General may bring a civil action in an appropriate district court of the United States against a State government or unit of general local government that the Attorney General has reason to believe has engaged or is engaging in a pattern or practice in violation of section 6716(a) or (b) of this title. The court may grant—

(1) a temporary restraining order;

(2) an injunction; or

(3) an appropriate order to ensure enjoyment of rights under section 6716(a) or (b) of this title, including an order suspending, terminating, or requiring repayment of, payments under this chapter or placing additional payments under this chapter in escrow pending the outcome of the action.

§ 6721. Civil action by a person adversely affected

(a) When a State government, a unit of general local government, or an officer or employee of a State government or unit of general local government acting in an official capacity, engages in a practice prohibited by this chapter, a person adversely affected by the practice may bring a civil action in an appropriate district court of the United States or a State court of general jurisdiction. Before bringing an action under this section, the person must exhaust administrative remedies under subsection (b) of this section.

(b) A person adversely affected must file an administrative complaint with the Secretary of the Treasury or the head of another agency of the United States Government or the State agency with which the Secretary has an agreement under section 6718(d) of

this title. Administrative remedies are deemed to be exhausted after the 90th day after the complaint was filed if the Secretary, the head of the Government agency, or the State agency—

(1) issues a decision that the government has not failed to comply with this chapter; or

(2) does not issue a decision on the complaint.

(c) In an action under this section, the court—

(1) may grant—

(A) a temporary restraining order;

(B) an injunction; or

(C) another order, including suspension, termination, or repayment of, payments under this chapter or placement of additional payments under this chapter in escrow pending the outcome of the action; and

(2) to enforce compliance with section 6716(a) or (b) of this title, may allow a prevailing party (except the United States Government) a reasonable attorney's fee.

(d) In an action under this section to enforce compliance with section 6716(a) or (b) of this title, the Attorney General may intervene in the action when the Attorney General certifies that the action is of general public importance. The United States Government is entitled to the same relief as if the Government had brought the action and is liable for the same fees and costs as a private person.

§ 6722. Judicial review

(a) A State government or unit of general local government receiving notice from the Secretary of the Treasury about withholding payments under section 6704(c) of this title, suspending payments under section 6718(a)(1)(B) of this title, or terminating payments under section 6717(d)(2)(A) of this title, may apply for review of the action of the Secretary by filing a petition for review with the court of appeals of the United States for the circuit in which the government is located. The petition must be filed by the 60th day after the notice is received. The clerk of the court immediately shall send a copy of the petition to the Secretary and the Attorney General.

(b) The Secretary shall file with the court a record of the proceeding on which the Secretary based the action. The court may consider only objections to the action of the Secretary that were presented before the Secretary.

(c) The court may affirm, change, or set aside any part of the action of the Secretary. The findings of fact by the Secretary are conclusive if supported by substantial evidence in the record. When a finding is not supported by substantial evidence in the record, the court may remand the case to the Secretary to take additional evidence. The Secretary may make new or modified findings and shall certify additional proceedings to the court.

(d) A judgment of the court under this section may be reviewed only by the Supreme Court under section 1254 of title 28.

§ 6723. Audits, investigations, and reviews

(a)(1) Except as provided in this section, a State government or unit of general local government expecting to receive a payment under this chapter shall have an independent audit made of the financial statements of the government at least once every 3 years to determine compliance with this chapter. The audit shall be carried out under generally accepted auditing standards.

(2) Paragraph (1) of this subsection does not apply to a government for a fiscal year in which the government receives less than \$25,000 under this chapter. However, an audit of the financial statements of the government for that fiscal year that is required under State or local law is deemed to be compliance with paragraph (1).

(3) An audit of financial statements of a government carried out under another law of the United States for a fiscal year is deemed to be compliance with paragraph (1) for that year when the audit substantially complies with the requirements of paragraph (1).

(b)(1) A State government or unit of general local government may elect to waive application of subsection (a)(1) of this section when—

(A) the financial statements of the government are audited by independent auditors under State or local law at least once every 3 years;

(B) the government certifies that the audit is carried out under generally accepted auditing standards; and

(C) the auditing provisions of the State or local law are applicable to the entitlement period to which the waiver applies.

(2) The election by the government shall include a brief description of the auditing standards used under the State or local law and specify the entitlement period to which the waiver applies.

(c) Under regulations of the Secretary of the Treasury, the Secretary may waive a requirement of subsections (a)(1) and (b) of this section for a State government or unit of general local government for a fiscal year when the Secretary decides that the financial statements of the government for the year—

(1) cannot be audited, and the government shows substantial progress in making the statements auditable; or

(2) have been audited by a State agency that does not follow generally accepted auditing standards or that is not independent, and the State agency shows progress in meeting generally accepted auditing standards or in becoming independent.

(d) A series of audits carried out over a period of not more than 3 years covering the total amount in the financial accounts of a State government or unit of general local government is deemed to be a single audit under subsections (a)(1) and (b) of this section.

(e) An opinion on an audit carried out under this section shall be provided to the Secretary in the form and at times required by the Secretary.

(f)(1) The Secretary shall maintain regulations providing reasonable and specific time limits for the Secretary to—

(A) carry out an investigation and make a finding after receiving a complaint referred to in section 6721(b) of this title, a determination by a State or local administrative agency, or other information about a possible violation of this chapter;

(B) carry out audits and reviews (including investigations of allegations) about possible violations of this chapter; and

(C) advise a complainant of the status of an audit, investigation, or review of an allegation by the complainant of a violation of section 6716(a) or (b) of this title or other provision of this chapter.

(2) The maximum time limit under paragraph (1)(A) of this subsection is 90 days.

(g) The Comptroller General shall carry out reviews of the activities of the Secretary, State governments, and units of gener-

al local government necessary for Congress to evaluate compliance and operations under this chapter.

§ 6724. Reports

(a) Before June 2 of each year, the Secretary of the Treasury personally shall report to Congress on—

(1) the status and operation of the State and Local Government Fiscal Assistance Trust Fund during the prior fiscal year; and
(2) the administration of this chapter, including a complete and detailed analysis of—

(A) actions taken to comply with sections 6716–6720 of this title, including a description of the kind and extent of noncompliance and the status of pending complaints;

(B) the extent to which State governments and units of general local government receiving payments under this chapter have complied with sections 6704, 6715, and 6723(a)–(e) and (g) of this title, including a description of the kind and extent of noncompliance and actions taken to ensure the independence of audits conducted under section 6723(a)–(e) and (g);

(C) the way in which payments under this chapter have been distributed in the jurisdictions receiving payments; and

(D) significant problems in carrying out this chapter and recommendations for legislation to remedy the problems.

(b)(1) At the end of each fiscal year, each State government and each unit of general local government receiving a payment under this chapter shall submit a report to the Secretary. The report shall be submitted in the form and at a time prescribed by the Secretary and shall be available to the public for inspection. The report shall state—

(A) the amounts and purposes for which the payment has been appropriated, expended, or obligated during the fiscal year;

(B) the relationship of the payment to the relevant functional items in the budget of the government; and

(C) the differences between the actual and proposed use of the payment.

(2) The Secretary shall provide a copy of a report submitted under paragraph (1) of this subsection by a unit of general local government to the chief executive officer of the State in which the government is located. The Secretary shall provide the report in the way and form prescribed by the Secretary.

(c) The Secretary shall prescribe regulations for applying this section to State governments and units of general local government that do not adopt budgets.

CHAPTER 69—PAYMENT FOR ENTITLEMENT LAND

Sec.

6901. Definitions.

6902. Authority and eligibility.

6903. Payments.

6904. Additional payments.

6905. Redwood National Park and the Lake Tahoe Basin.

6906. Authorization of appropriations.

§ 6901. Definitions

In this chapter—

(1) "entitlement land" means land owned by the United States Government—

(A) that is in the National Park System or the National Forest System, including wilderness areas and lands described in section 2 of the Act of June 22, 1948 (16 U.S.C. 577d), and section 1 of the Act of June 22, 1956 (16 U.S.C. 577d-1);

(B) the Secretary of the Interior administers through the Bureau of Land Management;

(C) dedicated to the use of the Government for water resource development projects;

(D) on which are located semi-active or inactive installations (except industrial installations) that the Secretary of the Army keeps for mobilization and for reserve component training;

(E) that is a dredge disposal area under the jurisdiction of the Secretary of the Army;

(F) that is located in the vicinity of Purgatory River Canyon and Pinon Canyon, Colorado, and acquired after December 23, 1981, by the United States Government to expand the Fort Carson military installation; or

(G) that is a reserve area (as defined in section 401(g)(3) of the Act of June 15, 1935 (16 U.S.C. 715s(g)(3))).

(2) "unit of general local government" means—

(A) a county, city, township, borough existing in Alaska on October 20, 1976, or other political subdivision of a State that the Secretary of the Interior, on the same basis that the Secretary of Commerce uses for general statistical purposes, decides is a general purpose political subdivision of a State;

(B) the Commonwealth of Puerto Rico;

(C) Guam;

(D) the Commonwealth of the Northern Mariana Islands; and

(E) the Virgin Islands.

§ 6902. Authority and eligibility

(a) The Secretary of the Interior shall make a payment for each fiscal year to each unit of general local government in which entitlement land is located. A unit may use the payment for any governmental purpose.

(b) A unit of general local government may not receive a payment for land for which payment under this chapter otherwise may be received if the land was owned or administered by a State or unit and was exempt from real estate taxes when the land was conveyed to the United States Government. This subsection does not apply to payments for land a State or unit acquires from a private party to donate to the Government within 8 years of acquisition.

(c) A unit of general local government receiving payment for a fiscal year for land under the Act of August 28, 1937 (43 U.S.C. 1181a et seq.), or the Act of May 24, 1939 (ch. 144, 53 Stat. 753), may not receive a payment under this chapter for the land for that fiscal year. This chapter does not apply to either Act.

(d) If the total payment to a unit of general local government for a fiscal year would be less than \$100, the Secretary may not make the payment.

§ 6903. Payments

(a) In this section—

(1) "payment law" means—

(A) the Act of June 20, 1910 (ch. 310, 36 Stat. 557);

(B) section 33 of the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1012);

(C) the Act of May 23, 1908 (16 U.S.C. 500);

(D) section 5 of the Act of June 22, 1948 (16 U.S.C. 577g, 577g-1);

(E) section 401(c)(2) of the Act of June 15, 1935 (16 U.S.C. 715s(c)(2));

(F) section 17 of the Federal Power Act (16 U.S.C. 810);

(G) section 35 of the Act of February 25, 1920 (30 U.S.C. 191);

(H) section 6 of the Mineral Leasing Act for Acquired Lands (30 U.S.C. 355);

(I) section 3 of the Act of July 31, 1947 (30 U.S.C. 603); and

(J) section 10 of the Act of June 28, 1934 (known as the Taylor Grazing Act) (43 U.S.C. 315i).

(2) population shall be determined on the same basis that the Secretary of Commerce determines resident population for general statistical purposes.

(3) a unit of general local government may not be credited with a population of more than 50,000.

(4) if any part of a smaller unit is located within another unit, entitlement land within both units is deemed to be located within the smaller unit.

(b)(1) A payment under section 6902 of this title is equal to the greater of—

(A) 75 cents for each acre of entitlement land located within a unit of general local government (but not more than the limitation determined under subsection (c) of this section) reduced (but not below 0) by amounts the unit received in the prior fiscal year under a payment law; or

(B) 10 cents for each acre of entitlement land located in the unit (but not more than the limitation determined under subsection (c) of this section).

(2) The chief executive officer of a State shall submit to the Secretary of the Interior a statement on the amounts of payments the State transfers to each unit of general local government in the State out of amounts received under a payment law.

(c)(1) The limitation for a unit of general local government with a population of not more than 4,999 is \$50 times the population.

(2) The limitation for a unit of general local government with a population of at least 5,000 is the following amount (rounding the population off to the nearest thousand):

If population equals—	the limitation is equal to the population times—
5,000.....	\$50.00
6,000.....	47.00
7,000.....	44.00
8,000.....	41.00
9,000.....	38.00
10,000.....	35.00
11,000.....	34.00
12,000.....	33.00
13,000.....	32.00
14,000.....	31.00
15,000.....	30.00
16,000.....	29.50
17,000.....	29.00
18,000.....	28.50
19,000.....	28.00
20,000.....	27.50
21,000.....	27.20
22,000.....	26.90
23,000.....	26.60
24,000.....	26.30
25,000.....	26.00
26,000.....	25.80
27,000.....	25.60
28,000.....	25.40
29,000.....	25.20
30,000.....	25.00
31,000.....	24.75
32,000.....	24.50
33,000.....	24.25
34,000.....	24.00
35,000.....	23.75
36,000.....	23.50
37,000.....	23.25
38,000.....	23.00
39,000.....	22.75
40,000.....	22.50
41,000.....	22.25
42,000.....	22.00
43,000.....	21.75
44,000.....	21.50
45,000.....	21.25

§ 6904. Additional payments

(a) In addition to payments the Secretary of the Interior makes under section 6902 of this title, the Secretary shall make a payment for each fiscal year to a unit of general local government collecting and distributing real property taxes (including a unit in Alaska outside the boundaries of an organized borough) in which is located an interest in land that—

(1) the United States Government acquires for—

(A) the National Park System; or
(B) the National Forest Wilderness Areas; and

(2) was subject to local real property taxes within the 5-year period before the interest is acquired.

(b) The Secretary shall make payments only for the 5 fiscal years after the fiscal year in which the interest in land is acquired. Under guidelines the Secretary prescribes, the unit of general local government receiving the payment from the Secretary shall distribute payments proportionally to units and school districts that lost real property taxes because of the acquisition of the interest. A unit receiving a distribution may use a payment for any governmental purpose.

(c) Each yearly payment by the Secretary under this section is equal to one percent of the fair market value of the interest in land on the date the Government acquires the interest. However, a payment may not be more than the amount of real property taxes levied on the property during the last fiscal year before the fiscal year in which the interest is acquired. A decision on fair market value under this section may not include an increase in the value of an interest because the land is rezoned when the rezoning causes the increase after the date of enactment of a law authorizing the acquisition of an interest under subsection (a) of this section.

(d) The Secretary may prescribe regulations under which payments may be made to units of general local government when subsections (a) and (b) of this section will not carry out the purpose of subsections (a) and (b).

§ 6905. Redwood National Park and the Lake Tahoe Basin

(a) The Secretary of the Interior shall make a payment for each fiscal year to each unit of general local government in which an interest in land owned by the United States Government in the Redwood National Park is located. A unit may use the payment for any governmental purpose. The payment shall be made as provided in section 6903 of this title and shall include an amount payable under section 6903.

(b)(1) In addition to payments the Secretary makes under subsection (a) of this section, the Secretary shall make a payment for each fiscal year to each unit of general local government in which is located an interest in land—

(A) owned by the Government in the Redwood National Park; or

(B) acquired in the Lake Tahoe Basin under the Act of December 23, 1980 (Public Law 96-586, 94 Stat. 3383).

(2) The payment shall be made as provided in section 6904 of this title and shall include an amount payable under section

6904. However, an amount computed but not paid because of the first sentence of subsection (b) and the 2d sentence of subsection (c) of section 6904 shall be carried forward and applied to future years in which the payment would not otherwise equal the amount of real property taxes assessed and levied on the land during the last fiscal year before the fiscal year in which the interest was acquired until the amount is applied completely.

(3) The unit of general local government may use the payment for any governmental purpose.

(4) The Redwoods Community College District is a school district under section 6904(b) of this title.

§ 6906. Authorization of appropriations

Necessary amounts may be appropriated to the Secretary of the Interior to carry out this chapter. Amounts are available only as provided in appropriation laws.

CHAPTER 71—JOINT FUNDING SIMPLIFICATION

- Sec.
7101. Purposes.
7102. Definitions.
7103. Authority of the President and heads of executive agencies.
7104. Processing project requests to be financed by at least 2 assistance programs.
7105. Prescribing uniform technical and administrative provisions.
7106. Delegation of supervision of assistance.
7107. Joint management funds.
7108. Limitation on authority under sections 7105-7107.
7109. Appropriations available for joint financing.
7110. Use of joint financing provisions for Federal-State assisted projects.
7111. Report to Congress.
7112. Expiration date.

§ 7101. Purposes

The purposes of this chapter are to—

(1) enable States, local governments, and private nonprofit organizations to use assistance of the United States Government more effectively and efficiently;

(2) adapt the assistance more readily to particular needs through wider use of projects that are supported by more than one executive agency, assistance program, or appropriation of the United States Government; and

(3) encourage Federal-State arrangements under which local governments and private nonprofit organizations may more effectively and efficiently combine Federal and State resources to support projects of common interest to those local governments and those organizations.

§ 7102. Definitions

In this chapter—

(1) "applicant" means a State, local government, or private nonprofit organization applying for assistance for one project.

(2) "assistance program" means a program of the United States Government providing assistance through a grant or contract but does not include revenue sharing, a loan, a loan guarantee, or insurance.

(3) "local government" means a county, city, political subdivision of a county or city, or other general purpose political subdivision of a State, a school district, a council of governments, or other instrumentality of a local government.

(4) "project" means an undertaking that includes components that contribute mate-

rially to carrying out one purpose or closely related purposes and are proposed or approved for assistance under—

(A) more than one United States Government program; or

(B) at least one Government program and at least one State program.

(5) "State" means a State of the United States, the District of Columbia, a territory or possession of the United States, an agency or instrumentality of a State, and a tribe as defined in section 3(c) of the Indian Financing Act of 1974 (25 U.S.C. 1452(c)).

§ 7103. Authority of the President and heads of executive agencies

(a) The President shall prescribe necessary regulations to carry out section 7101 of this title and to ensure that this chapter is applied by all executive agencies consistently. The regulations may require executive agencies to adopt or prescribe procedures requiring applicants for assistance for a project to be jointly financed under this chapter to take steps to—

(1) get the views and recommendations of States and local governments that may be significantly affected by the project; and

(2) resolve questions of common interest to those States and local governments before making application.

(b) Subject to regulations prescribed under subsection (a) of this section and other law, the head of an executive agency may do the following by an order of the agency head or by agreement with another executive agency:

(1) identify related programs likely to be particularly suitable in providing joint financing for specific kinds of projects.

(2) to assist in planning and developing a project financed from different programs, develop and prescribe—

- (A) guidelines;
- (B) model or illustrative projects;
- (C) joint or common application forms; and
- (D) other materials or guidance.

(3) review administrative program requirements to identify requirements that may impede joint financing of a project and modify the requirements when appropriate.

(4) establish common technical or administrative regulations for related programs to assist in providing joint financing to support a specific project or class of projects.

(5) establish joint or common application processing and project supervision procedures, including procedures for designating—

(A) a lead agency responsible for processing applications; and

(B) a managing agency responsible for project supervision.

(c) The head of an executive agency shall—

(1) take maximum action to carry out section 7101 of this title in conducting an assistance program of the agency; and

(2) consult and cooperate with the heads of other executive agencies to carry out section 7101 of this title in conducting assistance programs of different executive agencies that may be used jointly to finance projects undertaken by States, local governments, or private nonprofit organizations.

§ 7104. Processing project requests to be financed by at least 2 assistance programs

In processing an application or request for assistance for a project to be financed by at least 2 assistance programs, the head of an executive agency shall take action that will ensure that—

(1) required reviews and approvals are handled expeditiously;

(2) complete account is taken of special considerations of timing that are made known by the applicant that would affect the feasibility of a jointly financed project;

(3) an applicant is required to deal with a minimum number of representatives of the United States Government;

(4) an applicant is promptly informed of a decision or special problem that could affect the feasibility of providing joint assistance under the application; and

(5) an applicant is not required to get information or assurances from one executive agency for a requesting executive agency when the requesting agency may get the information or assurances directly.

§ 7105. Prescribing uniform technical and administrative provisions

(a) To make participation in a project easier than would be possible because of varying or conflicting technical or administrative regulations and procedures not required by law, the head of an executive agency may prescribe uniform provisions about inconsistent or conflicting requirements on—

(1) financial administration of the project (including accounting, reporting and auditing, and maintaining a separate bank account), to the extent consistent with section 7108 of this title;

(2) the timing of payments by the United States Government for the project when one schedule or a combined schedule is to be established for the project;

(3) providing assistance by grant rather than procurement contract or by procurement contract rather than by grant; and

(4) accountability for, or the disposition of, records, property, or structures acquired or constructed with assistance from the Government when common regulations are established for the project.

(b) To make easier the processing of applications for assistance, the head of an executive agency may provide for review of proposals for a project by one panel, board, or committee where reviews by separate panels, boards, or committees are not specifically required by law.

(c) Notwithstanding a requirement that one public agency or a specific public agency be established or designated to carry out or supervise that part of the assistance from the Government under an assistance program for a jointly financed project, the head of the executive agency carrying out the program may waive the requirement when—

(1) administration by another public agency is consistent with State or local law and the objectives of the assistance program; and

(2)(A) the waiver is requested by the head of a unit of general government certifying jurisdiction over the public agencies concerned; or

(B) the State or local public agencies concerned agree to the waiver.

§ 7106. Delegation of supervision of assistance

With the approval of the President, the head of an executive agency may delegate or otherwise arrange to have another executive agency carry out or supervise a project or class of projects jointly financed under this chapter. A delegation—

(1) shall be made under conditions ensuring that duties and powers delegated are exercised consistent with law; and

(2) may not relieve the head of an executive agency of responsibility for the proper and efficient management of a project for which the agency provides assistance.

§ 7107. Joint management funds

(a) In supporting a project, a joint management fund may be established to administer more effectively amounts received from more than one assistance program or appropriation. A proportional share of the amount required to pay a grantee shall be transferred periodically to the fund from each program or appropriation. When a project is completed, the grantee shall return to the fund an amount not expended.

(b) An account in a joint management fund is subject to an agreement made by the heads of the executive agencies providing assistance for the project about the responsibilities of each agency. An agreement shall—

(1) ensure the availability of necessary information to the executive agencies and Congress;

(2) provide that the agency administering a fund is responsible and accountable by program and appropriation for the amounts provided for the purposes of each account in the fund; and

(3) include procedures for returning, subject to fiscal year limitations, an excess amount to participating executive agencies under the applicable appropriation. An excess amount of an expired appropriation lapses from the fund.

(c) For each project financed through an account in a joint management fund, a recipient of an amount from the fund shall keep records prescribed by the head of the executive agency responsible for administering the fund. The records shall include—

(1) the amount and disposition by the recipient of assistance received under each program and appropriation;

(2) the total cost of the project for which assistance was given or used;

(3) that part of the cost of the project provided from other sources; and

(4) other records that will make it easier to carry out an audit.

(d) Records of a recipient related to an amount received from a joint management fund shall be made available to the head of the executive agency responsible for administering the fund and the Comptroller General for inspection and audit.

(e) For a project subject to a joint management fund, one non-Government share may be established conforming to—

(1) the proportional shares applicable to the assistance programs involved; and

(2) the proportional shares of an amount transferred to the project account from each of the programs.

§ 7108. Limitation on authority under sections 7105-7107

Under regulations prescribed by the President, the head of an executive agency may act under sections 7105-7107 of this title for a project assisted under at least 2 assistance programs. The regulations shall ensure that the head of an executive agency acts under those sections only—

(1) when a problem cannot be adequately solved through other action under this chapter or other law;

(2) when necessary to promote expeditious processing of applications or effective and efficient administration of the project; and

(3) in a way consistent with protecting the interest of the United States Government and with the program purposes and requirements of law.

§ 7109. Appropriations available for joint financing

An appropriation available for technical assistance or personnel training under an assistance program is available for technical assistance and training for a project proposed or approved for joint financing involving the program and another assistance program.

§ 7110. Use of joint financing provisions for Federal-State assisted projects

Under regulations prescribed by the President, the head of an executive agency may make an agreement with a State to extend the benefits of this chapter to a project involving assistance from at least one executive agency and at least one State agency. The agreement may include arrangements to process requests or administer assistance on a joint basis.

§ 7111. Report to Congress

By February 3, 1984, the President shall submit to Congress a report on actions taken under this chapter and make recommendations for its continuation, amendment, or termination. The report shall include a detailed evaluation of the operation of the chapter, including information on the benefits and costs of jointly financed projects that accrue to participating States, local governments, private nonprofit organizations, and the United States Government.

§ 7112. Expiration date

This chapter expires on February 3, 1985.

CHAPTER 73—ADMINISTERING BLOCK GRANTS

Sec.

7301. Purpose.

7302. Definitions.

7303. Reports and public hearings on proposed uses of amounts.

7304. Availability of records.

7305. State auditing requirements.

§ 7301. Purpose

It is the purpose of this chapter to ensure that—

(1) block grant amounts are allocated for programs of special importance to meet the needs of local governments, residents of local governments, and other eligible entities; and

(2) all eligible local governments, residents of local governments, and other eligible entities are treated fairly in distributing block grant amounts.

§ 7302. Definitions

In this chapter—

(1) "block grant amounts" means amounts received for a program that—

(A) directly allocates amounts to States only, except for amounts allocated for use by the agency administering the program; and

(B) provides that the State may use any part of the amounts at its discretion to continue to support activities financed on August 12, 1981, under programs whose authorizations were discontinued by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35, 95 Stat. 357) and that were financed on August 12, 1981, by allocations by the United States Government to local governments or other eligible entities, or both local governments and other eligible entities.

(2) "State" includes the District of Columbia and territories and possessions of the United States.

§ 7303. Reports and public hearings on proposed uses of amounts

(a)(1) The chief executive officer of each State shall prepare for each fiscal year a

report on the proposed use during the fiscal year of block grant amounts received by the State. The report shall include—

(A) a statement of goals and objectives;

(B) information on the types of activities to be supported, geographic areas to be served, and categories or characteristics of individuals to be served; and

(C) the criteria for, and way of, distributing the amounts, including details on the way amounts will be distributed on the basis of need to carry out the purposes of the block grant amounts.

(2) Beginning with the fiscal year ending September 30, 1983, each report shall describe how the State met the goals, objectives, and needs in using the amounts described in the report for the prior fiscal year.

(b) A State may not receive block grant amounts for a fiscal year until the State conducts a public hearing, after adequate public notice, on the proposed use and distribution of the amounts set out in the report prepared under subsection (a) of this section for the fiscal year.

(c) Each report prepared under subsection (a) of this section and changes to the report shall be made public in the State on a timely basis and in a way that encourages comments from interested local government and persons.

§ 7304. Availability of records

To evaluate and review the use of block grant amounts, consolidated assistance, and other grant programs established or provided for in the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35, 95 Stat. 357), records related to the amounts, assistance, or programs that are in the possession, custody, or control of a State, a political subdivision of a State, or a grantee of a State or political subdivision of a State shall be made available to the Comptroller General.

§ 7305. State auditing requirements

(a) The chief executive officer of each State shall conduct financial and compliance audits of block grant amounts received under the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35, 95 Stat. 357) and amounts received under a consolidated assistance program established or provided for in the Act. An audit shall be conducted for the 2-year period beginning on October 1, 1981, and for each 2-year period thereafter. As far as practicable, the audit shall be conducted consistent with standards the Comptroller General prescribes for the audit of governmental entities, programs, activities, and functions.

(b) An audit under subsection (a) of this section is in place of other financial and compliance audits of those amounts that the chief executive officer of the State is required to conduct under another provision of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35, 95 Stat. 357) unless the other provision, by explicit reference to this section, provides otherwise.

CHAPTER 91—GOVERNMENT CORPORATIONS

Sec.

9101. Definitions.

9102. Establishing and acquiring corporations.

9103. Budgets of wholly owned Government corporations.

9104. Congressional action on budgets of wholly owned Government corporations.

9105. Audits.

9106. Audit reports.

9107. Accounts.

9108. Obligations.

9109. Exclusion of a wholly owned Government corporation from this chapter.

§ 9101. Definitions

In this chapter—

(1) "Government corporation" means a mixed-ownership Government corporation and a wholly owned Government corporation.

(2) "mixed-ownership Government corporation" means—

(A) Amtrak.

(B) the Central Bank for Cooperatives.

(C) the Federal Deposit Insurance Corporation.

(D) the Federal Home Loan Banks.

(E) the Federal Intermediate Credit Banks.

(F) the Federal Land Banks.

(G) the National Credit Union Administration Central Liquidity Facility.

(H) the Regional Banks for Cooperatives.

(I) the Rural Telephone Bank when the ownership, control, and operation of the Bank are converted under section 410(a) of the Rural Electrification Act of 1936 (7 U.S.C. 950(a)).

(J) the United States Railway Association.

(K) the National Consumer Cooperative Bank.

(3) "wholly owned Government corporation" means—

(A) the Commodity Credit Corporation.

(B) the Export-Import Bank of the United States.

(C) the Federal Crop Insurance Corporation.

(D) Federal Prison Industries, Incorporated.

(E) the Federal Savings and Loan Insurance Corporation.

(F) the Government National Mortgage Association.

(G) the Overseas Private Investment Corporation.

(H) the Pennsylvania Avenue Development Corporation.

(I) the Pension Benefit Guaranty Corporation.

(J) the Rural Telephone Bank until the ownership, control, and operation of the Bank are converted under section 410(a) of the Rural Electrification Act of 1936 (7 U.S.C. 950(a)).

(K) the Saint Lawrence Seaway Development Corporation.

(L) the Secretary of Housing and Urban Development when carrying out duties and powers related to the Federal Housing Administration Fund.

(M) the Tennessee Valley Authority.

§ 9102. Establishing and acquiring corporations

An agency may establish or acquire a corporation to act as an agency only by or under a law of the United States specifically authorizing the action.

§ 9103. Budgets of wholly owned Government corporations

(a) Each wholly owned Government corporation shall prepare and submit each year to the President a business-type budget in a way, and before a date, the President pre-

scribes by regulation for the budget program.

(b) The budget program for each wholly owned Government corporation shall—

(1) contain estimates of the financial condition and operations of the corporation for the current and following fiscal years and the condition and results of operations in the last fiscal year;

(2) contain statements of financial condition, income and expense, and sources and use of money, an analysis of surplus or deficit, and additional statements and information to make known the financial condition and operations of the corporation, including estimates of operations by major activities, administrative expenses, borrowings, the amount of United States Government capital that will be returned to the Treasury during the fiscal year, and appropriations needed to restore capital impairments; and

(3) provide for emergencies and contingencies and otherwise be flexible so that the corporation may carry out its activities.

(c) The President shall submit the budget programs submitted by wholly owned Government corporations (as changed by the President) as part of the budget submitted to Congress under section 1105 of this title. The President thereafter may submit changes in a budget program of a corporation at any time.

§9104. Congressional action on budgets of wholly owned Government corporations

(a) Congress shall—

(1) consider budget programs for wholly owned Government corporations the President submits;

(2) make necessary appropriations authorized by law;

(3) make corporate financial resources available for operating and administrative expenses; and

(4) provide for repaying capital and the payment of dividends.

(b) This section does not—

(1) prevent a wholly owned Government corporation from carrying out or financing its activities as authorized under another law;

(2) affect section 26 of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831y); or

(3) affect the authority of a wholly owned Government corporation to make a commitment without fiscal year limitation.

§9105. Audits

(a)(1) Under regulations of the Comptroller General, the Comptroller General shall audit financial transactions of—

(A) wholly owned Government corporations; and

(B) mixed-ownership Government corporations during periods in which capital of the United States Government is invested in a mixed-ownership Government corporation.

(2) The Comptroller General shall audit each Government corporation at least once every 3 years. The Comptroller General shall audit the Federal Savings and Loan Insurance Corporation and Federal home loan banks on a calendar year basis.

(b) In conducting an audit under subsection (a) of this section, the Comptroller General—

(1) to the greatest extent the Comptroller General considers practicable, shall use reports of examinations of a Government corporation that a supervising administrative agency makes; and

(2) without regard to section 3709 of the Revised Statutes (41 U.S.C. 5), may make a

contract for professional services with a firm or organization for a temporary period or special purpose.

(c) An audit under subsection (a) of this section shall be conducted consistent with principles and procedures applicable to commercial corporate transactions where the accounts of a Government corporation usually are kept. A Government corporation shall—

(1) make available to the Comptroller General for audit all records and property of, or used by, the corporation that are necessary for the audit; and

(2) provide the Comptroller General with facilities for verifying transactions with the balances or securities held by depositaries, fiscal agents, or custodians.

(d) Regulations prescribed under subsection (a) of this section may provide that any part of an account of an accountable official about a financial transaction of a wholly owned Government corporation sent to the Comptroller General for settlement may be kept at the office of the corporation and that the Comptroller General may settle any part of the account on the basis of an examination during an audit. This subsection does not affect the authority of the Tennessee Valley Authority under section 9(b) of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831h(b)).

(e) The Comptroller General shall pay the cost of an audit under this section. A Government corporation shall reimburse the Comptroller General for the cost of the audit as determined by the Comptroller General. The Comptroller General shall deposit the reimbursement in the Treasury as miscellaneous receipts. Except as expressly provided by law, a Government corporation may not pay the cost of a private audit of the financial records of the corporation.

(f) An audit under subsection (a) of this section is in place of an audit of the financial transactions of a Government corporation the Comptroller General is required to make in reporting to Congress or the President under another law.

(g) Necessary amounts are authorized to be appropriated to the Comptroller General to carry out this section.

§9106. Audit reports

(a) The Comptroller General shall submit to Congress a report on each audit of a Government corporation under section 9105 of this title not later than 6.5 months after the end of the last year covered by the audit. The report shall state the scope of the audit and include—

(1) a statement (showing intercorporate relations) of assets, liabilities, capital, and surplus or deficit;

(2) a statement of surplus or deficit analysis;

(3) a statement of income and expenditures;

(4) a statement of sources and the use of money;

(5) specifically each financial transaction or undertaking the Comptroller General believes was carried out or made without authority of law;

(6) comments and information the Comptroller General considers necessary to keep Congress informed about the operations and financial condition of the Government corporation, including a statement of impaired capital noticed and recommendations for the return of capital of the United States Government or the payment of dividends the Comptroller General believes should be made; and

(7) other recommendations the Comptroller General considers advisable.

(b) The Comptroller General shall give the President, the Secretary of the Treasury, and the Government corporation a copy of the report when it is submitted to Congress.

§9107. Accounts

(a) With the approval of the Comptroller General, a Government corporation may consolidate its cash into an account if the cash will be expended as provided by law.

(b) The Secretary of the Treasury shall keep the accounts of a Government corporation. If the Secretary approves, a Federal reserve bank or a bank designated as a depository or fiscal agent of the United States Government may keep the accounts. The Secretary may waive the requirements of this subsection.

(c)(1) Subsection (b) of this section does not apply to maintaining a temporary account of not more than \$50,000 in one bank.

(2) Subsection (b) of this section does not apply to a mixed-ownership Government corporation when the corporation has no capital of the Government.

(3) Subsection (b) of this section does not apply to the Federal Intermediate Credit Banks, the Central Bank for Cooperatives, the Regional Banks for Cooperatives, the National Consumer Cooperative Bank, or the Federal Land Banks. However, the head of each of those banks shall report each year to the Secretary the names of depositories where accounts are kept. If the Secretary considers it advisable when an annual report is received, the Secretary may make a written report to the corporation, the President, and Congress.

§9108. Obligations

(a) Before a Government corporation issues obligations and offers obligations to the public, the Secretary of the Treasury shall prescribe—

(1) the form, denomination, maturity, interest rate, and conditions to which the obligations will be subject;

(2) the way and time the obligations are issued; and

(3) the price for which the obligations will be sold.

(b) A Government corporation may buy or sell a direct obligation of the United States Government, or an obligation on which the principal, interest, or both, is guaranteed, of more than \$100,000 only when the Secretary approves the purchase or sale. The Secretary may waive the requirement of this subsection under conditions the Secretary may decide.

(c) The Secretary may designate an officer or employee of an agency to carry out this section if the head of the agency agrees.

(d)(1) This section does not apply to a mixed-ownership Government corporation when the corporation has no capital of the Government.

(2) Subsections (a) and (b) of this section do not apply to the Rural Telephone Bank (when the ownership, control, and operation of the Bank are converted under section 410(a) of the Rural Electrification Act of 1936 (7 U.S.C. 950(a))), the Federal Intermediate Credit Banks, the Central Bank for Cooperatives, the Regional Banks for Cooperatives, the National Consumer Cooperative Bank, and the Federal Land Banks. However, the head of each of those banks shall consult with the Secretary before taking action of the kind described in subsection (a) or (b). If agreement is not reached, the Secretary may make a written report to the corporation, the President,

and Congress on the reasons for the Secretary's disagreement.

§ 9109. Exclusion of a wholly owned Government corporation from this chapter

When the President considers it practicable and in the public interest, the President shall include in the budget submitted to Congress under section 1105 of this title a recommendation that a wholly owned Government corporation be deemed to be an agency (except a corporation) under chapter II of this title and for fiscal matters. If Congress approves the recommendation, the corporation is deemed to be an agency (except a corporation) under chapter II and for fiscal matters for fiscal years beginning after the fiscal year of approval and is not subject to this chapter. The corporate entity is not affected by this section.

CHAPTER 93—SURETIES AND SURETY BONDS

Sec.

9301. Definitions.

9302. Prohibition against surety bonds for United States Government personnel.

9303. Use of Government obligations instead of surety bonds.

9304. Surety corporations.

9305. Authority and revocation of authority of surety corporations.

9306. Surety corporations acting outside area of incorporation and place of principal office.

9307. Civil actions and judgments against surety corporations.

9308. Civil penalty.

9309. Priority of sureties.

§ 9301. Definitions

In this chapter—

(1) "person" means an individual, a trust, an estate, a partnership, and a corporation.

(2) "Government obligation" means a public debt obligation of the United States Government and an obligation whose principal and interest is unconditionally guaranteed by the Government.

§ 9302. Prohibition against surety bonds for United States Government personnel

An agency (except a mixed-ownership Government corporation) may not require or obtain a surety bond for a member of the uniformed services or an officer or employee of the United States Government in carrying out official duties. This section does not affect the personal financial liability of the member, officer, or employee.

§ 9303. Use of Government obligations instead of surety bonds

(a) If a person is required under a law of the United States to give a surety bond, the person may give a Government obligation as security instead of a surety bond. The obligation shall—

(1) be given to the official having authority to approve the surety bond;

(2) be in an amount equal at par value to the amount of the required surety bond; and

(3) authorize the official receiving the obligation to collect or sell the obligation if the person defaults on a required condition.

(b)(1) An official receiving a Government obligation under subsection (a) of this section may deposit it with—

(A) the Secretary of the Treasury;

(B) a Federal reserve bank; or

(C) a depository designated by the Secretary.

(2) The Secretary, bank, or depository shall issue a receipt that describes the obligation deposited.

(c) Using a Government obligation instead of a surety bond for security is the same as using—

(1) a personal or corporate surety bond;

(2) a certified check;

(3) a bank draft;

(4) a post office money order; or

(5) cash.

(d) When security is no longer required, a Government obligation given instead of a surety bond shall be returned to the person giving the obligation. If a person, supplying labor or material to a contractor defaulting under the Act of August 24, 1935 (known as the Miller Act) (40 U.S.C. 270a-270d), files with the United States Government the application and affidavit provided under section 3 of the Act (40 U.S.C. 270c), the Government—

(1) may return to the contractor the Government obligation given as security (or proceeds of the Government obligation given) under the Act of August 24, 1935 (known as the Miller Act) (40 U.S.C. 270a-270d), only after the 90-day period for bringing a civil action under section 2 of the Act (40 U.S.C. 270b); and

(2) if a civil action is brought in the 90-day period, shall hold the Government obligation or the proceeds subject to the order of the court having jurisdiction of the action.

(e) This section does not affect the—

(1) priority of a claim of the Government against a Government obligation given under this section;

(2) right or remedy of the Government for default on an obligation provided under—

(A) the Act of August 24, 1935 (known as the Miller Act) (40 U.S.C. 270a-270d); or

(B) this section;

(3) authority of a court over a Government obligation given as security in a civil action; and

(4) authority of an official of the Government authorized by another law to receive a Government obligation as security.

(f) To avoid frequent substitution of Government obligations, the Secretary may prescribe regulations limiting the effect of this section to a Government obligation maturing more than one year after the date the obligation is given as security.

§ 9304. Surety corporations

(a) When a law of the United States Government requires or permits a person to give a surety bond through a surety, the person satisfies the law if the surety bond is provided for the person by a corporation—

(1) incorporated under the laws of—

(A) the United States; or

(B) a State, the District of Columbia, or a territory or possession of the United States;

(2) that may under those laws guarantee—

(A) the fidelity of persons holding positions of trust; and

(B) bonds and undertakings in judicial proceedings; and

(3) complying with sections 9305 and 9306 of this title.

(b) Each surety bond shall be approved by the official of the Government required to approve or accept the bond. The official may not require that the surety bond be given through a guaranty corporation or through any particular guaranty corporation.

§ 9305. Authority and revocation of authority of surety corporations

(a) Before becoming a surety under section 9304 of this title, a surety corporation must file with the Secretary of the Treasury—

(1) a copy of the articles of incorporation of the corporation; and

(2) a statement of the assets and liabilities of the corporation signed and sworn to by the president and secretary of the corporation.

(b) The Secretary may authorize in writing a surety corporation to provide surety bonds under section 9304 of this title if the Secretary decides that—

(1) the articles of incorporation of the corporation authorize the corporation to do business described in section 9304(a)(2) of this title;

(2) the corporation has paid-up capital of at least \$250,000 in cash or its equivalent; and

(3) the corporation is able to carry out its contracts.

(c) A surety corporation authorized under subsection (b) of this section to provide surety bonds shall file with the Secretary each January, April, July, and October a statement of the assets and liabilities of the corporation signed and sworn to by the president and secretary of the corporation.

(d) The Secretary—

(1) shall revoke the authority of a surety corporation to do new business if the Secretary decides the corporation is insolvent or is in violation of this section or section 9304 or 9306 of this title;

(2) may investigate the solvency of a surety corporation at any time; and

(3) may require additional security from the person required to provide a surety bond if the Secretary decides that a surety corporation no longer is sufficient security.

(e) A surety corporation providing a surety bond under section 9304 of this title may not provide any additional bond under that section if—

(1) the corporation does not pay a final judgment or order against it on the bond; and

(2) no appeal or stay of the judgment or order is pending 30 days after the judgment or order is entered.

§ 9306. Surety corporations acting outside area of incorporation and place of principal office

(a) A surety corporation may provide a surety bond under section 9304 of this title in a judicial district outside the State, the District of Columbia, or a territory or possession of the United States under whose laws it was incorporated and in which its principal office is located only if the corporation designates a person by written power of attorney to be the resident agent of the corporation for that district. The designated person—

(1) may appear for the surety corporation;

(2) may receive service of process for the corporation;

(3) must reside in the jurisdiction of the district court for the district in which a surety bond is to be provided; and

(4) must be a domiciliary of the State, the District of Columbia, territory, or possession in which the court sits.

(b) The surety corporation shall file a certified copy of the power of attorney with the clerk of the district court for the district in which a surety bond is to be given at each place the court sits. A copy of the power of attorney may be used as evidence in a civil action under section 9307 of this title.

(c)(1) If a resident agent is removed, resigns, dies, or becomes disabled, the surety corporation shall appoint another agent as described in this section.

(2) Until an appointment is made under paragraph (1) of this subsection or during an absence of an agent from the district in

which the surety bond is given, service of process may be made on the clerk of the court in which a civil action against the corporation is brought. The official serving process on the clerk of the court—

(A) immediately shall mail a copy of the process to the corporation; and

(B) shall state in the official's return that the official served the process on the clerk of the court.

(3) A judgment or order of a court entered or made after service of process under this section is as valid as if the corporation were served in the judicial district of the court.

§ 9307. Civil actions and judgments against surety corporations

(a)(1) A surety corporation providing a surety bond under section 9304 of this title may be sued in a court of the United States having jurisdiction of civil actions on surety bonds in—

(A) the judicial district in which the surety bond was provided; or

(B) the district in which the principal office of the corporation is located.

(2) Under sections 9304-9308 of this title, a surety bond is deemed to be provided in the district—

(A) in which the principal office of the surety corporation is located;

(B) to which the surety bond is returnable;

(C) in which the surety bond is filed; and

(D) in which the person required to provide a surety bond resided when the bond was provided.

(b) In a proceeding against a surety corporation providing a surety bond under section 9304 of this title, the corporation may not deny its power to provide a surety bond or to assume liability.

§ 9308. Civil penalty

A surety corporation is liable to the United States Government for a civil penalty of at least \$500 but not more than \$5,000 for violating sections 9304, 9305, or 9306 of this title. A civil action under this section may be brought in a judicial district in which a civil action may be brought against the corporation under section 9307 of this title. A penalty imposed under this section does not affect the validity of a contract made by the surety corporation.

§ 9309. Priority of sureties

When a person required to provide a surety bond given to the United States Government is insolvent or dies having assets insufficient to pay debts, the surety, or the executor, administrator, or assignee of the surety paying the Government the amount due under the bond—

(1) has the same priority to amounts from the assets and estate of the person as are secured for the Government; and

(2) personally may bring a civil action under the bond to recover amounts paid under the bond.

CHAPTER 95—GOVERNMENT PENSION PLAN PROTECTION

Sec.

9501. Purpose.

9502. Definitions.

9503. Reports about Government pension plans.

9504. Review and recommendations.

§ 9501. Purpose

The purpose of this chapter is to protect the interests of the United States and of the participants and their beneficiaries in Government pension plans by requiring complete disclosure of the financial condition of those plans.

§ 9502. Definitions

In this chapter—

(1) "Government pension plan"—

(A) means a pension, annuity, retirement, or similar plan (except a plan covered under the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1001 et seq.) or a plan or program financed by contributions required under chapter 21 or 22 of the Internal Revenue Code of 1954 (26 U.S.C. 3101 et seq., 3201 et seq.)) established or maintained by an agency, for any of its officers or employees, regardless of the number of participants covered by the plan; and

(B) includes—

(i) the Civil Service Retirement System.

(ii) the Coast Guard Retirement System.

(iii) the Commissioned Corps of the Public Health Service Retirement System.

(iv) the Farm Credit District Retirement Plans.

(v) the Federal Home Loan Bank Board Retirement Systems.

(vi) the Federal Home Loan Mortgage Corporation Plan.

(vii) the Federal Reserve Employees Retirement Plans.

(viii) the Foreign Service Retirement and Disability System.

(ix) judicial plans.

(x) the Military Retirement System.

(xi) the National Oceanic and Atmospheric Administration Retirement System.

(xii) nonappropriated fund plans.

(xiii) the Tennessee Valley Authority Retirement System.

(2) "plan year" means the calendar, policy, or fiscal year chosen by the Government pension plan on which the records of the plan are kept.

§ 9503. Reports about Government pension plans

(a) A Government pension plan is subject to section 103 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1023) in the same way that an employee pension benefit plan is subject to section 103. However, section 103 applies to a Government pension plan for officers or employees of the Central Intelligence Agency only if the President specifically approves application of the requirements of section 103 in writing. In applying section 103 to a Government pension plan—

(1) the annual report shall be—

(A) in the form and include information the President, in consultation with the Comptroller General, prescribes or, if the pension plan is referred to in section 9502(1)(B) (iv)-(vii) or (ix) of this title, the Comptroller General prescribes; and

(B) submitted to Congress and to the Comptroller General by the end of the 210-day period beginning on the day after the last day of the plan year involved;

(2) a provision providing for waiver of, relief from, or exception to a requirement otherwise applicable to an employee pension benefit plan applies to a Government pension plan only if specifically authorized by the Comptroller General;

(3) section 104(b) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1024(b)) does not apply;

(4) the report required by this chapter is in addition to other reports or projections required by law; and

(5) except for a Government pension plan referred to in section 9502(1)(B)(iv)-(vii) of this title, the Comptroller General shall conduct audits when appropriate instead of complying with the requirements for the independent qualified public accountant.

(b) This chapter does not prevent a Government pension plan from using the serv-

ices of an enrolled actuary employed by an agency administering the plan.

§ 9504. Review and recommendations

When necessary or when requested by either House of Congress or a committee of Congress, the Comptroller General shall—

(1) review financial and actuarial statements provided under section 9503 of this title to decide whether the reporting requirements of section 9503 are adequate to carry out section 9501 of this title; and

(2) submit to Congress recommendations for legislation necessary to carry out section 9501 of this title.

CHAPTER 97—MISCELLANEOUS

Sec.

9701. Fees and charges for Government services and things of value.

9702. Investment of trust funds.

§ 9701. Fees and charges for Government services and things of value

(a) It is the sense of Congress that each service or thing of value provided by an agency (except a mixed-ownership Government corporation) to a person (except a person on official business of the United States Government) is to be self-sustaining to the extent possible.

(b) The head of each agency (except a mixed-ownership Government corporation) may prescribe regulations establishing the charge for a service or thing of value provided by the agency. Regulations prescribed by the heads of executive agencies are subject to policies prescribed by the President and shall be as uniform as practicable. Each charge shall be—

(1) fair; and

(2) based on—

(A) the costs to the Government;

(B) the value of the service or thing to the recipient;

(C) public policy or interest served; and

(D) other relevant facts.

(c) This section does not affect a law of the United States—

(1) prohibiting the determination and collection of charges and the disposition of those charges; and

(2) prescribing bases for determining charges, but a charge may be redetermined under this section consistent with the prescribed bases.

§ 9702. Investment of trust funds

Except as required by a treaty of the United States, amounts held in trust by the United States Government (including annual interest earned on the amounts)—

(1) shall be invested in Government obligations; and

(2) shall earn interest at an annual rate of at least 5 percent.

CONFORMING PROVISIONS

SEC. 2. (a) Section 5316 of title 5, United States Code, is amended by adding at the end the following:

"Additional officers, Office of Management and Budget (6)."

(b) Title 10, United States Code, is amended as follows:

(1)(A) In sections 1479(2), 2206, 4592, and 5992, strike out "officer" and substitute "official".

(B) In section 2309(b), strike out "disbursing officer" and substitute "disbursing official".

(2)(A) Add immediately below item 1041 in the analysis of chapter 53 the following new item:

"1042. Copy of certificate of service."

(B) Add at the end of chapter 53 the following new section:

"§ 1042. Copy of certificate of service

"A fee for a copy of a certificate showing service in the armed forces may not be charged to—

"(1) a person discharged or released from the armed forces honorably or under honorable conditions;

"(2) the next of kin of the person; or

"(3) a legal representative of the person."

(3)(A) Add immediately below item 2360 in the analysis of chapter 139 the following new item:

"2361. Availability of appropriations."

(B) Add at the end of chapter 139 the following new section:

"§ 2361. Availability of appropriations

"Funds appropriated to the Department of Defense for research and development remain available for obligation for a period of two consecutive years."

(4)(A) Add immediately below item 2393 in the analysis of chapter 141 the following new items:

"2394. Availability of appropriations for military equipment and supplies and construction of military public works.

"2395. Advances for payments for compliance with foreign laws, rent in foreign countries, tuition, and pay and supplies of armed forces of friendly foreign countries."

(B) Add at the end of chapter 141 the following new sections:

"§ 2394. Availability of appropriations for procurement of technical military equipment and supplies and construction of military public works

"Funds appropriated to the Department of Defense for the procurement of technical military equipment and supplies and the construction of military public works remain available until spent.

"§ 2395. Advances for payments for compliance with foreign laws, rent in foreign countries, tuition, and pay and supplies of armed forces of friendly foreign countries

"(a) An advance under an appropriation to the Department of Defense may be made to pay for—

"(1) compliance with laws and ministerial regulations of a foreign country;

"(2) rent in a foreign country for periods of time determined by local custom; and

"(3) tuition.

"(b)(1) Under regulations prescribed by the Secretary of Defense, or by the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service of the Navy, an officer of an armed force of the United States accountable for public money may advance amounts to a disbursing official of a friendly foreign country or members of an armed force of a friendly foreign country for—

"(A) pay and allowances to members of the armed force of that country; and

"(B) necessary supplies and services.

"(2) An advance may be made under this subsection only if the President has made an agreement with the foreign country—

"(A) requiring reimbursement to the United States for amounts advanced;

"(B) requiring the appropriate authority of the country to advance amounts reciprocally to members of the armed forces of the United States; and

"(C) containing another provision the President considers necessary to carry out

this subsection and to safeguard the interests of the United States."

(5)(A) Add immediately below item 2635 in the analysis of chapter 157 the following new item:

"2636. Deductions from carriers because of loss or damage to material in transit."

(B) Add at the end of chapter 157 the following new section:

"§ 2636. Deductions from carriers because of loss or damage to material in transit

"An amount deducted from an amount due a carrier because of loss of or damage to material in transit for a military department shall be credited to the proper appropriation, account, or fund from which the same or similar material may be replaced."

(6)(A) Insert between items 2661 and 2662 in the analysis of chapter 159 the following new item:

"2661a. Appropriations for advance planning of military public works."

(B) Insert between sections 2661 and 2662 the following new section:

"§ 2661a. Appropriations for advance planning of military public works

"(a) There are authorized to be appropriated to the Department of Defense, to remain available until spent, funds for advance planning, construction design, and architectural services for—

"(1) military public works projects not otherwise authorized; and

"(2) construction management of projects funded by governments of foreign countries directly or through international organizations for which the armed forces of the United States are the sole or primary user.

"(b) The Secretary of Defense may not enter into a transaction for a military public works project for which estimated advance planning, construction design, and architectural services costs of at least \$225,000 will be funded under this section until after the expiration of 30 days from the date on which a report of the project and the estimated costs is submitted to the Committees on Armed Services of the Senate and the House of Representatives."

(7)(A) Amend item 2773 in the analysis of chapter 165 to read as follows:

"2773. Designation, powers, and accountability of deputy disbursing officials."

(B) Amend section 2773 to read as follows:

"§ 2773. Designation, powers, and accountability of deputy disbursing officials

"(a)(1) With the approval of a Secretary of a military department when the Secretary considers it necessary, a disbursing official of the military department may designate a deputy disbursing official—

"(A) to make payments as the agent of the disbursing official;

"(B) to sign checks drawn on disbursing accounts of the Secretary of the Treasury; and

"(C) to carry out other duties required under law.

"(2) The penalties for misconduct that apply to a disbursing official apply to a deputy disbursing official designated under this subsection.

"(b)(1) If a disbursing official of any military department dies, becomes disabled, or is separated from office, a deputy disbursing official may continue the accounts and payments in the name of the former disbursing official until the last day of the 2d month after the month in which the death, disability, or separation occurs. The accounts and

payments shall be allowed, audited, and settled as provided by law. The Secretary of the Treasury shall honor checks signed in the name of the former disbursing official in the same way as if the former disbursing official had continued in office.

"(2) The deputy disbursing official, and not the former disbursing official or the estate of the former disbursing official, is liable for the actions of the deputy disbursing official under this subsection."

(8)(A) Add immediately below item 2775 in the analysis of chapter 165 the following new items:

"2776. Use of receipts of public money for current expenditures.

"2777. Requisitions for advances and removal of charges outstanding in accounts of advances.

"2778. Accounts of the military departments.

"2779. Use of funds because of fluctuations in currency exchange rates of foreign countries."

(B) Add at the end of chapter 165 the following new sections:

"§ 2776. Use of receipts of public money for current expenditures

"Without deposit to the credit of the Secretary of the Treasury and without withdrawal on money requisitions, a disbursing official of the Department of Defense may use receipts of public money charged in the disbursing official's accounts (except receipts to be credited to river, harbor, and flood control appropriations) for current expenditures, with necessary bookkeeping adjustments being made.

"§ 2777. Requisitions for advances and removal of charges outstanding in accounts of advances

"(a) The Secretary of a military department may issue to a disbursing official or agent of the department a requisition for an advance of not more than the total appropriation for the department. The amount advanced shall be—

"(1) under an 'account of advances' for the department;

"(2) on a proper voucher;

"(3) only for obligations payable under specific appropriations;

"(4) charged to, and within the limits of, each specific appropriation; and

"(5) returned to the account of advances.

"(b) A charge outstanding in an account of advances of a military department shall be removed by crediting the account of advances of the department and deducting the amount of the charge from an appropriation made available for advances to the department when—

"(1) relief has been granted or may be granted later to a disbursing official or agent of the department operating under an account of advances and under a law having no provision for removing charges outstanding in an account of advances; or

"(2) the charge has been—

"(A) outstanding in the account of advances of the department for 2 complete fiscal years; and

"(B) certified by the head of the department to the Comptroller General as uncollectable.

"(c) Subsection (b) of this section does not affect the financial liability of a disbursing official or agent.

"§ 2778. Accounts of the military departments

"The Comptroller General shall—

"(1) maintain all accounts of—

"(A) receipts and expenditures of public money in the military departments; and

"(B) debts due the United States on moneys advanced for the department;

"(2) preserve settled accounts, vouchers, and certificates;

"(3) record all requisitions drawn by the Secretary of the department;

"(4) each year on the first Monday in November, report to the Secretary of the Treasury on the application of money appropriated for the military departments; and

"(5) report on the accounts of the military departments as the Secretary of the department requires.

"§ 2779. Use of funds because of fluctuations in currency exchange rates of foreign countries

"(a)(1) Funds transferred from the appropriation 'Foreign Currency Fluctuations, Defense' may be transferred back to the appropriation—

"(A) when the funds are not needed to pay obligations incurred because of fluctuations in currency exchange rates of foreign countries in the appropriation to which the funds were originally transferred; and

"(B) because of subsequent favorable fluctuations in the rates or because other funds are, or become, available to pay the obligations.

"(2) A transfer back to the Foreign Currency Fluctuations, Defense appropriation may not be made after the end of the 2d fiscal year after the fiscal year that the appropriation to which the funds were originally transferred is available for obligation.

"(b)(1) One hundred million dollars, plus \$25,000,000 from Family Housing, Defense, are appropriated to the Secretary of Defense, to remain available until spent. The appropriation is available only to provide funds to eliminate losses in military construction or expenses of family housing for the Department of Defense caused by fluctuations in currency exchange rates of foreign countries that changed after a budget request was submitted to Congress.

"(2) Funds provided under this subsection are merged with and are available for the same purpose and for the same time period as the appropriation to which they are applied. An authorization or limitation limiting the amount that may be obligated or spent is increased to the extent necessary to reflect fluctuations in exchange rates from those used in preparing the budget submission.

"(3) An obligation payable in the currency of a foreign country may be recorded as an obligation based on exchange rates used in preparing a budget submission. A change reflecting fluctuations in the exchange rate may be recorded as a disbursement is made.

"(4) The Secretary each year shall report to Congress on funds made available under this subsection."

(9)(A) Add immediately below item 4540 in the analysis of chapter 433 the following new item:

"4541. Gratuitous services of officers of the Army Reserve."

(B) Add at the end of chapter 433 the following new section:

"§ 4541. Gratuitous services of officers of the Army Reserve

"The Secretary of the Army may accept the gratuitous services of officers of the Army Reserve in enrolling, organizing, and training members of the Army Reserve or the Reserve Officers' Training Corps, or in consulting on matters related to the armed forces."

(10)(A) Add immediately below item 4840 in the analysis of chapter 453 the following new items:

"4841. Payment of small amounts to public creditors.

"4842. Settlement of accounts of line officers."

(B) Add at the end of chapter 453 the following new sections:

"§ 4841. Payment of small amounts to public creditors

"When authorized by the Secretary of the Army, a disbursing official of Army subsistence funds may keep a limited amount of those funds in the personal possession and at the risk of the disbursing official to pay small amounts to public creditors.

"§ 4842. Settlement of accounts of line officers

"The Comptroller General shall settle the account of a line officer of the Army for pay due the officer even if the officer cannot account for property entrusted to the officer or cannot make a monthly report or return, when the Comptroller General is satisfied that the inability to account for property or make a report or return was the result of the officer having been a prisoner, or of an accident or casualty of war."

(11)(A) Add immediately below item 7230 in the analysis of chapter 631 the following new item:

"7231. Accounting for expenditures for obtaining information."

(B) Add at the end of chapter 631 the following new section:

"§ 7231. Accounting for expenditures for obtaining information

"When the Secretary of the Navy decides that an expenditure by the Department of the Navy from an appropriation for obtaining information from anywhere in the world may be made public, the expenditure shall be accounted for specifically. When the Secretary decides that an expenditure should not be made public, the Secretary shall make a certificate on the amount of the expenditure. The certificate is a sufficient voucher for the amount stated to have been spent."

(12)(A) Add immediately below item 659 in the analysis of subtitle C the following new item:

"661. Accountability and responsibility..... 7861"

(B) Add at the end of subtitle C the following new chapter:

"CHAPTER 661—ACCOUNTABILITY AND RESPONSIBILITY

"Sec.

"7861. Accounts of paymasters of lost or captured public vessels.

"7862. Disbursements by order of commanding officer.

"§ 7861. Accounts of paymasters of lost or captured public vessels

"When settling the account of a paymaster of a lost or captured naval vessel, the Comptroller General in settling money accounts, and the Secretary of the Navy in settling property accounts, shall credit the account of the paymaster for the amount of provisions, clothing, small stores, and money for which the paymaster is charged that the Comptroller General or Secretary believes was lost inevitably because of the loss or capture. The paymaster is then free of liability for the provisions, clothing, small stores, and money.

"§ 7862. Disbursements by order of commanding officer

"When settling an account of a disbursing official, the Comptroller General shall allow disbursements of public moneys or disposal of public stores the disbursing official made under an order of a commanding officer when presented with satisfactory evidence that the order was made and that the money was paid or the stores disposed of as the order provided. The commanding officer is accountable for the disbursement or disposal."

(13)(A) Add immediately below item 9540 in the analysis of chapter 933 the following new item:

"9541. Gratuitous services of officers of the Air Force Reserve."

(B) Add at the end of chapter 933 the following new section:

"§ 9541. Gratuitous services of officers of the Air Force Reserve

"The Secretary of the Air Force may accept the gratuitous services of officers of the Air Force Reserve in enrolling, organizing, and training members of the Air Force Reserve or the Reserve Officers' Training Corps, or in consulting on matters related to the armed forces."

(14)(A) Add immediately below item 9840 in the analysis of chapter 953 the following new items:

"9841. Payment of small amounts to public creditors.

"9842. Settlement of accounts of line officers."

(B) Add at the end of chapter 953 the following new sections:

"§ 9841. Payment of small amounts to public creditors

"When authorized by the Secretary of the Air Force, a disbursing official of Air Force subsistence funds may keep a limited amount of those funds in the personal possession and at the risk of the disbursing official to pay small amounts to public creditors.

"§ 9842. Settlement of accounts of line officers

"The Comptroller General shall settle the account of a line officer of the Air Force for pay due the officer even if the officer cannot account for property entrusted to the officer or cannot make a monthly report or return, when the Comptroller General is satisfied that the inability to account for property or make a report or return was the result of the officer having been a prisoner, or of an accident or casualty of war."

(c) The first section of the Federal Reserve Act (12 U.S.C. 221) is amended by adding at the end the following new paragraph:

"The terms 'bonds and notes of the United States', 'bonds and notes of the Government of the United States', and 'bonds or notes of the United States' used in this Act shall be held to include certificates of indebtedness and Treasury bills issued under section 3104 of title 31."

(d) Title 18, United States Code, is amended as follows:

(1)(A) In the analysis of chapter 33, strike out item 714.

(B) Strike out section 714.

(2)(A) Insert at the beginning of section 3059 the designation "(a)(1)".

(B) Insert before the word "If" the designation "(2)".

(C) Add at the end of the section the following new subsection:

"(b) The Attorney General each year may spend not more than \$10,000 for services or information looking toward the apprehension of narcotic law violators who are fugitives from justice."

(3)(A) Insert between items 3150 and 3151 in the analysis of chapter 207 the following new item:

"3150a. Refund of forfeited bail."

(B) Insert between sections 3150 and 3151 the following new section:

"§ 3150a. Refund of forfeited bail

"Appropriations available to refund money erroneously received and deposited in the Treasury are available to refund any part of forfeited bail deposited into the general fund of the Treasury and ordered remitted under the Federal Rules of Criminal Procedure."

(4)(A) Add immediately below item 4042 in the analysis of chapter 303 the following new item:

"4043. Acceptance of gifts and bequests to the Commissary Funds, Federal Prisons."

(B) Add at the end of chapter 303 the following new section:

"§ 4043. Acceptance of gifts and bequests to the Commissary Funds, Federal Prisons

"The Attorney General may accept gifts or bequests of money for credit to the 'Commissary Funds, Federal Prisons'. A gift or bequest under this section is a gift or bequest to or for the use of the United States under the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.)."

(e) The Act of April 25, 1940 (22 U.S.C. 2668), is amended—

(1) by inserting at the beginning of the text of the Act the subsection designation "(a)"; and

(2) by adding at the end of the Act the following new subsections:

"(b) A charge outstanding in the 'State account of advances' shall be removed by crediting the account of advances and deducting the amount of the charge from an appropriation made available for advances to the Department of State when—

"(1) relief has been granted or may be granted later to a disbursing official or agent of the Department operating under the account of advances and under a law having no provision for removing charges outstanding in the account of advances; or

"(2) the charge has been—

"(A) outstanding in the account of advances for 2 complete fiscal years; and

"(B) certified by the Secretary of State to the Comptroller General as uncollectable.

"(c) Subsection (b) of this section does not affect the financial liability of a disbursing official or agent."

(f) The Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) is amended as follows:

(1) In section 7801(c), insert immediately after "in this section" the following: "or section 301(f) of title 31".

(2) In section 7802(b)—

(A) insert immediately before "There" the following:

"(1) Establishment of Office.—"

(B) Add at the end of section 7802(b) the following new paragraph:

"(2) Authorization of appropriations.—There is authorized to be appropriated to the Department of the Treasury to carry out the functions of the Office an amount equal to the sum of—

"(A) so much of the collections from taxes imposed under section 4940 (relating to excise tax based on investment income) as

would have been collected if the rate of tax under such section was 2 percent during the second preceding fiscal year; and

"(B) the greater of—

"(i) an amount equal to the amount described in paragraph (A); or

"(ii) \$30,000,000."

(g) Title 28, United States Code, is amended as follows:

(1)(A) In the analysis of chapter 31, strike out—

"524. Appropriations for administrative expenses; notarial fees; meals and lodging of bailiffs."

and substitute—

"524. Availability of appropriations."

(B) In the catchline of section 524, strike out—

"Appropriations for administrative expenses; notarial fees; meals and lodging of bailiffs"

and substitute—

"Availability of appropriations."

(C) Insert at the beginning of the text of section 524 the subsection designation "(a)".

(D) Add at the end of section 524 the following new subsection:

"(b) Except as provided in subsection (a) of this section, a claim of not more than \$500 for expenses related to litigation that is beyond the control of the Department may be paid out of appropriations currently available to the Department for expenses related to litigation when the Comptroller General settles the payment."

(2) Add at the end of section 571 the following new subsection:

"(d) Appropriations for salaries, expenses, and fees of marshals are available for advances with the approval of the Attorney General."

(3)(A) Insert between items 572 and 573 in the analysis of chapter 37 the following new item:

"572a. Depositing public moneys."

(B) Insert between sections 572 and 573 the following new section:

"§ 572a. Depositing public moneys

"Except for public moneys deposited under section 2041 of this title, each United States marshal shall deposit public moneys that the marshal collects into a checking account in the Treasury, subject to disbursement by the marshal. At the end of each accounting period, the earned part of public moneys accruing to the United States shall be deposited in the Treasury to the credit of the appropriate receipt accounts."

(4)(A) In the analysis of chapter 129, strike out—

"2041. Deposit."

and substitute—

"2041. Deposit of moneys in pending or adjudicated cases."

(B) Add immediately below item 2042 in the analysis of the chapter the following new item:

"2043. Deposit of other moneys."

(C) In the catchline of section 2041, strike out—

"Deposit"

and substitute—

"Deposit of moneys in pending or adjudicated cases."

(D) In section 2042, insert the words—

(1) "under section 2041 of this title" immediately after "No money deposited" in the first paragraph; and

(ii) "under section 2041" immediately after "deposited in court" in the last paragraph.

(E) Add at the end of chapter 129 the following new section:

"§ 2043. Deposit of other moneys

"Except for public moneys deposited under section 2041 of this title, each clerk of the United States courts shall deposit public moneys that the clerk collects into a checking account in the Treasury, subject to disbursement by the clerk. At the end of each accounting period, the earned part of public moneys accruing to the United States shall be deposited in the Treasury to the credit of the appropriate receipt accounts."

(5) Effective on the later of October 1, 1982, or the date of enactment of this Act, amend section 2516(b) to read as follows:

"(b) Interest on a judgment against the United States affirmed by the Supreme Court after review on petition of the United States is paid at a rate equal to the coupon issue yield equivalent (as determined by the Secretary of the Treasury) of the average accepted auction price for the last auction of fifty-two week United States Treasury bills settled immediately before the date of the judgment."

(h) Section 107 of title 32, United States Code, is amended by adding at the end the following new subsection:

"(c) The pay and allowances for the Chief of the National Guard Bureau and officers of the Army National Guard of the United States or the Air National Guard of the United States called to active duty under section 3496 or 8496 of title 10 shall be paid from appropriations for the pay of the Army National Guard or Air National Guard."

(i) Title 37, United States Code, is amended as follows:

(1) Add at the end of section 406 the following new subsection:

"(j) A member traveling under orders who is relieved from a duty station is entitled to transportation for his dependents, baggage, and household effects, regardless of the time the dependents, baggage, or household effects arrive at their destination. Appropriations of the Department of Defense available for travel or transportation that are current when the member is relieved may be used to pay for the transportation."

(2)(A) Add immediately below item 1011 in the analysis of chapter 19 the following new item:

"1012. Disbursement and accounting."

(B) Add at the end of chapter 19 the following new section:

"§ 1012. Disbursement and accounting

"Amounts appropriated under sections 206(a), (b), and (d), 301(f), 309, 402(b) (last sentence), and 1002 of this title for pay of enlisted members of the Army National Guard of the United States or the Air National Guard of the United States for attending regular periods of duty and instruction shall be disbursed and accounted for by the Secretary concerned. Disbursements shall be made for 3-month periods for units of the Army National Guard or Air National Guard under regulations prescribed by the Secretary concerned, and on payrolls prepared and authenticated under the regulations."

(j) Section 203 of title 38, United States Code, is amended—

(1) by inserting at the beginning of the text of the section the subsection designation "(a)"; and

(2) by adding at the end of the section the following new subsection:

"(b) An appropriation may be used for a settlement of more than \$1,000,000 on a construction contract only if the settlement is audited independently for reasonableness and appropriateness of expenditures and the settlement is not provided for specifically in an appropriation law."

(k) Section 409 of title 39, United States Code, is amended by adding at the end the following new subsection:

"(e) A judgment against the Government of the United States arising out of activities of the Postal Service shall be paid by the Postal Service out of any funds available to the Postal Service."

(l) Effective on the date prescribed by section 396(i) of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35, 95 Stat. 441), the following sections of title 31 (enacted by section 1 of this Act), United States Code, are amended as follows:

(1) In section 9101(2), strike out—

"(K) the National Consumer Cooperative Bank."

(2) In sections 9107(c)(3) and 9108(d)(2), strike out "the National Consumer Cooperative Bank."

(m) Effective on the later of October 1, 1982, or the date of enactment of this Act—

(1) section 1961(b) of title 28, United States Code, as added by section 302(a)(3) of the Federal Courts Improvement Act of 1982 (Public Law 97-164; 96 Stat. 56), is amended by striking out "title 28, United States Code, and section 1302 of the Act of July 27, 1956 (31 U.S.C. 724a)" and substituting "this title and section 1304(b)(1) of title 31";

(2) section 1304 of title 31 (as enacted by section 1 of this Act), United States Code, is amended—

(A) in subsection (b)(1)(A), by striking out the words "under section 2411(b) of title 28"; and

(B) in subsection (b)(1)(B), by striking out the words "Court of Claims" and substituting "Court of Appeals for the Federal Circuit or the United States Claims Court"; and

(3) sections 155, 160(11), and 302(c) and (d) of the Federal Courts Improvement Act of 1982 (Public Law 97-164, 96 Stat. 47, 48, 56) are repealed.

CONFORMING CROSS-REFERENCES

SEC. 3. (a) Title 5, United States Code, is amended as follows:

(1) In section 575(c)(13), strike out "section 3679(b) of the Revised Statutes (31 U.S.C. 665(b))" and substitute "section 1342 of title 31".

(2) In section 1205(j), strike out "section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11)" and substitute "section 1105 of title 31".

(3) In section 3102(b)(1)(C), strike out "section 3679(b) of the Revised Statutes (31 U.S.C. 665(b))" and substitute "section 1342 of title 31".

(4) In section 3109(a)(2), strike out "section 849 of title 31" and substitute "section 9104 of title 31".

(5) In section 3111(b), strike out "section 3679(b) of the Revised Statutes (31 U.S.C. 665(b))" and substitute "section 1342 of title 31".

(6) In section 3374(c)(2), strike out "section 638a of title 31" and substitute "sections 1343, 1344, and 1349(b) of title 31".

(7) In section 3381(d), strike out "section 529 of title 31" and substitute "section 3324(a) and (b) of title 31".

(8) In section 4101(1)(C), strike out "sections 846-852 or 856-859 of title 31" and substitute "chapter 91 of title 31".

(9) In section 4109(a)(2), strike out "section 529 of title 31" and substitute "section 3324(a) and (b) of title 31".

(10) In section 5307(a), strike out "section 665 of title 31" and substitute "sections 1341, 1342, and 1349-1351 and subchapter II of chapter 15 of title 31".

(11) In section 5349(b), strike out "section 180 of title 31" and substitute "section 5141 of title 31".

(12) In section 5514(b), strike out "section 581d of title 31" and substitute "section 3530(d) of title 31".

(13) In section 5545(a), strike out "section 180 of title 31" and substitute "section 5141 of title 31".

(14) In section 5721(5), strike out "section 849 of title 31" and substitute "section 9104 of title 31".

(15) In sections 5923(2) and 5924(4)(A), strike out "section 529 of title 31" and substitute "section 3324(a) and (b) of title 31".

(16) In section 7903, strike out "section 849 of title 31" and substitute "section 9104 of title 31".

(17) In section 8147(c), strike out "section 856 of title 31" and "sections 841-869 of title 31" and substitute "section 9101(2) of title 31" and "chapter 91 of title 31", respectively.

(b) Title 10, United States Code, is amended as follows:

(1) In section 139(a), strike out "section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11)" and substitute "section 1105 of title 31".

(2) Strike out the last sentence of section 140a.

(3) In section 2127(b), strike out "section 3648 of the Revised Statutes (31 U.S.C. 529)" and substitute "section 3324(a) and (b) of title 31".

(4) In section 2205, strike out "the Act of March 4, 1915 (31 U.S.C. 686)" and substitute "sections 1535 and 1536 of title 31".

(5) In section 2212, strike out "section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11)" and substitute "section 1105 of title 31".

(6) In section 2388(c), strike out "section 529 of title 31" and substitute "section 3324(a) and (b) of title 31".

(7) In section 2633(a), strike out "section 3678 of the Revised Statutes (31 U.S.C. 628)" and substitute "section 1301(a) of title 31".

(8) In section 6154, strike out "section 529 of title 31" and substitute "section 3324(a) and (b) of title 31".

(9) In section 7522(b), strike out "Section 3648 of the Revised Statutes (31 U.S.C. 529)" and substitute "Section 3324(a) and (b) of title 31".

(10) In section 7605, strike out "sections 3639 and 3651 of the Revised Statutes (31 U.S.C. 521 and 543)" and substitute "section 3302(a) of title 31".

(c) Sections 345 and 15345 of title 11, United States Code, are each amended by striking out "section 15 of title 6" and substituting "section 9303 of title 31".

(d) Section 659 of title 14, United States Code, is amended by striking out "section 1 of the Act of July 25, 1956, as amended (31 U.S.C. 701)" and substituting "section 1352(a) of title 31".

(e) Title 18, United States Code, is amended as follows:

(1) In section 1906, strike out "section 117(e) of the Accounting and Auditing Act of 1950" wherever it appears and substitute "section 714 of title 31".

(2) In section 4109(2), strike out "section 3648 of the revised statutes as amended (31 U.S.C. 529)" and substitute "section 3324(a) and (b) of title 31".

(3) In section 4204(b)(1), strike out "section 3648 of the Revised Statutes of the United States (31 U.S.C. 529)" and substitute "section 3324(a) and (b) of title 31".

(4) In section 4204(b)(2), strike out "section 3679 of the Revised Statutes of the United States (31 U.S.C. 665(b))" and substitute "section 1342 of title 31".

(5) In section 4284(a), strike out "(31 U.S.C. 725s(22))" and substitute "in section 1321(a)(22) of title 31".

(f) The Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) is amended as follows:

(1) In sections 170(k)(7) and 2055(f)(6), strike out "section 2 of the Act of May 15, 1952, as amended by the Act of July 9, 1952 (31 U.S.C. 725s-4)" and substitute "section 4043 of title 18, United States Code".

(2) In section 2055(f)(7), strike out "section 24 of the Second Liberty Bond Act (31 U.S.C. 757e)" and substitute "section 3113(e) of title 31, United States Code".

(3) In sections 5177(b)(1) and 5403(3), strike out "6 U.S.C. 15" and substitute "section 9303 of title 31, United States Code".

(4) In section 6103(i)(6)(A)(i), strike out "section 117 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 67)" and substitute "section 713 of title 31, United States Code".

(5) In section 6103(l)(4)(A)(ii), strike out "section 3 of the Act of July 7, 1884 (23 Stat. 258; 31 U.S.C. 1026)" and substitute "section 330 of title 31, United States Code".

(6) In section 6103(m)(2), strike out "section 3 of the Federal Claims Collection Act of 1966" and substitute "section 3711 of title 31, United States Code".

(7) In section 6326(6), strike out "R.S. 3466 (31 U.S.C. 191)" and substitute "section 3713(a) of title 31, United States Code".

(8) In section 6422(10), strike out "R.S. 3477 (31 U.S.C. 203)" and substitute "section 3727 of title 31, United States Code".

(9) In section 6422(11), strike out "the act of March 3, 1875, as amended by section 13 of the act of March 3, 1933 (31 U.S.C. 227)" and substitute "section 3728 of title 31, United States Code".

(10) In section 6901(a)(1)(B), strike out "section 3467 of the Revised Statutes (31 U.S.C. 192)" and substitute "section 3713(b) of title 31, United States Code".

(11) In section 7101(2), strike out "6 U.S.C. 15" and substitute "section 9303 of title 31, United States Code".

(12) In section 7123—
(A) strike out of subsection (a) the following:

"(a) Criminal penalties"; and

(B) strike out subsection (b).

(13) In section 7421(b)(2), strike out "section 3467 of the Revised Statutes (31 U.S.C. 192)" and substitute "section 3713(b) of title 31, United States Code".

(14) In section 7430(6), strike out "R.S. 3466 (31 U.S.C. 191)" and substitute "section 3713(a) of title 31, United States Code".

(15) In section 7485(b)(2), strike out "6 U.S.C. 15" and substitute "section 9303 of title 31, United States Code".

(g) Section 1828(b) of title 28, United States Code, is amended by striking out "section 501 of the Act of August 31, 1951 (ch. 376, title 5, 65 Stat. 290; 31 U.S.C. 483a)" and substituting "section 9701 of title 31".

(h) Title 32, United States Code, is amended as follows:

(1) In section 334(a), strike out "section 1302 of the Act of July 27, 1956 (31 U.S.C. 724a)" and substitute "section 1304 of title 31".

(2) In section 710(d), strike out "(31 U.S.C. 725(c)(22))".

(i) Section 42(b) of title 35, United States Code, is amended by striking out "the provisions of section 725e of title 31, United States Code, notwithstanding".

(j) Section 1006(h) of title 37, United States Code, is amended by striking out "section 3648 of the Revised Statutes (31 U.S.C. 529)" and substituting "section 3324(a) and (b) of title 31".

(k) Title 38, United States Code, is amended as follows:

(1) In section 620A(d)(1), strike out "the Act of March 4, 1915 (31 U.S.C. 686)" and substitute "sections 1535 and 1536 of title 31".

(2) In section 1632, strike out—

(A) "subsection (a) of section 725s of title 31" and substitute "section 1322(a) of title 31"; and

(B) "the last proviso of that subsection" and substitute "section 1322(a)".

(3) In section 1820(a)(6), strike out "section 3617, Revised Statutes (31 U.S.C. 484)" and substitute "section 3302(b) of title 31".

(4) In sections 3021(a) and 3109(a), strike out "sections 123-128 of title 31" and substitute "sections 3329 and 3330 of title 31".

(5) In section 3204, strike out "the last proviso of subsection (a) of section 725s of title 31" and substitute "section 1322(a) of title 31".

(6) In section 4118(g)(3), strike out "section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11)" and substitute "section 1105 of title 31".

(7) In section 4142(f)(2), strike out "section 3648 of the Revised Statutes of the United States (31 U.S.C. 529)" and substitute "section 3324(a) and (b) of title 31".

(8) In the first sentence of section 4206, strike out "corporations by sections 841-869 of title 31," and substitute "corporations by chapter 91 of title 31".

(9) In sections 5202(d) and 5220(a), strike out "section 725s(a)(45) of title 31" and substitute "section 1321(a)(45) of title 31".

(1) Title 39, United States Code, is amended as follows:

(1) In section 2003(e)(1), strike out "section 665 of title 31" and substitute "subchapter II of chapter 15 of title 31".

(2) In section 2009, strike out "section 11 of title 31" and substitute "section 1105 of title 31".

(m) Title 44, United States Code, is amended as follows:

(1) In section 308(c)(1), strike out "section 244 of title 31" and substitute "section 3726 of title 31".

(2) In section 309(d), strike out "section 849 of title 31" and substitute "section 9104 of title 31".

(3) In section 3519, strike out "section 313 of the Budget and Accounting Act of 1921, as amended" and substitute "section 716 of title 31".

(n) Section 11706(f) of title 49, United States Code, is amended by striking out "section 244 of title 31" and substituting "section 3726 of title 31".

(o)(1) Rule XLIX of the Rules of the House of Representatives is amended as follows:

(A) In clause 2—

(i) strike out "the first sentence of section 21 of the Second Liberty Bond Act (31 U.S.C. 757b)" and substitute "section 3101(b) of title 31, United States Code"; and

(ii) strike out "section 21 of the Second Liberty Bond Act" and substitute "section 3101(b) of title 31".

(B) In clause (5)—

(i) strike out "the Second Liberty Bond Act" and substitute "chapter 31 of title 31, United States Code";

(ii) strike out "section 21 of such Act" and substitute "section 3101(b) of title 31"; and

(iii) strike out "the second sentence thereof" and substitute "section 3101(a) of title 31".

(2) This subsection—

(A) is enacted as an exercise of the rule-making power of the House of Representatives; and

(B) may be changed by the House at any time, in the same way, and to the same extent as any other rule of the House,

under the constitutional right of the House to change its rules.

LEGISLATIVE PURPOSE AND CONSTRUCTION

SEC. 4. (a) Sections 1-3 of this Act restate, without substantive change, laws enacted before April 16, 1982, that were replaced by those sections. Those sections may not be construed as making a substantive change in the laws replaced. Laws enacted after April 15, 1982, that are inconsistent with this Act supersede this Act to the extent of the inconsistency.

(b) A reference to a law replaced by sections 1-3 of this Act, including a reference in a regulation, order, or other law, is deemed to refer to the corresponding provision enacted by this Act.

(c) An order, rule, or regulation in effect under a law replaced by sections 1-3 of this Act continues in effect under the corresponding provision enacted by this Act until repealed, amended, or superseded.

(d) An action taken or an offense committed under a law replaced by sections 1-3 of this Act is deemed to have been taken or committed under the corresponding provision enacted by this Act.

(e) An inference of a legislative construction is not to be drawn by reason of the location in the United States Code of a provision enacted by this Act or by reason of the caption or catchline of the provision.

(f) If a provision enacted by this Act is held invalid, all valid provisions that are severable from the invalid provision remain in effect. If a provision of this Act is held invalid in any of its applications, the provision remains valid for all valid applications that are severable from any of the invalid applications.

REPEALS

SEC. 5. (a) The repeal of a law by this Act may not be construed as a legislative inference that the provision was or was not in effect before its repeal.

(b) The laws specified in the following schedule are repealed, except for rights and duties that matured, penalties that were incurred, and proceedings that were begun before the date of enactment of this Act:

Executive Orders

Date	Order No.	Section
June 10.....	1933	6166 4
May 29.....	1934	6728

The SPEAKER. Is a second demanded?

Mr. FISH. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered. There was no objection.

The SPEAKER. The gentleman from Texas (Mr. SAM B. HALL, JR.) will be recognized for 20 minutes, and the gentleman from New York (Mr. FISH) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. SAM B. HALL, JR.).

Mr. SAM B. HALL, JR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 6128, as amended, restates certain money and finance laws without substantive change and enacts those laws as title 31 of the United States Code. The bill is a part of the legislative requirement of the Office of the Law Revision Counsel under section 285b of title 2, United States Code, to prepare a proposed codification of those titles of the United States Code that have not been enacted into positive law.

Earlier drafts of H.R. 6128, as amended, and of a proposed report to accompany the bill were circulated to obtain comments from interested Government agencies and members of the public.

Amendments are made to the bill of a further technical and clarifying nature. The Law Revision Counsel is satisfied that H.R. 6128, as amended, is an accurate restatement of existing law without substantive change.

In explanation of the clarifying and technical amendments, the following are offered as substitutions in House Report No. 97-651:

The explanation for section 701 should read as follows:

In clause (1), "agency" (which is defined for purposes of this title in section 101 to mean a department, agency, or instrumentality of the United States) is coextensive with and substituted for the term "department or establishment" which was defined in 31:11 as in part meaning "any executive department, independent commission, board, bureau, office, agency, or other establishment of the Government, including any independent regulatory commission or board". This definition merely restates and continues, and does not in any way change or expand, the definition in 31:11. Under that definition, entities such as the Tennessee Valley Authority that have been interpreted to be outside the purview of the definition will continue to be outside the purview in the same manner and to the same extent that they were under 31:11. The word "includes the District of Columbia government" are used because of existing law but the inclusion of these words is not to be interpreted as construing the extent to which the District of Columbia Self-Government and Governmental Reorganizational Act (Pub. L. 93-198, 87 Stat. 774) supersedes the provisions codified in this title. The words "of the United States" are omitted as surplus. The text of 31:2 (2d-4th pars.) is omitted as unnecessary because of the restatement. The text of section 2 (3d par.) of the Budget and Accounting Act, 1921 (ch. 18, 42 Stat. 20), is omitted as obsolete because of section 501 of the revised title.

The seventh paragraph in explanation of section 716 should read as follows:

In subsection (c)(1), the words "require by . . . the production of" are omitted as surplus. The words "person not in the United States Government" are substituted for "contractors, subcontractors, or other non-Federal persons" for consistency and to eliminate unnecessary words. The words "from whom access is sought", "in the case of service by certified or registered mail", and "post office" are omitted as surplus.

The explanation for section 1101 should read as follows:

In the section, a reference to 31:71 and 471 is omitted because the definitions in the section are not used in 31:71 and 471.

In clause (1), "agency" (which is defined for purposes of this title in section 101 to mean a department, agency, or instrumentality of the United States) is coextensive with and substituted for the term "department or establishment" which was defined in 31:11 as in part meaning "any executive department, independent commission, board, bureau, office, agency, or other establishment of the Government, including any independent regulatory commission or board". This definition merely restates and continues, and does not in any way change or expand, the definition in 31:11. Under that definition, entities such as the Tennessee Valley Authority that have been interpreted to be outside the purview of the definition will continue to be outside the purview in the same manner and to the same extent that they were under 31:11. The words "includes the District of Columbia government" are used because of existing law but the inclusion of these words is not to be interpreted as construing the extent to which the District of Columbia Self-Government and Governmental Reorganizational Act (Pub. L. 93-198, 87 Stat. 774) supersedes the provisions codified in this title. The words "of the United States" are omitted as surplus. The text of 31:2 (2d-4th pars.) is

omitted as unnecessary because of the restatement. The text of section 2 (3d par.) of the Budget and Accounting Act, 1921 (ch. 18, 42 Stat. 20), is omitted as obsolete because of section 501 of the revised title.

The second and third paragraphs in explanation of section 1108 should read as follows:

In subsection (b)(1), the word "President" is substituted for "Office" in 31:16 (last sentence) and "Office of Management and Budget" in 31:23 and 24(a) because sections 101 and 102(a) of Reorganization Plan No. 2 of 1970 (eff. July 1, 1979, 84 Stat. 2085) designated the Bureau of the Budget as the Office of Management and Budget and transferred all functions of the Bureau to the President. The word "prepare" is substituted for "prepare or cause to be prepared" in 31:22 to eliminate unnecessary words. The word "appropriations" is substituted for "regular, supplementary, or deficiency appropriations" in 31:22 and 24(a) to eliminate unnecessary words. The words "in each year" are omitted as surplus. The words "in the form prescribed by the President under this chapter and by the date established by the President" are substituted for "on or before a date which the President shall determine" in 31:23, and "as the President may determine in accordance with the provisions of section 11 of this title" and "in such manner and at such times as may be determined by the President" in 31:24, to eliminate unnecessary words and to provide a cross-reference to the authority of the President to prepare and submit budgets and appropriations request. The words "prepare the request for the executive agency to be included in the budget or changes in the budget or as deficiency or supplemental appropriations" are substituted for "cause such requests to be prepared as are necessary to enable him to include such requests with the Budget in respect to the work of such department or establishment" in 31:23 for clarity and because of the restatement. The word "change" is substituted for "assemble, correlate, revise, reduce, or increase" in 31:16 (last sentence) to eliminate unnecessary words. The words "The head of the executive agency shall use" are substituted for "shall be used by all departments and establishments and their subordinate units" and "shall be made on the basis of" in 31:24 as being more precise. The word "operation" is omitted as being included in "administer". The word "amounts" is substituted for "funds" for consistency in the revised title. The word "divide" is substituted for "administrative subdivisions" because of the restatement.

In subsection (b)(2), the words "deficiency or supplemental appropriations" are substituted for "subsequent appropriations" for consistency. The words "the Office of Management and Budget" are omitted because sections 101 and 102(a) of Reorganization Plan No. 2 of 1970 designated the Bureau of the Budget as the Office of Management and Budget and transferred all functions of the Bureau to the President. The words "the executive agency" are substituted for "by such department or establishment, or by any organization unit thereof" to eliminate unnecessary words.

The first paragraph in explanation of section 1511 should read as follows:

In subsection (a)(1), the words "appropriated amounts" are substituted for "appropriations" for clarity. In clause (3), the word "make" is substituted for "create" as

being more precise. The text of 31:665(d)(2) (5th sentence) is omitted as unnecessary because of section 102 of the revised title.

The second paragraph in explanation of section 3713 should read as follows:

In subsection (a)(1), before clause (A), the word "paid" is substituted for "satisfied" for consistency. In clause (A)(i), the words "and the priority established shall extend as well to cases in which" are omitted because of the restatement. In clause (A)(ii), the word "property" is substituted for "estate and effects" to eliminate unnecessary words. The words "absconding, concealed, or" and "by process of law" are omitted as surplus.

The explanation for section 3729 should read as follows:

In the section, before clause (1), the words "a member of an armed force of the United States" are substituted for "in the military or naval forces of the United States, or in the militia called into or actually employed in the service of the United States" and "military or naval service" for consistency with title 10. The words "is liable" are substituted for "shall forfeit and pay" for consistency. The words "civil action" are substituted for "suit" for consistency in the revised title and with other titles of the United States Code. The words "and such forfeiture and damages shall be sued for in the same suit" are omitted as unnecessary because of rules 8 and 10 of the Federal Rules of Civil Procedure (28 App. U.S.C.). In clauses (1)-(3), the words "false or fraudulent" are substituted for "false, fictitious, or fraudulent" and "Fraudulent or fictitious" to eliminate unnecessary words and for consistency. In clause (1), the words "presents, or causes to be presented" are substituted for "shall make or cause to be made, or present or cause to be presented" for clarity and consistency and to eliminate unnecessary words. The words "officer or employee of the Government or a member of an armed force" are substituted for "officer in the civil, military, or naval service of the United States" for consistency in the revised title and with other titles of the Code. The words "upon or against the Government of the United States, or any department or officer thereof" are omitted as surplus. In clause (2), the word "knowingly" is substituted for "knowing the same to contain any fraudulent or fictitious statement or entry" to eliminate unnecessary words. The words "record or statement" are substituted for "bill receipt, voucher, roll, account, claim, certificate, affidavit, or deposition" for consistency in the revised title and with other titles of the Code. In clause (3), the words "conspires to" are substituted for "enters into any agreement, combination, or conspiracy" to eliminate unnecessary words. The words "of the United States, or any department or officer thereof" are omitted as surplus. In clause (4), the words "charge", "or other", and "to any other person having authority to receive the same" are omitted as surplus. In clause (5), the words "document certifying receipt" are substituted for "certificate, voucher, receipt, or other paper certifying the receipt" to eliminate unnecessary words. The words "arms, ammunition, provisions clothing, or other", "to any other person", and "the truth of" are omitted as surplus. In clause (6), the words "arms, equipments, ammunition, clothes, military stores, or other" are omitted as surplus. The words "member of an armed force" are substituted for "soldier, officer, sailor, or other person called into or employed in the mili-

tary or naval service" for consistency with title 10. The words "such soldier, sailor, officer, or other person" are omitted as surplus.

The second and third paragraphs in explanation of section 3730 should read as follows:

In subsection (a) the words "Attorney General" are substituted for "several district attorneys of the United States [subsequently changed to 'United States attorneys' because of section 1 of the Act of June 25, 1948 (ch. 646 62 Stat. 909)] for the respective districts, for the District of Columbia, and for the several Territories" because of 28:509. The words "by persons liable to such suit" are omitted as surplus. The words "and found within their respective districts or Territories" are omitted because of the restatement. The words "If the Attorney General finds that a person has violated or is violating section 3729, the Attorney General may bring a civil action under this section against the person" are substituted for "and to cause them to be proceeded against in due form of law for the recovery of such forfeiture and damages" for clarity and consistency. The words "as the district judge may order" are omitted as surplus. The words "of the Attorney General" are substituted for "the person bringing the suit" for consistency in the section.

In subsection (b)(1), the words "Except as hereinafter provided" are omitted as unnecessary. The words "for a violation of section 3729 of this title" are added because of the restatement. The words "and carried on", "several" and "full power and" are omitted as surplus. The words "of the action" are substituted for "to hear, try, and determine such suit" to eliminate unnecessary words. The words "Trial is in the judicial district within whose jurisdictional limits the person charged with a violation is found or the violation occurs" are substituted for "within whose jurisdictional limits the person doing or committing such act shall be found, shall wheresoever such act may have been done or committed" for consistency in the revised title and with other titles of the Code. The words "withdrawn or" and "Judge of the" are omitted as surplus. The words "Attorney General" are substituted for "district attorney [subsequently changed to 'United States attorneys' because of section 1 of the Act of June 25, 1948 (ch. 646, 62 Stat. 909)], first filed in the case" because of 28:509.

The explanation for section 6307 should read as follows:

In clause (2), the word "exempt" is substituted for "except" for consistency.

The explanation for section 9103 should read as follows.

In subsection (a), the word "President" is substituted for "Office of Management and Budget" because sections 101 and 102(a) of Reorganization Plan No. 2 of 1970 (eff. July 1, 1970, 84 Stat. 2085) designated the Bureau of the Budget as the Office of Management and Budget and transferred all functions of the Bureau to the President. The words "in a way, and before a date, the President prescribes by regulation for the budget program" are substituted for "under such rules and regulations as the President may establish as to the date of submission, the form and content, the classifications of data, and the manner in which such budget program shall be prepared and presented" to eliminate unnecessary words.

In subsection (b), before clause (1), the words "budget program" are substituted for

"budget program shall be a business-type budget, or plan of operation" for consistency and to eliminate unnecessary words. In clause (1), the words "actual" and "completed" are omitted as surplus. In clause (2), the words "as are necessary or desirable", "types of", "together with", and "funds" are omitted as surplus. In clause (3), the words "as authorized by law" are omitted as surplus.

In subsection (c), the words "as changed" are substituted for "as modified, amended, or revised" to eliminate unnecessary words. The word "submit" is substituted for "transmitted" for consistency. The word "annual" is omitted as surplus. The word "thereafter" is added for clarity. The text of 31:848 (last par.) is omitted as unnecessary.

The first paragraph in explanation of section 9104 should read as follows:

In subsection (a), the words "budget programs for wholly owned Government corporations" are substituted for "Budget programs" for clarity and consistency. The words "legislation . . . be enacted, as may be", "for expenditure", "corporate funds or other", "or limiting the use thereof", "as the Congress may determine", and "funds" are omitted as surplus.

The second paragraph in explanation of section 9108 should read as follows:

In subsection (a), before clause (1), the word "Before" is substituted for "which are" for clarity. The words "bonds, notes, debentures, and other similar" are omitted as surplus. The words "as have been" are omitted as executed. In clause (1), the words "terms and" are omitted as surplus. The restatement of the source provisions does not affect other existing laws.

The explanation for section 9109 should read as follows:

The word "President" is substituted for "Director of the Office of Management and Budget" because sections 101 and 102(a) of Reorganization Plan No. 2 of 1970 (eff. July 1, 1970, 84 Stat. 2085) designated the Bureau of the Budget as the Office of Management and Budget and transferred all functions of the Bureau to the President. The words "with the approval of the President" are omitted because of the restatement. The word "considers" is substituted for "deemed" for consistency. The words "in connection with the budget program of such corporation" are omitted as surplus. The words "submitted to Congress under section 1105 of this title" are added for clarity. The words "deemed to be" are substituted for "treated . . . as if it were" for consistency. The word "agency" is substituted for "Government agency" and "establishment" because of section 101 of the revised title and for consistency. The words "if it were", appropriations, expenditures, receipts, accounts, and other", and "in connection with the budget program for any fiscal year" are omitted as surplus. The words "deemed to be" are substituted for "regarded as" for consistency.

Mr. FISH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join my colleague in supporting enactment of H.R. 6128, as amended, a bill to revise, codify, and enact without substantive change certain general and permanent laws, related to money, finance, as title 31,

United States Code, "Money and Finance."

As the distinguished gentleman from Texas (Mr. SAM B. HALL, JR.) stated, this bill was prepared by the Office of the Law Revision Counsel of the House of Representatives. The Law Revision Counsel is required by law to restate in comprehensive form all statutes at large which have not yet formally been enacted as titles of the United States Code. Those requirements were imposed on the office in 1974 when the office was established by the House as an independent non-partisan office under the Speaker.

In H.R. 6128, all laws related to money and finance have been restated by replacing obsolete and awkward terms with simple language, and eliminating superseded, executed, and obsolete laws.

A number of earlier drafts of the bill were circulated and reviewed by interested Government agencies and members of the public. The Law Revision Counsel, the Department of the Treasury, the Office of Management and Budget, and the Comptroller General are satisfied the bill is an accurate restatement of existing law without substantive change. The Congressional Budget Office finds no additional cost will be incurred as a result of enactment.

I urge my colleagues to support H.R. 6128, as amended.

Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. SAM B. HALL, JR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. SAM B. HALL, JR.) that the House suspend the rules and pass the bill, H.R. 6128, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, H.R. 6128, as amended, was passed.

A motion to reconsider was laid on the table.

SHY FLAT TABERNACLE CEMETERY, CHRISTIAN COUNTY, KY.

Mr. DE LA GARZA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6195) to direct the Secretary of Agriculture to release a reversionary interest held by the United States in certain lands located in Christian County, Ky., so that such lands may be used for cemetery purposes.

The Clerk read as follows:

H.R. 6195

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, with respect to 1.52 acres of land in Christian

County, Kentucky, described in section 2 of this Act, the Secretary of Agriculture, on behalf of the United States, shall release the Commonwealth of Kentucky, without consideration, from the condition contained in a deed dated July 9, 1954, between the United States and the Commonwealth of Kentucky granting certain lands in Christian County, Kentucky, of which the described lands are a part, that requires that the lands so granted be used for public purposes and provides for a reversion of such land to the United States if at any time it ceases to be so used: *Provided*, That such release shall in no way affect the interests of the United States in coal, oil, gas, and other minerals (not outstanding or reserved in third parties) reserved by the United States in the described lands: *Provided further*, That such release shall be applicable so long as the described lands are used exclusively for cemetery purposes.

SEC. 2. The 1.52 acre tract described in section 1 lies on the west side of Kentucky Highway numbered 109, touching the Tabernacle church and Cemetery on the west side, and is more particularly described as follows: Beginning at an iron pipe on the west side of an old road the same being the north east corner of the Tabernacle Cemetery property; thence, north 76 degrees and 30 minutes east, and in line with the north side of the above mentioned cemetery 237.90 feet to an iron pipe in the right-of-way line of Kentucky Highway numbered 109; thence, in line with the right-of-way line of the highway south 54 degrees 45 minutes east 292.80 feet to an iron pipe in the right-of-way line in Kentucky Highway numbered 109; thence, south 78 degrees 00 minutes west and in line with the south side of the Tabernacle Cemetery property 384.60 feet to a concrete monument the same being the south east corner of the cemetery property; thence, north 25 degrees 30 minutes west and in line with the east side of said cemetery 211.03 feet to an iron pipe, the same being the place of the beginning.

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from Texas (Mr. DE LA GARZA) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. FINDLEY) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 6195 involves what may seem a small matter in comparison with most bills that come before the House. But it is a significant matter to members of a small church in Kentucky who need about 1½ acres of land to expand their church cemetery.

The 1.52 acres in question are part of larger conveyance granted to the Commonwealth of Kentucky by the United States in 1954 and which is now the Pennyroyal State Forest. The lands were granted under authority of section 32(c) of the Bankhead-Jones Farm Tenant Act of 1937. That section provides that lands acquired by the Federal Government under the act may be conveyed to public authorities

and agencies, but with the condition that they be used for public purposes, and that if they are not so used, they revert to the United States. The 1954 deed contains this "public purpose reversionary clause" and thus would prevent the State from conveying any land in the project to the cemetery corporation. The bill releases this clause for the 1.52-acre tract, but retains to the United States 75 percent of the mineral interests.

The Senate has passed identical legislation. Our committee ordered the bill reported by a recorded vote of 25 ayes to no nays. Adoption by the House will remove a rather technical obstacle and permit the Shy Flat Tabernacle Church to expand its cemetery.

□ 1215

Mr. FINDLEY. Mr. Speaker, there is no controversy whatsoever on this bill. It went through by unanimous vote in committee.

I urge support of my colleagues for the bill, and I have no further requests for time.

Mr. DE LA GARZA. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. FINDLEY. Mr. Speaker, I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA) that the House suspend the rules and pass the bill, H.R. 6195.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture be discharged from further consideration of the Senate bill (S. 2154). To direct the Secretary of Agriculture to release a reversionary interest held by the United States in certain lands located in Christian County, Ky., so that such lands may be used for cemetery purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2154

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, with respect to 1.52 acres of land in Christian County, Kentucky, described in section 2 of this Act, the Secretary of Agriculture, on behalf of the United States, shall release the Commonwealth of Kentucky, without consideration, from the condition contained

in a deed dated July 9, 1954, between the United States and the Commonwealth of Kentucky granting certain lands in Christian County, Kentucky, of which the described lands so granted be used for public purposes and provides for a reversion of such land to the United States if at any time it ceases to be so used: *Provided*, That such release shall in no way affect the interests of the United States in coal, oil, gas, and other minerals (not outstanding or reserved in third parties) reserved by the United States in the described lands: *Provided further*, That such release shall be applicable so long as the described lands are used exclusively for cemetery purposes.

SEC. 2. The 1.52 acre tract described in section 1 lies on the west side of Kentucky Highway numbered 109, touching the Tabernacle Church and Cemetery on the west side, and is more particularly described as follows: Beginning at an iron pipe on the west side of an old road the same being the north east corner of the Tabernacle Cemetery property; thence, north 76 degrees and 30 minutes east, and in line with the north side of the above mentioned cemetery 237.90 feet to an iron pipe in the right-of-way line of Kentucky Highway numbered 109; thence, in line with the right-of-way line of the highway south 54 degrees 45 minutes east 292.80 feet to an iron pipe in the right-of-way line of Kentucky Highway numbered 109; thence, south 78 degrees 00 minutes west and in line with the south side of the Tabernacle Cemetery property 384.60 feet to a concrete monument the same being the south east corner of the cemetery property; thence, north 25 degrees 30 minutes west and in line with the east side of said cemetery 211.03 feet to an iron pipe, the same being the place of the beginning.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 6195) was laid on the table.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

MILITARY CONSTRUCTION AUTHORIZATION ACT, 1983

Mr. BRINKLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6214) to authorize certain construction at military installations for fiscal year 1983, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Georgia (Mr. BRINKLEY).

The motion was agreed to.

The SPEAKER. The Chair designates the gentleman from Kansas (Mr. GLICKMAN) as Chairman of the Committee of the Whole and requests the

gentleman from Texas (Mr. DE LA GARZA) to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6214, with Mr. DE LA GARZA, Chairman pro tempore, in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Georgia (Mr. BRINKLEY) will be recognized for 1 hour, and the gentleman from Virginia (Mr. WHITEHURST) will be recognized for 1 hour.

The Chair recognizes the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is a pleasure to bring the military construction bill to the floor because it is a positive measure attuned to the needs of people. It is oriented to the human needs of our military population—where they live, where they work, and where they play.

Of the \$7.8 billion sought to be authorized, over \$1 billion is required for operations under the housing program. Of course, this includes utilities.

Another billion dollars plus is provided for maintenance. The total housing program accounts for over one-third of the total bill and deals with 363,498 units and contemplates 2,915 new units of housing.

Our subcommittee held 10 sessions on this one bill, and dealt with such innovative initiatives as joint or dual use of facilities; flexible barrier technology more commonly known as air bubble construction; and photovoltaics.

The following response was made to my inquiry about dual use functions in a single facility:

Each DOD dependents school has an important dual use. These American schools could almost be appropriately termed American Community Centers. They are the gathering place for the military and the families of the military. The facilities are frequently used not only for dependents school purposes but also for other activities. Examples are: military off-duty and dependents education classes, club and other activity meetings, gym activities and leagues, chapel services, Sunday school, choir practice, dancing, boy and girl scouts meetings, and movies. The DOD dependents schools are heavily used during the day and the evening.

Potential use of flexible barrier technology led to the deferral of several projects in anticipation of possible cost savings. The air bubble concept is chiefly used for warehouses, recreational and other group facilities. In Turkey where needs are more urgent than elsewhere, no deferrals were made.

An important provision in our bill, authored by Representative NICK MAVROULES, is intended to promote the use of photovoltaics and other renewable energy sources. This is a genuinely exciting area and I am glad to be part of this key undertaking.

Now for some details.

On May 4, by a 35 to 0 vote, the Committee on Armed Services approved H.R. 6214, a clean bill totaling \$7,508,014,000. This amount is \$355,251,000 below the requested amounts.

The Department of Defense originally requested new authority in the amount of \$7,811,164,000 for fiscal year 1983. Also, DOD submitted a fiscal year 1982 supplemental request in the amount of \$52,101,000. Combined the two requests total \$7,863,265,000. Rather than reporting the supplemental request as a separate bill, the committee considered it with the fiscal year 1983 request.

Because of severe budgetary constraints, a number of reductions were made and some projects were deleted that would otherwise be considered valid requirements. However, based upon overall priorities, the projects were deferred. At the same time, projects were added when it was determined by either testimony or supporting material that priority was great enough to warrant their inclusion in the bill.

Before turning to a discussion of some of the major items in the bill, I want to comment on two committee amendments. These amendments are technical in nature and are designed to clarify the committee's intention of conforming with the requirements of section 402(a) of the Budget Act. The two amendments simply make clear that section 606 and section 804 of the bill become effective October 1, 1982, the beginning of the new fiscal year. Further, section 804 is amended by making it subject to the availability of appropriations.

This section 804 is different from the Senate bill which carries that same section number. The Senate provision contains general authority to sell or exchange Defense real property. Our bill has no such provision and I am personally opposed to the Senate provision.

Briefly, some of the major items in the bill are: \$365.6 million for the rapid deployment force construction; \$977.2 million for European construction, including \$375 million for the NATO Infrastructure program; \$18.3 million of a binary munitions facility at Pine Bluff Arsenal, Ark.; \$103 million for the MX program; and \$2.9 billion for the military family housing program including \$200 million for the construction of 2,915 new units of housing, \$2.1 billion for the operation and upkeep of 363,498 units of housing

and \$169 million for the leasing of approximately 28,252 units.

Turning to the individual titles of the bill, the Department of the Army's requests in title I totaled some \$2.09 billion. The committee reduced the request by \$61.2 million; therefore, the new total is \$2.03 billion.

Included in the Army program is \$555.5 million for construction inside the United States.

For overseas Army construction, primarily in Europe, Korea, and in support of the Rapid Deployment Force (RDP), the committee approved \$320 million.

For title II, the Navy portion of the bill, the original request amounted to \$1.91 billion. Following committee consideration, the amount was raised to \$1.97 billion, an increase of some \$64 million.

Included in the Navy program is \$900.7 million for overseas construction inside the United States and \$220.8 million for overseas construction.

For title III, the Air Forces section of the bill, the Air Force requests totaled \$2.9 billion. The committee reduced the program by \$280.8 million; therefore, the new total is \$2.6 billion.

This authorization will provide \$1 billion for construction inside the United States and \$498.3 million for overseas construction.

Contained in the recommendation is \$103 million for the MX program. The committee reduced the original authorization request of \$207 million by \$104 million. The \$103 million authorization permits work to proceed on those facilities that would be basic to any basing mode and that reflect the current production schedule of the missile.

For title IV, Defense agencies, the total request was \$405,396,000. The committee is recommending \$297,466,000, a decrease of \$107,930,000 in the request amount.

Title V includes \$375 million for the NATO infrastructure program. The committee recommends the requested amount.

In title VI, administrative provisions, the committee extended cost variation authorities and certain project authorizations for items not yet executed.

In title VII, Guard and Reserve facilities, the committee approved \$232,858,000 which is \$30,658,000 above the requested authorization of \$202.2 million. The increased authorization will permit the Guard and Reserve forces to proceed with the program at the original request, and to build additional armories and undertake other projects which contribute to their readiness.

In title VIII, general provisions, the committee approved three fair market value land exchanges; approved a provision sponsored by Representative DAN DANIEL designed to provide for a

more effective programing and construction schedule of commissaries; and approved the Marvroules initiative on photovoltaics.

Mr. Chairman, this concludes my statement on H.R. 6214. Mr. TRIBLE, the ranking Republican member, and each and every member of the subcommittee gave yeomanship service and I commend them most warmly. I strongly urge my colleagues to support passage of this bill.

□ 1230

Mr. WHITEHURST. Mr. Chairman, I yield myself such time as I may expend.

Mr. Chairman, just let me make some general observations first. As all of us in this Chamber know, this is the last year of the congressional service of our distinguished leader, the gentleman from Georgia (Mr. JACK BRINKLEY). We view his leaving with great misgivings because he has always given splendid service in the Committee on Armed Services, and moreover, he has been particularly effective as the chairman of the Subcommittee on Military Installations and Facilities.

I have served with a number of colleagues of mine who have been chairmen of this subcommittee, and all have been most competent, but I must say that this year and the last year, with the gentleman from Georgia (Mr. BRINKLEY), have been particularly rewarding. We wish the gentleman Godspeed as he returns to his native State. We are certainly going to miss him as our leader on this subcommittee.

Mr. Chairman, I wish to join my good friend, the distinguished gentleman from Georgia (JACK BRINKLEY), in support of H.R. 6214, the Military Construction Authorization Act for fiscal year 1983. This is a very complex and important bill which touches every facet of our defense effort. It includes facilities to support our strategic weapons systems, contingency facilities for our Rapid Deployment Joint Task Force (RDJTF), and projects to upgrade the living and working conditions of our service personnel.

The Committee on Armed Services, faced with severe budget constraints, spent long hours in hearings searching for economies that would bring about savings without reducing readiness. Our task was to insure that all of the projects approved in the fiscal year 1983 program were essential to readiness of our strategic and conventional forces and would improve the poor living and working conditions of our military personnel not only at home but in Europe where many facilities are outmoded and beyond economic repair.

Tough choices had to be made. Therefore, I want to emphasize that the legislation before you today is \$335 million below the budget request submitted by the Department of De-

fense. It reflects the committee's belief that reduction in the Federal budget, defence included, must be implemented to lessen the budget deficit facing our country. Let me briefly comment on some of the painful reductions we were forced to make.

CONSTRUCTION IN EUROPE

Construction in Europe continues to constitute a major portion of the military construction program. The Defense Department requested \$1.165 billion to improve the readiness of U.S. and allied forces for fiscal year 1983. The request included \$375 million for the U.S. contribution to the NATO infrastructure program, representing a 27.4-percent share of this common funded effort by alliance members.

While the committee approved the amount requested for the U.S. contribution to the NATO Infrastructure Fund, it deferred some \$188 million in projects proposed in Europe. These included schools and family housing at two sites selected for initial deployment of the ground-launched cruise missile (GLCM). These funds were deferred pending the outcome of United States-Soviet negotiations on mutual reduction of intermediate range nuclear forces. We attempted to defer any expenditures on construction that might have to be abandoned because of possible policy changes by the United States or its allies. An additional \$44.3 million was deferred for construction of support facilities at a third GLCM site pending verification of approval by the host nation.

The committee further deferred \$56 million in projects at sites designated by the Army as part of its master re-stationing plan (MRP) until ongoing negotiations on cost-sharing with the Federal Republic of Germany (FRG) are complete. MRP would relocate three U.S. Army brigades into new facilities nearer the East German border thereby improving living and working conditions for our service personnel. The committee fully supports MRP but believes that the FRG as the host nation should fund the entire cost of the plan. The Department of Defense and the State Department have been urged to vigorously pursue complete negotiations that would result in a bilateral agreement providing for German participation in a satisfactory cost-sharing arrangement.

Despite the increase in construction expenditures, the backlog of requirements for construction in Europe continue to grow. These growing requirements cannot continue to be addressed solely through unilateral U.S. funding. We must aggressively seek alternative funding sources which rely more heavily on allied burden-sharing. In the light of the large commitment of United States resources to protect our interests and those of our European allies in Southwest Asia, the NATO

allies and particularly the German Government must expand their support of our mutual efforts in the defense of Europe.

RAPID DEPLOYMENT JOINT TASK FORCE

The committee cut \$131.8 million from the \$497.4 million requested for construction to support operations of the Rapid Deployment Joint Task Force (RDJTF) near the Persian Gulf and in the Indian Ocean. Included was a \$51.1 million reduction in the \$60.4 million request for construction on Oman pending Omani Government siting approval for projects previously authorized in fiscal year 1982. The \$64.9 million request for new facilities at Lajes Air Force Base in the Portuguese-owned Azores Islands was also denied because bilateral negotiations with Lisbon over U.S. rights to use the base have not been completed.

These actions by the committee do not represent a lack of support for the RDJTF. Rather, they reflect the judgment that the RDJTF construction program should be properly scoped and planned before authorization is requested.

Mr. Chairman, the committee is further concerned that the United States is bearing the total cost of the RDJTF construction program despite the fact that we are less dependent upon Persian Gulf oil than Western Europe or Japan. For this reason, we must continue to press for increased burden-sharing by our allies. The United States can no longer afford to foot the entire bill. Our allies must pay their fair share of the costs for our mutual defense.

MX CONSTRUCTION

As my colleague, Mr. BRINKLEY, has explained, the Air Force requested \$207 million to begin construction of various logistics, flight test, training, and support facilities which are required for the MX weapon system.

The committee, which supports the MX missile program and the expeditious selection of a permanent basing mode, reduction of a permanent basing mode, reduced the Air Force request by \$104 million. The \$103 million authorization approved will permit construction to go forward on those facilities that would be required regardless of the basing mode eventually selected.

COST-SAVING INITIATIVES

Mr. Chairman, given the state of the economy and the tight budget constraints facing us, I would like to touch briefly on some economic initiatives undertaken by the Armed Services Committee in the area of military construction and military family housing.

With the ever escalating costs in the military construction and family housing programs, the committee has been increasingly concerned with the lack of initiative on the part of the defense

establishment toward investigating modern construction technologies that may prove less costly than current practices.

In the fiscal year 1982 military construction act, the committee successfully initiated the use of manufactured housing in a 200-unit test project at the Army's National Training Center at Fort Irwin, Calif. As a result of opening the military family housing market to less costly alternatives to conventional construction, the bidding competition at Fort Irwin has been intense. The Army was able to realize a \$3.3 million savings on the site-built portion of the program and as a result has been able to program an additional 30 units of conventionally constructed housing at no additional cost to the Government.

In conjunction with the bill before you today, a number of selected overseas construction projects were deferred and the military services were authorized to undertake a comprehensive study of the possible use of flexible barrier technology, more commonly known as air bubble construction. This type of construction is being used by universities, elementary and secondary schools, and other public agencies throughout the United States. Based upon available information, it is less costly than permanent construction and offers the advantage of being relocatable. The triservice study should be completed and the finding submitted to the Armed Services Committee before the fiscal year 1984 military construction request is submitted to the Congress.

Again, we are hopeful that savings to the taxpayer will be generated by these committee initiatives.

Finally, Mr. Chairman, the military construction program for fiscal year 1983 is more reflective of the needs of the Department of Defense than has been the case in recent years. Due to a series of contributing factors, the Department of Defense physical plant is in an accelerating state of decline, often impairing our defense capability. Much of it is of World War II vintage which means that many facilities still in use are obsolete and have far exceeded their planned economic life. This condition, coupled with inconsistent funding support during the past several years, has produced a large backlog in both new construction and maintenance of existing structures. As a result, it has precluded optimum training, created lower morale, and has severely inhibited reenlistment efforts.

This situation must be turned around. I believe this bill will help do that. I, therefore, urge my colleagues to vote in favor of H.R. 6214 which meets the military services' needs and at the same time is fiscally responsible in that the total amount authorized is well below the administration's budget

request and also meets the requirements of the Budget Committee.

Mr. BRINKLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. HUNTER. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from California.

Mr. HUNTER. Mr. Chairman, as a member of the Committee on Armed Services, I would also like to commend our colleague, the gentleman from Georgia (Mr. BRINKLEY), a member of the committee, for the tremendous work that he has done, and I would note simply that his responsibility as chairman of the Subcommittee on Military Installations and Facilities is extremely important to the defense of this Nation and to our allies.

I have been very much impressed with the gentleman's intellectual approach to his job and his deliberative way of doing things, and I wish my colleague the best. The leadership he has shown in the Committee on Armed Services is an example for all of us in our own careers. I would like to say, "Thanks a lot, JACK, for your service to America."

Mr. BRINKLEY. Mr. Chairman, I thank the gentleman from California (Mr. HUNTER), very kindly for his remarks, and also I thank the gentleman from Virginia (Mr. WHITEHURST) very kindly for his remarks.

Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. STENHOLM).

Mr. STENHOLM. Mr. Chairman, I rise in strong support of this bill.

Mr. Chairman, it is my intention to introduce an amendment to H.R. 6214, the Military Construction Authorization Act of 1983, that would permit the Air Force to begin a promising new pilot program in the area of military family housing.

This amendment would allow the Secretary of the Air Force to enter into contracts for the leasing of housing facilities for periods of up to 30 years and at no more than five separate locations. No more than 300 units could be leased at each location.

This would represent a novel, although certainly not radical, approach to providing military family housing and would explore the possibility of meeting our military family housing needs with greater speed, efficiency, and flexibility.

Most importantly, there is a great need for this kind of approach and there is a great need to move quickly, in view of severe shortages in housing for military families that we are now seeing occur.

For example, in the 17th District of Texas, at Dyess Air Force Base, the waiting list for military family housing runs as long as a year. The demand for family housing included, in May of

this year, the needs of 407 families with personnel of the ranks above E-4 and 448 of the ranks E-4 and below for a total shortfall of 855. Yet the occupancy rate of off-base apartments and mobile homes is 98 percent.

Out of adversity, however, ingenuity is often born. The officers at Dyess Air Force Base, along with officials from the city of Abilene and members of the Abilene Chamber of Commerce have worked together to form a planning committee and to propose that this badly needed family housing, 300 units in all, would be privately financed and would be leased, and later acquired, by the Air Force.

This is not an isolated situation and not an isolated suggestion. A similar situation exists at Eielson Air Force Base in Alaska and a proposal is being generated regarding that base, also, for the private financing of military family housing construction. This is an approach to providing housing in which the Department of the Air Force and the Department of Defense are acutely interested. DOD has commissioned a study of the private financing of military family housing in general and the Air Force is providing analysis and assistance in preparing these specific base proposals.

Generally, then, this amendment contemplates entering into an agreement with a developer to build housing units and to lease them to the Air Force over a number of years. Existing housing could be acquired on the same basis. Such leasing authority would be a novel approach, but not a radical one. Right now, for example, the military can enter into such long-term leasing arrangements overseas that last up to 10 years. This provision is very similar to the current law allowing overseas long-term housing leases, with longer terms allowed to obtain favorable financing.

I know there will be concern that a proposal such as this will add to off-budget spending in future years. I believe my views on off-budget spending are well-known: We are suffering today because of spending programs that were written into law that were open-ended, and provided for unpredictable levels of spending for indefinite periods of time. But there is a difference between writing a blank check and entering into a leasing contract where you know in advance exactly what your outlays will be. A long-term leasing proposal such as this one will not compromise our ability to plan future budgets. It will recognize, however, the immediate need to lower our deficits while still providing needed family housing that otherwise would not be built for several years down the line.

Moreover, this gives us a chance to encourage the interest and involvement of local communities in Federal programs. I know personally that

there is a close relationship between the city of Abilene and Dyess Air Force Base. Each is deeply interested in the future of the other and both are anxious to form the type of partnership this amendment would allow. To encourage this type of mutually beneficial working relationship between a local community and the Federal Government is to promote the New Federalism at its best.

I know there is concern that no hearings have been held on this topic, and that enacting this amendment now might be considered putting the cart before the horse. In response, I would emphasize: First, there is a great need to move as quickly as possible to provide the family housing our military personnel need; in some areas this is a crisis situation; second, this is only a pilot program, limited to five locations; this will give us the opportunity to have practical, empirical data on hand when we consider whether to make such a method of financing more widely available; third, there will be adequate mechanisms for review, that are already in place, when the Air Force considers specific proposals, when these are reported to appropriate congressional committees, and when appropriations for such specific programs are considered; this is, after all, only authorizing legislation; and fourth, possible legal barriers that would relate much more specifically to an individual project, such as the proposal to use tax-exempt bonds for the Dyess housing, can be dealt with better separately from this legislation and, in fact, are currently being pursued.

This amendment proposes a pilot program that first, answers an immediate need for new military family housing in some areas; second, allows us to test a flexible new approach to providing this housing in a prudent, limited manner; and third, is fiscally responsible.

● Mr. LAGOMARSINO. Mr. Chairman, I rise in support of H.R. 6214, the Military Construction Authorization Act for fiscal year 1983. I want to commend the chairman and the committee for their work on this bill. At a time of competing national priorities, when we need to simultaneously limit spending while strengthening our national defense, the committee has done an outstanding job. This bill provides needed facilities for our national defense while carefully insuring fuller participation by our allies and the most efficient and cost effective methods of construction. The \$7.5 billion authorized in this bill, while below the amount requested by the administration, nonetheless represents a substantial sum of money, and it behooves us to insure that it is spent carefully. I think the committee has done an excellent job in that respect. As currently before us, the bill authorizes funds

for several important projects at bases associated with the 19th Congressional District of California, which I have the honor to represent. In particular, it includes needed funds for Space Shuttle facilities at Vandenberg Air Force Base, which will help keep that very successful program on track toward a needed Western launch facility a few years from now. Other items in the bill are equally vital to our national interest, and I urge my colleagues to support the committee and its work and pass this bill. ●

Mr. BRINKLEY. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. Pursuant to the rule, the bill shall be read under the 5-minute rule by title and each title shall be considered as having been read.

The Clerk will designate section 1.

Section 1 reads as follows:

H.R. 6214

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Military Construction Authorization Act, 1983".

Mr. BRINKLEY. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the Committee rose, and the Speaker pro tempore (Mr. BRINKLEY), having assumed the chair, Mr. DE LA GARZA, Chairman pro tempore of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6214) to authorize certain construction at military installations for fiscal year 1983, and for other purposes, had come to no resolution thereon.

RECONCILIATION LEGISLATION FROM AGRICULTURE COMMITTEE SCHEDULED FOR TOMORROW

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, I take this time to advise the Members of the House that tomorrow morning, as the House convenes or shortly thereafter, the Committee on Agriculture will bring before the House reconciliation legislation. I am very happy to inform the Members that the Committee on Agriculture had been directed by the Committee on the Budget and by the action of the House to reduce by some \$779 million.

The committee has done an exceedingly good job, and we will come with a package which will save over \$1 billion of taxpayers' money. I do hope that the Members of the House will support the activities of the Committee on Agriculture.

We have endeavored very diligently, not only to carry out the direction of the House in its budget resolution, but to see at the same time that we do not destroy programs within the jurisdiction of the Department of Agriculture and the Committee on Agriculture. We have tried in a responsible way to maintain the programs, but yet, knowing of the need to reduce our expenditures, we have tried to do so in a way that would hurt the least number of people for the largest amount of savings and to reduce services to the least number of people for the largest amount of savings. We will be bringing that legislation up tomorrow shortly after the House convenes.

WILDERNESS PROTECTION ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6542) to withdraw certain lands from mineral leasing, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING).

The motion was agreed to.

The SPEAKER pro tempore. The Chair designates the gentleman from Minnesota (Mr. OBERSTAR) as Chairman of the Committee of the Whole and requests the gentleman from Texas (Mr. DE LA GARZA) to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 6542, with Mr. DE LA GARZA (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Ohio (Mr. SEIBERLING) will be recognized for 30 minutes, and the gentleman from Alaska (Mr. YOUNG) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 6542, the Wilderness Protection Act of 1982. H.R. 6542 is a response to the threat posed to wilderness and wilderness candidate areas by other 1,000 applications for oil and gas and other mineral leases in existing wilderness areas, and an additional untold number of lease applications in areas that are under review for possible addition to the National Wilderness Preservation System. The bill protects existing wilderness by perma-

nently withdrawing it from mineral leasing and affords temporary protection to wilderness candidate areas. Time is of the essence in enacting this legislation because an existing moratorium on leasing in wilderness expires at the end of this current session of Congress. However, prior to discussing the merits of the legislation in detail, I believe it would be helpful to briefly describe the events which led us to the point we are at today.

When Congress passed the Wilderness Act in 1964, it did so with the intention of securing "for the American people of present and future generations the benefits of an enduring resource of wilderness." At the same time, a political compromise was reached in section 4(d)(3) of the Wilderness Act which allowed discretionary mineral leasing in wilderness until 1984 "to the same extent as applicable prior to the effective date of this act." At that time and prior to enactment of the Wilderness Act, it was Forest Service policy not to recommend approval of mineral lease applications in wilderness, wild and primitive areas except in the rarest of circumstances where directional drilling or other nonsurface-disturbing methods could be used to avoid "any invasion of the surface" of such areas. This policy remained in the Forest Service manual and was followed by every administration until this one.

On May 14, 1981, the longstanding policy against leasing was revised and both the Departments of Agriculture and the Interior now indicate that they interpret the law to deny them discretion to reject mineral lease applications solely on wilderness grounds. In addition, the Government has been considering applications to allow explosive seismic prospecting in wilderness. Interior Secretary James Watt has stated that this new interpretation of the law is likely to continue and has suggested that Congress amend the law if it wishes to clearly enunciate a policy against leasing in wilderness and wilderness candidate areas.

Just prior to and after the May 1981 policy change, a series of events gradually aroused public concern over the wilderness/leasing issue:

In early 1981 the Forest Service considered allowing seismic exploration involving the use of explosives in the Bob Marshall Wilderness complex in Montana. The public also learned that over 340 oil and gas lease applications were pending in the Bob Marshall complex.

On September 1, 1981, the Bureau of Land Management issued three leases in the Capitan Mountains Wilderness Area in New Mexico without completing an environmental impact statement, and without notice to the public or the Congress.

On October 5, 1981, the forest supervisor for the Ouachita National Forest

in Arkansas recommended leasing in a portion of the Caney Creek Wilderness without opportunity for public comment prior to making his decision. Interior Committee members subsequently received a letter from Senator BUMPERS requesting that we assist him in obtaining an emergency withdrawal of the area to prevent any leasing. The Senator also wrote Forest Service Chief Max Peterson to express his opposition to leasing.

On October 22, 1981, the Forest Service issued a draft environmental assessment recommending oil and gas leasing within the Ventana Wilderness on California's Big Sur coast, the Santa Lucia Wilderness, and the proposed Dick Smith Wilderness. This leasing was roundly condemned by numerous Members of the California congressional delegation, and the Big Sur area's Congressman, LEON PANETTA.

On November 13, 1981, the Forest Service issued a draft environmental impact statement recommending the leasing of 89,000 acres of Wyoming's Washakie Wilderness, despite concern expressed by the Wyoming Congressional delegation, and as I understand it, opposition from roughly 98 percent of the public that commented on the leasing proposal.

In January 1982 the existence of lease applications covering some 49,000 acres of the Alpine Lakes Wilderness in Washington State became public knowledge. Both the Governor of Washington and the entire congressional delegation responded to the overwhelming public sentiment against leasing by indicating their opposition to any leasing in the Alpine Lakes area.

Just 2 weeks ago the public became aware of oil and gas lease applications covering some 31,260 acres of the well-known and often photographed Maroon Bells-Snowmass Wilderness, which spans the extraordinarily spectacular high country between Aspen and Crested Butte, Colo. Oil and gas development in this area could have severe adverse impacts on the resident elk herd and on the existing heavy use of the area for hunting, fishing, and other primitive recreation.

Information supplied by the Forest Service reveals that there are currently over 1,000 applications pending for oil and gas leases covering more than 3 million acres of existing wilderness, and also numerous applications for geothermal and other minerals leasing. It appears that the 1981 policy change has sparked interest in leasing in wilderness, with new lease applications being filed constantly. Unless Congress acts to ban leasing, it seems likely that lease issuance could begin on a nationwide basis shortly after the expiration of the current moratorium at the end of this year. Indeed, the

Forest Service estimates that absent a leasing ban, \$1 million will be spent just to process lease applications in wilderness areas in fiscal year 1983 alone.

In response to this threat, and in order to give Congress time to examine the issue in detail, in November 1981 the House Interior Committee voted 41 to 1 to request Secretary Watt to refrain from issuing leases in wilderness until June 1982. In late January, the Secretary extended the moratorium until the end of the current session of the 97th Congress. However, the moratorium applies only to the actual issuance of leases, and not necessarily to the preparation of environmental impact statements or other actions administratively or legally required prior to leasing. Thus, even as the moratorium is in place, work preparatory to leasing and the processing of lease applications is continuing in many instances. It is possible, therefore, that many lease applications will be deemed procedurally ready for approval when the moratorium expires and that leases could be issued rapidly after that date absent legislation or other congressional action. For example, in a May 1982 draft environmental impact statement on the land management plan for the San Juan National Forest in Colorado, leasing was tentatively recommended in portions of the South San Juan, Lizard Head, and Weminuche wilderness areas.

In recognition of this situation, on December 16, 1981, Congressman PHILLIP BURTON introduced the Wilderness Protection Act (H.R. 5282) to permanently withdraw all wilderness and wilderness candidate areas from mineral leasing and hardrock mining. Then, in late February 1982, Secretary Watt responded with his own version of a wilderness protection bill (H.R. 5603) which afforded some temporary protection for wilderness and wilderness candidate areas, but at the same time contained other provisions to open wilderness candidate areas for timber harvest, road construction, water projects, ski area construction, and other development. The Watt bill would also have allowed the President to open wilderness areas to mineral leasing and development without the concurrence of Congress.

With bills thus introduced representing two widely divergent concepts of wilderness protection, and with the moratorium due to expire in late 1982, the Subcommittee on Public Lands and National Parks, which had already held 2 days of hearings on the subject, held an additional 7 days of hearings in March and April. As is generally the case with the subcommittee's hearings, the hearings were open to anyone who wished to testify, and all those who called in to sign up were given time to speak. By the end of

April, testimony had been received from some 516 witnesses at hearings in Washington, D.C.; Cody, Wyo.; Grand Junction, Colo.; Santa Ana, Calif.; San Francisco, Calif.; Seattle, Wash., and St. Paul, Minn. Of the 516 witnesses who testified, some 490 opposed mineral leasing and development in wilderness and roundly condemned the concepts of the Watt bill. The Burton bill, on the other hand, received strong support. Based on testimony at the hearing and other public input, Mr. LUJAN, the ranking Republican on the Interior Committee, and I consulted with other members and determined that it would be advisable to fashion a compromise bill which reflected the basic wilderness protection goals of the popular Burton bill but moderated certain provisions. Accordingly, a compromise bill was prepared during May 1982, and was introduced as H.R. 6542 on June 8. The bill was reported by the Subcommittee on Public Lands and National Parks on June 18 and by the Interior Committee on June 24 on a rollcall vote of 34 to 7.

As the preceding summary of recent events indicates, H.R. 6542 is a necessary response to documented threats to the National Wilderness Preservation System as well as a bipartisan effort to avoid the controversy which will ensue if Secretary Watt's moratorium expires prior to the enactment of legislation. And above all, the bill addresses the public's desire to see wilderness and wilderness candidate areas placed off limits to leasing. This desire stems from the belief that wilderness and mineral development are simply incompatible, and that a small percentage of the federally owned lands should be off limits to development, even if they appear to have some mineral potential. The statistics and other evidence support this belief.

At the outset, it should be remembered that the withdrawals of H.R. 6542 are limited to existing wilderness and national forest wilderness candidate areas, and as such cover roughly 2 percent of the land in the Lower 48 States. The withdrawals do not cover BLM wilderness study areas, but even if those were to be added, the Department of Energy's contractors at the Oak Ridge National Laboratory estimate that wilderness and wilderness candidate areas contain only on the order of 3 percent of the Nation's undiscovered oil resources and 2 percent of the Nation's undiscovered gas resources. Interestingly, a study conducted for the wilderness society by Mr. Leonard Fischman of Economic Associates, Inc., independently confirms the Oak Ridge National Laboratory estimates to within one-half of 1 percent. Moreover, the Oak Ridge experts testified that they saw little justification for allowing mineral activities in existing wilderness areas and believed that the existing review proc-

ess prior to wilderness designation adequately insures that wilderness candidate areas with truly meaningful mineral potential are not included in wilderness.

Thus, it is clear that H.R. 6542's withdrawal of roughly 33 million acres of wilderness and wilderness candidate areas not already statutorily closed to leasing will have minimal impacts on energy supplies or the availability of new areas for exploration. Further, the negligible potential impact of H.R. 6542 on energy supplies is highlighted by the fact that there are already some 137 million acres of largely unexplored Federal land outside wilderness and wilderness candidate areas in the lower 48 States under existing oil and gas lease. This is over four times the amount of land withdrawn by H.R. 6542. The Department of the Interior estimates, and the General Accounting Office confirms, that up to 80 percent of these existing leases will expire without exploratory drilling, mostly because, as GAO found, "many lease applicants seek leases for speculation only". In addition, some 100 million acres of Federal lands classified as "prospectively valuable" for oil and gas, but not yet leased and lying outside wilderness are available for possible future leasing.

Given these statistics, I share the public's opinion that wilderness and wilderness candidate areas should not be leased now, and certainly should not be leased unless and until all the existing leases and other prospectively valuable leasing areas outside wilderness have been fully explored and developed. In short wilderness and wilderness candidate areas should be the last areas to be leased so that other public values such as wildlife, fisheries, natural plant communities, watershed, scenery, and primitive recreation can be protected and preserved for future generations with minimal disturbance.

In this regard, I believe a few words about the potential impacts of mineral leasing and development in wilderness and wilderness candidate areas are in order, because it is the fear of such impacts that has rightfully aroused public concern. Although certain elements in the mineral industry have alleged that mineral leasing and development in wilderness and wilderness candidate areas can occur without significant adverse impacts on wilderness values, the public thinks otherwise, and I believe the facts indicate that industry is wrong. In the first place, it must be acknowledged that the issuance of a mineral lease confers certain absolute rights on the lessee. This is a matter of commonsense, unless leases are to be regarded as little more than worthless pieces of paper. Certainly few individuals or companies would pay lease application fees and annual

rentals of \$1 per acre for oil and gas leases which afforded no exploration and development rights whatsoever. This fact was recognized in a 1980 U.S. district court decision in the case of Rocky Mountain Oil and Gas Association against Andrus, in which the judge indicated that "a lease without developmental rights is a mockery of the term 'lease'".

If one accepts the basic contention that a Federal land lease affords certain inviolable rights, the next question is what rights are afforded, and to what degree they can be regulated by the Government. For example, does a lease guarantee the lessee the right to explore? Can dynamite, helicopters, and other noisy or disruptive methods be used in exploration? Does the lessee have the right to construct a road into the lease in order to bring in exploratory drilling equipment? If oil and gas is discovered, can a road be built, or an exploration road be upgraded, to bring in heavier equipment for production drilling? Can buildings necessary for drilling or other production efforts be constructed on the lease? Can pipelines, storage tanks, or other oil and gas gathering and storage devices be constructed on the lease, or into the lease? Can power transmission, water, and telephone lines be run into the lease area through surrounding lands?

Many of these questions are currently under review in the courts. However, the questions on their face indicate the types of disturbance and impacts that the public views as incompatible with the preservation of wildlife, scenery, primitive recreation, and other wilderness values. Such impacts are acknowledged by the Federal agencies which administer the land. For example, in its report to the House Interior Committee on the 1981 emergency withdrawal of the Bob Marshall wilderness complex in Montana from mineral leasing, the Department of the Interior indicated the following potential impacts:

Because of the nature of oil and gas development . . . disturbance to the recreation user would extend a great deal beyond the physically disturbed areas. Entire drainages may become unsuitable for primitive recreational use for 50 to 100 years.

The Bob Marshall Area and adjacent non-wilderness lands are one of the most productive and unique big game habitats in the contiguous United States. The leasing of lands in the Bob Marshall Area and subsequent oil and gas activities could affect the wildlife resource in four ways: (1) direct habitat loss through land disturbance activities; (2) disturbance from oil and gas activities or human presence causing a displacement from or preclusion of use of key habitat; (3) direct mortality from possible toxic wastes or collision hazards; (4) human/animal conflict resulting in harassment or mortality of the animal.

Roads would be required for exploratory drilling which could increase the access to currently remote areas, thereby increasing the zone of disturbance associated with the activity.

Increased mortality of grizzly bears could occur because of control actions resulting from human conflicts.

The Flathead River drainage supports one of the largest native fisheries for westslope cutthroat trout and bull trout in the United States. . . . Oil and gas activities could affect fish or their habitat in five basic ways: (1) decrease in aquatic habitat quality because of increased sediment loading; (2) decrease in aquatic habitat quality because of toxic wastes or oil spills; (3) direct loss of riparian habitat through land disturbance activities; (4) overexploitation of fish resource because of increased access (emphasis added); and (5) blockage of fish passage.

Since natural appearance is an important attribute of wilderness, the construction of roads, drill pads, and pipelines will effectively decrease the wilderness resource for 50-100 years in some areas.

The accidental escape of highly toxic hydrogen sulfide gases represents the biggest threat to air quality. Frequent temperature inversions in the valleys of the Bob Marshall Area could trap these gases and threaten wilderness workers, recreationists, and wildlife.

Oil and gas activity will likely affect the basic suitability of the Bob Marshall Area from primitive recreation uses. This is because most recreation use, including private and commercial outfitter camps, and located in drainage bottoms that are the most suitable terrain for oil and gas development (roads, pipelines, drill sites, etc.).

A quick review of these potential impacts indicates why the public is so concerned over the wilderness/leasing issue. While the adverse impacts may not occur in each and every case where a lease is issued, the public believes that the risk of adverse impacts is not worth taking on such a small percentage of the federally owned lands, especially lands which have been, or may be, selected as wilderness in order to permanently protect their paramount wildlife, fisheries, watershed, esthetic, and recreational values. This risk takes on added significance when one recognizes that in addition to such intangible values as scenery, recreational opportunities, and the mere satisfaction of knowing that wilderness exists somewhere in our modern environment, wilderness also has ascertainable dollars-and-cents value as a producer of wildlife populations, high quality and quantity water flows, and as the source of thousands of jobs in the outfitting, licensed guide, and other recreation industries. In this regard, I would note that I have personally visited several commercial outfitter operations that would be forced to shut down if the wilderness quality lands on which they depend for their living were opened to mineral or other development.

My point in discussing these impacts is to illustrate in the clearest possible terms that H.R. 6542 is not a politically motivated or hysterical reaction to some imagined threat posed to wilderness by the policies of Secretary Watt. Rather, it is a carefully reasoned response, based on voluninous public input, to the basic incompatibility be-

tween wilderness values and mineral development, and to the wilderness/leasing policy change that was implemented by the Departments of Interior and Agriculture in 1981. As such, H.R. 6542 does the following:

WILDERNESS AREAS

Existing and future wilderness areas, except in Alaska, are permanently and immediately withdrawn from oil and gas, geothermal and other mineral leasing. In essence, this closes the 1-year window that will exist for possible leasing between the end of 1982, when Secretary Watt's leasing moratorium expires, and January 1, 1984, when all wilderness areas will be permanently withdrawn from leasing and hardrock mining by the Wilderness Act. H.R. 6542 also closes wilderness to seismic exploration involving the use of explosives. The withdrawal of H.R. 6542 covers approximately 18 million acres of existing national forest wilderness and 12,000 acres of existing BLM wilderness that are not already statutorily or administratively withdrawn. In addition, the withdrawal includes some 3 million acres of existing national park wilderness areas and about 650,000 acres of existing national wildlife refuge wilderness areas. These latter withdrawals are largely redundant, however, as national parks are statutorily closed to leasing and wildlife refuges have been generally subject to a no-leasing policy, although that policy is currently being reviewed by the Department of the Interior. As new components of the wilderness system are designated by Congress, they will also fall under the withdrawals of H.R. 6542, and on January 1, 1984, under the more sweeping withdrawal of the Wilderness Act.

WILDERNESS CANDIDATE AREAS

The so-called wilderness candidate areas are areas of national forest land which have either: First, been recommended to Congress for wilderness designation; second, been statutorily designated by Congress as wilderness study areas; or third, are being reviewed independently by the Forest Service under the National Forest Management Act for possible wilderness designation and are known as further planning areas.

One of the important decisions reached in formulating H.R. 6542 was that areas under consideration by either Congress or the Forest Service for wilderness designations should not be leased until a wilderness/nonwilderness allocation or decision has been made. This commonsense approach recognizes that it would constitute both poor public policy and land management folly to grant leases and associated development rights prior to Congress making a decision as to whether to designate an area as wilderness; or prior to the completion of Forest Service wilderness studies and

land management planning. In short, if leasing is to be banned in wilderness on the grounds of incompatibility with the wilderness concept, it should also be banned in areas which have been recommended for wilderness, or are being studied for wilderness—at least until Congress either rejects the wilderness recommendation or the Forest Service study and planning process is completed.

To do otherwise would be to allow possible development of a lease and the destruction of an area's wilderness character before Congress or the Forest Service can act on the area.

RECOMMENDED WILDERNESS

In accordance with the above philosophy, H.R. 6542 temporarily withdraws some 7 million acres of national forest lands which have been recommended to Congress by the President for wilderness designation, but on which Congress has yet to reach a decision. In this regard, I would note that the bulk of this 7-million acre backlog may be acted on by Congress in the very near future. Indeed, of the total of 7 million acres, the House has already sent bills to the Senate covering 1.4 million acres, and the Subcommittee on Public Lands and National Parks has conducted field inspections or held hearings on an additional 3.1 million acres.

The proposed Dick Smith Wilderness in the Los Padres National Forest in California provides an excellent example of why recommended wilderness should be withdrawn from mineral leasing until Congress can make a decision on the area. The Dick Smith area (RARE II No. A5124) was recommended for wilderness by the Forest Service in RARE II and receives heavy primitive recreational use by virtue of its close proximity to Santa Barbara. It is the home for numerous wildlife species including cougar and the endangered California condor. Wilderness designation would protect a large portion of the Santa Ynez River watershed, which is one of the major sources of water for the Santa Barbara south coast region. The area also embraces numerous sites of archeological significance, including several undisturbed Chumash cave paintings.

The proposed wilderness is strongly supported by the local congressman, our distinguished colleague Bob LAGOMARSINO, and has been introduced in bills by both of California's Senators. The proposal passed the House in the 96th Congress and again in the 97th Congress, and is currently awaiting Senate hearings and consideration.

Despite these clear indications that Congress is likely to designate the area as wilderness, last fall the Forest Service issued a draft environmental assessment recommending issuance of nine oil and gas leases within the boundaries of the proposed wilderness. Since last fall additional applications

have been filed covering 15,000 acres of the proposed wilderness. If leases are issued and ultimately developed with drill pads, roads, pipelines, and the like, the area could lose its existing wild character and opportunity for primitive recreation for 50 to 100 years. Certainly this should not be allowed to happen in an area where Congress has already indicated the strong possibility of wilderness designation.

CONGRESSIONALLY-DESIGNATED WILDERNESS STUDY AREAS

This category of lands comprises some 1.8 million acres of national forest land which essentially are already off limits to mineral leasing. To wit, the Forest Service is required by law to manage such areas for varying specified periods "so as to maintain their presently existing wilderness character and potential for inclusion in the National Wilderness Preservation System." H.R. 6542 merely emphasizes this language insofar as mineral leasing is concerned, and insures that such areas will not be leased and possibly jeopardized by no-surface-occupancy clauses or other conditional leasing devices which may or may not protect the surface of the areas.

FURTHER PLANNING AREAS

Further planning areas consist of some 5.8 million acres of national forest areas which the Forest Service is reviewing for possible recommendation to Congress for designation as wilderness. This review is being conducted in the context of the initial forest management plans for each national forest which are currently being prepared pursuant to section 6 of the National Forest Management Act. Recommendations can be expected within the next 1 to 3 years.

H.R. 6542 withdraws further planning areas for one of two periods. If a further planning area is recommended for wilderness in the initial forest management plan it will be withdrawn until Congress reaches a decision on the recommendation. If it is recommended for nonwilderness, it will be withdrawn until 1 year after the date of final approval and implementation of the initial forest management plan covering the further planning area concerned. The 1-year waiting period is intended to give Congress time to review any nonwilderness recommendations.

In theory, Forest Service policy provides that the wilderness values of further planning areas will not be jeopardized by mineral leasing during the planning period. However, some further planning areas are actually being leased with so-called no surface occupancy (NSO) or similar clauses. Such clauses ostensibly protect the areas because they permit no occupancy of the land surface without permission from the Government. However, in practice, no-surface-occupancy clauses have

their problems. First, they can be revoked or modified by the Government, at which point to the protection they afford either decreases or ceases to exist.

Second, and equally troubling, the courts have cast doubts on their validity and enforceability. As I mentioned earlier, in 1980 a U.S. District Court decision in Wyoming, Rocky Mountain Oil and Gas Association against Andrus, stated that "a lease without developmental rights is a mockery of the term 'lease.'" Further, the judge indicated that lease provisions similar to "no surface occupancy" clauses may constitute "a system of issuing 'shell' leases with no developmental rights" which is "clearly an unconstitutional taking and is blatantly unfair to lessees". The ruling is currently under appeal in the 10th circuit. More recently, on March 31, 1982, a U.S. District Court for the District of Columbia decision in Sierra Club versus Peterson appeared to uphold the validity of no-surface-occupancy clauses and stated that the Wyoming decision was "of questionable validity."

Thus, about all that can be concluded at this point is that the validity and enforceability of no surface occupancy or similar provisions is in a state of flux. It is possible that such provisions will be invalidated by the courts, in which case the lessees might gain full development rights, including the right to build roads. On the other hand, the leases might be deemed to have been illegally issued in the first place and the lessees would thereby have to forfeit the leases with back rentals and other moneys returned.

Given this uncertain situation, we felt the wisest policy would be to simply place further planning areas off limits to leasing, but not to seismic prospecting, until the Forest Service plans are completed and recommendations developed. As already indicated, the planning process will be completed in the next several years, and even with the additional 1-year congressional review period provided by the bill, most further planning areas recommended for nonwilderness will be available for leasing in the near future. In the interim, we agreed to allow, and the bill permits, seismic prospecting involving the use of explosives and other inventorying in further planning areas.

The soundness of prohibiting leasing in further planning areas on an interim basis is borne out if one examines the case of the Deep Creek further planning area in Montana. This area, which lies immediately adjacent to the Bob Marshall Wilderness, received the highest wilderness rating score in the entire Nation during the Forest Service's RARE II wilderness review, yet was allocated to further planning in order to allow time for additional min-

erals assessment such as seismic prospecting. However, earlier this year oil and gas leases containing no surface occupancy clauses were issued, thus raising the possibility that roadbuilding or other development could occur in Deep Creek if the NSO clauses are modified or lifted by the Government or declared invalid by the courts. If this were to happen the highest rated potential wilderness area in the Nation could be developed and its wilderness character destroyed before the Forest Service even completes its wilderness study of the area, and long before Congress gets a chance to review the area for possible wilderness designation. I submit such a result would be intolerable, especially since I personally know of at least one outfitter/dude ranch operation that could be forced out of business if roads are built into Deep Creek. Fortunately, there is hope for Deep Creek because the leases were issued without preparation of an environmental impact statement and may therefore be invalid. But important areas like Deep Creek should not be administered in such a shoddy and haphazard manner, and I believe the temporary withdrawal of H.R. 6542 represents the commonsense approach to the matter.

In withdrawing areas from mineral leasing in H.R. 6542, the sponsors were mindful that certain wilderness and wilderness candidate areas may contain leasable mineral resources which are in further need of mineral evaluation. In particular, Congress or the Forest Service could benefit from additional minerals information in certain wilderness candidate areas prior to making a wilderness/non-wilderness decision. To this end, section 4 of H.R. 6542 permits continued seismic prospecting involving the use of explosives in all wilderness candidate areas and additionally provides for other prospecting conducted in a manner compatible with the preservation of the wilderness environment. However, with respect to lands that have been finally designated as wilderness, the Interior Committee voted 28-11 to ban such prospecting as incompatible with the wilderness concept. Such a ban was strongly endorsed by the public at the Subcommittee's hearings. While we recognize that some methods of explosive testing do little damage to the land surface, all methods can cause significant impacts, including forest fires, the disruption of wildlife, and interference with the calm and serenity expected in wilderness by recreational users. Further, the attendant helicopter flights to shuttle equipment and personnel can also be extremely disruptive.

It may be that at some future date the pressure of dwindling energy supplies or other shortages may dictate the opening of wilderness to seismic testing and/or energy development and extraction. If such a need occurs, section 5 of H.R. 6542 allows the President, with the concurrence of Congress, to open specified areas to seismic testing, mineral leasing or other activities prohibited by the bill. For the present, however, I would only reiterate the earlier cited statistics that wilderness and wilderness candidate areas are estimated to contain but 2-3 percent of the nation's undiscovered oil and gas resource, and that the 137 million

acres of Federal land in the lower 48 states already under oil and gas lease should be fully explored and developed before wilderness areas are entered.

I would also note that H.R. 6542 fully protects all valid existing rights, including all existing and validly issued mineral leases, and further allows the subsurface of national forest and public land wilderness areas to be leased, as long as mineral development and extraction occurs from outside the wilderness boundary, by directional drilling or other methods which cause no disturbance to the surface of lands within wilderness.

Mr. Chairman, before concluding this statement I should add a few words about what this bill does not do, as I am fully aware that H.R. 6542 does not tackle all the problems that certain interest groups would like to see addressed. In particular, in drafting and moving H.R. 6542 to the House floor, we have resisted proposals to: immediately close all wilderness and wilderness candidate areas to "hardrock" mining under the mining laws; to withdraw 24 million acres of BLM wilderness study areas from mineral leasing and hardrock mining; to "release" certain roadless lands to timber harvest and other development and amend the National Forest Management Act to prohibit further wilderness studies; to amend the Clean Air Act concerning wilderness; and to allow disabled persons to use motor vehicles in wilderness.

Although certain of these provisions may have merit as separate legislation, we determined that their inclusion in H.R. 6542 could raise considerable controversy and thereby diminish the chance of the bill's passage in this session. And, as I have already mentioned, time is of the essence in this bill, because the current moratorium on leasing imposed by Secretary Watt will expire at the end of this session of Congress. A brief description of our specific reasons for rejecting the above mentioned proposals follows:

MINING LAW WITHDRAWAL

Although the subcommittee's hearings revealed considerable public support for a mining law withdrawal, many Members of Congress are concerned about the availability of domestic supplies of so-called strategic and critical minerals such as cobalt, chromium, nickel, manganese and tungsten. Unlike oil, gas, coal and other leasable minerals withdrawn by H.R. 6542, the strategic and critical minerals are not found in relative abundance in the United States and there are therefore fewer opportunities for their discovery. As such, it was decided that exploration for, and development of, these "hardrock" minerals should continue to be governed by existing law, including the 1872 mining law and the Wilderness Act. I would note, however, that the Wilderness Act will withdraw existing wilderness areas from "hardrock" mining as of January 1, 1984, and I would strongly oppose

any proposals to extend that deadline. Wilderness candidate areas will continue to be available under the 1872 mining law unless and until they are designated as wilderness.

BLM WILDERNESS STUDY AREAS

H.R. 6542 does not withdraw the 24 million acres of BLM wilderness study areas which have been identified and are currently being reviewed by the Bureau of Land Management for possible recommendation for wilderness designation. Many of these areas possess outstanding wilderness values and could contribute significantly to the diversity and quality of the National Wilderness Preservation System.

Despite a preponderance of testimony at the subcommittee's hearings for withdrawing these areas, I believe they should continue to be administered under the nonimpairment standards of section 603 of the Federal Land Policy and Management Act of 1976. In this regard, I must confess that I have been distressed by some of the recent actions of the Department of the Interior in interpreting and enforcing the nonimpairment standards. Indeed, I have received reports of actions which may result in the destruction of the existing wilderness character of certain areas. I intend to explore this issue in oversight hearings and will consider legislative action if the facts so warrant. However, I do not believe it behooves us to change the law in this bill. The interim nonimpairment standards have been labored over for some 6 years now and have been the subject of repeated revisions, refinements and legal opinions. Statutory revision prior to further congressional oversight would only create new uncertainties.

CLEAN AIR ACT AMENDMENTS

This amendment would prevent States from upgrading wilderness areas from class II to class I under the Clean Air Act, and was quite properly ruled nongermane during full committee markup. Not only does the amendment infringe on States rights, but it also lies primarily within the jurisdiction of the Committee on Energy and Commerce, and is currently being debated in that committee. Further, it is totally unrelated to the issue of mineral leasing in wilderness and was mentioned by not even a single witness in the subcommittee's hearings on the mineral leasing question.

DISABLED PERSONS

During full committee markup an amendment was offered to allow disabled or "handicapped" persons to use motor vehicles in certain wilderness and wilderness candidate areas. Like the Clean Air Act amendment, it was ruled nongermane to H.R. 6542 because it is totally unrelated to the issue of mineral leasing in wilderness. It is conceivable that the amendment, if introduced as separate legislation

and subjected to full public hearings, might be found to have some merit. However, the general issue and the proposed language have had no hearings or other formal opportunity for public comment, and I have had communications from several handicapped individuals strongly opposing the amendment's concept of special treatment for the handicapped in wilderness.

On the merits, I would note that wilderness is not off limits to the handicapped. Many "handicapped" or disabled individuals can, and do, travel in wilderness using crutches, canes, horses, wheelchairs and the like. For example, just 2 weeks ago a 1-legged man climbed Mt. Rainier, and a party of paraplegics ascended the highest peak in Texas in wheelchairs. Last summer, a party explored the High Uintas Primitive Area in Utah in wheelchairs. I would certainly want to hear more from such individuals before considering any proposal to allow motor vehicles in wilderness.

RELEASE LANGUAGE

Last, but most importantly, we have strongly resisted attempts to include so-called "release" language in the bill. Of all the issues involved in H.R. 6542, the public appears to feel the most strongly about keeping the release and mineral leasing issues separate. Indeed, the overwhelming majority of the 516 witnesses who testified at the subcommittee's hearings opposed attaching release language to any bill dealing with mineral leasing in wilderness. Rather than elaborate further on this issue, I would merely cite the excellent discussion of the matter contained in Congressman LUJAN's remarks on H.R. 6542 when he and I and eight other Interior Committee members introduced the bill on June 8.

The bill does not contain so-called "release" language. In rejecting release language in the bill not only are we responding to overwhelming public testimony opposing linkage of the release and wilderness/leasing issues, but we are also recognizing that release is nongermane to the wilderness/leasing question. For one thing, the wilderness/leasing debate centers around the issue of whether mineral leasing for oil, gas, coal, geothermal and other mineral potential should be allowed in wilderness or wilderness candidate areas on which a wilderness/nonwilderness decision has not yet been made. The release issue, however, goes far beyond this relatively simple question, and speaks to the opening of lands determined unsuitable as wilderness for timber, harvest, road construction, water project development, intensive grazing development, and other development uses. Further, because release only speaks to the development side of the wilderness equation, we believe it necessarily must be incorporated only in legisla-

tion which at the same time designates wilderness * * * and the leasing moratorium imposed by Secretary Watt does not allow time to develop consensus wilderness designation/wilderness release bills on a State-by-State or regional basis.

Finally, we have noted that the release issue has become so controversial, particularly as it relates to the question of whether Forest Service planners can reconsider and study wilderness as a possible land use in the future, that its inclusion in a bill dealing with mineral leasing in wilderness could fatally impair chances of the bill's passage prior to the expiration of Secretary Watt's leasing moratorium. This would leave the Secretary without the official guidance he has requested from Congress, and would raise the possibility that Congress might have to resort to use of its emergency withdrawal authority under section 204(e) of FLPMA, or other measures, to block any undesired leasing. We feel legislative resolution of the problem is far preferable, and do not wish to see legislation to implement the public consensus against leasing fail over the unrelated issues of timber harvest and future forest planning procedures. The release controversy can, and should be resolved separately in the context of statewide or regional RARE II bills, as is was in the last Congress in Alaska, Colorado, and New Mexico.

For further discussion I would also refer my colleagues to the additional views of our distinguished colleague PHILLIP BURTON which appear on pages 14-23 of the committee report on H.R. 6542 (Report No. 97-638). I particularly share his view that the efforts to include release language in H.R. 6542 are little more than a transparent attempt to revive the timber industry's immensely unpopular and totally discredited "hard" release language by attaching it through a nongermane amendment to a consensus bill which legislates the overwhelming public sentiment against mineral leasing in wilderness and wilderness candidate areas. This effort not only violates the rules of the House on germaneness, but clearly flaunts the will of the public.

In conclusion Mr. Chairman, I strongly commend H.R. 6542 to my colleagues as an excellent example of how a commonsense and bipartisan compromise can be reached on a difficult issue. Besides having 60 cosponsors in the House, the bill is also supported by: the Oil, Chemical and Atomic Workers International Union, AFL-CIO; the United Auto Workers; the Industrial Chemical Workers Union; the Industrial Union Department, AFL-CIO; the International Association of Machinists and Aerospace Workers; the United Steelworkers of America; the Wilderness Society; the

Sierra Club; The National Wildlife Federation; the National Audubon Society; the World Wildlife Fund; the Izaak Walton League; the National Parks and Conservation Association; the Environmental Policy Center; the Environmental Defense Fund; Defenders of Wildlife; the National Resources Defense Council; Friends of the Earth; the American Forestry Association and numerous other conservation organizations. In addition, some 220 newspapers have run editorials opposing leasing in wilderness and supporting a ban on leasing.

The American public is deeply concerned about the possible impacts of mineral development in wilderness and wilderness candidate areas and has come to its elected representatives for help. H.R. 6542 is that help, and deserves swift passage before Secretary Watt's moratorium expires.

□ 1300

Mr. YOUNG of Alaska. Mr. Chairman, I yield such time as he may consume to the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Chairman, I rise in support of H.R. 6542, the proposed Wilderness Protection Act of 1982. When Secretary of the Interior Watt issued his moratorium on oil and gas leasing in wilderness areas, he, in effect, asked Congress: First, to decide exactly which lands should be withdrawn from leasing; second, to decide which mineral development statutes those lands should be excluded from; and third, to decide how long that withdrawal should last. H.R. 6542 makes those decisions.

HOW MUCH LAND

First, let me explain which lands are withdrawn. The Federal Government owns mineral interests in approximately 798 million acres of land throughout the Nation.

H.R. 6542 withdraws from mineral leasing those designated components of the wilderness preservation system which are located in the lower 48 States, a body of land adding up to about 19.7 million acres out of the total 798 million acre mineral estate.

Also withdrawn are about 7 million acres of Forest Service lands recommended by the Forest Service to Congress for wilderness designation which we have not acted upon yet. Some of that wilderness candidate land will be designated as wilderness areas and the rest will either be released for other uses or designated for further study.

In addition, about 1.8 million acres are withdrawn because Congress has designated those lands for further study.

Finally, about 5.9 million acres are withdrawn because those lands have been identified by the Forest Service for further planning pending completion of their respective forest plans.

In total, H.R. 6542 withdraws 34.4 million acres out of the 798 million acre Federal mineral estate. It should be noted that H.R. 6542 does not affect any of the 400 million acres of BLM land and it does not affect any land whatsoever in Alaska.

WHAT MINERALS

Second, let me explain which mineral development statutes H.R. 6542 affects. This bill would only withdraw the lands I have mentioned earlier from the leasing, under the 1920 Mineral Leasing Act, of oil, gas, oil shale, coal, phosphate, potassium, sulfur and gilsonite and the leasing, under the Geothermal Steam Act of 1970, of geothermal formations. H.R. 6542 would not affect the development of any of our strategic minerals. It would have nothing, to do with the leasing of lead or copper or zinc. I hasten to add that H.R. 6542 also has nothing to do with the 1872 mining law which provides for prospecting, claim filing, and the development of hard rock minerals.

LENGTH OF WITHDRAWAL

Third, let me explain the length of the withdrawal for each of the four categories of land affected.

The 19.7 million acres of congressionally designated wilderness area would be withdrawn permanently unless opened up under the special urgent national need provision included as section 5.

The 7 million acres of wilderness-candidate land would be withdrawn only for the term of the forest land management plans applicable to each respective area. These forest plans last for 10 years and began, for most areas, in the late 1970's. Thus, a wilderness candidate area could either be designated by Congress as a wilderness area and thus be withdrawn permanently, or included as a wilderness-candidate area in a second-generation forest management plan, and thus be withdrawn for another 10 years, or be released from this withdrawal if it is not designated as a wilderness area and is not included as a wilderness-candidate area in a second-generation forest land management plan.

The 1.8 million acres of study areas would be withdrawn for so long as Congress has designated that they should be studied. Some areas have been designated for study until Congress determines otherwise while others have been designated for a set number of years.

The 5.9 million acres of further planning areas would be withdrawn while the initial forest management plans are being prepared and implemented. H.R. 6542 would provide a 1-year extension of this withdrawal for each area so that Congress would have an opportunity to review the plan and the wilderness recommendations therein.

URGENT NATIONAL NEED

Thus, the withdrawals in H.R. 6542 would be permanent for 19.7 million acres of designated wilderness areas and may be either permanent or temporary for the rest of the land in question. Any portion of the entire 34.4 million acres of land withdrawn from certain mineral leasing by H.R. 6542 could be opened up to mineral development under the urgent national need provision included in section 5. It authorizes the President to recommend opening up a withdrawn area where he finds that an urgent national need for minerals development exists. If Congress approves the President's recommendation, mineral development may take place. I understand that the number of oil and gas drilling rigs in operation today has dropped from about 4,600 9 months ago to less than 2,700 today. However, this decline in drilling activity should not be interpreted as a permanent change. Our Nation will need enormous amounts of oil and gas in the years to come. Just because the vast majority of oil and gas leases which now exist on public lands will not even be explored before the lease expires does not mean that we should not have the capability to open up part of a wilderness or wilderness candidate area in an emergency. The 1974 OPEC embargo taught us a lesson that we should never forget.

SEISMIC EXPLORATION

H.R. 6542 is the end result of an extensive hearing process and a prolonged period of discussion, negotiation, and compromise. One provision in this bill prohibits seismic activities involving the use of explosives in designated wilderness areas. In my opinion, this prohibition is unwarranted. Seismic activity can take place without permanently damaging a wilderness area and can be conducted at times when wildlife will not be affected. However, this is a compromise bill. While I would prefer to delete the seismic activity prohibition, I realize that others are strongly in favor of it. Some Members would even have preferred that the seismic prohibition apply to wilderness-candidate areas as well. I understand that an amendment may be offered affecting this provision and I hope we can agree upon language that is acceptable to most Members.

RELEASE LANGUAGE

Another subject of extensive debate is the question whether or not H.R. 6542 should include language which would remove all wilderness-candidate lands from being administered as wilderness areas after a date certain. This is often referred to as national release language. The Interior Committee has chosen to release wilderness-candidate lands on a State-by-State basis as Congress enacts legislation on each State, and thus, not to include such language in H.R. 6542. This is an extremely im-

portant issue and I hope we can either develop legislation to resolve the problem in the near future or come up with a timetable which would complete the consideration of all RARE II wilderness proposals on a State-by-State basis within a reasonable period of time.

In conclusion, Mr. Chairman, I strongly recommend passage of H.R. 6542. Secretary Watt has imposed a moratorium on oil and gas leasing in wilderness areas until the end of this session of Congress. If we do not act favorably on H.R. 6542, we may see hundreds of oil and gas leases issued next year in our wilderness areas. Applications have been filed on wilderness areas in 21 different States; 52 have been filed on Colorado's West Elk Wilderness Area, 270 are pending on Montana's Bob Marshall Wilderness Area, and 109 have been filed on Wyoming's Washakie Wilderness Area. As far as I have been able to determine, 54 different wilderness areas have oil and gas lease applications awaiting approval. If any major portion of those leases are granted, our entire wilderness system will be jeopardized. For these reasons I urge your support of H.R. 6542.

Mr. YOUNG of Alaska. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, and for those who are in the listening audience of this great deliberative body in which I serve, I would like the audience to know that there are only four Members of the U.S. Congress in the Hall at this time, that we are deliberating something here that affects millions of Americans in one way or the other. It is an example to welcome to "Saturday Night Live." It is unfortunate, Mr. Chairman, that this legislation represents the Congress at its worst—reacting to emotional claptrap perpetrated by the nogrowth elite in this country who wish to deny the American people access to the resources that they need to cheaply heat their homes and their schools and run their automobiles. The groups that have sought to make the Congress feel that this legislation is necessary are the same who fight development of any kind—the same people who fought construction of the Alaska pipeline, which has so far brought over 2 billion barrels of American oil to our consumers, and contributed to the pressure that is now forcing OPEC to forgo price hikes and a further economic dislocation in this Nation and around the world.

As a result of their contrived horror stories, the Wilderness Protection Act has seemed necessary. It is most certainly not, and I can only say that if the oil companies or the industries of this Nation were engaged in the same type of effort to distort the truth to the people of the United States and

their elected Representatives, they would be hung out to dry.

H.R. 6542 would immediately withdraw over 30 million acres of publicly owned lands and resources from even the most environmentally sound exploration and production processes. Though the majority of Americans have apparently been convinced by the no-growth, "I've got mine and to hell with you" crowd and their media lackeys that wilderness areas must be withdrawn or face the bulldozer and permanent destruction, this bill goes far beyond that, and closes millions of acres of wilderness study lands, many of them with high, but unknown, potential for energy.

This bill violates the wilderness study process, by ignoring the fact that the purpose of wilderness study is to study prospective wilderness areas, gather data, and insure that congressional decisions will be informed and based on all facts, about subsurface as well as surface resources. This is particularly true of further planning areas, which were identified as such, precisely because the Forest Service felt oil and gas drilling was essential before informed decisions could be made.

By closing further planning areas, study areas, and recommended wilderness areas, this bill would preempt the decisionmaking process and prevent the gathering of information essential to make a final determination. By virtually guaranteeing that energy data will be inadequate, especially when contrasted with data on surface resources, it would inevitably create a biased process tilted in favor of wilderness and all but insure a wilderness decision, even where an area has extremely high energy potential.

The bill reflects a very narrow, myopic view of what is in the public interest—a view which considers only wilderness preservation, without regard to other, equally legitimate needs. It ignores the public interests to be served by meaningful resources inventories, informed land use decisions, and an orderly, phased, and environmentally sound exploration and development program.

The inventory process in this bill is a sham. It will result in just what the national wilderness advocacy groups want—very little information on subsurface values, so that cheap, abundant energy produced at home will elude Americans, and we will all have to adhere to their "small is beautiful" theory, like it or not. Because it completely bans seismic surveys with explosives in designated wilderness areas, no meaningful oil and gas data will be available when needed to respond to "urgent national needs." With no hope of every acquiring a lease, no company or individual is ever going to survey these areas for their energy potential, and they will be lost

forever, or until a real emergency some time in the future starts an all-out search for energy, complete with bulldozers and all of the careless practices that accompany a search for energy in a time of life or death need.

H.R. 6542, in its present state, would thus guarantee that little will ever be known about the subsurface resources of the areas covered by the bill—and that Americans will be led to believe that the areas contain no energy or mineral resources.

The bill would ban all forms of seismic exploration in designated wilderness areas, even though modern seismic methods have virtually no impacts on the land. The only tried and true methods for conducting seismic activities and finding where oil and gas potential areas are, are the explosives, or "thumper trucks," which must have access on reasonably good roads. Both options are banned under this bill. In times of urgent national need, we will search irresponsibly, with no environmental safeguards because we will have to cover large areas rapidly, rather than go directly to known areas of high potential.

By prohibiting seismic surveys requiring the use of explosives, the bill ignores the Wilderness Act's clear standards for what is to be judged "compatible with the preservation of the wilderness environment." It elevates the new standard of "calm and serenity" of the most intolerant hikers to be the new standard of what will be permitted in wilderness areas. In doing so, it completely ignores the vital public interest of the vast majority of Americans who seek to know the nature, extent, and location of their oil and gas resources before an emergency occurs.

This bill ignores the numerous environmental protection laws and techniques that have been developed over the past decade and proceeds on the assumptions that the only way to protect an area is to prohibit energy and mineral activities. In so doing, it ignores the fact that the cumulative total of land affected by mining operations in the United States over the last 50 years is only 5.78 million acres—7 percent of the land now designated as wilderness.

By making wilderness candidate areas off limits to oil and gas leasing on the ground that roads would have to be constructed, H.R. 6542 ignores the fact that Congress has consistently placed lands with roads into the wilderness system, saying that if blockaded, the roads would soon disappear with no trace. The recent Cumberland Island wilderness bill is a perfect example—the Congress decided that even though the area contained well-maintained roads and buildings, they would be included within the area designated, so long as they were later removed.

In another major shortfall of this bill, the President is supposedly given an "unlock" provision in time of national need and the consensus of the Congress. By requiring him to submit an EIS along with his request to Congress, this legislation erroneously assumes that the President is going to be able to determine when a national need will occur—with the 1½-year EIS procedure, at least that long. As such, it stands as an empty gesture to Members who are legitimately and honestly concerned about the Nation's ability to respond in a short time to a national security crisis involving energy or minerals. Further, while the bill does not affect hard rock, or the strategic minerals this country is so dependent upon others for, the date for shutting off exploration for those minerals is the end of 1983—and this bill has no emergency provision for a national need for minerals.

This bill does not include any release language. It fails to address the critical questions of how long areas should remain in wilderness study or candidate areas, how and when they are to be returned to multiple-use, sustained-yield uses, under our general land laws and the environmental laws which have accumulated since the passage of the Wilderness Act of 1964.

Since we have all heard of "release," perhaps we should look at what the facts of released lands are:

Release is not the same as development;

No development can occur on any released lands until all applicable environmental study and permit requirements have been met;

Any development that could occur would probably involve only a small area, and will not foreclose the wilderness option for the other lands or, indeed, the mineralized lands after reclamation; and

Many wilderness, and wilderness candidate areas have been impacted by past energy, mineral, homesteading, road building, timber harvesting and other human activities. They are in the wilderness or candidate category today because these signs of man have been removed through environmentally sound reclamation. The same approach could be used with respect to the acreage affected by exploration or development wilderness values.

The cost estimate of this bill is somewhat amusing, since it indicates a minimal loss in potential receipts to the Federal Treasury based upon a study conducted by the Wilderness Society that has been refuted as "hogwash" by responsible resource appraisal experts and geologists who understand the methodology of the study. The studies were politically motivated, lacking adequate mineral data, and demonstrating a gross misunderstanding of even the most basic mineral as-

assessment principles. The fact is, Ms. Rivlin is unable to give us a realistic appraisal of the cost of forgone revenues in this bill, because only God knows what is under those millions of acres, and so far, he has let man's God-given talents find the resources, rather than endowing us with the divinely inspired guesses of the often talked about "studies."

This bill, in sum, is a turkey—it reverses the carefully wrought compromise that led to the passage of the Wilderness Act, when national security problems related to minerals and energy were virtually unknown, as were the proper environmental safeguards we have instituted since. In one fell swoop with this bill we put off limits more acreage than was ever intended by the original legislation. It is against the national interest, unless one's idea of the national interest is being ignorant about what resources we have in order to protect our country from shortages of energy and minerals necessary to continue our way of life. I am beginning to wonder about the motives of this Congress, and the groups that have lied about every public land issue to come before the Subcommittee on Public Lands and National Parks, on which I sit as ranking member. My only observation is that they intend to do their best to stop any development of any kind—water, energy, mineral, industrial, and agricultural. I urge the Members to think about all the issues they advocate and ask ourselves about the motivations of groups that are anti-everything. I think the Congress has more fortitude than to roll over and play dead on every issue they bring to us in the name of the environment. I need only remind you that your constituents live from the fruits of the environment in this great Nation, and that to continue to make more and more of that environment inaccessible to them for their uses means that each and every one of us will be forced to do with less. To vote for this bill as it stands not only insures that, but also insures that your constituents will be living with less because they will be denied the knowledge about their resources on the public lands. That is a shame for this Nation and a shame for the world, given our relative position in the world. I urge the Members to reject this bill and send the Interior Committee back to square one to deal with this issue in a rational, rather than emotional, manner.

□ 1315

The greatness of this Nation was created by the utilization of our resources. It is what allowed those that came to our shores from overseas to improve their lot. It gave us the capability to build the greatest and highest standard of living anywhere in the world. And yet we have only disturbed

5 million acres of that land. Only 3 percent of the land under this bill will be affected. I think my statement of 5.5 brings that out. Three percent of the areas that can have and may have those resources that we need. And all I have ever asked is for the environmental groups to start listening to what I am saying. There is nothing in this for me. And even the environmental groups will say when we need it we will go get it, but with what knowledge. That is like saying I have a pain, and there is nothing wrong. I do not want to find out what is within myself, because I hurt, but I am sure it is nothing. But then the emergency arises and you rush to the doctor, and the doctor is in a panic and he whacks out something he should not whack out because he does not have the knowledge to know what he is doing because he did not have the time to identify the problem.

We spent \$78 billion last year overseas to buy oil from those people that you are reading about in the paper today; \$15 billion to buy minerals. How can we balance the budget and put people to work when we are not developing our resources?

What moral right do we have as a Nation to take from the Third World and increase their high-inflationary rate by buying with borrowed dollars those resources? What happened to the term "management"? Man has made mistakes, but he has learned, and he can produce those resources, renewable and nonrenewable, and again to lead this world as we should as a free nation.

It is ironic to me the anti's, antinuclear, antidams, antioil, antiminerals, anti, anti anti, are also antimilitary.

My colleagues may ask why do I bring this up? There has never been a war won by military strength, never. A war is won by economic strength. And World War II, how did we win that war? Not by military strength.

When we needed a tank we got 10, because we had the economic strength. When we needed a battleship we got five, because we had the economic strength. When we needed 1 airplane, we got 50 airplanes. We had economic strength.

And yet these same anti, anti, anti—I am going to tell the Members about the antis. It is a tremendous thing. "No dams, I want to paddle my canoe; no wells because you disturb the wilderness; no mining; do not do anything, but just bye-bye, let me have what I have got because I am one of the elite."

I am talking to that listening audience out there that is out of work in Detroit. And by the way, the United Auto Workers support this legislation. I do not know where their leadership comes from. They must be with the Edsel. I cannot understand what is occurring as far as the labor movement

when it comes to this type legislation. How can we send \$78 billion last year over seas for oil, and I cannot build a gas line? I cannot build a northern tier. We cannot drill because we might disturb something.

The listening audience had better be very well aware, because there is nobody in this Chamber right now, that they are being misled by the finest organized groups in America today, under the guise of environment. Five point 7 million acres of land disturbed in the last 50 years, and you will listen to them, and they are going to destroy the whole America, the United States.

Remember the battle about the pipeline? It was a grand battle. They showed there was going to be destruction of the very tender flora and fauna. They showed that the bulldozers were going down and digging ditches. We took the same amount of land that one hare would take across this whole Chamber. And today it is one of the soundest environmental projects ever completed. But it was done. Because we needed it.

It was passed in 1973 and we had the embargo in 1973. But we knew it was there, we had engineered it, we understood where it was we identified it.

Under this bill you are taking lands and setting it aside without any knowledge.

Mr. Chairman, I cannot understand what is the fear of knowledge. Why are we so panicked and pressured-supposedly because they are against my good Secretary of the Interior, that he is a bad person, and he has let leases. He has not let any leases in any wilderness area. It is the previous administration, including the previous President, let seven in wilderness areas. Nobody said a word. It was the intent of the act that this would take place, that there was compatibility. And I would challenge those that support this legislation, let us cut out the nonsense, let us make parks out of them, let us put them out there where they really are so the American public will understand what is really happening to them.

I ask this body—unfortunately there is only again, I want to stress again, about four people on the floor—I ask this body—two—which opposes—the other one is very quite about it. I asked this body to consider looking at knowledge of the lands which we are seeking to lock up, and why is this bill necessary.

Now, I know the argument is going to be we are only talking about 7 million acres. Do my colleagues know there are 231 million acres of land in wilderness today? And we have only got 736 million acres of public lands approximately? One-third is already wilderness. And I challenge them within those borders to show me

where there is one acre that does not have other values—oil, gas, minerals, hydro, timber, agriculture—the things that this Nation was built upon. And they are saying we need it to save it for the future generations.

I am telling my colleagues that is nonsense. What we need is the knowledge of what is there so we can systematically plan and derive the benefits from those resources when it is needed, and that I will say is what is wrong with this bill, because we are dealing with ignorance and ignorance alone.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to my good chairman, the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. I thank the gentleman for yielding.

Would the gentleman care to detail where he arrives at this figure of 237 million acres? I have had staff do some research and we cannot come up with anything even approaching that figure in terms of lands that are off limits to oil exploration. And certainly not that many that are in wilderness.

Mr. YOUNG of Alaska. Well, I would suggest the gentleman study all his parks, all the potential wilderness areas, and that you come up with 237. I have the statistics. I will gladly show them to the gentleman. They are a GAO Government report.

Mr. SEIBERLING. I have them in front of me.

Mr. YOUNG of Alaska. What the gentleman sees is not what I see.

Mr. SEIBERLING. Evidently.

Mr. YOUNG of Alaska. But I have the figures; the gentleman has the figures. As to how we read the figures, the gentleman may go by the modern math. I went to the old school where 2 and 2 are 4.

Mr. SEIBERLING. The gentleman will recall that the thing that precipitated the Interior Committee's request to Secretary Watt to declare a moratorium on leasing in wilderness was the action of the Secretary last year in approving three mineral leases in the Capitan Wilderness of New Mexico.

Mr. YOUNG of Alaska. That is the type propaganda which the gentleman is strongly in support of, and I understand that, that caused this great concern, because there were no leases on the surface within that area, and the gentleman has to admit they were off surface, outside, and slant drilling. And there is nothing wrong with that under the Wilderness Act itself.

Mr. SEIBERLING. If the gentleman will yield further, the gentleman said there has been no leasing in wilderness areas by this administration, when in fact the Capitan Wilderness leases were granted for the wilderness area.

Mr. YOUNG of Alaska. They were not within the wilderness boundaries. The gentleman knows that. Has any previous President ever allowed leasing in any wilderness areas?

Mr. SEIBERLING. With rare exceptions, yes.

Mr. YOUNG of Alaska. How many has the present Secretary allowed?

Mr. SEIBERLING. The present Secretary granted three leases.

Mr. YOUNG of Alaska. Outside the boundaries of the wilderness. And second, the gentleman knows there were seven other leases allowed by the other administrations and not anyone ever raised that question.

So when this is done, this administration's position is wrong. But these are nitpicky little things.

What I am talking about, and the gentleman has to admit it, how can a man with the great intelligence that the gentleman has, a Member of Congress, who is chairman of the committee, deal in the fact that we are locking up lands without knowing what is there?

Mr. SEIBERLING. If the gentleman will continue to yield, I still want to clarify the first issue, which is the leases in the Capitan Wilderness, which contained a clause there would be no surface occupancy. But the courts have ruled that once you issue a lease you cannot deny surface occupation.

Mr. YOUNG of Alaska. The leases were let to not go within the border.

Mr. Chairman, I reserve the balance of my time.

Mr. SEIBERLING. Mr. Chairman, I yield 5 minutes to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Chairman, the Wilderness Act, passed in 1964, granted mining interests a 20-year grace period to stake and perfect claims in wilderness areas. It also allowed, but did not require, the Secretary of the Interior to issue discretionary softrock mineral leases.

Until this administration came to power, Interior Secretaries chose not to issue mineral leases at all. They weighed wilderness values, and the wishes of the people, and chose to preserve a few precious lands free of exploration and drilling.

This was wise policy—wilderness was preserved, and precious resources were left in the ground. If, at some point in the future, our reserves became so depleted, and our needs so great, then we could tap these irreplaceable resources. If, on the other hand, through wise conservation, and development of alternative energy sources, our Nation did not become so desperate, then our wilderness would have been preserved for us and for future generations.

This rational and sound policy was pursued for 17 years—until Secretary Watt began abuse of the Wilderness

Act and our Nation's wilderness areas. If this Secretary were not so determined to commit these abuses, we would not be debating this bill today, the resolution arrived at in the Wilderness Act would still be intact, and in less than 18 months our wilderness areas would be forever closed to mineral leasing. Were it not for Secretary Watt, the Lujan-Seiberling Wilderness Protection Act would not be necessary.

The only argument for this legislation is that over the next 18 months, this Secretary of the Interior, in this administration, must be curbed. This is a convincing argument. Because this Secretary's excesses must be curbed now, I will support this legislation, but not without reservations.

We must be sure that the long-term tradeoff for curbing these immediate abuses is not too great. We are considering granting the President new power to propose opening up wilderness areas at any time in the future, in exchange for protecting this wilderness for 1½ years. We must not allow the urgency of arresting this immediate threat to bring us to sacrifice sound, long-term protection.

The Wilderness Act provided such vital long-term protection. Under the Wilderness Act, opening up a wilderness area to leasing after 1984 required an act of Congress, complete with the hearings and careful examination of issues required to enact a law. In short, the same careful deliberation that is required to designate a wilderness area was required to open one for leasing.

The original H.R. 6542 proposal did not allow for such careful deliberation. It would have established an expedited process by which wilderness areas could be opened to leasing, with no public hearings, and no participation by affected States. Section 5 originally gave the President the power to recommend opening wilderness upon his own determination of an urgent national need. Congress could then be forced—without public hearings, and without adequate review—to act on this recommendation after only 60 days.

This provision gave the President too much power to open wilderness. It was unnecessary, and ripe for abuse. Because it was included, I voted against this bill in the Interior Committee.

But this substitute offered by my colleague from Ohio deletes this troublesome provision. It is a much sounder bill, and I support it. It strikes the essential balance between our Nation's future mineral and energy needs, and priceless wilderness values. It curbs the abuses of this Secretary, and provides for sound, long-term wilderness protection. The normal, orderly decisionmaking process of Congress is preserved. Wilderness protection is one

area where all the patience and caution of our legislative process serves us well, and it should be preserved.

Under the Wilderness Protection Act, Congress retains the power to determine whether mineral activity is allowed in wilderness. Congress has the freedom to move with due caution and reason. It remains the responsibility and privilege of Congress to protect our Nation's wild lands for future generations, so that future generations will have wild lands to protect.

I urge my colleagues to join me in voting for the Wilderness Protection Act.

□ 1330

Mr. SEIBERLING, Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. KILDEE).

Mr. KILDEE, Mr. Chairman, I rise in support of the bill H.R. 6542. This bill, introduced by my colleagues on the House Interior Committee, Congressmen LUJAN, and SEIBERLING is an expression of the bipartisan conviction on the committee that action must be taken to protect vital federally owned wilderness areas. By withdrawing our amount to less than 2 percent of all Federal lands, from mineral leasing and development, we are insuring that these unique areas will be preserved for the benefit of future generations. The bill was the subject of intense scrutiny and consideration by the Interior Committee which included 9 days of hearings throughout the country and the receipt of testimony from over 500 people. It is truly a compromise measure which addresses the concerns of interested and involved groups and persons.

I urge my colleagues to pass the bill without amendment.

Mr. YOUNG of Alaska, Mr. Chairman, I yield 2 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS, Mr. Chairman, I rise in strong support of H.R. 6542, a bill that represents a bipartisan compromise to resolve, once and for all the controversy over oil and gas leasing in the wilderness areas of this country.

As my colleagues speaking ahead of me have noted, until recently there was an informal policy of not issuing leases in wilderness areas, in spite of the authority to do so that was contained in the Wilderness Act of 1964. The public furor that has erupted over this issue indicates that the administration has miscalculated about the importance of this and many other environmental issues to the American people.

This bill is truly a bipartisan effort and I would say to my Republican colleagues that we will do the administration a favor by passing this legislation and putting to rest this divisive issue. Republicans have a tradition of being at the forefront of environmental

movements and we cannot allow that to change.

To those who claim that this bill would lock up valuable resources, I ask you to consider the importance of the resources we are attempting to protect and to look at the reasonable nature of this bill.

First, the bill provides for ongoing mineral surveys in all withdrawn lands and allows the President to open any withdrawn area in case of urgent national need if the Congress concurs. It also continues to allow mineral extraction by slant drilling from outside a wilderness area.

And what about the charge that we are locking up vast amounts of land that could otherwise be of use to Americans? Nothing could be further from the truth. Making such a charge assumes that the only use for Federal lands, including wilderness, that is desired by Americans is that of resource extraction. The fact is that wilderness and wilderness candidate areas comprise only about 2 percent of the land in the lower 48 States. Furthermore, according to estimates by the Oak Ridge National Laboratory, these areas contain only about 2 to 3 percent of the Nation's undiscovered oil and gas resources. Finally, and possibly most important, is the broad public support for the concept of wilderness for its own sake.

I urge all of my colleagues to vote for this legislation, thereby helping to defuse an issue that has cost the administration a great deal of support.

Mr. SEIBERLING, Mr. Chairman, I yield 3 minutes to the gentleman from Montana (Mr. WILLIAMS), and in so doing I want to commend the gentleman for the leading role he has played in trying to resolve this conflict, and for the initial action that we took in ordering the Secretary to withdraw the Bob Marshall wilderness from mineral leasing.

Mr. WILLIAMS of Montana, Mr. Chairman, it is with a great amount of personal fulfillment that I rise today to speak in support of the Wilderness Protection Act, H.R. 6542. To many of you, the controversy surrounding the question of mineral leasing in our Nation's wilderness areas was one that began when Secretary Watt came to head the Interior Department. In the State of Montana, this is a controversy that we wrestled with long before this administration, and long before the Congress became involved. The opening volleys in this controversy took place in Montana, and the first battleground was the Bob Marshall Wilderness.

In early 1978, a group of 200 to 300 Montanans from all walks of life gathered in Missoula, Mont., to stage a protest outside of the regional forester's office. The catalyst for this demonstration was the forthcoming issuing of leases for oil and gas exploration or

permits for seismic activity in Montana's Bob Marshall Wilderness. The Bob Marshall is considered by many to be the flagship of the wilderness fleet. Outside the Federal Courthouse in Missoula, the chants and the signs were the clear: "Do not bomb the Bob!" This expression, "bombing the Bob," was in reference to the use of explosives in seismic exploration. It was believed by many people at that time that any seismic activity using explosives would be extremely detrimental to not only those people seeking the wilderness experience; but, more importantly, to the survival of wildlife. At the time of that demonstration, there were 343 leases for oil and gas permits pending before Tom Coston, the regional forester. In that case, he was particularly ruling on a request by Consolidated Geophysics Georex, a seismic exploration company, to conduct seismic activity in the Bob.

The regional forester denied Georex's application, saying that need was not demonstrated, and that there was considerable lack of public support for any other decision. That decision was automatically appealed to Max Peterson, the head of the Forest Service, and it is at this point that the Mountain States Legal Foundation, headed by Jim Watt, entered the picture. The Washington office ruled that the regional forester had made his determination on insufficient grounds, and that the decision should be sent back to the regional level for another consideration. The decision went back to the regional office, President Reagan was elected to office, and Jim Watt became Secretary of the Interior Department. When the Secretary was appointed, there were many in Montana who feared for the Bob Marshall. On May 5, 1981, Secretary Watt in an inner-office memo directed his solicitor to work to reinterpret the law regarding mineral entry into wilderness areas, so that it opened wilderness areas. On May 21, 1981, the Forest Service changed its regulations to provide that wilderness designation could no longer be the basis for denying a mineral lease, permit, or license. Suddenly, the direction of our Government seemed clear, and it was to be inevitable that the Bob Marshall would be the first victim.

Recognizing that an emergency existed, I asked the Interior Committee, of which I am a member, to consider withdrawing the Bob Marshall under an emergency provision within the Federal Land Management Policy Act. The Interior Committee agreed with my request, and on May 21, 1981, the committee withdrew the Bob Marshall from any leasing activity. There were those people at that time who felt that the Bob Marshall was an isolated incident, and that no emergency really

existed. But, then, the Forest Service followed with proposals to lease in Wyoming's Washakie Wilderness, in California's Ventana and Santa Lucia Wildernesses, and Arkansas' Caney Creek Wilderness. Suddenly, Montana did not stand alone, and, as the late Jimmy Durante would say, "Everyone wanted to get into the act." It was that concern that ultimately culminated into today's consideration.

I only offer this brief history for two reasons: One is to show that this is not a new issue—it is a problem that has been discussed in the West for some time; and the other is to preface the importance of observations, taken from a report prepared by the Interior Department, following the withdrawal of the Bob Marshall. One of the things required under the Federal Land Management Policy Act decision was that the Interior Department prepare a report addressing the emergency that prompted withdrawal. Since this is the only report that I know of that directly discusses the outcome of oil and gas leasing in a wilderness area, I think it is important for the full House to know what its findings were. As I begin this discussion, I want you to note that this is a report that was prepared last year by this Department of Interior, and discusses the question of oil and gas leasing in the Bob Marshall. I will discuss its findings in three categories. These categories comprise the most often-asked questions about leasing in wilderness areas. The first question is: Will leasing be detrimental to the quality of a wilderness? The second question is: Will seismic activity be detrimental to a wilderness area? And the third area, most importantly, is: Will we significantly enhance our energy standing by allowing oil and gas leasing in wilderness areas?

Will leasing be detrimental to the quality of a wilderness?

The phase following exploration is actual leasing. Once a lease is given, its holder has the right to go through to production. The report by Interior is clear:

An oil and gas leasing program could have both short and long term effects on wilderness attributes. During exploration, such activities as helicopter flights, seismic explosions, vehicle traffic, and well drilling could detract from the wilderness resource. Noise pollution, visual degradation from roads and drill pads, and areas of concentrated human use would generally be confined to areas of drainages that are subject to exploration activities. Particular drainages subjected to exploration activities could have their wilderness characteristics altered substantially, particularly during periods when roads and heavy equipment are used.

During the long oil and gas production period (up to 50 years) a wilderness may be fragmented by numerous roads and development in its main valleys. While the actual area impacted by surface disturbance would be low the remaining area may be so fragmented that some of its current wilderness

value would be lost. Entire drainages may become unsuitable for primitive recreation use for 50 to 100 years.

Will seismic activity be detrimental to a wilderness area?

On page 15 of the Interior report is stated:

The lack of roads would require extensive use of helicopter portable techniques. Environmental impact during this time is primarily limited to noise pollution from helicopters and surface explosive charges.

Let me place this observation in perspective. It is estimated that, of the 800 grizzly bear left in the lower 48 States, approximately 400 live in the Bob Marshall. The lower 48's largest bighorn sheep herd, about 1,000 head, inhabit this area. Had Consolidated Georex Geophysics been allowed to explore, it would have involved 270,000 pounds of explosives along 207 miles of seismic line. This would require 5,700 separate explosions (60 pounds every 150-200 feet) at a rate of 50-100 shots a day. A crew of almost 30 people would be transported back and forth by helicopters in the wilderness area for approximately 3 months. I point out that this is only one company, and 343 lease applications were pending—all presumably needing some seismic activities.

SUMMARY

The conclusion seems clear: Both seismic and leasing activity are detrimental to any wilderness area. This price will be paid with very little, if any, gain in energy independence. I submit that the price is too dear; and the areas left to explore, other than wilderness areas, are too many for this legislation not to be enacted.

This is bipartisan legislation reported by the Interior Committee has reported to this body. This bill incorporated the concerns of many Americans who testified before the Interior Committee, not only here in Washington, but in many States across the West. A voice that began quietly in Montana has risen across this country, and its statement is concise: Do not condemn our last wild areas to development. I submit that this Congress cannot turn its back on that plea.

I conclude, my colleagues and my friends, by saying that all legislative bodies, including the U.S. Congress, often and with great dramatics and unabashed fanfare close the barn door on an empty barn. Do not let it happen this time. Our foresight should be 20-20. Let me say that Americans have no fight with the oil companies. PAT WILLIAMS has no fight with the oil companies. We all understand that theirs is a roughneck, and a dirty, and a noisy and essential business. Americans welcome the oil companies. We want them in our houses, we welcome them into our recreation rooms, we want them to come into the kitchen of our agricultural areas, into the dining rooms of our mountains,

where they can feed upon the potential oil and gas reserves below: We simply, and politely, request that they stay out of our parlor.

Mr. YOUNG of Alaska. Mr. Chairman, in my remaining 3 minutes, I am glad the gentleman from Montana said there were only a thousand bears left in the United States. We in Alaska have many times considered seceding from the Union for the way we have been treated as far as action on our lands, on 147 million acres of land, which is twice as large or three times as large as Montana, which has been set aside for the grizzly bears. In fact, if you want some, we will be glad to send you some down to these areas. You know, we will just get rid of them, and maybe a few wolves while we are at it.

But anyway, Mr. Chairman, to clarify one point, the designated wilderness area today in 80,000,902 acres. The recommended wilderness is 20,764,000 acres. Under study is 131,109,402, which comes to a total of 231,874,332 acres.

The way this Congress is acting, that is one-third of our total land mass in the United States today that is publicly owned.

The way this Congress acts, it is being misled by those groups that like to say that this is for the wilderness sake, that will lock up potentially the majority of our resources.

This is not myself speaking. This is the information we obtained from GSA, GAO, from all those military establishments, from the geologists, from the USGS, and whole groups that understand the facts, that we are, in fact, putting ourselves into jeopardy of the other countries if we have to import minerals and oil from them.

Mr. Chairman, this is not an environmental vote. This is a no-growth vote. It is not a sound management policy. It is a nonmanagement policy.

Mr. Chairman, I will urge my colleagues on Wednesday, when we vote on this, hopefully, that they will read the record and ask themselves, do they continue to want this great Nation of ours to be dependent upon foreign countries for those resources which we must have to maintain our strength, or do they want access and knowledge of where those resources are and the wise and sound development of those resources as we need them?

If you believe in no-management, if you believe in ignorance, if you believe that this Nation is no longer great, then you will vote for this legislation.

If you believe that man has the capability to manage and to understand and to develop and still maintain the environment, then you will vote against this legislation.

I am realistic enough to know that I may be a voice in the darkness, a cry in the wind; but there will be a time,

and even those supporting this bill, there will be a time when this so-called wilderness area, those resources will be needed.

Unfortunately for our future generations, because of ignorance and a lack of forethought, there will be a mass rape and destruction of those great lands.

There has to be an understanding and a middle ground and the no-growthers and the elitists and those who say it is ours only and no one else's have to understand that we need those resources, the knowledge of them today, and not tomorrow.

Mr. SEIBERLING. Mr. Chairman, I yield myself the balance of my time.

Just to correct the record, there are 410 million acres of federally owned land in the lower 48 States. Of these, 137 million acres are already under lease for oil and gas and another 100 million acres are available for lease.

Federal lands comprise only 21 percent of the land in the lower 48 and the remaining 79 percent is in private ownership.

Even if you take all the lands that are in wilderness, national parks, or military reservations and the like, you come up with only 100 million acres; so that more than twice as many acres are available for oil and gas development as would be banned by this and all other withdrawal actions.

Now, in withdrawing areas from mineral leasing in H.R. 6542. The sponsors were mindful that certain wilderness candidate areas may contain leasable mineral resources which are needed for other evaluations; so to this end, section 4 of the bill permits continued seismic prospecting involving the use of explosives in all wilderness candidate areas and additionally provides for other prospecting conducted in a manner compatible with the preservation of the wilderness and the environment; but with respect to lands that have been designated wilderness by the Congress, the committee voted 28 to 11 to ban such prospecting as incompatible with the wilderness concept and such a ban was certainly supported in the hearings that we had by the overwhelming majority of witnesses.

Now, it may well be that at some future date the pressure of dwindling energy supplies or other shortages may dictate opening wilderness areas or even the national parks for energy development and extraction, and in the meantime if such a need occurs the bill provides that the President may make a recommendation to Congress and if Congress concurs on the basis of a national need, those areas can be opened up; but I would reiterate the statistics that point out that 237 million acres of Federal land in the lower 48 are already available or under oil and gas lease today.

Mr. Chairman, this bill is a widely supported bill. It is not supported by elitists, as the gentleman from Alaska observed. It is supported by such groups as the Oil, Chemical and Atomic Workers International Union; the AFL-CIO; the United Auto Workers; the Industrial Chemical Workers Union; the Industrial Union Department of the AFL-CIO; the International Association of Machinists and Aerospace Workers; the United Steelworkers of America; as well as the Wilderness Society, the Sierra Club, the National Wildlife Federation, the National Audubon Society, the World Wildlife Fund; the Isaac Walton League; the National Parks and Conservation Association; and I could go on and on, including the American Forestry Association, I might add; so this is a widely supported bill that in my opinion is in the national interest from every aspect.

● Mr. LAGOMARSINO. Mr. Chairman, I rise in support of H.R. 6542, the Wilderness Protection Act of 1982.

H.R. 6542 represents a bipartisan response to a critical situation now facing our wilderness areas. The 1964 Wilderness Act provided a 20-year waiting period before prohibitions against oil drilling in wilderness areas took effect. In the period since enactment of the act, successive administrations have voluntarily refrained from leasing in these areas; however, recent court decisions have removed administrative discretion in this regard, resulting in a flood of new leasing applications. In the Los Padres National Forest in my own district, hundreds of applications have been filed in an attempt to beat the 1984 filing cutoff.

These actions pose a threat to both existing and potential wilderness areas. Recognizing the seriousness of the situation, the Interior Committee—under the leadership of our chairman, Mr. UDALL, the ranking minority member, Mr. LUJAN, and the chairman of the Public Lands Subcommittee, Mr. SEIBERLING—has drafted this legislation, which is designed to protect our existing and potential wilderness areas in the interim period between the expiration at the end of the 97th session of Congress of the existing moratorium imposed by the Secretary of the Interior, and the January 1984 effective date of the leasing prohibition in the 1964 act.

As an original sponsor of this bill, along with the chairman and eight other Members, I believe it is a responsible and necessary means of protecting these valued lands. Its immediate effect will be to provide permanent protection to 18 million acres of wilderness. Another 15 million acres of lands recommended for wilderness or further planning would be withdrawn until Congress can act upon them. And unlike previous efforts to resolve the issue, H.R. 6542 would require the

concurrence of Congress, through a joint resolution, of any future administration proposals to allow leasing in the wilderness on the basis of national needs.

I urge my colleagues to vote for this important bill. ●

● Mr. WYDEN. Mr. Chairman, today I would like to express my unequivocal support for H.R. 6542, the Wilderness Protection Act of 1982. This legislation takes a major step toward insuring the protection of the irreplaceable pristine lands in our Nation.

H.R. 6542 is a rational and responsible answer to the question of whether there should be leasing of wilderness areas for mineral extraction. While withdrawing certain lands from mineral leasing, H.R. 6542 provides for the inventory of minerals in these areas and for the revocation of withdrawals should the need arise.

Also, this legislation protects the rights of companies with existing leases and allows for the leasing of the subsurface of wilderness as long as exploration and extraction are accomplished from outside the area. These provisions balance the current and potential energy needs of our Nation with the need to preserve undisturbed wilderness areas in the United States.

Only a very small quantity of energy resources exist in the areas withdrawn under H.R. 6542. The findings of a study by private consultant Leonard Fischman for the Wilderness Society typifies the results of several studies on this point. Fischman found that Federal lands as a whole contain roughly 30 percent of the U.S. onshore oil reserves and 22 percent of its onshore gas reserves.

Of those totals, the potential contribution from designated wilderness areas is only about 1.1 percent of the oil and 1.2 percent of the gas; for potential wilderness areas, it is 3.4 percent of the oil and 2.5 percent of the gas. The possible benefit of developing these resources clearly does not justify the sure decimation of fragile ecosystems.

The implicit point of H.R. 6542 is compelling. Extract minerals from nonwilderness areas. General Accounting Office and Department of the Interior studies indicate that up to 80 percent of the existing leases on nonwilderness Federal lands will expire without any exploratory drilling.

Large quantities of untapped resources exist on Federal land and are available for extraction. These resources will remain available under the provisions of this bill.

With existing Federal leases unexplored, there is no justification to risk marring our small amount of unspoiled wilderness. An area I am familiar with illustrates the danger of not passing this legislation. The Wenaha-Tucannon Wilderness Area,

which encompasses about 180,000 acres in Oregon and Washington, had 49 known applications for oil and gas leases as of January 1982. The beauty and serenity of this area would be severely damaged if these leases were granted. The building of roads and installation of equipment would shatter the delicate balance of nature that presently exists.

We must not blithely dismiss the importance of preserving America's wilderness. Too little of this country's original grandeur remains to endanger it with unnecessary industrial encroachment. Serious efforts must be undertaken to insure that for generations to come Americans will be able to see these living treasures and enjoy the natural beauty that this country affords us. H.R. 6542 is one of those serious efforts.●

□ 1345

The CHAIRMAN pro tempore. All time has expired.

Pursuant to the rule, the text of the bill, H.R. 6846, shall be considered as an original bill for the purpose of amendment under the 5-minute rule in lieu of the amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs now printed in the bill.

The Clerk read as follows:

H.R. 6846

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION. 1. This Act may be cited as the "Wilderness Protection Act of 1982".

Mr. SEIBERLING. Mr. Chairman, I move that the Committee do now rise. The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DE LA GARZA, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6542) to withdraw certain lands from mineral leasing, and for other purposes, had come to no resolution thereon.

DISTRICT OF COLUMBIA
BUSINESS

The SPEAKER. This is District of Columbia day. The Chair recognizes the gentleman from California (Mr. DELLUMS), chairman of the Committee on the District of Columbia.

REQUEST FOR CONSIDERATION
OF H.R. 5595, INCREASE AUTHORIZATION FOR THE
ANNUAL FEDERAL PAYMENT
TO THE DISTRICT OF COLUMBIA

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the Dis-

trict of Columbia, I call up the bill (H.R. 5595) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

The SPEAKER. The Clerk will report the title to the bill.

The Clerk read the title of the bill.

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. PARRIS. Mr. Speaker, reserving the right to object, it is my understanding that the chairman of the committee intends to make a unanimous-consent request to have this matter considered at a later time.

Is my understanding correct in that regard?

Mr. DELLUMS. Mr. Speaker, will my distinguished colleague yield?

Mr. PARRIS. I yield to the gentleman from California.

Mr. DELLUMS. By a previous commitment, there is to be no rollcall vote taken today, and the gentleman from Virginia, as I understand it, is prepared to offer an amendment to the bill before the body calling for a vote. Since amendments cannot be delayed, they have to be acted upon at the time they are presented to the body. Therefore, the chairman would offer a motion to withdraw the resolution before us and ask unanimous consent that the bill, H.R. 5595, be considered at some later date this week.

Mr. PARRIS. Further reserving the right to object, Mr. Speaker, would the gentleman inform the House as to whether or not his unanimous-consent request would apply just to the balance of this week?

Mr. DELLUMS. If the gentleman would yield further—

Mr. PARRIS. That is, for rescheduling. I yield to the gentleman from California.

Mr. DELLUMS. The gentleman would very much like to see the bill acted upon this week.

As I understand my distinguished colleague from Virginia has some problem with Wednesday afternoon. The chairman has no problem with scheduling. As the gentleman knows, this gentleman has no ability to schedule the matter on the floor of the Congress. We can certainly ask the Speaker to take judicial notice of the fact that the gentleman would like to be present and able to offer his amendment.

This gentleman would reassure my colleague from Virginia that we will do everything at our disposal to make certain the gentleman's rights are protected.

Mr. PARRIS. Further reserving the right to object, Mr. Speaker, I appreci-

ate very much the gentleman's consideration in that regard. I would suggest to the gentleman that in the event, for some untoward reason, the bill cannot be scheduled after Wednesday of this week, it would certainly not be this Member's intention to object to some appropriate time next week.

With the understanding of the chairman that at such time as this matter is considered by the full House that we would have an opportunity to offer amendments which, as the gentleman is aware, are pending to this measure now, would it be the chairman's position that appropriate amendments, germane as usual, under the appropriate rules, would be in order at such time as the measure is considered?

Mr. DELLUMS. If the gentleman would yield further, I would say to the gentleman that the gentleman's right will be protected; certainly his amendments would be in order.

Mr. PARRIS. Further reserving the right to object, Mr. Speaker—and I appreciate the gentleman's comments—as I understand the parliamentary situation, if the House were to proceed on this matter at this time, under the rules, it would be appropriate for any Member to require a recorded vote and the Speaker has indicated that recorded voted will not be taken today, so that it is possible under the rules that the House might have to adjourn or send out the Sergeant at Arms to arrest the Members.

Certainly none of the Members would like to see that happen. I have no desire personally to delay this matter. The adoption of this legislation certainly is important, but I do have a sincere desire to have the House consider my amendment, which would restore \$14 million for retiree benefits to this bill.

Finally, Mr. Speaker, further reserving the right to object, if I withdraw my objection, could I have the understanding of my colleague, the gentleman from California, that he would give this Member reasonable notification of whatever time this matter may be scheduled by the House?

Mr. DELLUMS. If the gentleman would yield further, we will let the gentleman know as soon as this gentleman finds out when the matter will be scheduled before the body.

Mr. PARRIS. With that representation from the gentleman from California, I withdraw my reservation of objection.

Mr. DELLUMS. Mr. Speaker, I withdraw the bill.

The SPEAKER pro tempore (Mr. KILDEE). The gentleman from California (Mr. DELLUMS) withdraws the bills.

DISTRICT OF COLUMBIA REVENUE BONDS FOR EDUCATIONAL EXPENSES AMENDMENT

Mr. DELLUMS. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 6276) to amend the District of Columbia Self-Government and Governmental Reorganization Act to allow the issuance of revenue bonds to finance college and university programs which provide student educational loans.

The Clerk read the title of the bill.

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 6276

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 490(a)(1) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-334) is amended by inserting "college and university programs which provide loans for the payment of educational expenses for or on behalf of students," after "college and university facilities."

Mr. DELLUMS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I am pleased to bring up for the consideration of the committee the bill, H.R. 6276. H.R. 6276 amends the revenue bond section of the Home Rule Act (section 490, as amended) to enable the District to authorize the sale of revenue bonds for financing student loan programs. Specifically, the bill authorizes the sale of revenue bonds for financing college and university programs which provide loans for the payment of educational expenses for or on behalf of students. This authority will be available to all of the universities in the District of Columbia.

H.R. 6276 is essentially a minor amendment to the bill, H.R. 4910, which was passed and signed into law last year. It simply adds to the list of permissible purposes for revenue bonds the sale of such bonds for the purpose of financing a student loan program. This legislation is required to insure that bonds could be sold for this purpose.

The committee view is that the District of Columbia should have the right to make its own decision regarding the advisability of undertaking such a program. This legislation does not imply congressional endorsement of such a bond sale; rather, it simply is a logical extension of bonding authority already held by the District.

This legislation is prompted by the possibility of a reduction in student loan funds from Federal sources. The

actual need for such loan funds, the quantity of such loan funds, and the advisability of selling revenue bonds to finance such a loan pool, was not analyzed by the committee; rather, it was the position of the committee that these issues would be determined by the District Government.

As in all cases, should District legislation be enacted to sell bonds, such legislation would lay over for congressional review. I would also like to point out that this legislation neither causes nor implies any Federal Government financing or responsibility for these bonds.

The Subcommittee on Fiscal Affairs and Health held hearings on May 26. At that time, the bill was favorably reported to the full committee. The committee, on June 23, 1982, approved H.R. 6276, by a unanimous recorded vote of 10 votes "aye" and 0 votes "nay."

Mr. PARRIS. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, H.R. 6276 amends the District of Columbia Self-Government and Governmental Reorganization Act to permit the District to issue revenue bonds to finance college and university programs providing student educational loans.

I think it is important for the Members to remember that any District legislation enacted to establish the revenue bond sales would be subject to the usual 30-day congressional review period. The District currently has authority to issue revenue bonds to finance housing, health, transit, utility, recreational, and university facilities, and this legislation would add guaranteed student loans under fairly carefully structured conditions secured by the endowments and the assets of institutions of higher learning.

The administration supports the adoption of the amendment. The cost will only represent the loss of revenue to the Treasury because of the tax-exempt status of the bonds.

Mr. FAUNTROY. Mr. Speaker, I rise in support of H.R. 6276, a bill which would enable the District, like all other jurisdictions, to sell revenue bonds as a means of financing student loan programs.

This bill would amend section 490 of the Home Rule Act and is part of a series of measures designed to make the District of Columbia government more effective, efficient, and responsive. As home rule for the District ages, it is my hope that we will continue to clean up and clear up the shortcomings in the original act.

H.R. 6276 enjoyed strong, bipartisan support at the committee level. We are not here mandating the use of revenue bonds for college loans. Instead, we are merely providing the District of Columbia government with the authority to enact such a program if it deems it necessary.

This authority is vital as the District, like all other places, faces the belt-tightening fiscal policy of the Federal Government, and thus, the prospect of fewer Federal dollars for higher education assistance.

During the first session of this Congress, we passed H.R. 4910, a bill which will help facilitate access to the bond market for the District. H.R. 6276 complements that action we took and will move the District closer to the bonding authority enjoyed by all other jurisdictions.

● Mr. McKINNEY. Mr. Speaker, our colleagues may recall that last year the Committee on the District of Columbia reported legislation that dealt with the ability of the city to issue bonds. That bill did not provide any new authority to the city, but rather clarified the ambiguous language contained in the original Home Rule Act. It was the opinion of bond counsel that without clarification, the original language was too vague to permit any type of bond to be successfully issued. The passage of that measure into law last December removed all technical impediments to the city's entry into the private bond market.

The bill before us today, H.R. 6276, is a logical extension of the effort to get the city into the bond market at the earliest possible time. It would, quite simply, include college and university student loan programs as an eligible purpose for the issuance of bonds. If approved, the District of Columbia would be permitted to issue tax-exempt revenue bonds on behalf of the universities and colleges located in the city. Such bonds would not be guaranteed by either the Federal Government or the District of Columbia government. The institutions wishing to participate must provide the guarantee by setting up reserves or pledging assets against the possibility of default on the loans.

I think it is important to note that with a reduction in Federal aid for student loans, efforts by the States to pick up the slack should be praised. Illinois was the first State to consider such a program when it established just 1 year ago a new agency to issue tax-exempt bonds for independent colleges. Similar measures have been passed in Iowa, Maryland, and Massachusetts. In five other States—Vermont, Rhode Island, New Hampshire, Maine, and Kentucky—the authority of existing agencies has been expanded to include the issuance of bonds for student loans or the construction of college facilities. What we hope to do today is add the District of Columbia to the growing list of States and local governments who have taken the initiative to develop alternative student loan programs. And the reason we must take this step is that the Congress must act as the legislature for

the District of Columbia in amending the Home Rule Act.

In looking at the bill itself, one may well wonder where the controls and limitations of the program appear. They do not appear, but for a very sound reason that goes to the heart of the concept of home rule. The purpose of this bill is not to spell out in great detail the specifics of the program. Rather, it is to provide the city with the basic authority without which it cannot even consider such an effort. Just as the several States will decide for themselves what costs will be eligible for loans and how the bonds will be controlled and marketed, the District of Columbia, through the action of the City Council, will make those decisions. And in fact, the city may decide not to proceed with bonds for student loans at all. We seek through this bill not to mandate any action, but rather to eliminate the impediments facing the city should they decide to follow that avenue.

Before any bonds could be offered under this new authority, the City Council would be required to enact local legislation which would get into the specific expenses which would be eligible for loans, the guarantees offered by the participating institutions, and the concerns of rating agencies, bond counsel, and the underwriters. That local legislation would not be any different from any other local legislation, and it would therefore be required to undergo the normal 30-day congressional review period. Should any part of the local legislation cause concern, the city can be prevented from going forward by a congressional resolution of disapproval.

In summary, Mr. Speaker, this bill would not lessen the authority of Congress regarding the District of Columbia in any manner, it would not pledge the full faith and credit of either the local or Federal Government against the bonds, and in fact, it would not mandate that the city actually issue such bonds. What it would do is provide the basic authority to proceed on such a course if the city finds it to be in the best interest of the residents of the District of Columbia.

I urge my colleagues to lend their support and approve the bill.●

Mr. DELLUMS. Mr. Speaker, I move the previous question on the bill. The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

MAKING IN ORDER CONSIDERATION OF H.R. 5595 ON THURSDAY, AUGUST 12, 1982

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that it shall be in order that the bill (H.R. 5595) to amend the district of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia, be considered on Thursday, August 12, 1982.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

DESIGNATING OCTOBER 15 AS NATIONAL POETRY DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

● Mr. FASCELL. Mr. Speaker, I would like to note the introduction of House Joint Resolution 550, a bill to designate October 15 of each year as National Poetry Day.

October 15 has historically been set aside to take note of the contributions of poetry to civilization, and Dr. Frances Clarke Handler of Miami Beach has worked tirelessly and persistently to have this date recognized and celebrated around our Nation.

It is through the unflagging efforts of Dr. Handler and of State poetry societies that more than half of our States, as well as a number of cities and counties, have issued proclamations to recognize October 15 as Poetry Day.

Dr. Handler, who is national director of the National Poetry Day Committee, is well known in Florida for her dedication to the art of poetry which has been an importance form of expression and literature. Because I believe in the importance of communication in its most persuasive and critical form, I offer my support to the National Poetry Day Committee in its efforts.

If our colleagues would like to join in saluting the contributions of poetry and poets in our everyday lives and culture, I invite and urge them to contact my office and join in sponsoring House Joint Resolution 550.●

THE LATE HONORABLE WALTER B. HUBER OF OHIO

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, it is my sad duty to announce to the House the passing of a former colleague. The Honorable Walter B. Huber of Ohio succumbed to cancer yesterday in Maryland where he had lived since leaving office in 1950.

Mr. Huber and I were elected to the House in 1944, but Walter left office in 1950. He remained in Washington, however, where he had a distinguished career as an investigator for the Senate Committee on the Judiciary, as an administrative assistant with the House Subcommittee on Legislative Oversight and as a consultant to the House Committee on Un-American Activities until his retirement from public service in 1968.

We should be grateful for his service to the Nation, and I am sure my colleagues join me in conveying the sympathies of the House to Mr. Huber's son and grandchildren.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. WOLF of Virginia (at the request of Mr. MICHEL), for today and the balance of the week, on account of a death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DELLUMS) to revise and extend their remarks and include extraneous material:)

Mr. GORE, for 30 minutes, today.
Mr. GONZALEZ, for 15 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. COELHO, for 5 minutes, today.
Mr. FASCELL, for 5 minutes, today.
Mr. OBERSTAR, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FAUNTROY, to revise and extend his remarks on H.R. 6276 in the House today.

(The following Members (at the request of Mr. HUNTER) and to include extraneous matter:)

Mr. LeBOUTILLIER.

(The following Members (at the request of Mr. DELLUMS), and to include extraneous matter:)

Mr. WILLIAM J. COYNE.
Mr. MAZZOLI.
Mr. GORE.
Mr. MOLLOHAN in two instances.
Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.

SENATE ENROLLED JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled joint resolutions of the Senate of the following title:

S.J. Res. 123. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week";

S.J. Res. 183. Joint resolution to authorize and request the President to issue a proclamation designating October 17 through October 23, 1982, as "Lupus Awareness Week"; and

S.J. Res. 190. Joint resolution to authorize and request the President to designate "National Family Week."

ADJOURNMENT

Mr. DELLUMS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock p.m.) under its previous order, the House adjourned until Tuesday, August 10, 1982, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4560. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment and services to Turkey (Transmittal No. 82-73), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

4561. A letter from the Chairman, Federal Home Loan Bank Board, transmitting the Board's annual report on the economic viability of depository institutions for the period April 1, 1981, to March 31, 1982, pursuant to section 206 of Public Law 96-221; to the Committee on Banking, Finance and Urban Affairs.

4562. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to Turkey (Transmittal No. 82-73), pursuant to section 36(b) of the Arms Export Control Act, together with certification that the sale is consistent with the principles contained in section 620B(b) of the Foreign Assistance Act of 1961, pursuant to section 620C(d) of the act; to the Committee on Foreign Affairs.

4563. A letter from the Acting Director, Office of Legislative Affairs, Agency for International Development, transmitting notice of proposed changes in an existing records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

4564. A letter from the General Counsel, Occupational Safety and Health Review Commission, transmitting notice of a proposed new system of records, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

4565. A letter from the Chairman, Securities and Exchange Commission, transmitting a supplemental report to the Commission's annual report, regarding corporate reorganizations under the bankruptcy code for the fiscal year ended September 30, 1981, pursuant to Public Law; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOWARD: Committee on Public Works and Transportation. Supplemental report on H.R. 6666 (Rept. No. 97-684, Pt. I). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GLICKMAN:

H.R. 6953. A bill to repeal the change made by the Omnibus Budget Reconciliation Act of 1981 in the State trigger provisions of the Federal-State Extended Unemployment Compensation Act of 1870, and for other purposes; to the Committee on Ways and Means.

By Mr. MOLLOHAN:

H.J. Res. 566. Joint resolution designating the week of August 29, 1982, through September 4, 1982 as "National Railroad Week"; to the Committee on Post Office and Civil Service.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

453. By the SPEAKER: Memorial of the Legislature of the State of California, relative to savings and loan associations; to the Committee on Banking, Finance, and Urban Affairs.

454. Also, memorial of the Legislature of the State of Illinois, relative to H.R. 2229, furnishing outpatient medical services to "atomic veterans"; to the Committee on Veterans' Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 4070: Mr. LANTOS.

H.R. 5088: Mr. EVANS of Delaware, Mr. MAVROULES, Mr. WHITTAKER, Mr. ROYBAL, Mr. SHANNON, and Mr. WALGREN.

H.R. 5600: Mr. BENEDICT, Mr. BROWN of California, Mr. BURGNER, Mrs. COLLINS of Illinois, Mr. DWYER, Mr. EMERSON, Mr. HENDON, Mr. LEBOUTILLIER, Mr. LUJAN, Mr. McCURDY, Mr. MOLINARI, Mr. RANGEL, Mr. RATCHFORD, Mr. ROBERTS of South Dakota, Mr. ST GERMAIN, Mr. WOLFE, Mr. BROWN of Colorado, Mr. HAGEDORN, Mr. LIVINGSTON, and Ms. OAKAR.

H.R. 6938: Mr. PERKINS.

H.J. Res. 496: Mr. PAUL, Mr. CLINGER, Mr. COURTER, Mr. KILDEE, Mr. ANNUNZIO, Mr. SOLARZ, Mr. DAUB, Mr. ADDABBO, Mrs. ASHBROOK, Mr. JEFFRIES, Mr. PRICE, Mr. LANTOS, Mr. PEYSER, Mr. KRAMER, Mrs. SCHROEDER, Mr. LEBOUTILLIER, Mr. LEHMAN, Mr. DONNELLY, Mr. CONYERS, Mr. FISH, Mr. ROSENTHAL, Mr. RAILSBACK, Mrs. HOLT, Mr. LUJAN, Mr. FORD of Tennessee, Mr. GIBBONS, Mr. MOAKLEY, Mr. DOUGHERTY, Mr. AKAKA, and Mr. GRADISON.

H.J. Res. 533: Mr. McCURDY, Mr. HALL of Ohio, Mr. MARTINEZ, Mr. EVANS of Delaware, and Mr. MORRISON.

H. Con. Res. 325: Mr. DOUGHERTY, Mr. DREIER, Mr. DUNN, Mr. GINGRICH, Mr. JACOBS, Mr. KOGOVSEK, Mr. KRAMER, and Mr. LEE.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

554. By the SPEAKER: Petition of the City Council, New York, N.Y., relative to H.R. 6459, transferring the National Institute of Occupational Safety and Health to the National Institutes of Health; to the Committee on Energy and Commerce.

555. Also, petition of the national apostolate of Maronites, San Antonio, Tex., relative to a peaceful solution for Lebanon; to the Committee on Foreign Affairs.

556. Also, petition of the City Council, Houston, Tex., relative to opposition to section 121 of H.R. 6211; to the Committee on Public Works and Transportation.

557. Also, petition of the City Council, East Chicago, Ind., relative to steel import limitations; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5427

By Mr. HARKIN;

(Amendment to the Leach substitute.)—Page 3, strike out line 21 through 23 and insert in lieu thereof the following:

"(d) If radio broadcasting to Cuba under this Act includes any AM frequency broadcasts, such broadcasts may only be carried out on a single AM frequency and—

(Substitute for Energy and Commerce Committee amendment.)

—Page 3, strike out line 21 and all that follows through line 8 on page 6 and insert in lieu thereof the following:

"(d) If radio broadcasting to Cuba under this Act includes any AM frequency broadcasts, such broadcasts may only be carried out under the authority provided by this subsection. For purposes of such AM frequency broadcasting, the Board is authorized to—

"(1) prepare or otherwise obtain material suitable for broadcasting; and

"(2) provide for the broadcasting of that material to Cuba by making expenditures for charges for the use of the facilities of commercial radio broadcasting stations which can be heard in Cuba."

—Page 4, line 1, strike out "the" and all that follows through "Act" in line 5 and insert in lieu thereof the following: "radio broadcasting to Cuba under this Act may only be carried out with broadcasting facilities."

ties located on Swan Island off the coast of Honduras".

—Page 7, line 23, strike out "authorized" and insert in lieu thereof "directed"; page 8, line 1, strike out "in mitigating the effects" and insert in lieu thereof "as a result" and at the end of line 3, insert the following:

"For purposes of this subsection, the term 'expenses' includes (but is not limited to) the capital costs associated with the planning and construction of new or modified antenna, arrays, transmitters, and associated equipment, lost advertising revenues and reductions in advertising rates, increased power costs, and costs of additional personnel required to monitor and operate revised radio broadcasting facilities."

—Page 8, after line 12, insert the following:

PROHIBITION ON HIRING OF ADDITIONAL PERSONNEL FOR RADIO BROADCASTING TO CUBA

Sec. 7. (a) Except as provided in subsection (b), functions relating to radio broadcasting to Cuba under this Act may only be carried out by personnel of Federal agen-

cies, and no Federal agency may employ additional personnel for purposes of carrying out any such function.

(b) Nothing in this section precludes the Board for International Broadcasting from utilizing the services of existing news reporting organizations.

Page 3, line 16, strike out "The" and all that follows through the end of line 20.

H.R. 6214

By Mr. STENHOLM:

—At the end of the bill add the following new section:

LONG-TERM LEASES FOR AIR FORCE FAMILY HOUSING

Sec. . (a) Notwithstanding any other provision of law, the Secretary of the Air Force may enter into contracts for the lease of housing facilities, existing or to be constructed, on or near military installations in the United States for assignment of such facilities, without rental charge, as public quarters to members of the Armed Forces, including enlisted members in the grade of

E-4 and below. Such contracts may be made through negotiation.

(b)(1) A contract for the lease of housing facilities under this section may be for any period not in excess of 30 years (including the period for construction of such housing facilities).

(2) Contracts under this section may not be made for the lease of housing facilities at more than five separate locations. Not more than 300 housing units may be leased under this section at any one location.

(c) Expenditures for the rental of housing facilities under a contract under this section (exclusive of any costs for utilities, maintenance, and operation) may not exceed \$1,000 per month for any unit for the first year of the contract.

(d) A contract may not be made under this section until (1) the Secretary of the Air Force submits to the Committees on Armed Services of the Senate and House of Representatives a written report of the facts concerning the proposed contract, and (2) a period of 21 days elapses after the report is received by those committees.

EXTENSIONS OF REMARKS

OUTMODED DIE CASTING FACTORIES ILLUSTRATE NEED FOR H.R. 5540, DEFENSE INDUSTRIAL BASE REVITALIZATION ACT

HON. WILLIAM J. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 9, 1982

● Mr. WILLIAM J. COYNE. Mr. Speaker, American industry must modernize rapidly to regain its competitive edge in world and domestic markets. And for national security reasons, this modernization is simply a must so we can maintain our ability to mobilize industrial production in the event of emergency.

The House will soon have an opportunity to help spur this upgrading of the Nation's industrial plant when it votes on H.R. 5540, the Defense Industrial Base Revitalization Act. This legislation will provide the framework under which small- and medium-size firms can catch up with their modernization needs.

The New York Times recently described the linkage between outmoded equipment in the die casting industry and the loss of business to foreign competitors and to the plastics industry. The article illustrates the problem of retraining workers along with the implementation of technological changes.

H.R. 5540 also addresses the training of critical skills for this very reason. Workers in an industrial area like my area of Pennsylvania would resist modernization programs, and understandably so, if the introduction of robots left them out in the cold. This bill gives workers a chance to become part of the modernization process.

The text of the New York Times article follows:

[From the New York Times, June 28, 1982]

DIE CASTERS ARE STRUGGLING TO ADAPT AN OLD CRAFT SEEKS WAYS TO MODERNIZE

RIVER GROVE, ILL.—A 400-pound, five-foot-long yellow arm carries a bucket of molten aluminum from a furnace and pours it into a casting machine. It swings around, refills the bucket and begins again, repeating the movements every 30 seconds.

That robotic arm is the brightest hope for salvaging one of America's bread-and-butter industries—die casting.

In the last decade, die casting, a \$6 billion-a-year, 12,000-company, family business still operating on equipment almost as old as the art itself, has fallen behind its competition from abroad and from the plastics industry. And now it is banking on high technology to assure its survival.

"The industry hasn't kept pace with the times," said Laura Conigliaro, a financial

analyst with Bache Halsey Stuart Shields Inc. in New York.

Indeed, the industry faces a \$1 billion loss this year, according to James Cannon, executive vice president of the Society of Die Casting Engineers.

EQUIPMENT LAG

Miss Conigliaro attributes the industry's problems to obsolete equipment. "The major cause for lost business is that companies are guilty of having equipment older than that of similar industries in other countries," she said.

Machine tools more than 10 years old accounted for 69 percent of this country's total inventory, compared with 41 percent in Japan, according to the 12th American Machinery Inventory of Metal Working Equipment completed in late 1978, which, Miss Conigliaro pointed out, reflects the industry today. "This obsolescence tends to breed lower profitability because your production is less," she said.

"The use of plastics and foreign competition has created several complications for our industry," said Mr. Cannon. "Seven years ago the trend toward lighter-weight equipment and auto parts caused us to lose business to the plastics industry. We finally leveled off from that impact a few years ago when we learned to produce lighter parts. But now we're losing out to foreign competition with better equipment."

Previous training methods for die casters are no longer adequate, according to Mr. Cannon. The new technology demands a more sophisticated approach, he said, one that emphasizes "hands-on experience" rather than learning from a manual.

And the Society of Die Casting Engineers, the educational arm of the industry, is beginning just such a training program in a newly constructed training center at Triton College in this Chicago suburb. Triton is one of the nation's largest two-year colleges, with nearly 47,000 students and more than 100 technical programs.

CASTING PROCESS

The training facilities, in addition to the robotic arm (or ladler), which puts metal into die casting machines, also has an extractor robot, which removes the finished product. One hundred molds an hour can be completed without the use of manual labor, a 25 percent increase in productivity.

The traditional die casting process requires a worker to stand by a machine with a dipper, scooping molten metals from a furnace in which they are heated to 1,200 degrees. The worker pours the steaming metal into a nearby molding machine, and when a mold is formed, reaches between high pressure clamps that exert 1,000 tons of pressure and removes the finished product.

"I can remember my father coming home with burns," said Brent Knight, Triton's president, who, as it happens, is the son of a die caster.

"The process is boring, hot and dangerous," said Miss Conigliaro.

Although robots are used in less than 10 percent of the industry, Mr. Cannon estimates that within the next five years they will be functioning in as much as 25 percent of it.

COST OF CHANGE OVER

Nonetheless, it will not be easy to turn the industry around. For one thing, changeover costs may be a problem in some plants.

The total cost of the ladler and extractor, per die casting machine, is \$35,000. Most plants have at least five to 10 of the machines and some, like General Motors, have more than 140. Moreover, if the robots were to be installed in a typical factory, all of the other equipment there would have to be upgraded to accommodate them.

There is also some resistance to change. "Many die casters want to stay with the old ways," said Miss Conigliaro. "There is so much that needs to be done, they are overwhelmed and confused."

Will people lose jobs to robots? "Absolutely not," said Miss Conigliaro. "Robots will 'displace,' not replace men." Humans will be used for cleaner and safer jobs like quality inspection and maintenance of the machines, she added.

LEARNING TO USE ROBOTS

"When we began changing our systems, many of the old-timers felt threatened," said Arlin Rohrer, president of the independent union at the O.M.C. Johnson Corporation in Waukegan, Ill., an outboard motor manufacturer that is about 10 percent automated. "They thought, 'I'm going to lose my job,' and other men thought the robots would be too complicated."

However, Mr. Rohrer said, he has not yet encountered anyone who could not learn how to use the new equipment or who has lost a job as a result of the automation.

Beginning in September, Triton will offer courses of from one to five days. Classes of between 25 and 30 students will receive both traditional training and hands-on education in robotics and other new devices.

Even though there are few jobs in the industry for novices, Mr. Cannon said, "We'd rather have them trained in metals than plastics, when the economy turns around." ●

U.S. RAILROADS HONORED

HON. ROBERT H. MOLLOHAN

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 9, 1982

● Mr. MOLLOHAN. Mr. Speaker, I today introduce a joint resolution to designate the week of August 30 through September 4 as "National Railroad Week" and September 4 as "National Railroad Day." My distinguished colleague from West Virginia in the other body, the Honorable ROBERT C. BYRD, has embarked on a similar course of action there.

There is little doubt that throughout the history of the United States, railroads have both extended our horizons and our ability to reach them. Railroads have long been a symbol of our national unity. Even as the United States was torn by the War Between

the States, track was being laid for the first transcontinental rail link, completed in 1869.

It is vital for us to remember, however, that the first great rail links were over three trunk lines from the east coast over or around the Appalachians—the Erie, completed from New York to Buffalo in 1851; the Pennsylvania, completed from Philadelphia to Pittsburgh in 1852; and the Baltimore & Ohio, completed from Baltimore to Wheeling in 1853. The B. & O. was the first line to be incorporated for the purposes of carrying passengers and freight in 1827.

We have seen major consolidations of lines and reorganizations of companies in the more than 125 years since these great lines were built. But 100 years ago, railroad men like Vanderbilt, Gould, Harriman, Hill, Morgan, and Belmont still held virtual monopoly power in some States.

Initial efforts to break this power and protect the general public were incorporated by the Congress in the Interstate Commerce Act of 1887. Not incidentally, this act also was designed to save the railroads, themselves, from the rate wars and rebate schemes that were proving to be as poor a business practice as they were irresistible.

Railroads today are more than fond memories, however. They still carry freight and passengers in a most fuel-efficient manner, including the coal that is West Virginia's contribution to America's energy future. That is why the people of Grafton, W. Va., have scheduled the First Annual West Virginia Railroad Heritage Festival beginning later this month.

This festival will be a success, not only because of our great history, but because of the still unrealized potential of America's railroads.

I urge my colleagues to give the joint resolution their full consideration in the weeks ahead. The text of the joint resolution follows:

H.J. Res. 566

Whereas railroads were vital to American territorial expansion and industrial development in the nineteenth century;

Whereas railroads have contributed a rich and colorful culture to America in the form of art, literature, song and architecture;

Whereas railroads have provided Americans with unexcelled luxury in travel;

Whereas historically, railroads have been the leaders in American freight and passenger traffic;

Whereas railroads are destined to lead the Nation in sophisticated, rapid freight and passenger transportation in the future; and

Whereas the important role of railroads in the development and future of the Nation deserves to be recognized: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of August 29, 1982, through September 4, 1982, as "National Railroad Week" and September 4, 1982, as "National Railroad Day" and call-

ing upon all Government agencies and the people of the United States to observe the week and day with appropriate programs, ceremonies, and activities.●

SALUTE TO PORT WASHINGTON'S FIRE DEPARTMENT ON ITS 75TH ANNIVERSARY

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 9, 1982

● Mr. LeBOUTILLIER. Mr. Speaker, nowhere is the spirit of voluntarism in America more typified than in a community volunteer fire department. "Wherever Americans have lived together," R. H. Kayser wrote in the July 29, 1982, edition of the Port Washington News, "they have cooperated to control the ravages of fire." Nowhere is this better shown than through the 75-year efforts of Port Washington's volunteer Atlantic Hook and Ladder Company.

Port Washington's Atlantic Hook and Ladder Company was born out of the community spirit as well as from the strong individualism that has made America what it is. This fire company has grown with Port Washington and the changing times. The Atlantic Hook and Ladder Company has ably met the challenge of more and bigger buildings, greater population, and the potential for more lethal fires and calamities.

This 75th anniversary of the Port Washington Atlantic Hook and Ladder Company is a special occasion for all Port residents. The Port Washington Fire Department will celebrate 75 fine years of selfless dedication and highly competent work on August 7. I know that all of my colleagues here in the U.S. House of Representatives share my salutations to the Port Washington Atlantic Hook and Ladder Company.

I wish to express my sincere best wishes for another 75 years of expert and dedicated services to each and every Port resident.

Port Washington has much to be proud of in the Atlantic Hook and Ladder Company; and a recent editorial in the July 29 Port Washington News speaks for me and all of us in Congress. I wish to reprint the editorial entitled "Among the Best" below:

AMONG THE BEST

It is a joy to congratulate the Port Washington Fire Department on its 75th anniversary. All our encounters with the wonderful men and women of the department have made us proud of them and grateful to live in a community served and protected by such dedicated and fine people.

Our Fire Department volunteers give freely of their private time to protect our citizens and their property. They do their jobs in a professional and compassionate manner. The fire fighters and the medics

spend extra time to keep their skills up to date.

They do their difficult and often dangerous jobs with care and kindness, working quickly but taking time to reassure and inform.

These generous and courageous men and women are among the best in Port Washington, and our Fire Department is one of which we can all be very proud.

We urge all our neighbors to join the department in its anniversary celebration next week.●

THE NEED FOR REVISION IN THE CURRENT INSANITY LAWS

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, August 9, 1982

● Mr. MAZZOLI. Mr. Speaker, I would like to call to the attention of my colleagues the following article that appeared in the Washington Post on August 3, 1982. The outrageous verdict in this case underscores the immediate need to change the current insanity laws.

The article follows:

[From the Washington Post, Aug. 3, 1982]

60 DAYS FOR WIFE-KILLING

The headline on the wire service story was a mind-boggler: "Educator Gets 60 Days in Wife Killing." *Sixty days?* Surely there must have been some mistake. Sixty days for accumulated parking violations, maybe, or for an especially rowdy, peace-disturbing party . . . but certainly not for "wife-killing." Wrong. The headline was not an editor's error but a true account of a Missouri court's idea of justice.

Ron J. Karraker, the defendant in this case, was chairman of the department of educational psychology at the University of Missouri-Kansas City in 1980 when he picked up a hammer one night and killed his wife. He then had the presence of mind to bundle the body into a car, drive to Lake Jocomo, east of the city, and dump the body into the lake. He was soon arrested and charged with second-degree murder. So far, so good. But Mr. Karraker pleaded not guilty on the grounds that his act had been the product of a mental disease or defect. This is the very broad rule for acquittal by reason of insanity that was abandoned in the District of Columbia 10 years ago. Missouri is one of the few states that still uses this standard.

According to Kansas City prosecutors, Mr. Karraker had no history of mental illness or violence, and no one claimed that he was mentally ill at the time he was brought to court. Nevertheless, five of the six psychiatrists and psychologists who examined him found that he was temporarily suffering from a mental disease at the very time he killed his wife. Fearing that he would be acquitted of second-degree murder on the testimony of these medical experts, the prosecutors chose to accept a plea of guilty of manslaughter instead of proceeding with the trial.

Given the broad nature of Missouri's insanity defense and the fact that manslaughter is punishable by 10 years in prison, it is difficult to question the judgment of the prosecutors at this point. What must have

astounded them, however, was the judge's sentence. Judge Gene R. Martin of the Jackson County Circuit Court suspended the entire jail term except for 60 days and ordered that the defendant then spend the next 22 months teaching inmates of the local jail. One wonders what he will teach.

Judge Martin may believe that his resolution of this case was a practical approach to sentencing. Coming so soon after the controversy over the Hinckley verdict, it is sure to add to public confusion over the standards that are applicable in our criminal courts. Rules governing the insanity defense vary widely among the states, and in some instances it appears that even a threat to raise the defense is a valuable tool in plea bargaining. And judicial discretion in sentencing is broad, so broad that there is often great disparity among sentences handed down by different judges for identical crimes.

Most criminal law experts now support legislation that Congress has been considering for some years that would set mandatory minimum and maximum sentences, within a narrow range, for federal crimes. This Missouri case, where a defendant who pleads guilty to killing his wife with a hammer and hiding her body in a lake gets 60 days in jail, will surely be used as an example of the kind of judicial discretion that confuses the public and can eventually undermine that confidence in the judicial system that is necessary for the preservation of a just and stable society.●

SUPPORT H.R. 5540

HON. ROBERT H. MOLLOHAN

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 9, 1982

● Mr. MOLLOHAN. Mr. Speaker, I would like to call attention to a letter from Gene Bottoms, executive director of the American Vocational Association sent to Members of the House in support of H.R. 5540, the bipartisan Defense Industrial Base Revitalization Act that will soon be on the House floor for debate and vote.

As the letter points out, this important legislation authorizes a specialized skill training program to be operated at the State and local levels to train, retrain, and upgrade skills of workers in critical-shortage categories needed by defense-related industries. Dozens of skill areas are involved—tool and die makers, machinists, drill press operators, laser technicians, millwrights, machine tool operators, various types of mechanics, computer technicians, forging and casting workers, industrial machinery repairmen, et cetera. We must train hundreds of thousands of such types of workers if we are to strengthen our defense industrial base and meet our overall civilian production needs.

Mr. Speaker, other provisions of H.R. 5540 would encourage modernization of industrial plant and equipment of small- and middle-size firms in the defense subcontractor base. It would also provide loans, loan guarantees,

and purchase agreement authority to assist the domestic mining industry develop new sources of critical and strategic materials for our defense requirements. Finally, the measure would assist higher educational institutions in the acquisition of modern scientific and technical equipment that is urgently needed to increase our supply of trained engineers and other scientific and technical personnel that are vitally needed for our national defense effort.

Mr. Speaker, as a cosponsor of H.R. 5540, I urge our colleagues on both sides of the aisle to support this important legislation to amend the Defense Production Act so that critical gaps in the production, training, and materials areas may be closed in time for our defense buildup to be fully effective.

The letter from the American Vocational Association follows:

AMERICAN VOCATIONAL ASSOCIATION,

Arlington, Va., July 22, 1982.

DEAR CONGRESSMAN: H.R. 5540, the bipartisan "Defense Industrial Base Revitalization Act," will soon be on the House floor for debate and vote. This important series of amendments to the Defense Production Act of 1950, as amended, has the full and enthusiastic support of the American Vocational Association and its State and local vocational training affiliates throughout the country.

This legislation authorizes a five-year program (operated at the State and local levels) to train, retrain, and upgrade skills of workers in critical-shortage categories needed by defense-related industries. These critical skill shortages currently exist and will grow—despite record-high unemployment—unless specialized training programs can be brought to bear. Dozens of job categories are involved—tool and die makers, machinists, drill press operators, laser technicians, millwrights, machine tool operators, various types of mechanics, computer technicians, forging and casting workers, industrial machinery repairmen, etc. Hundreds of thousands of such types of workers must be trained, retrained, and their skills upgraded in order to strengthen our defense industrial base and to meet our overall civilian productivity requirements over the coming five years.

H.R. 5540's skill-training program provides a workable method of meeting these critical needs, patterned on the successful skill training programs of World War II that trained some 7.5 million persons for defense jobs in the four-year period. The \$250 million in annual skill-training funds would be distributed on the basis of State Plans including three major criteria—(1) the number of high priority industries located in the State; (2) the categories of skill shortages for which training programs must be developed; and (3) the overall quality of the State Plan to fulfill these objectives.

Some opponents of H.R. 5540 have charged that this defense industrial base skill-training program is just another "CETA program" in disguise. This allegation is totally false. It is NOT a social welfare program: it is NOT a program to replace the established apprenticeship training programs that are operating so successfully in many parts of our industrial complex; nor is it some "blank check" to an-

other big spending program. Instead, it supplements in key advanced skill shortage areas, the vocational training already conducted by private companies for their own workforce requirement, existing vocational education programs, apprenticeship programs, and private training company programs in order to fill the critical defense industrial base training gap that threatens to cripple our defense buildup.

Other provisions of this bi-partisan measure would encourage modernization of the industrial plant and equipment of small- and middle-size firms in the defense subcontractor base. H.R. 5540 would also provide loans, loan guarantees, and purchase agreement authority to assist the domestic mining industry develop new sources of critical and strategic materials for our defense requirements. Finally, the bill would assist higher educational institutions in the acquisition of modern scientific and technical equipment urgently needed to increase our supply of trained engineers and other scientific personnel vital to national defense needs.

We hope that you will support and vote for H.R. 5540 when it comes before the House.

Sincerely yours,

GENE BOTTOMS,
Executive Director.●

END WORLD HUNGER

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, August 9, 1982

● Mr. HALL of Ohio. Mr. Speaker, more people have died of hunger in the last 5 years than have been killed in all of the wars, revolutions, and murders in the past 150 years. This is deplorable considering the fact that international studies show that the resources and technology exist today to end world hunger within the next 20 years. This on-going tragedy can no longer be ignored and must be pursued by all people of the world with a great sense of faith and conviction.

Tomorrow, August 10, teams of Cyclists To End World Hunger will visit Capitol Hill to honor Members of Congress for the support they have received to promote awareness of world hunger and malnourishment. The meeting will be held on the lower terrace of the Capitol at 12:15 p.m.

The Cyclists To End World Hunger learned of recent congressional efforts to end domestic hunger and food waste through the national news coverage given to the "Hunger in the Land of Plenty" luncheon which I co-sponsored along with 14 of my colleagues.

The cyclists, who began from Atlanta, Fort Lauderdale, and Denver have converged in Washington before beginning the final leg of their trip to the United Nations in New York. They have crossed 15 States, met with State and local officials, and have brought

their message about the need to intensify an idea whose time has come.

During this year's trip, the cyclists have compiled a list of over 10,000 signatures from individuals who have aligned themselves with efforts to end hunger, both domestically and worldwide. Over the last 4 years, a total of 2.2 million signatures have been obtained in conjunction with this noble cause.

I urge my colleagues from both the Senate and the House to join me in welcoming the cyclists to Washington at tomorrow's ceremony. ●

**EXPLANATION OF WAMPLER SUBSTITUTE TO THE
FOOD AND AGRICULTURE RECONCILIATION
BILL—H.R. 6892**

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 9, 1982

●**Mr. WAMPLER.** For the information of those interested in what the effect is of the Wampler substitute to the food and agriculture reconciliation bill (H.R. 6892) I am printing the following explanation:

**WAMPLER AMENDMENT IN THE NATURE OF A
SUBSTITUTE TO H.R. 6892**

1. The Wampler Substitute adopts the Committee Bill, H.R. 6892, except that it makes the following changes or additions to title III (most of which were amendments narrowly defeated in Committee):

A. The Secretary of Agriculture is given the authority to require that applicants look for a job at the time they apply for food stamps. The Committee bill gives states an option to require job search at the time of the food stamp application.

B. Definitive guidelines are established for expedited service. Current law requires that persons who say they are in immediate need must receive food stamps within two to three days, with no verification required of the person's income or assets. This amendment sets a gross income test of \$150 (while maintaining current income rules for migrant and seasonal farmworkers); a liquid assets test of \$100; requires verification of these two items, whenever practicable; and, requires that benefits be issued to eligible persons as soon as possible but not later than 5 days after application.

C. States will be required to reduce their error rates to 9% for fiscal year 1983; to 7% for fiscal year 1984; and to 5% for fiscal year 1985 and all succeeding years. States which fail to reduce their error rates will be required to repay to the federal government the value of the benefits issued in error, over these target error rates. The Committee bill requires that a percentage of administrative costs be repaid if error rates are not reduced to specific target levels.

2. The Wampler Substitute will have the savings and corresponding reductions in the authorization "cap" as noted in the attachments as proposed by Congressman Coleman (Ranking Member of the Domestic Marketing, Consumer Relations and Nutrition Subcommittee) and adopted in the Wampler Substitute.

3. Also included in the Wampler Substitute is the amendment sought to section 130

of H.R. 6892 by Chairman Zablocki relating to the donation of dairy products. The technical Committee amendments are also included in the Substitute.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, August 10, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

AUGUST 11

9:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.

3110 Dirksen Building

Office of Technology Assessment

The Board, to meet on pending business items.

EF-100, Capitol

9:30 a.m.

Judiciary

Constitution Subcommittee

To hold hearings on proposed legislation authorizing funds for fiscal year 1983 for the U.S. Commission on Civil Rights.

5110 Dirksen Building

Labor and Human Resources

Labor Subcommittee

To hold hearings on S. 2634, providing for integration of handicapped persons employed in work activity centers and sheltered workshops.

4232 Dirksen Building

10:00 a.m.

Agriculture, Nutrition, and Forestry

Agricultural Research and General Legislation Subcommittee

To hold hearings on S. 2348, providing the Department of Agriculture with greater flexibility in its inspection procedures at food processing plants.

324 Russell Building

Environment and Public Works

Business meeting, to continue consideration of proposed amendments to the Clean Air Act (Public Law 95-95).

4200 Dirksen Building

Judiciary

Security and Terrorism Subcommittee

To resume hearings to review the U.S. Attorney General's guidelines on domestic security investigations (Levi Guidelines).

2228 Dirksen Building

10:30 a.m.

Foreign Relations

Closed briefing on the degree of Soviet economic dependence on the West (United States) and Soviet policy alternatives to use of Western (United States) leverage.

S-116, Capitol

2:00 p.m.

Agriculture, Nutrition, and Forestry

Agricultural Research and General Legislation Subcommittee

To continue hearings on S. 2348, providing the Department of Agriculture with greater flexibility in its inspection procedures at food processing plants.

324 Russell Building

Energy and Natural Resources

Public Lands and Reserved Water Subcommittee

To hold hearings on H.R. 5161, designating certain lands in the Monongahela National Forest, W.Va., as wilderness.

3110 Dirksen Building

Judiciary

To hold hearings on pending nominations.

2228 Dirksen Building

AUGUST 12

9:30 a.m.

Commerce, Science, and Transportation

To hold hearings on S. 2792 and S. 2794, bills establishing a Federal fund from revenues derived from oil and gas leases on the Outer Continental Shelf to provide block grants to certain States and territories for ocean and coastal energy impact assistance and resource management.

235 Russell Building

Finance

To hear and consider the nominations of Mary Ann Cohen, of California, Lapsley W. Hamblen, Jr., of Virginia, and James H. Stamper, of Missouri, each to be a judge of the U.S. Tax Court.
2221 Dirksen Building

Judiciary

Regulatory Reform Subcommittee

To hold joint hearings with the Committee on Small Business Subcommittee on Government Regulation and Paperwork on the implementation of the Regulatory Flexibility Act (Public Law 96-354), and S. 2170, requiring a Federal agency to prepare a regulatory flexibility analysis whenever the agency publishes a general notice of proposed rulemaking or a final rule.
2228 Dirksen Building

Judiciary

Juvenile Justice Subcommittee

To hold hearings on State and local law enforcement efforts to reduce criminal case backlog.
457 Russell Building

Small Business

Government Regulation and Paperwork Subcommittee

To hold joint hearings with the Committee on the Judiciary's Subcommittee on Regulatory Reform on the implementation of the Regulatory Flexibility Act (Public Law 96-354), and S. 2170, requiring a Federal agency to prepare a regulatory flexibility analysis whenever the agency publishes a general notice of proposed rulemaking or a final rule.
2228 Dirksen Building

10:00 a.m.

Energy and Natural Resources

To hold hearings on the nominations of Milton M. Masson, Jr., of Arizona, and John B. Carter, Jr., of Texas, each to be a member of the Board of Directors of the U.S. Synthetic Fuels Corporation, and Oliver G. Richard III, of Louisiana, to be a member of the Federal Energy Regulatory Commission.
3110 Dirksen Building

Foreign Relations

To hold hearings on U.S. economic policy toward the Soviet Union.
4221 Dirksen Building

Labor and Human Resources

Education, Arts and Humanities Subcommittee

To hold oversight hearings on the Student Loan Marketing Association (Sallie Mae).
4232 Dirksen Building

Select on Intelligence

Closed business meeting, to discuss general intelligence matters.
224 Russell Building

2:00 p.m.

Energy and Natural Resources

Public Lands and Reserved Water Subcommittee

To hold hearings on S. 2186, providing for the Secretary of the Interior to acquire from the State of Indiana certain lands by exchange at the Indiana Dunes National Lakeshore, and S. 2710, establishing a wilderness area in the Hoosier National Forest area, Ind.
3110 Dirksen Building

Judiciary

Security and Terrorism Subcommittee

To continue hearings to review the U.S. Attorney General's guidelines on domestic security investigations (Levi Guidelines).
2228 Dirksen Building

2:30 p.m.

Foreign Relations

To hold hearings on the nomination of Charles W. Greenleaf, Jr., of Virginia, to be an Assistant Administrator of the Agency for International Development.
4221 Dirksen Building

AUGUST 13

9:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.
3110 Dirksen Building

10:00 a.m.

Labor and Human Resources

Handicapped Subcommittee

To resume hearings to review proposed regulations implementing part B (assistance for education for all handicapped children), of the Education for All Handicapped Children Act (Public Law 94-142).
4232 Dirksen Building

10:30 a.m.

Foreign Relations

To continue hearings on U.S. economic policy toward the Soviet Union.
4221 Dirksen Building

AUGUST 16

9:00 a.m.

Energy and Natural Resources

Public Lands and Reserved Water Subcommittee

To hold hearings on S. 2818 and S. 2805, bills providing for an adjustment in the termination, extension, or modification of certain contracts for the sale of timber from National Forest System lands and public lands.
3110 Dirksen Building

10:30 a.m.

Judiciary

To hold hearings on S. 2784, clarifying the intent of antitrust laws relating to the relocation of member clubs of professional sports leagues.
2228 Dirksen Building

AUGUST 17

10:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.
3110 Dirksen Building

Governmental Affairs

To resume hearings on S. 2562, transferring certain activities of the Department of Energy to the Department of Commerce.
3302 Dirksen Building

2:00 p.m.

Energy and Natural Resources

Public Lands and Reserved Water Subcommittee

To continue hearings on S. 2818 and S. 2805, bills providing for an adjustment in the termination, extension, or modification of certain contracts for the sale of timber from National Forest System lands and public lands.
3110 Dirksen Building

AUGUST 18

9:30 a.m.

Labor and Human Resources

Labor Subcommittee

To hold hearings on S. 2617, abolishing mandatory retirement and other forms of age discrimination in employment.
4232 Dirksen Building

10:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.
3110 Dirksen Building

Environment and Public Works

Transportation Subcommittee

To resume hearings on highway revenue and cost allocation issues.
4200 Dirksen Building

Governmental Affairs

To continue hearings on S. 2562, transferring certain activities of the Department of Energy to the Department of Commerce.
3302 Dirksen Building

Judiciary

To resume hearings on S.J. Res. 199, proposing a Constitutional amendment providing for voluntary prayer in public schools and certain institutions.
2228 Dirksen Building

Select on Intelligence

Closed briefing on intelligence matters.
224 Russell Building

2:00 p.m.

Energy and Natural Resources

Public Lands and Reserved Water Subcommittee

To hold hearings on S. 2118, designating certain lands in Wyoming as wilderness.
3110 Dirksen Building

AUGUST 19

9:30 a.m.

Labor and Human Resources

To resume consideration of proposed legislation establishing a program to increase the availability to the American public of information on the health consequences of smoking and thereby improve informed choice.
4232 Dirksen Building

10:00 a.m.

Energy and Natural Resources

Business meeting, to consider pending calendar business.
3110 Dirksen Building

Governmental Affairs

To hold hearings on S. 2629, proposed Budget Reform Act, establishing a 2-year Federal budget cycle.
3302 Dirksen Building

10:30 a.m.

Veterans Affairs

Business meeting, to mark up S. 2378, amendment No. 1909 to S. 2378, S. 1956, S. 2460, S. 2461, S. 2048, S. 2381, S. 2382, S. 2709, S. 2388, measures increasing the rates of disability compensation for disabled veterans, increasing the rates of dependency and indemnity compensation for surviving spouses and children of veterans, discontinuing duplicative payments to certain veterans, increasing the level of disability required for the payment of dependent allowances, and providing for cost-saving improvements in veterans' programs, S. 2747, and amendment No. 1984 to S. 2747, measures improving certain aspects of the Veterans' Administration educational benefits programs and the Department of Labor veterans' employment programs.

(Legislative day of Monday, July 12, 1982)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable SLADE GORTON, a Senator from the State of Washington.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

There is a way which seemeth right unto a man, but the end thereof are the ways of death.—Proverbs 14: 12.

** * * wide is the gate, and broad is the way, that leadeth to destruction, * * * strait is the gate, and narrow is the way, which leadeth unto life, * * *—Matthew 7: 13, 14.*

God of truth and light and order, lead us. Thy way is the way of truth. Help us to seek Thy truth. Thy way is the way of light. Help us to seek Thy light. Thy way is the way of order. Help us to seek Thy order. Save us from the way of error, darkness and chaos.

In Thy will is reality—outside Thy will is unreality and illusion. May we choose Thy will for ourselves, our colleagues and peers, our associates and staffs, for all who serve here, and for our families.

Grant to the Senate in the closing weeks of this Congress the way that will lead the people in righteousness and justice. In His name Who is the Way, the Truth and the Life. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 10, 1982.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable SLADE GORTON, a Senator from the State of Washington, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. GORTON thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. STEVENS. Mr. President, regarding the schedule of the Senate for today. I can only reiterate the statement that was made by the majority leader on yesterday that Members of the Senate should be on notice that we may have a late night any night between now until we recess on either August 20 or August 27.

The majority leader has also stated that if we are to recess at the same time as the House on August 20, we must consider priority legislation including the supplemental appropriations bill, the immigration bill, the debt ceiling bill, and available conference reports.

The majority leader later today will, make a statement as to how long he intends to keep the Senate in session tonight. It is the intention and hope of the leadership to finish the supplemental appropriations bill before recessing for the day. We will have to see whether that can be done.

On behalf of the majority, I again request that Members who have amendments to offer to this bill come to the floor as soon as possible and inform the leadership on both sides of the aisle whether such amendments will be offered today.

We are delighted with the work of the Appropriations Committee under the leadership of the chairman, the distinguished Senator from Oregon (Mr. HATFIELD). He did accelerate the work of the Appropriations Committee in getting this bill to the Senate, and we are hopeful that the Senate itself will carry on that approach and expedite the consideration of this bill today. Completions of this bill today will have a great deal to do with whether or not we can keep the schedule in an attempt to recess on August 20.

I reserve the remainder of our time.

LABOR DAY RECESS ANNOUNCEMENT

Mr. BAKER. Mr. President, yesterday, I took the opportunity to remind Senators that the dates for the upcoming Labor Day recess are from the close of business on Friday, August 27, until Wednesday, September 8. I also indicated, as I have several times before, that should the Senate dispense with its much publicized "must list" before August 20, it would then be possible for the Senate's recess to parallel that of the House of Representatives which begins on August 20.

Today, I would like to share with my colleagues one of my 18 reasons for the Senate to recess on August 20. Reason No. 7: August is a sticky, humid, miserable month. Cars overheat, tempers flare, air-conditioners break. The only way to deal with it, is to spend as much time as possible in one's home State, with one's family and friends. An extra week of legislative aggravation instead of an extra week of liberty seems almost too unnecessary; but then again, the whole schedule is in our hands, and we will not have to look too far to place the blame.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield the remainder of my time to Mr. CHILES if he should need it.

RECOGNITION OF SENATOR CHILES

The ACTING PRESIDENT pro tempore. The Senator from Florida is recognized.

THE CRIME CONTROL ACT OF 1982, TITLE IV—HABEAS CORPUS REFORM

Mr. CHILES. Mr. President, for 2½ months now, Senator NUNN and I have been coming to the floor of the Senate every day to speak out on crime, and on the need for the Senate to move promptly to pass anticrime legislation. We are encouraged by the fact that the Senate has reached a time agreement that will govern the consideration of a package of anticrime proposals, S. 2572. If we move to pass that proposal, and get it over to the House

of Representatives, we stand a chance of taking a strong step to fight crime this year.

But passage of this proposal, important as it is, will not address one of the most important shortcomings in today's criminal justice system. And it is that shortcoming, the abuse of the writ of habeas corpus, that Senator NUNN and I have focused on over the last month. It is essential, as far as I am concerned, that we eliminate from the present habeas corpus statute, those provisions which have enabled prisoners to abuse the purpose of the writ of habeas corpus. We can act to make this much needed change by passing any one of several habeas corpus proposals, S. 653, last year. Early this year, the administration sent its own version of habeas corpus reforms to the Congress, in S. 2216. Finally, this May, Senator NUNN and I included the provisions of S. 653 in title 4 of S. 2543, the anticrime proposal which we introduced. S. 2543 is currently pending on the Senate Calendar, and the Senate Judiciary Committee had held 2 days of hearings on habeas corpus reform proposals. There is no reason for us not to act on this important reform.

Mr. President, those persons who are directly involved in representing the public's interest in our criminal justice system—our police officers and our district attorneys—have come out in support of the need for habeas corpus reform. They understand all too well the frustration that occurs when a State prisoner is able to use habeas corpus to challenge State court convictions years after the original trial took place, and on the grounds that have nothing to do with guilt, innocence, or a fair trial. When habeas petitions are filed years, or even decades, after the person has been convicted, the State is invariably unfairly prejudiced in its ability to respond. Evidence may have disappeared, and key witnesses may no longer be available. Moreover, our prosecutors must spend their time trying to reconstruct events which occurred years earlier, instead of focusing on current cases. The result is even more delays and backlogs in our already overcrowded criminal justice system.

It is therefore no surprise that our law enforcement officials feel so strongly about the need for habeas reform. Just last week, I received a letter of support for our efforts to reform the habeas laws from the National District Attorneys Association. Enclosed in that letter was a resolution which the National District Attorneys Association just adopted. I would like to read that resolution:

Whereas the greatest single deterrent to crime is swift and sure punishment, and

Whereas public confidence in the criminal justice system is seriously eroded by a perception that the law allows an unnecessary

and endless stream of attacks by defendants in their conviction, and

Whereas the virtually unrestricted access of convicted persons to Federal court on the filing of writs of habeas corpus is a serious impediment to the finality of judgments and unnecessarily consumes scarce judicial resources: Now, therefore, be it

Resolved, That the National District Attorneys Association urges the Congress to act expeditiously to address the problems caused by excessive use of habeas corpus and further urges the Congress to support Senate bill 653 toward that end.

Last week, I also received a letter of support for our anticrime efforts from the International Association of Chiefs of Police. They underscored their support for crime-fighting legislation in general, and they also pointed out the need to include habeas corpus reform in any criminal justice overhaul. Their letter said, and I quote:

The habeas corpus provision of S. 2543 would be a great benefit to our judicial system. Countless writs which are often frivolous are filed throughout the United States creating much unnecessary litigation and costing millions of dollars in court costs and man-hours. Reasonable limitations such as those contained in S. 2543 would greatly ease this problem.

Mr. President, those who we ask to fight crime understand all too well the shortcomings in today's system which allow the guilty to go free, and which destroy the notion of finality in our criminal justice system. We can make the reforms which need to be made, and show our law enforcement officials that we in Congress are committed to giving them our full support in their all important fight to make our neighborhoods safe once again. We can do that, Mr. President, but only if we act soon and pass the anticrime package and to move on habeas corpus reform. Time is running short, and no issue is more important for us to deal with.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered.

TRIBUTE TO THE BESSEMER RESERVE MARINES

Mr. HEFLIN. Mr. President, as the senior Senator from the great State of Alabama, I quite naturally feel that my State has a great deal to be proud of. In fact, from time to time I will stand here and extol the virtues of people or organizations who have been recognized for excellence in a particular field.

Today, however, my pride in my home State is doubly strong, for the people I rise in recognition of are not only from Alabama but represent a group for which, as a former member, I feel a close personal affinity—the U.S. Marine Corps.

The particular group, made up of more than 400 marines, is the Reserve Marine Unit of Bessemer, Ala. The Bessemer Marines were recently singled out by the Reserve Officers Association, in a competition with more than 170 other Reserve Marine outfits across the country. This honor brought them the prestigious Harry Schmidt Trophy as this year's outstanding Reserve Fleet Marine Force and Mobile Expedition Force.

Although many persons may not even realize that such things as Reserve Marines exist, they form an important part of our armed services. These marines always operate under the assumption that they could be called out at any moment. The Bessemer Battalion remains prepared to be airlifted to any remote corner of the world within 24 hours, should such a need arise.

In case of such situations, the Bessemer Battalion, and all Reserve Marines, are constantly training and learning and working to stay prepared. They work with tank guns, and M-16 rifles. They take classes in advanced warfare tactics, and have extensive conventional warfare training.

The Bessemer Marines have stayed well prepared, as is evidenced by the honor they recently achieved. These people are a group for all Alabamians to be proud of, and I heartily congratulate them.

Mr. President, I ask unanimous consent that an article from the Birmingham News about the Bessemer Reserve Marines be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Birmingham News, July 15, 1982]
BESSEMER MARINES CHOSEN AS BEST OUT OF 170 UNITS

(By Norman Atkins)

If enemy troops ever tried to invade Birmingham, combat-ready Reserve Marines from Bessemer would draw a line in the dirt and tell them to cross it at their own peril.

And the city could find no better Reserve battalion in America to defend it, according to the national Reserve Officers Association.

The ROA has singled out the Bessemer battalion over 170 other Reserve outfits across the country for the prestigious Harry Schmidt Trophy as this year's outstanding reserve Fleet Marine Force and Mobile Expedition Force.

"Ninety-nine percent of the people in the area don't even realize the Marines are right here in Bessemer," says Sgt. R. L. Bailey, 24.

"When somebody sees me in uniform, he'll say, 'What, are you a recruiter or something?' I tell him I'm with the Marines, and

then he wants to know, "What in the dickens are Marines doing in Bessemer?"

But there they train, at 1001 Fourth Ave. SW, in and around a two-year old center they share with the Navy.

A row of green-and-black camouflaged trucks and jeeps are lined up outside the training center. Behind them crouch four heavily armed tanks. "These pack a pretty mean wallop," Bailey jokes.

The tanks, equipped to fire conventional or nuclear warheads and so well insulated that those inside would be sheltered from atomic fall-out, "are filled with fuel and ready to roll," he adds.

"We operate under the assumption that we could be called out at any moment, and we're always preparing for it should that time come."

The Bessemer battalion can dash, via airlift, to any place in the world within 24 hours, and is prepared to stay a while if necessary, Bailey says.

"This unit is just as good or better than any I've been with in World War II or the Korean conflict," says Sgt. Major William Ballard, 54 one of the oldest in the battalion. "We're prepared to go anywhere—and I fully trust them, too."

The last time a Birmingham Reserve Marine unit had to fight was during the Korean War.

In the next two decades, the Bessemer battalion's members trained people for Vietnam and took charge of all Marine Corps funeral duty in Alabama.

Today, they train, and train. And then they train some more.

One weekend a month, they gather in Bessemer to hone skills on the big tank guns and the M-16 rifles they all carry.

They take classes in everything from the latest chemical-biological warfare tactics to alcohol and drug abuse.

"No matter what rank you are, they always have new stuff for you to learn," Bailey says.

Bailey says that every Reserve Marine in Bessemer is trained in nuclear warfare.

But their extensive conventional warfare training is crucial, he adds.

"You can make a country glow, but you have to have troops to keep the land," he explains.

This week, one of the Birmingham outfits is practicing landing tactics and field duty at the Landing Force Training Center in California.

Another unit will work on its shooting abilities at Fort Bliss, Texas in the fall.

The Reserve Marines serve six-year hitch-es.

They prepare themselves to be ready in case of war, standing ready to take the place of fallen active-duty Marines.

But now that the Bessemer outfit is known as a top-flight battalion, it could draw a tough and important assignment should a critical situation arise, Bailey says.

People join the Marine Reserve for a number of reasons:

College students have a special incentive to sign up because the Corps pays up to \$1,000 a year toward their education, Bailey explains. This is why a number of Bessemer Reserve Marines are full-time students at the University of Alabama Birmingham.

Reservists are entitled to military pensions, says Ballard, who will be drawing such a pension in six years.

"More than anything else, it's a family thing," says Ballard, whose oldest son played taps for all Marine funerals in Alabama several years ago.

After active duty, "you get a feeling you belong in the Marines," says Sgt. John Felton, 34, who heads one of the two Bessemer units. "A lot of my men were in Vietnam, and know what can happen."

"I don't like fighting, but somebody's got to be ready to defend our country in a time of war," says Bailey. "There is a matter of duty and patriotism involved for sure."

Some gun-and-war "freaks" join up, but "we don't have many crazies like that in our unit," Bailey says.

Most of the reservists are between the ages of 18 and 24.

More than half are black, although 15 or 20 years ago the unit was predominantly white.

Only one woman belongs to the Bessemer battalion, which is the headquarters for four units, one in Illinois, one in Chattanooga and the two in Bessemer.

Overall, the battalion has more than 400 Marines, making it one of the largest in the country.

"It's easy to train a unit of 25 and keep them in line," says Felton. "But with a larger one, it starts to get difficult."

"This is the best Marine battalion in the country, though, and I mean Reserve or active. We do as much in a weekend as an active unit does in a month."

When there is no war for the reservist Marines to keep their minds on, they focus in on other goals—like the Schmidt prize, Felton says.

He points out that no Marine battalion has won the prize two years in a row, "but we aim to be the first."

FRANK E. MCGOUGH, SR.

Mr. HEFLIN. Mr. President, it is with great sadness and loss that I note the death of Frank E. McGough, Sr., of Montgomery, Ala. The loss of Frank will be felt by all in the Montgomery community, and his friendship and dedication to community affairs will be missed by all.

Through his life, Frank demonstrated an active commitment to civic affairs in Montgomery and the State of Alabama. Frank graduated from Lanier High School in 1937 and subsequently attended the University of Alabama. Frank left the University of Alabama to serve our Nation in the U.S. Air Force during World War II. Subsequently, Frank played an active role in the alumni affairs of the University of Alabama. He served as vice president of the university's National Alumni Association and as president of the Montgomery County branch for this alumni association. In addition, he served in the president's cabinet of the University of Alabama with honor and distinction.

Throughout his life, Frank demonstrated an intense and active commitment to the Montgomery community through his service in civic affairs. Frank served as president of the Montgomery YMCA, the Blue Gray Association, and the Lions Club of Montgomery. In 1969, he was bestowed the YMCA's most distinctive honor when he was selected "Man of the Year." Frank was also a member

of the Men of Montgomery and he formerly served as director of the Montgomery Area Chamber of Commerce. In addition, Frank served on the board of commissioners of the Montgomery Housing Authority from 1964 to 1971. During his service with the housing authority he was selected to serve as chairman. His outstanding guidance and leadership on the Montgomery Housing Authority will serve the Montgomery community in the years ahead.

Frank enjoyed tremendous success as he served as president of a Montgomery automobile dealership. He was highly respected for his commitment to the success of the automobile industry. His dedication to this industry is evidence by his service on the Chevrolet Dealer Factory Council and the General Motors President's Dealer Advisory Council. In addition, Frank was highly respected by the automobile industry throughout Alabama for his superior service as director of the Alabama Automobile Driver's Association. In addition, the tremendous service Frank rendered to the automobile industry, he also served as chairman of the board of First Southern Savings & Loan and was a member of the board of directors of the Alabama National Bank. His outstanding service and dedication to these entities will be missed.

Frank E. McGough, Sr., was a compassionate American with an impeccable history of dedication and service to his community, to his church, to his profession, to his university, and to his family. I wish to extend my sincerest sympathies to Frank's wife, Sidney McMillan; to his mother, Mrs. Elizabeth McGough; his two sons, Frank E. McGough, Jr., and John Van McGough, and to his brother, Thomas McGough III.

JUSTICE STEVENS' SPEECH TO THE AMERICAN JUDICATURE SOCIETY

Mr. HEFLIN. Mr. President, I am sure we have all read of the remarks Justice John Paul Stevens made on August 6, 1982 on the subject of the problems of the U.S. Supreme Court.

I take this opportunity to commend Justice Stevens for drawing attention to the problems facing the Supreme Court in its efforts to meet its constitutional responsibilities. His thoughtful remarks to the American Judicature Society focus on areas that have long been my concern, and the concern of the entire judicial community. It is no secret to the courts, to Congress, or to the American people, that the continued existence of our individual liberties and right to self-government depend on the strength of our judicial system.

One hundred and ninety-three years ago, the Federal court system was established and still exists today with only a few significant structural changes. The most important change came in 1891, when nine circuits of the U.S. courts of appeals were established to assist the U.S. Supreme Court, which then had a docket of 492 cases, in its reviewing function. In 1892, the year following this relief measure, the U.S. Supreme Court decided 275 cases, and a large number of those were summarily determined. I think it is quite significant to remember that number—275 cases.

The Supreme Court was also granted the power to exercise discretion over the review of certain cases. These reforms helped to reduce the number of cases docketed in the Supreme Court and resulted in a more effective and efficient administration of justice.

From that time on, however, the number of cases on the Supreme Court's docket has increased steadily. In its 1951 term, the Supreme Court had 1,353 cases on its dockets. It decided approximately 275 cases—the same number in its 1892 term. In the 1961 term, the number of cases on the docket had increased to 2,570, and again the number of cases actually decided was approximately 275. In the 1981 term, which was completed a year ago, the figures show that the docket had swelled to 3,814. Also during the 1981 term, the Supreme Court received 4,242 petitions for writs of certiorari. It granted 289, less than 7 percent. The 289 is approximately the 275 cases that I have been speaking about since 1890. Of the 289 cases granted, 107 were summarily decided and only 182 were scheduled for oral argument. Note that almost every year the number of cases decided is approximately 275. Clearly, more than 6 or 7 percent of the cases filed deserved to be heard, but our highest Court has little choice.

There appears to be no sign of a tapering off or decline in the volume of judicial business. Thus, it is recognized that the existing judicial structure is not designed to handle this increased docket load.

The major response thus far has been the addition of personnel, but this has not solved the problem of maintaining a nationally uniform body of Federal law, or of handling the increased volume of litigation adequately. Thus, the solution lies in restructuring the judiciary at the appellate level.

During the 1970's, there were two important and influential studies conducted which recommend the creation of a National Court of Appeals in order to provide relief to the Supreme Court.

In 1971, the Chief Justice of the United States, Warren Burger, appointed a seven-member study group

on the caseload of the Supreme Court. This group, headed by Prof. Paul A. Freund of Harvard Law School studied the problems confronting the Court, explored alternatives, and in December 1972 submitted its recommendations that Congress establish a seven-member National Court of Appeals.

As conceived by the Freund study, the National Court of Appeals would screen all petitions for review filed with the Supreme Court. Several hundred of the most important cases would be certified to the Supreme Court for further screening and the Supreme Court would select from this group the cases it wished to hear.

Under the Freund plan, the National Court of Appeals could deny review and no appeal would lie from its refusal to allow review. Also, cases of real conflict between appellate tribunals on important issues would be certified to the Supreme Court, and the National Court of Appeals would hear cases of lesser importance involving conflicts between circuits.

The second study was conducted beginning in 1973 by the Commission on Revision of the Federal Court Appellate System, called the Hruska Commission after its Chairman, Senator Roman Hruska of Nebraska. This Commission was mandated by statute to study the structure and internal procedures of the U.S. circuit courts of appeals system.

In June 1975 the Hruska Commission issued its report in which it recommended the creation of a National Court of Appeals, although one substantially different from the one recommended by the Freund group.

As proposed by the Hruska Commission, the National Court of Appeals would not screen cases for the Supreme Court. Jurisdiction of the new court would extend to two classes of cases: First, those referred to it by the Supreme Court, and second, those transferred to it by one of the U.S. courts of appeals, Courts of Claims, Courts of Customs and Patent Appeals.

Under the Hruska plan, the seven judges of the new court would be appointed by the President subject to confirmation by the Senate.

During the 94th Congress, Senator Hruska introduced a revised version of his original bill for the creation of a new court. His new bill eliminated transfer jurisdiction of the National Court of Appeals and allowed a phase-in appointment of judges by the President over an 8-year period.

During my relatively short time in the Senate, I have introduced, and been a vocal supporter of, legislation to establish a National Court of Appeals. Not only Justice Stevens, but numerous other judges and judicial scholars have pointed out the crucial importance of providing badly needed

and long-overdue assistance to the Supreme Court.

I firmly believe that justice is the guardian of all liberty, and that we, here in the Senate, the greatest deliberative body in the world, have a responsibility to insure an effective, efficient system of justice.

The ever-increasing number of cases demanding attention coupled with the Supreme Court's capacity for handling cases dictates that a smaller and smaller percentage of cases can be reviewed by the Court. Something must be done if the judiciary is to continue to fulfill its constitutional duty to the citizens of this country. The very future of the effective administration of justice is uncertain unless Congress seeks resolutions and assesses alternatives now.

It was in this spirit that I offered two separate pieces of legislation to create a National Court of Appeals, S. 1529 and S. 2035.

These two bills provide for the same jurisdiction of cases referred to it by the Supreme Court, including cases which the Supreme Court, first, directs the National Court of Appeals to decide and, second, transfers to the National Court of Appeals for such court to determine whether or not to grant certiorari. Under either bill the National Court of Appeals may deny review in any case referred to it by the Supreme Court unless directed by the Supreme Court to decide the case. Unless modified or overruled by the Supreme Court the decisions of the National Court of Appeals shall be binding on all courts of the United States and with respect to questions arising under the Constitution, laws, or treaties of the United States on all other courts.

These bills have differences. S. 1529 would be a full-time court composed of a chief judge and eight associate judges. S. 2035 would have only one full-time member of the court, who would be called the Chancellor of the United States; the other judges of the court would come temporarily from the circuit courts of appeal and would serve on a percase basis. S. 2035 would also use senior circuit judges under the age of 70.

The Chancellor of the United States would assist the Chief Justice of the United States in his many time-consuming administrative matters and nonjudicial functions.

In addition the Chancellor would serve as the administrative judge of the National Court of Appeals and could sit as the presiding judge on occasions. S. 2035 would have a pool of 21 judges and members, on a case-by-case basis, would be determined by lot drawing; however, no circuit judge could sit on a case from his particular circuit.

Another pending proposal calls for the same jurisdiction of S. 1529 and

S. 2035, but would provide members from an intercourt panel of judges from the existing courts of appeals. This temporary interpanel would be composed of between 14 and 22 judges, and members would serve on a temporary case-by-case basis.

In his remarks, Justice Stevens said that he favors creation of a different type of new court—a type of entrance court, rather than the exit court which my legislation proposes. With such a creation, the Supreme Court would surrender to this new court its power to decide what cases the Supreme Court should decide on the merits. As he noted, this proposal is very similar to that made by the Freund Commission, which I discussed earlier.

Justice Stevens makes some very cogent and persuasive arguments in support of this type of new court, and I will not take the time here to repeat them, but will merely recommend them for your perusal. Mr. President, I ask unanimous consent that the remarks of Mr. Justice Stevens be inserted in the RECORD after my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. HEFLIN. I do not intend to say that my proposals would be any more or any less effective or desirable than the type put forth by Justice Stevens. I will, however, most emphatically repeat my prior sentiment: the very future of effective administration of justice is uncertain unless Congress seeks resolutions and assesses alternatives now. The time to act is now.

We must study the current and future problems which face our court system. Uniformity and clarity must be restored to the Federal law and the Supreme Court must be given relief from its burdens. As caseloads multiply, as appeals increase, as legal fees mushroom, as time for resolving litigation lengthens, our inaction is unacceptable. We should heed the admonition of Learned Hand, who wrote:

If we are to keep our democracy, there must be one commandment: Thou shalt not ration justice.

Thank you, Mr. President.

EXHIBIT 1

ANNUAL BANQUET OF THE AMERICAN JUDICATURE SOCIETY

(By Justice John Paul Stevens)

During my exceptionally long tenure as the junior justice on the Supreme Court of the United States, I was frequently asked to compare the work on that Court with the work on the Court of Appeals for the Seventh Circuit on which I sat for five years. My answer to that question always made the point that I was much more conscious of the similarities between the two courts than of their differences.

During my brief tenure as one of the eight senior justices on the Court, I have frequently been asked to compare the work on an integrated court with the work on a segregated court. My answer to that question

has usually made two points. First, my initial concern that the quality of communication during our conferences might be impaired has proved unfounded; for during the 1981 term the task of the doorkeeper was performed with the same high degree of skill and dedication that characterized that office during the preceding six Terms. Second, although every retirement and every new appointment produces a different Court than its predecessor, the similarities between the Court on which Justice Stewart sat and the Court on which Justice O'Connor sits far outweigh their differences.

My belief that the common characteristics of the work of judges in a free society are far more significant than their differences has persuaded me that it may be worthwhile to share with you some of my concerns about the way the Supreme Court is presently discharging one of its judicial responsibilities. A frank discussion of our problems may identify some pitfalls that all of us should try to avoid and may uncover some possible solutions that merit further study.

The Supreme Court is now processing more litigation than ever before. The Court is granting more petitions for certiorari; litigants whose petitions are granted next fall may have to wait a full year before their cases are argued. The Court is issuing more pages of written material; opinions for the Court are longer and more numerous and separate opinions are becoming the norm instead of the exception. The Court is deciding more cases on the merits without the benefit of full briefing and argument, using the currently fashionable technique of explaining its reasons in a "Per Curiam" opinion—a document generally written for the Court by an anonymous member of its ever increasing administrative staff. More and more frequently, after a case has been fully argued, the Court finds it appropriate to dismiss the writ of certiorari without making any decision on the merits because it belatedly learns that certiorari was improvidently granted. As is true in so many courts throughout the country, the heavy flow of litigation is having a more serious impact on the administration of justice than is generally recognized.

Some of the consequences of this increased flow are predictable and have already begun to manifest themselves. The problem of delay—which is not yet serious—in a few years will be a matter of national concern. Of even greater importance, however, is what may happen within the Court itself. For when a court is overworked, the judges inevitably will concentrate their principal attention on the most important business at hand. Matters of secondary importance tend to be put to one side for further study or to be delegated to staff assistants for special consideration. Two examples illustrate this point.

At the beginning of our last Term, after the Court had processed the list of certiorari petitions that had been filed during the summer recess—if my memory serves me correctly there were about a thousand cases on that list—we agreed that it was essential that we confront the question whether the Court should either support legislation that would increase the appellate capacity of the federal judicial system or try to develop new internal procedures that would ameliorate the impact of the case volume on our own work. As the Term developed, however, and we became more and more deeply involved in the merits of a series of difficult cases, our initial recognition of the overriding im-

portance of evaluating our own workload problems—and the desirability of scheduling conferences devoted exclusively to that subject matter—gradually dissipated and no such conference was ever held. We were too busy to decide whether there was anything we could do about the problem of being too busy.

Reviewing approximately 100 certiorari petitions each week and deciding which to grant and which to deny is important work. But it is less important work than studying and actually deciding the merits of cases that have already been accepted for review and writing opinions explaining those decisions. Because there simply is not enough time available to do the more important work with the care it requires and also to read all the certiorari petitions that are filed, I have found it necessary to delegate a great deal of responsibility in the review of certiorari petitions to my law clerks. They examine them all and select a small minority that they believe I should read myself. As a result, I do not even look at the papers in over 80 percent of the cases that are filed. I cannot describe the practice of any of my colleagues, but when I compare the quality of their collective efforts at managing the certiorari docket with the high quality of their work on argued cases, I readily conclude that they also must be treating the processing of certiorari petitions as a form of second-class work. My observation of that process during the past seven Terms has convinced me that the Court does a poor job of exercising its discretionary power over certiorari petitions. Because we are too busy to give the certiorari docket the attention it deserves, we grant many more cases than we should, thereby making our management problem even more unmanageable.

At this point I should make clear that I am expressing only my own opinion—an opinion that perhaps none of my colleagues share. Indeed, some of them believe we should be taking many more cases and that our overflow should be decided by a newly created National Court of Appeals. Under that view, the aggregate lawmaking capacity of the federal judiciary would be enlarged. There would be a significant increase in the number of federal adjudications binding on courts throughout the nation. Moreover, under that view, the management functions performed by the Supreme Court would require a relatively greater portion of the justices' total time. For the Justices would not only decide what cases are important enough to justify decision on the merits at a national level, but they would also decide which of the two courts with nationwide jurisdiction should hear those cases. In other words, they would be managing the docket of two courts instead of just one. The increased national capacity would also make it more difficult for us to resist the temptation to review every case in which we believe the court below has committed an error. Like a new four-lane highway that temporarily relieves traffic congestion, a new national court would also attract greater and greater traffic volumes and create unforeseen traffic problems. In my opinion it would be unfortunate if the function of the Supreme Court of the United States should become one of primarily—or even largely—correcting errors committed by other courts. It is far better to allow the state supreme courts and federal courts of appeals to have the final say on almost all litigation than to embark on the hopeless task of attempting to correct every judicial error that can be found.

In my opinion, the Court and the nation would be better served by reexamining the doctrine of judicial restraint and by applying its teachings to the problems that confront us. The doctrine of judicial restraint is often misunderstood. It is not a doctrine that relates to the merits of judicial decisions; it is a doctrine that focuses on the process of making judicial decisions. It is a doctrine that teaches judges to ask themselves whether, and if so when, they should decide the merits of questions that litigants press upon them. It is not a doctrine that denies the judiciary any lawmaking power—our common law heritage and the repeated need to add new stitches in the open fabric of our statutory and constitutional law forecloses the suggestion that judges never make law—but the doctrine of judicial restraint, as explained for example in Justice Brandeis' separate opinion in *Ashwander v. Tennessee Valley Authority*, teaches judges to avoid unnecessary lawmaking. When it is necessary to announce a new proposition of law in order to decide an actual case or controversy between adversary litigants, a court has a duty to exercise its lawmaking power. But when no such necessity is present, in my opinion there is an equally strong duty to avoid unnecessary lawmaking.

The fact that the Court is granting a larger number of certiorari petitions than ever before raises the question whether it is engaging in unnecessary lawmaking. The answer to that question is suggested by a few examples of the way the Court has exercised its discretionary jurisdiction in recent years. For both in deciding when to review novel questions and in deciding what questions need review, the Court often exhibits an unfortunate lack of judicial restraint. Thus, the various opinions in our recent case involving a school library plainly disclose that the Court granted certiorari at an interlocutory stage of a case in which further proceedings in the trial court would either have clarified the constitutional issue or perhaps have mooted the entire case. Similar considerations in the case involving a court clerk's claim of immunity prompted the Court to dismiss the writ as improvidently granted. The Court's timing in these cases demonstrates that patience is both a virtue and a characteristic of judgment that judges sometimes forget.

In other cases the Court has displayed a surprising unwillingness to allow other courts to make the final decision in cases that are binding in only a limited geographical area and in which no conflict exists. Thus, in *Watt v. Alaska*, apart from the possibility that error had been committed, there was no reason for our Court to involve itself in a dispute between the State of Alaska and one of its counties over the division of mineral leasing revenues that could only arise in the Ninth Circuit. In *Oregon v. Kennedy*, the Court elected to review a misapplication of double jeopardy doctrine by the Oregon Court of Appeals even though the particular facts of the case may never be duplicated in other litigation. The fact that the new double jeopardy doctrine pronounced in the opinion of five of my colleagues was totally unnecessary to decide that case adds emphasis to the lack of necessity for granting certiorari at all. Moreover, despite that pronouncement, the Oregon court remained free to reinstate its prior judgment by unambiguously relying on Oregon, rather than federal, law to support its holding. In *South Dakota v. Opperman*, the State Supreme Court followed that precise course, thereby proving that

our Court had unnecessarily taken jurisdiction of a case in which deference to the state court's judgment would have been appropriate in the first instance. The decision to review (and to reverse summarily without argument) a novel holding by a California intermediate appellate court concerning the burden of proof in an obscenity trial, or an equally novel holding by the Pennsylvania Supreme Court concerning a police officer's order commanding the driver of a vehicle to get out of his car after a traffic violation, are additional examples of the many cases in which the Court has been unwilling to allow a state court to provide one of its residents more protection than the Federal Constitution requires even though the state decision affected only a limited territory and did not create a conflict with any other decision on a question of federal law, and even though the state court had the power to reinstate its original judgment by relying on state law. A willingness to allow the decision of other courts to stand until it is necessary to review them is not a characteristic of this Court when it believes that error may have been committed.

The Court's lack of judicial restraint is perhaps best illustrated by the procedure it followed in the *Snepp* case. A former CIA agent filed a petition for certiorari seeking review of a Fourth Circuit decision holding that his publication of a book about Viet Nam violated his secrecy agreement with the CIA; he contended that his contract was unenforceable because it abridged his right to free speech. The Government opposed his petition and also filed a conditional cross-petition, praying that if the Court should grant *Snepp's* petition, it should also consider whether the remedy ordered by the lower court was adequate. The Court denied *Snepp's* petition, but nevertheless granted the cross-petition and, without hearing argument on the merits, issued a *Per Curiam* opinion ordering a constructive trust to be imposed on all of the book's earnings even though there was neither a statutory nor contractual basis for that novel remedy. Since the Government had not even asked the Court to review the remedy issue unless it granted *Snepp's* petition, it is undeniable that the Court's exercise of lawmaking power in that case was totally unnecessary. If you think the *Snepp* case is unique in the revelatory light it casts on the Court's present approach to the doctrine of judicial restraint, I suggest that you read the Court's *Per Curiam* opinion in the *McCluskey* case, decided on the last day of this Term, in which the Court exercised its majestic power to reinstate the suspension of a high school student who had consumed too much alcohol.

You may think I have wandered away from a discussion of the problems created by the mounting tide of litigation that is threatening to engulf our Court. My purpose in discussing the doctrine of judicial restraint, however, is relevant for two quite different reasons. First, it lends support to a possible solution to the problem that I favor; second, it explains why judges who do not share my respect for the doctrine will surely oppose that solution.

Instead of creating a new court to decide more cases on the merits, thereby increasing the aggregate judicial power that the Supreme Court may exercise, I favor the creation of a new court to which the Supreme Court would surrender some of its present power—specifically, the power to decide what cases the Supreme Court should decide on the merits. In essence, this is the

proposal that was made by the committee headed by Professor Paul Freund several years ago with one critical difference. I would allow that court to *decide*—not merely to recommend—that a certiorari petition should be granted or denied. Let me just briefly explain why I believe the creation of a new court with that power would significantly improve the administration of justice.

First, and of greatest importance, I believe an independent tribunal that did not have responsibility for deciding the merits of any case would do a far better job of selecting those relatively few cases that should be decided by the Supreme Court of the United States. As I have already suggested, I think the present Court does a poor job of performing that task. It grants too many cases and far too often we are guilty of voting to grant simply because we believe error has been committed rather than because the question presented is both sufficiently important for decision on a national level and also ripe for decision when action is taken on the certiorari petition. I recognize that a different court might make similar mistakes, but reflection has persuaded me that such a court would be more likely to develop a jurisprudence of its own that properly focused on the factors—other than possible error—that should determine whether or not a certiorari petition should be granted.

Second, if I am correct in my belief that such a court would grant fewer petitions, this Court would be required to decide fewer cases on the merits. Even if that assumption is not correct, if the vast flood of paper and the small army of administrative personnel associated with the processing of our certiorari docket could be entirely removed from the Supreme Court, the time available to the justices for doing their most important work would be dramatically increased. The threat to the quality of that work that is now posed by the flood of certiorari petitions would be entirely removed.

Finally, if the new court were granted the power to control our docket, I believe capable judges would regard membership on that court as worthy of their talent. When the original Freund Committee proposal was made, my initial reaction to it was the same as that of other circuit judges with whom I was serving—it seemed to offer us the opportunity to become law clerks instead of judges. But an important reason for that reaction was the fact that the proposed court was not expected to exercise any real power—it would have done no more than perform a preliminary screening function for the Supreme Court without the actual power of decision. If the Supreme Court surrendered that power to the new court, the status of that court would indeed be significant. I am firmly convinced that a proper performance of the function of selecting the cases for the Supreme Court's docket would be rewarding judicial work, requiring a scholarly understanding of new developments in the law and of our democratic institutions that only our ablest judges possess.

Those who question the wisdom of allowing the Supreme Court to relinquish control over its own docket, and who favor the creation of a new National Court of Appeals to decide cases that are referred to it by our Court, rely heavily on the perceived need to enlarge our capacity to resolve conflicts among the circuits. Let me therefore say a word about that asserted need. Again the doctrine of judicial restraint sheds light on the problem.

Putting to one side my own view that the number of unresolved conflicts is exaggerated, I would like to suggest, first, that the existence of differing rules of law in different sections of our great country is not always an intolerable evil and, second, that there are decisionmakers other than judges who could perform the task of resolving conflicts on questions of statutory construction. As Justice O'Connor noted in her eloquent dissent in the FERC case, the fact that many rules of law differ from state to state is at times one of the virtues of our federal system. It would be better, of course, if federal law could be applied uniformly in all federal courts, but experience with conflicting interpretations of federal rules may help to illuminate an issue before it is finally resolved and thus may play a constructive role in the lawmaking process. The doctrine of judicial restraint teaches us that patience in the judicial resolution of conflicts may sometimes produce the most desirable result.

The doctrine of judicial restraint also raises the question whether the conflict resolution task need always be performed by judges. If the conflict is on a question of constitutional law, it must be resolved by the Supreme Court. But if, as is more frequently the case, the conflict is over the meaning of an ambiguous statutory provision, it may be both more efficient and more appropriate to allow Congress to make the necessary choice between the alternative interpretations of the legislative intent. If the conflicts problem is—or should become—sufficiently important to justify the creation of an entirely new federal appellate court, I would suppose that the problem would also justify the creation of a standing committee of the Congress to identify conflicts that need resolution and to draft bills to resolve them one way or the other. If the source of the conflict is ambiguity resulting from an omission in a statute, it would seem to make good sense to assign Congress the task of performing the necessary corrective law-making.

At the outset of my remarks I suggested that a discussion of problems I perceive in our Court might be useful to other judges because the similarities among courts outweigh their differences. Before I close let me therefore explain why I hope my comments may be relevant to the problems that arise in other courts. First, I would urge you to identify your problems and to discuss them openly and frankly. Disagreements with other judges is a characteristic of our profession that implies no disrespect and no lack of faith in the inherent strength of our institution. We must begin to talk about our problems before we can solve them. Second, when you are considering possible changes in your procedures—as well as when you are deciding particular cases—keep in mind the teachings of the doctrine of judicial restraint. Consider whether, when and how the special talent of judges—the thoughtful application of impartial judgment—should play a role in the decisionmaking process. And finally, I must note that although my remarks have indicated that proper management of a docket requires a court to treat some cases as having a greater importance or priority than others, distinctions that are made for administrative reasons are not applicable to the decisional process itself. With regard to our primary responsibility, I would urge you to heed the advice of a truly great judge. In an interview a few weeks ago Justice Stewart was asked if there was some opinion of which he was particularly proud. This was his answer:

"I worked hard on every opinion. I think they were all satisfactory. I think it's very important for a judge—any judge, anywhere—to remember that every case is the most important case in the world for the people involved in that case, and not to think of a case as a second-class case or a third-class case or an unimportant case. It behooves the judge or justice to apply himself fully to every case and to give it conscientious consideration."

Justice Stewart's example, as well as his written word, is a great teacher.

RECOGNITION OF SENATOR LEVIN

The PRESIDING OFFICER. Under the previous order, the Senator from Michigan (Mr. LEVIN) is recognized for not to exceed 15 minutes.

Mr. LEVIN. I thank the Chair.

NATIONAL DEFENSE STOCKPILE

Mr. LEVIN. Mr. President, many elements of our national defense program are glamorous subjects which we read and hear about every day. However, this morning, I would like to discuss an issue that is not consistently in the public eye but is still very important to this Nation's military preparedness. This issue is the national defense stockpile.

My purpose this morning is to bring to the attention of the Senate a report by the General Accounting Office which I requested in June and which I am releasing today. This report provides strong evidence that the Reagan administration is putting short-term budgetary considerations ahead of our long-term national security interest in its management of the stockpile. The General Accounting Office confirmed that the administration's plan for the stockpile will result in the accumulation of \$1.8 billion in the Treasury from the sale of excess stockpile materials over the next 5 years. By not using these funds to purchase additional needed materials for the stockpile, this plan clearly violates the expressly stated will of the Congress that "the purpose of the stockpile is to serve the interest of national defense only and is not to be used for economic or budgetary purposes." By ignoring this statutory policy, the administration has also explicitly rejected the advice of the national security agencies within the executive branch responsible for insuring that this country has an adequate strategic stockpile.

I ask unanimous consent that the GAO report, issued to me on July 16, 1982, be printed in the *Record* at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

BACKGROUND OF THE NATIONAL DEFENSE STOCKPILE

Mr. LEVIN. Mr. President, the United States maintains a national de-

fense stockpile because we cannot produce certain strategic and critical materials in sufficient amounts to meet our military and industrial needs during periods of national emergency. The Federal Government's management of the stockpile since its creation has been far from distinguished. Too often in the last three decades, we have used the sale of stockpile materials as an easy source of revenues for the Federal Treasury, ignoring the legitimate requirements to maintain a stable source of critical materials to enable us to respond to a war or national emergency.

As a result, today the inventory of many strategic materials in the stockpile is a long way from the requirement for these materials set by the Federal Emergency Management Agency (FEMA). To illustrate these shortages, let me just mention some of the strategic materials that are required to make the Pratt and Whitney F-100 turbofan engine. This is the jet engine that powers the F-15 and F-16, the first-line tactical fighter aircraft of our Air Force.

According to FEMA officials the manufacture of one of these jet engines requires:

Five thousand three hundred and sixty six pounds of titanium. In 1981, this country imported 47 percent of its titanium consumption. The current inventory of titanium in the stockpile represents only 17 percent of what we need in that stockpile.

Five thousand two hundred and four pounds of nickel. In 1981, this country imported 73 percent of its nickel consumption. The stockpile currently has no nickel; the requirements for our stockpile is 200,000 short tons, and we have nothing in that stockpile.

Nine hundred and ten pounds of cobalt. In 1981, this country imported 93 percent of its cobalt consumption. Even with the recently announced proposal to purchase an additional 5.2 million pounds of cobalt, the current stockpile inventory will be only 54 percent of the requirement after this announced purchase.

One hundred and seventy-one pounds of columbium. In 1981, this country imported 100 percent of its columbium consumption. The stockpile inventory of the columbium commodity group is only 52 percent of the inventory objective.

Three pounds of tantalum. In 1981, this country imported 97 percent of its tantalum consumption. The stockpile currently contains only 33 percent of the inventory objective of the tantalum commodity group.

This example covers the materials needed in just one jet engine. In this example, the stockpile inventory for each of these materials is approximately one-half or less than the requirement established by the execu-

tive branch. In fact, all of these materials were on the recent list of highest priority materials slated for purchase for the stockpile. If this administration has its way, the large deficits in the stockpile inventory for these and other critical materials will not be filled anytime soon.

1979 STOCKPILING ACT

Mr. President, with the passage of the Strategic and Critical Materials Stock Piling Revision Act of 1979, Congress took a major step toward strengthening the management of the national defense stockpile. This act articulated a national policy that the stockpile inventory should be sufficient to cover the country's needs for critical materials for not less than 3 years of a national emergency. It also explicitly established the policy I just quoted that "the purpose of the stockpile is to serve the interest of national defense only and is not to be used for economic and budgetary purposes." To insure this, Congress, in the act, set up a separate fund in the U.S. Treasury—the national defense stockpile transaction fund—where all receipts received from the sale of stockpile materials are deposited. By law, funds deposited in that fund can only be used for the acquisition of needed strategic and critical materials for the stockpile—nothing else.

Two years later, in the Omnibus Budget Reconciliation Act of 1981, Congress included an additional safeguard against the stockpile being used for economic and budgetary purposes. Because receipts going into the stockpile transaction fund are counted on the revenue side of the Federal ledger, there might be an inclination on the part of an administration anxious to generate revenues to sell off excess stockpile materials and leave the receipts in the stockpile transaction fund without using the receipts for their intended purpose—filling of the stockpile. To prevent this from happening, Congress stipulated that no disposal may be made from the stockpile after September 30, 1983, if the disposal would result in there being a balance in the stockpile transaction fund in excess of \$500,000,000.

The same amendments also require the President to submit to the Congress annually a 5-year materials plan for the operation of the stockpile. This report lays out the details of planned expenditures for acquisition and of anticipated receipts from proposed disposals of stockpile materials during the next fiscal year and the succeeding 4 fiscal years.

REAGAN ADMINISTRATION STATEMENTS ON THE NATIONAL DEFENSE STOCKPILE

Mr. President, the rhetoric of the Reagan administration suggests a strong commitment to rebuilding the stockpile. On March 31, 1981, less than 2 months after coming into office, President Reagan directed the Federal

Emergency Management Agency (FEMA) "to begin the first purchase program for the national defense stockpile of strategic and critical materials in over 20 years." President Reagan went on to say in the statement that "it is expected that larger purchases will be made as funds from sales of excess materials build up in the stockpile fund." One year later, the President's promises have fallen far short of implementation.

On April 5, 1982, in the National Materials and Minerals Program Plan and Report to Congress, the President promised that "the administration will expeditiously dispose of those stockpiled materials held in excess of goals and acquire additional materials through the appropriations process."

The President also said that "this program demonstrates a serious commitment by this administration to enhance significantly the national security." In response to this statement, I only hope that the President does not want us to measure his administration's commitment to enhancing the national security by the plan for the national defense stockpile over the next 5 years because that plan makes the President's statement sound more like a hollow promise than a serious commitment.

THE 1982-87 ANNUAL MATERIALS PLAN

The fact is that under the administration's 5-year plan, the revenues from sales of stockpile receipts would be way out of proportion to the proposed purchases of new materials. Receipts and purchases are not even close to balancing. Through fiscal year 1987, FEMA's plan anticipated receipts from stockpile disposals at more than \$2.4 billion. At the same time, FEMA's plan proposed expenditures for stockpile purchases through 1987 totaled only \$660 million. Sales would be four times purchases.

In other words, under the administration's current plan, at the end of fiscal year 1987, there would be almost \$1.8 billion of receipts from stockpiles sales sitting idle in the stockpile transaction fund. This represents over three times the \$500 million limit on the size of the balance in the stockpile transaction fund established in law just last year.

GAO REPORT

Because of the serious inconsistencies in the administration's annual materials plan for fiscal years 1982 to 1987, I asked the General Accounting Office to examine the plan to determine whether it violated the requirements of the Stock Piling Act. Mr. President, the answer from GAO could not have been clearer. The GAO concluded—and I quote—

From our examination, it appears that the administration has given priority to budgetary considerations over stockpile needs, and that the 5-year plan, if implemented, will

result in the \$500 million limitation on the stockpile transaction fund being exceeded.

GAO also reported that OMB officials had stated that before the \$500 million limitation on the balance in the stockpile transaction fund was exceeded, "appropriate amending legislation would be submitted to the Congress." In other words, the administration plans to seek repeal of the principal legislative safeguard in the Stock Piling Act that prevents the stockpile from being manipulated for economic and budgetary purposes.

CONCLUSION

Mr. President, there is more than enough blame to go around for the sorry state in which we find the stockpile today. Just last year, the Congress appropriated only \$57.6 million of the \$120 million requested by the administration for stockpile purchases. But, Mr. President, I can only conclude from this GAO report that the administration's commitment to rebuild the national defense stockpile is an illusory one. At the rate of purchases for the stockpile proposed by the administration, it will be well beyond the middle of the next century before we eliminate the current shortages of critical and strategic materials in the stockpile.

Of additional serious concern is the blatant disregard by the administration of the policy set forth in the 1979 Stock Piling Act that the stockpile not be used for economic and budgetary purposes. The administration's plan would allow the accumulation of \$1.8 billion in the stockpile transaction fund which, under the law, is not supposed to be used for any purpose except to purchase additional materials for the stockpile. The only possible explanation for this is the administration's desire to use these funds as a revenue offset to create the appearance of lowering the overall deficit.

Finally, and most basically, the administration's actions raise the question of how critical the current administration considers the national defense stockpile to our national security. The inventory goals for the stockpile are not set in Congress. They are established and ratified through a lengthy process involving all of the various national security agencies within the executive branch.

Mr. President, the fact is that for many critical commodities, our stockpile inventory today includes only a fraction of the objective. As of April 30, 1982, the stockpile goals or requirements represent materials valued at \$17.5 billion. We have materials valued at \$11 billion in the stockpile today. Of this \$11 billion, only \$7.3 billion represents materials that can be charged to stockpile goals; the remaining \$3.7 billion worth of material are excess. Thus, we need about \$10.2 billion worth of strategic and critical ma-

terials—almost 60 percent of our requirement—to meet the requirements for the stockpile developed through the collective wisdom of the national security agencies within the executive branch.

As I pointed out earlier, these shortages occur in materials such as titanium, cobalt, and nickel which would be essential to our industrial effort in a war or national emergency. We are a long way from reaching the inventory goals for some very important materials. If the administration is not willing to spend even the receipts from stockpile sales on additional critically needed materials—funds which are not supposed to be used for any other purpose—then I can only conclude that the administration does not think the stockpile inventory objectives are very critical to our national security.

This criticism does not extend to the officials of FEMA and GSA, directly responsible for day-to-day management of the stockpile, I might add. In testimony before the Preparedness Subcommittee on June 9, GSA officials indicated their original requests to OMB for fiscal year 1982 and fiscal year 1983 for new materials for the stockpile were \$908.9 million and \$862.4 million, respectively. OMB reduced these requests to \$120 million in both years, less than one-seventh of the requests made to them by the administration for the stockpiles.

Mr. President, the chairman of the Preparedness Subcommittee, Senator HUMPHREY, has been a strong supporter of our military preparedness in general and of our national defense stockpile in particular. As the Preparedness Subcommittee, under his leadership, continues its oversight hearing on the stockpile, I hope that we can call GSA, FEMA, and OMB witnesses to testify on the conclusions of the GAO report which I am releasing today.

EXHIBIT 1

U.S. GENERAL ACCOUNTING OFFICE,

Washington, D.C., July 16, 1982.

Subject: Implementation of National Defense Stockpile Plans Would Require Amending Existing Legislation (GAO/EMD-82-111).

Hon. CARL LEVIN,

Ranking Minority Member, Subcommittee on Preparedness, Committee on Armed Services, U.S. Senate.

DEAR SENATOR LEVIN: The United States cannot produce certain strategic and critical materials in sufficient amounts to support its requirements during periods of national emergency. To prevent what could be a dangerous and costly dependence on foreign supply sources during these crises, the United States maintains a National Defense Stockpile of materials to avoid military setbacks and economic damage in wartime.

On June 18, 1982, you asked us to review the Federal Emergency Management Agency's (FEMA) 5-year Annual Materials Plan for Fiscal Years 1983-1987. (See encl. I.) You asked our views on whether the plan meets the requirements in the Strategic and Critical Materials Stock Piling Act, as amended, (50 U.S.C. 98 et seq.) that—

"The purpose of the stockpile is to serve the interest of national defense only and is not to be used for economic or budgetary purposes" and

Except for rotations, disposal of excess materials that may cause a loss to the Federal Government if allowed to deteriorate, and releases required for national defense, "no disposal may be made from the stockpile * * * if the disposal would result in there being a balance in the National Defense Stockpile Transaction Fund * * * after September 30, 1983, * * * in excess of \$500,000,000."¹

From a strictly legal standpoint, the plan is not required to comply with these provisions of the act. The plan is only required to indicate proposed acquisitions and disposals. However, we attempted to determine whether the proposed actions, if implemented as planned, would meet the requirements that the stockpile not be used for economic and budgetary purposes and that the stockpile Transaction Fund not exceed \$500 million. From our examination, it appears that the administration has given priority to budgetary considerations over stockpile needs, and that the 5-year plan, if implemented, will result in the \$500 million limitation on the Transaction Fund balance being exceeded. An OMB official told us that before the limitation is exceeded, appropriate amending legislation would be submitted to the Congress.

Your office subsequently asked us to determine whether proposed stockpile acquisitions appear consistent with Presidential stockpile policy included in his April 5, 1982, program plan and report to the Congress. This plan and report were required by the National Materials and Minerals Policy, Research and Development Act of 1980, Public Law 96-479. We found no apparent attempt within the administration to correlate the budget with either the President's March 13, 1981, statement or the April 5, 1982, program plan.

BACKGROUND

The first major Federal program to stockpile strategic and critical materials was authorized and initiated under a 1939 act and amended by the Strategic and Critical Materials Stock Piling Act of 1946. Materials were procured under this act to support U.S. industrial and military needs during an emergency.

The Strategic and Critical Materials Stock Piling Revision Act of 1979, Public Law 96-41, revised and updated the 1946 act to conform to current stockpile policy and to strengthen the legislative role in stockpile matters. The 1979 act restricts the use of stockpile materials to national defense and precludes their use for economic or budgetary purposes. It also established a separate fund in the U.S. Treasury—the National Defense Stockpile Transaction Fund—where all moneys received from the sale of stockpile materials are deposited. Moneys in the Transaction Fund are only for the acquisition of strategic and critical materials.

Title II of the Omnibus Budget Reconciliation Act of 1981 made further improvements in stockpile management. It amended the Stock Piling Act to require most moneys received from the sale of stockpile materials to remain in the Transaction Fund until appropriated and provides that moneys in the Fund, when appropriated, remain available until expended, unless otherwise provided in

appropriation acts. The act limits the balance in the Fund to \$500 million after September 30, 1983.

Title II of the Omnibus Budget Reconciliation Act of 1981 also amended the Stock Piling Act to require the President to submit to the Congress a report containing an annual materials plan for the operation of the stockpile during the next fiscal year and the succeeding four fiscal years. The report, which accompanies the President's budget for the next fiscal year, includes details of planned expenditures for acquisition and of anticipated receipts from proposed disposals of stockpile materials during the 5-year period.

Stockpile planning

The annual materials plan is a list of stockpile materials proposed for acquisition and disposal developed each year through an interagency committee chaired by FEMA. The planning process begins when FEMA gives a list of goals, deficits, excesses, and priorities to the General Service Administration (GSA). The materials proposed for purchase and/or sale are ranked according to national security priorities. GSA makes an initial assessment of the market for these materials and determines the quantities that could be bought or sold without undue disruption of usual markets.

After GSA's market constraints are added, among other reviews, the revenue and cost projections of the annual materials plan proposal are examined. Upon inclusion of all approved revisions, the Director of FEMA submits the plan to the National Security Council and simultaneously provides a copy to the President's Office of Management and Budget (OMB). Any further revisions are made jointly by the National Security Council, OMB, and FEMA.

FEMA's list of goals, deficits, excesses, and priorities is prepared independent of the Federal budget process. However, the Transaction Fund is a GSA budget activity and, as such, subject to Presidential and congressional guidance and budget decisions. Thus, moneys flowing in and out of the Fund are treated as receipts and outlays, respectively, in GSA's fiscal year budget, and the annual materials plan is adjusted to conform to Presidential and congressional guidance and decisions on the desired unappropriated end-of-year balance in the Transaction Fund. For fiscal year 1983, the President's budget projects an end-of-year Transaction Fund balance of \$741 million.

GIVING PRIORITY TO BUDGETARY CONSIDERATIONS MAY REQUIRE AMENDING EXISTING LEGISLATION

Because the Transaction Fund can be used with other Treasury funds to balance the Federal budget, the Omnibus Budget Reconciliation Act of 1981, amending the Stock Piling Act, prohibits any stockpile disposal which would result in a Fund balance in excess of \$500 million. House Report 97-158, which accompanied the act, states that the \$500 million limitation was enacted because: "The Committee on Armed Services expressed particular concern that management of the stockpile be consistent with the purpose set out in the (Stock Piling) Act: 'to serve the interest of the national defense only and is not to be used for economic and budgetary purposes.'"

The \$741 million projected in the President's fiscal year 1983 budget as a Transaction Fund balance on September 30, 1983, would exceed the congressionally mandated limitation by \$241 million. FEMA's 5-year

¹ Amendment by the Omnibus Budget and Reconciliation Act of 1981, Public Law 97-35.

plan projects that at the end of fiscal year 1987, the Fund will be at \$1.8 billion—\$1.3 billion above the \$500 million limitation.

We questioned FEMA and GSA officials concerning these apparent inconsistencies and were informed that the projected balance in the Transaction Fund reflects OMB guidance and "policy decisions." FEMA's Assistant Associate Director for Resources Preparedness informed us that the annual program plan, prepared in December 1981, focused primarily on acquisitions and included a range of options—one of which would have reduced the Transaction Fund balance below the \$500 million limitation. The plan was then revised and adjusted to match the President's fiscal year 1983 budget and long-range (through fiscal year 1987) budget projections for stockpile acquisitions and disposals provided by OMB's budget examiner for GSA.²

FEMA's Assistant Associate Director stated that the annual materials plan did not, in any way, influence the President's budget. He continued that FEMA advised OMB that the President's fiscal year 1983 budget would exceed the limitation and that an alternative plan should be considered. However, he was advised by OMB to revise the annual materials plan to conform to the President's budget decisions.

GSA's Chief, Budget Formulation Branch, told us that GSA was advised by OMB to adjust its fiscal year 1983 budget to reflect \$592 million in disposal receipts and \$120 million in acquisition expenditures. However, \$402 million in receipts is contingent on congressional approval to dispose of stockpile silver.³

We approached OMB's budget examiner for GSA concerning the validity of the statements made by the FEMA and GSA officials. He stated that OMB does not support the congressionally mandated limitation on the Transaction Fund balance. He noted, however, that since the disposal of stockpile silver has been suspended, the limitation on the Transaction Fund balance may not be exceeded in fiscal year 1983. He concluded that proposed legislation to either eliminate or increase the existing limitation would be forthcoming with the President's fiscal year 1984 budget if fiscal year 1983 disposals are expected to exceed the current limitation on the Transaction Fund balance.

Finally, while FEMA is responsible for planning, programming, and reporting on the stockpile, GSA is responsible for acquiring and disposing of the materials. GSA's fiscal year 1983 congressional highlight summary identifies numerous economic benefits to be derived from disposing of excess stockpile materials, including "the reduction of dollar outflow and improvement of the overall balance of payments positions of the United States." However, the need to acquire other materials currently below stockpile goal levels in the interest of national defense is not identified as a benefit to be derived from the disposals.

² Projected expenditures for stockpile acquisitions for fiscal years 1983 through 1987 total \$660 million. Estimated receipts from stockpile disposals under existing legislation total \$902 million, while receipts for disposals under proposed legislation total \$1,533.7 million.

³ The fiscal year 1982 Defense Appropriation Act, Public Law 97-114, December 29, 1981, suspended the weekly auctions of silver from the National Defense Stockpile pending a July 1, 1982, now overdue, redetermination by the President that the over 100 million troy ounces of silver to be disposed of is excess to stockpile requirements and congressional approval of the recommended disposal method.

It appears that the administration has given priority to budgetary considerations over national defense-related needs. However, the existing stockpile legislation precludes implementation of the administration's plans by prohibiting any disposals which would result in a Transaction Fund balance in excess of \$500 million. As stated above, OMB intends to propose amending legislation to either eliminate or increase the limitation if it appears that the limitation would be exceeded.

PROPOSED STOCKPILE ACQUISITIONS APPEAR INCONSISTENT WITH PRESIDENTIAL POLICY

In a March 13, 1981, statement authorizing \$100 million for the first purchase program for the National Defense Stockpile in over 20 years, the President stated that it is now widely recognized that our Nation is vulnerable to sudden shortages in basic raw materials necessary to our defense production base. He concluded that the stockpile acquisition program is a necessary first step to decrease this vulnerability and expected that larger purchases would be made as funds from the sale of excess materials build up in the Transaction Fund.

The President's April 5, 1982, program plan and report to the Congress, required by the National Materials and Minerals Policy, Research and Development Act of 1980 states that the administration endorses "the policy that the stockpile should be sufficient to meet military, industrial, and essential civilian needs in support of the national defense in a crisis." The plan continues that the administration will seek congressional appropriations to acquire necessary stockpile materials and will provide a fiscal year annual materials plan that "matches annual budget ceilings, market conditions, immediate strategic requirements, and GSA purchase activities." It concludes that the President's acquisition and disposal program "demonstrates a serious commitment by this Administration to enhance significantly the national security."

Additionally, OMB's budget examiner for GSA told us that many of the materials currently below stockpile goals are "low priority." He implied that this is why the administration has requested only \$120 million for fiscal year 1983 stockpile acquisitions even though the Transaction Fund is projected to have a \$741 million balance at the end of fiscal year 1983. However, bauxite, chromite and chromium metal, columbium concentrates, nickel, the platinum group metals, and titanium, identified by both us⁴ and FEMA as materials for which the United States appears vulnerable to supply disruptions or sharp price increases and which may be critical to national defense, are below stockpile goal levels. Over \$450 million is needed to meet the Jamaican grade bauxite goal alone. Therefore, the OMB budget examiner's statement that many of the materials currently below stockpile goal levels are low priority appears questionable.

While the President's fiscal year 1983 budget and long-range projections reflect an intention to expeditiously dispose of stockpile materials currently held in excess of goals, we do not believe that it reflects a "serious commitment" to acquire additional materials. No apparent attempt was made to correlate the budget with either the President's March 13, 1981, statement or April 5, 1982, program plan.

⁴ U.S. General Accounting Office, "Actions Needed to Promote a Stable Supply of Strategic and Critical Minerals and Materials," GAO/EMD-82-69, June 3, 1982.

As requested by your office, we did not obtain official agency comments on this report. As arranged with your office, unless you publicly announce its contents earlier, we plan to further distribution of this report until 30 days from the date of its issuance. At that time we will send copies to interested parties and make copies available to others upon request.

Sincerely yours,

J. DEXTER PEACH, Director.

Enclosure.

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, D.C., June 18, 1982.

HON. CHARLES A. BOWSER,
Comptroller General of the United States,
General Accounting Office, Washington,
D.C.

DEAR MR. BOWSER: The Preparedness Subcommittee of the Armed Services Committee has a continuing interest in issues affecting the National Defense Stockpile. On April 23, 1982, Louis O. Giuffrida, Director of the Federal Emergency Management Agency, transmitted to the Congress the Annual Materials Plan for Fiscal Years 1983-1987. This plan shows anticipated purchases for the sales from the National Defense Stockpile for Fiscal Years 1982-1987.

I would like the General Accounting Office to review the proposed 5-Year Annual Materials Plan for Fiscal Years 1983-1987 and determine whether this Plan meets all of the requirements of the 1979 Strategic and Critical Materials Stockpiling Act, as amended by the Omnibus Reconciliation Act of 1981. Specifically, I would like GAO's legal opinion as to whether the Plan meets the requirements in Section 3(b)(1) of the Act that "The purpose of the stockpile is to serve the interest of national defense only and is not to be used for economic or budgetary purposes", and in Section 5(b)(2) that no disposal may be made from the stockpile after September 30, 1983, if the disposal would result in there being a balance in the Stockpile Transaction Fund in excess of \$500,000,000.

I would appreciate your response to this question by July 15, 1982. Members of the Committee staff have been in touch with the staff of the Energy and Minerals Division of GAO. If they have any further questions, they can contact Mr. David Lyles of the Committee staff at 224-9344.

Thank you for your attention to this matter.

Sincerely,

CARL LEVIN,
Ranking Minority Member,
Subcommittee on Preparedness.

Mr. President, I thank the Chair, and I yield back the remainder of my time, if any.

The PRESIDING OFFICER. The Senate majority leader.

Mr. BAKER. Mr. President, who has the next special order?

The PRESIDING OFFICER. The next special order is for Senator HUMPHREY for a time not to exceed 15 minutes.

Mr. BAKER. Mr. President, I understand the Senator is on his way to the floor to claim his time under the special order. While he arrives, I suggest the absence of a quorum to be charged against that time.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM 12 NOON TO 2 P.M. TODAY

Mr. BAKER. Mr. President, there is not an order for the Senate to recess from 12 to 2 today yet, is there?

The PRESIDING OFFICER. There is no order yet.

Mr. BAKER. Mr. President, as has been the custom recently, I intend in a moment to ask consent of the Senate to recess between 12 o'clock noon and 2 p.m. The reason, as the distinguished occupant of the Chair knows, is that Members on both sides of the aisle will be attending caucuses of their respective parties off the floor of the Senate. Those caucuses are of a quasi-official nature. They are meetings in which many issues are discussed and occasionally decisions are made as to party positions. Therefore, they are important to the conduct of the Senate.

Mr. President, in view of that, I ask unanimous consent that the Senate today stand in recess from the hour of 12 noon until 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, under the same terms and conditions as previously requested, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR HUMPHREY

The PRESIDING OFFICER. Under the previous order, the Senator from New Hampshire (Mr. HUMPHREY) is recognized for not to exceed 15 minutes.

NATIONAL DEFENSE STOCKPILE CRISIS

Mr. HUMPHREY. Mr. President, I commend my colleague, the distinguished Senator from Michigan (Mr. LEVIN) for his diligent efforts in the matter of the strategic stockpile. He is a strong supporter of cost-efficient national defense, and has displayed a great interest in the national defense stockpile, which comes under the purview of the Subcommittee on Preparedness, which this Senator chairs,

and on which Senator LEVIN is the ranking minority member.

I have read the GAO report requested by Senator LEVIN and, frankly, find it disturbing, to say the least.

The President has declared his intentions for upgrading the national defense stockpile very clearly. The Office of Management and Budget, however, has chosen to use the stockpile transaction fund to produce the illusion of deficit reductions. The actions taken by OMB contradict the goals established by the President and his national security advisers and are detrimental to our national defense.

This is not the first time that the national defense stockpile has been the subject of criticism in this Chamber. There has, in fact, been a consistent theme of negative evaluations since the early 1960's. The issue is, and has been, to what extent should the national defense stockpile be planned and managed in the interest of national security. If it is the policy of national defense to insure that the country is prepared for effective industrial mobilization in time of emergency, then the national defense stockpile should be financed so that strategic and critical materials are available.

In simple terms, this requires that the national defense stockpile be separated from fiscal and budgetary imperatives and strategies. And it also requires that we, the Congress of the United States, remove political fiscal and budgetary counterstrategies in maintaining a national defense stockpile.

I disagree with the GAO report that argues that the President is responsible for the problems of rebuilding the stockpile. We should consider if we, the Congress, have given proper support to assist the President in fulfilling his "serious commitment . . . to enhance significantly the national security" in national defense stockpile aspects. Did we support previous administrations, as the problem is not uniquely limited to this administration? The answer is no. For fiscal year 1983, the administration requested \$635.5 million for stockpile purchases, but we, the Congress are preparing to authorize only \$157.6 million.

I would point out, as Senator LEVIN did a few moments ago, that in 1982 the administration requested \$120 million and Congress appropriated only \$57.6 million. So the blame can be widespread. It does not rest exclusively with the White House.

We must begin to revise our reliance on the stockpile transaction fund as a source of revenue to buy needed strategic and critical materials. The \$1.8 billion that my colleague from Michigan suggests would be in the transaction fund depends on the assumption that the GSA will continue to sell tin supplies. Last year the predicted fund balance numbers were larger and even

more dangerously persuasive because at that time we assumed that the transaction fund would be flowing over with revenues from a proposal to sell silver as excess material. There is today a strong probability that we will not have the money from the projected tin sale because of international consequences. Without the projected income of nearly \$2 billion from a sale of tin, there will not by any violation of the Omnibus Budget Reconciliation Act of 1981 which provides for the \$500 million cap in disposal revenue in the transaction fund. The points of the GAO study would then become academic.

We cannot provide for the national security of the United States in the area of emergency mobilization and materials availability when decisions and policies are the results of a budgetary management approach. Budget planning and policy control in national security affairs within minerals and materials policy should be supportive and consultative. Therefore, for the stockpile needs to be addressed effectively, decisions should be made independent of the budget preparation process.

That is not a new observation, Mr. President. The Congress has been making this observation and trying to insure that stockpile decisions were independent of budgetary and fiscal considerations. We passed legislation in the hope of affecting that situation, but we are still not where we want to be.

I would observe, Mr. President, that as long as the sales from the stockpile are counted as revenues, and purchases for the stockpile are counted as revenues, and purchases for the stockpile are counted as outlays, there will always be the temptation on the part of any administration to insert an element of budgetary considerations into the management of the stockpile.

Mr. President, I am encouraged that the administration is attempting to address stockpile difficulties. My correspondence with the White House in recent days indicates an awareness of the problems. The administration has completed its emergency mobilization preparedness review. According to that review, it would be the policy of the United States to restore industrial mobilization capability in both the military and civilian sectors as a matter of preparedness for significant military conflict. To achieve this objective, the administration would affirm that the national defense stockpile should become the principal source of strategic and critical materials availability.

Furthermore, the administration would recognize the National Security Council as the final authority of Emergency Mobilization Board planning. I anticipate and fully endorse national defense stockpile decisionmak-

ing under that Board and the Council. There is where it belongs. Both the rebuilding of the stockpile and the national security it is intended to support will be better served. If it is managed by such authority, the suspicion and contentiousness over the transaction fund will no doubt fade away. But we, in Congress, must be prepared through authorizations and appropriations to do our part.

I will close, Mr. President, by emphasizing that it is the administration's intent, according to my recent communications with the White House, to place in charge as final authority over emergency mobilization planning the National Security Council. I urge the White House to implement that intention forthwith.

I thank the Chair.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond the hour of 11:30 a.m., with statements therein limited to 3 minutes each.

VFW OPPOSES AMNESTY FOR ILLEGAL ALIENS

Mr. HELMS. Mr. President, a deluge of calls and letters coming to me strongly oppose the granting of amnesty for aliens who have entered the United States illegally. The Immigration Reform and Control Act of 1982, S. 2222, contains provisions which would grant amnesty to millions of these lawbreakers.

Mr. President, I ask unanimous consent that a letter and enclosure from the Veterans of Foreign Wars of the United States be printed in the RECORD at the conclusion of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
July 28, 1982.

Hon. JESSE HELMS,
U.S. Senate, Washington, D.C.

DEAR SENATOR HELMS: I have just been informed of your proposed amendment to the Simpson-Mazzoli Bill, and I both thank and applaud you for this clear restatement of first principles.

"Amnesty" by any name simply means that the Congress will have quit on the problem because it is tough and politically sensitive.

You, and your great colleague Senator East, have given us a timely reminder that we are a nation of laws.

Best personal wishes.

Most cordially,

ARTHUR J. FELLWOCK,
National Commander-in-Chief.

VETERANS OF FOREIGN
WARS OF THE UNITED STATES,
July 28, 1982.

To: Members, United States Senate.

From: Arthur J. Fellwock, National Commander-in-Chief, Veterans of Foreign Wars of the United States.

Subject: Illegal aliens.

The Veterans of Foreign Wars of the United States strongly supports the amendment to S. 2222/H. R. 6514, "The Immigration Reform and Control Act of 1982" (the Simpson-Mazzoli bill) put forward by Senators Helms and East (both of North Carolina). This amendment would strip from the bill its provisions for a wide and generous amnesty to aliens residing illegally in this country.

My reasons follow:

(a) despite disclaimers, the Simpson-Mazzoli amnesty provisions would be a magnet for aliens not already in this country to enter illegally and swell the ranks of the 5-6 million illegals already here;

(b) "amnestying" the 5-6 million illegal aliens already here would, according to Executive Branch sources, cost up to \$10 billion over the next four years in welfare payments, food stamps, etc.

A small portion of this amount could be properly applied to reinforcing the thinly-stretched Border Patrol to the end that our already generous legal immigration could be adequately policed; and, finally,

(c) the gut, bottom-line issues are: 1) do we regain control of our borders or not; and 2) do we turn a blind eye to law enforcement when it is difficult or politically sensitive.

Acceptance of S. 2222/H. R. 6514 ("Simpson-Mazzoli"), with its amnesty provisions intact, would neither see us regain control of our borders nor foster respect for equitable laws already on the books.

For this reason, I urge passage of the Helms-East Amendment to the basic legislation.

Cordially,

ARTHUR J. FELLWOCK,
National Commander-in-Chief.

RETIRED BORDER PATROL OFFICERS OPPOSE AMNESTY FOR ILLEGALS

Mr. HELMS. Mr. President, the Immigration Reform and Control Act of 1982, S. 2222, contains provisions which would grant amnesty to millions of aliens who have entered the United States illegally.

Those charged with the responsibility of patrolling our borders, and who have first-hand knowledge of the current crisis situation, advise caution concerning this legislation.

Mr. President, I ask unanimous consent that a letter from Mr. Gordon J. MacDonald, retired Deputy Assistant Commissioner of the Border Patrol, writing on behalf of the Fraternal Order of Retired Border Patrol Officers, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE FRATERNAL ORDER OF
RETIRED BORDER PATROL OFFICERS,
OFFICE OF THE SECRETARY,
Vienna, Va., July 30, 1982.

Hon. JESSE A. HELMS,
Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR HELMS: This is to express my sincere appreciation for your recent, most worthy stand on immigration reform. In my capacity as Founder and Secretary of The Fraternal Order of Retired Border Patrol Officers I am in recurrent contact with several thousand immigration enforcement officers, both on-duty officers and former Immigration Investigators and Border Patrol Agents. I can assure you, Senator, to a man, they support your proposed effort to remove the legalization (amnesty) provision from immigration reform bill S. 2222.

For nearly twenty years we have envisioned such a bill as S. 2222; a bill that would finally give INS the legislative resources to regain control of our borders and our interior illegal alien problems. We have come so close, only to have the entire program threatened by this unbelievably broad form of amnesty. Such a provision would be totally devastating to the enforcement programs of the Immigration Service, and would certainly nullify the positive benefits that would accrue as a result of this bill.

We are with you all the way on this, Senator, and we wish you every success.

Sincerely,

GORDON J. MACDONALD,
Deputy Assistant Commissioner,
Border Patrol, retired.

AMERICAN LEGION OPPOSES AMNESTY FOR ILLEGAL ALIENS

Mr. HELMS. Mr. President, there is great concern throughout the country over provisions in the Immigration Reform and Control Act of 1982, S. 2222, which would grant amnesty to millions of aliens who have entered our Nation illegally.

I ask unanimous consent that two letters from the American Legion in this connection be printed in the RECORD at the conclusion of my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE AMERICAN LEGION,
Washington, D.C., July 23, 1982.

Hon. JESSE A. HELMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HELMS: For the last several years The American Legion has taken the view that regaining control over immigration into the United States—both legal and illegal—is of vital importance to nearly every major facet of American life. This nation stands virtually alone among western nations in having failed even minimally to exercise its sovereign right to police its own borders. The consequences of too many years of too little control have created an overwhelming popular sentiment that demands reduced legal immigration and enforcement of tough new illegal immigration laws.

This year, the best efforts of both House and Senate Judiciary Subcommittees on Immigration have yielded little more than a

compromise package which may be sound from a political standpoint but in many respects is inadequate to seriously address immigration control or assuage the growing anxieties of American taxpayers. In that regard, provisions to amnesty millions of illegals within each of the two major reform measures make a mockery of serious intentions to control immigration and we invite your attention to and possible leadership in opposing these provisions. Our position against amnesty of any kind is adamant for a variety of reasons outlined in the attached documents. Assuming that you agree with us on this matter it is sufficient to point out that in the last several weeks momentum has begun to move in a direction favorable to our position. This, in light of two significant events.

First, Senator Kennedy succeeded in amending S. 2222 in Committee with a provision vastly expanding eligibility for amnesty—legalization as it is called in polite circles—to include all illegal aliens having resided in the U.S. prior to January 1, 1982. Many Senators previously willing to look the other way at a moderate legalization program are now beginning to pay more attention in the face of a wide-open amnesty which is tantamount to an open border policy.

The second factor moving things our way is the June 15, 1982 Supreme Court ruling on free public schooling for the children of illegals. In that decision the Court found that Texas had unconstitutionally denied equal protection under the 14th Amendment to the children of illegals by barring their access to free public schooling. The significance of this decision is that by using the same equal protection arguments, illegals taking advantage of amnesty will be entitled to the full range of social welfare benefits now available to Americans.

This prospect must be taken seriously in any consideration of amnesty because of the cost to taxpayers. Indeed OMB projects that if 80% of an illegal population conservatively estimated at 4.5 million stepped forward, the cost in social services and benefits would range around \$9 billion over four years. Moreover, when the Administration gave its support for legalization, in both its own proposal and the original amnesty provision in S. 2222, it did so with the understanding that most of those legalized would be ineligible for federal welfare and other benefits.

As stated already, momentum is moving in our direction. We believe that many Senators—both Democrats and Republicans—would like an opportunity to vote no on amnesty, but fear being labeled as racist or nationalist. In short, the support is there, but what is needed is leadership.

Recognizing that you are deeply involved in numerous matters of great importance, we sincerely hope that you will consider a leadership role in amending S. 2222 by deleting amnesty. Should you agree with our posture on this issue, The American Legion stands ready to support your efforts to the greatest possible extent.

Sincerely,

E. PHILIP RIGGIN,
Director, National
Legislative Commission.

THE AMERICAN LEGION,
Washington, D.C., July 28, 1982.

DEAR SENATOR: On July 22, 1982 Senators Helms and East introduced an amendment to the Immigration Reform and Control Act of 1982 which The American Legion com-

mends to your serious attention. Specifically, this amendment would strike from S. 2222 any authority to begin a program of amnesty for illegal aliens and we urge you in the strongest possible terms cosponsor and support this amendment when it is debated on the floor.

For the last several years this organization has taken the view that regaining control over immigration into the United States—both legal and illegal—is of vital importance to nearly every facet of American life. This nation stands virtually alone among western nations in having failed even minimally to exercise its sovereign right to police its own borders.

The consequences of too many years of too little control have created an overwhelming popular sentiment that counsels reduced legal immigration, enforcement of tough new illegal immigration laws and absolutely demands that those having already violated our immigration laws not be pardoned. Apart from the inherent wisdom of the American public, there are a variety of important policy considerations which if evaluated closely make amnesty very unwise.

From a public policy standpoint, The American Legion opposes amnesty because jobs held by illegals should be made available to Americans, because new waves of illegals looking toward subsequent amnesties will be encouraged, because amnesty is unfair to those having awaited their legal turns, because general disrespect of law will ensue by legitimizing the transgressions of violators, because the administrative burden on INS would be too great even if amnesty were a good idea and because the cost to taxpayers as increased numbers become eligible for social welfare programs over the first four years will amount to over \$10 billion even according to the Administration. For all of these reasons we believe, and hope you will agree, that amnesty however truncated is inappropriate. This is particularly true now at a time in which the state of the national economy has seriously jeopardized our own citizens.

With the understanding that the Immigration Reform and Control Act is scheduled for consideration imminently, we ask that you consider the matter of amnesty thoughtfully. As always, your attention to the views of The American Legion are appreciated.

Sincerely,

JACK W. FLYNT,
National Commander.

THE FALKLANDS/MALVINAS TRAGEDY: HOW QUICKLY WE FORGET

Mr. HELMS. Mr. President, 4 months ago, the big news around the world was that Argentina had occupied the islands in the South Atlantic—Islands which the Argentines call the Malvinas and which the British call the Falklands. Tension filled the days and weeks that followed as two friends of the United States prepared for war.

Now, in retrospect, does anyone doubt that the conflict which followed could have been avoided without the tragic loss of life and materiel for both sides and severe damage to the good faith and credibility of the United States?

Mr. President, as we now reflect upon the so-called "mediation" which followed, is not the intention of the State Department to take sides in this dispute all too clear? Is it not now equally clear that the United States should have demanded that both sides back up and cool off? In the tide of anti-Argentine sentiment following the decision by Secretary of State Haig to grant Britain all the aid it needed to triumph over the Argentines, Americans ignored Argentina's claims to sovereignty over those disputed islands.

In fact, Mr. President, as I have mentioned many times in this Chamber, the United States should have given calm and fair consideration to the claims of Argentina and to a peaceful resolution of their dispute with Great Britain.

Mr. President, on July 9, Argentina's Ambassador to the United States, Esteban Takacs, whose efforts in recent months have won him the respect of adherents of all sides in the dispute, stated the Argentine case for sovereignty persuasively. He did so in a communication to the editor of the Washington Times, published July 9. Since many Senators have indicated that they did not see Ambassador Takacs' letter, I ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

There being no objection, the letter was ordered to be printed, in the RECORD, as follows:

ARGENTINA'S CASE FOR SOVEREIGNTY

Ever since the question of the Malvinas Islands became front page news, there has been much discussion of this matter in the American press.

Unfortunately, most of this discussion has accepted at face value the historic claim to these islands set forth by Great Britain. Time Magazine of April 12, for example, declares that, "The main island grouping . . . was discovered by the British in 1592 . . ." Writing in The Washington Times of June 21, Byron Farwell states, "The Falkland Islands were first seen by the British navigator, John Davis, in 1592 . . . history and justice are clearly on the side of Britain." And so it has gone.

Now that the question of the Malvinas has receded from the front page, perhaps the American people, who are unique in their open-mindedness and willingness to explore all sides of complex questions, are prepared to examine in more detail the claim set forth by Great Britain. It is my belief that, if they do, they will discover that Argentina's case for sovereignty is indisputable and that it has, in addition, been supported over the years by leading experts in the United States and elsewhere.

The British claim to have discovered the Malvinas in 1592. This is simply not true. The fact is that the Malvinas were discovered in 1520 by Esteban Gomez, a Portuguese who was part of the Magellan expedition sponsored by Spain. In Spanish maps and charts of the beginning of the 16th century, the Islands already appear. The first map is that of Pedro Reinel (1522-23) which shows an archipelago situated on the paral-

lel 53°55' latitude South. Diego Rivera, principal cartographer to Charles V of Spain inserted the islands in the Castiglione (1526-27), Salviati (1526-27) and Rivera (1527) maps and also in two charts in 1529.

Thus, it is clear that the British could not have "discovered" the Malvinas Islands in 1592 because they had already been discovered by the Magellan Expedition in 1520. The area was also sailed by Simon de Alcazaba in 1534 and Alonso de Camargo in 1540. Sarmiento de Gamboa took symbolic possession of the Straits of Magellan together with its adjacent islands, including Malvinas, and in 1584 founded a settlement.

While the British continue to claim their "discovery" of the Islands in 1592, the fact is that British maps of the period do not show the Islands, nor is there proof of any kind of any British involvement with these islands either in 1592 or during the previous century, when Spain has already discovered and claimed the area for its own. Beyond this, there is no British involvement with the islands in the next century, the 17th, either.

The British are not heard from again until 1748 when they announced preparations from an expedition to the islands. Spain became aware of this plan and formally protested to the British Government. Great Britain abandoned the plan. Instructions received from his government by the British representative in Madrid stated: "Since there is no intention of making settlement in any of the afore-mentioned islands and since His Majesty's corvettes wish neither to make nor touch any part of the Spanish coast, His Majesty falls to understand how this project can in any way cause objection from Madrid."

Thus, in this clear statement of official British policy and in the acts of consultation of 1749, addressed to the Spanish Court, we see clear proof that England recognized the rights of Spain over the islands and coasts of South America, in areas where British ships could neither sail nor trade, much less claim territory.

This, however, was nothing new. Great Britain had long acknowledged Spanish rights in South America which were originally granted to Spain by virtue of the Papal Bulls Inter Coetera and Dudum se Quidem of 1493. At this time, Great Britain was Roman Catholic and supported the jurisdiction and authority of the Pope who, in this particular case, was mediating a dispute between Spain and Portugal. Great Britain was making no claims at this time whatsoever.

Later, in the Treaty of Madrid of 1670, it was agreed that England would retain all lands, islands, colonies and dominions she possessed in America and there was a counter-recognition by England that "the subjects of Great Britain would not direct their trade to, nor sail in, ports or places which His Catholic Majesty possesses in the above-mentioned Indies nor will they trade with them." There was a provision prohibiting sailing and trading by Great Britain in areas not open to traffic at the end of the 17th century, which was ratified again in the Treaty of Utrecht in 1713.

When Britain first tried to send an expedition to the Malvinas in 1749, she could not have considered the Islands *res nullius*, and therefore open to appropriation. She had already acknowledged Spanish rights—and had done so many times.

The first actual settlement in the Malvinas came in 1764, when a French naval explorer, Bougainville, founded Port Louis on

Soledad Island (East Falkland) and named the islands the Malvinas. Spain immediately protested to the French Government and her rights of dominion were quickly recognized. King Louis XV ordered Bougainville to hand over Port Louis. By doing so, France clearly and openly recognized the legal rights of the Spanish Crown to the islands.

Only after this centuries old history of the legitimacy of Spanish right to the Malvinas, in January, 1766, did the British found Port Egmont on the small and obscure Saunders Islet, not on either of the main islands in the group, Soledad or Gran Malvina (East or West Falkland). Spain also protested to England. Since the British did not withdraw, an expedition departing from Buenos Aires, commanded by the Governor of Buenos Aires, evicted them in 1770. Each time Spanish control of the Malvinas was challenged—first by the French, then by the British—reaction was swift. When the British left Port Egmont, they left behind a metal plate reading, "Be it known to all nations that Falkland's Island with this port . . ." They referred to the island in the singular, proving that English claims were limited during their stay at Port Egmont exclusively to this small settlement, not to the entire archipelago. In the following years, 19 Spanish and 5 Argentine governors exercised control over the Malvinas.

Fifty nine years elapsed before the English returned to the Malvinas in 1833 when they took control of the islands by the use of force, expelling the Argentines and the Argentine governor who was present in the islands.

Great Britain's imperialistic aims are clear. Twice, once in 1806 and once in 1807, Britain invaded Buenos Aires itself, capturing the city. Both times the Spanish expelled them and regained control of the city. What England was seeking in Buenos Aires in 1806 and in 1807 and in the Malvinas in 1833 was simply control of the strategically important sea routes of the South Atlantic. The Strait of Magellan, after all, was the only path to India and Japan.

England's silence over the Malvinas after 1774 confirms her recognition of Spanish rights. Spanish, and then Argentine, control over the islands was steady and continuous in the intervening years. In the first British-Argentine Treaty of Friendship, Trade and Navigation, signed in 1825, Britain makes no reservations concerning any claim to the Malvinas. At this time, an Argentine Governor was already in the islands.

Spanish rights in the islands were widely accepted even in Great Britain. In his "Thoughts on the Late Transactions Respecting Falklands' Islands" (1771), Samuel Johnson explains how the Spanish Minister Grimaldi could have answered any attempt by the British government to ask for any control over the territories: "We (the Spaniards) have now for more than two centuries ruled large tracts of the American continent, by a claim which perhaps is valid only upon this consideration, that no power can produce a better one: by the right of discovery and prior settlement . . . The justice of this tenure the world has hitherto admitted, and yourselves at least tacitly allowed it, when about twenty years ago you desisted from your purposed expedition and expressly disowned any design of settling . . ."

The Nootka Sound Convention of 1790 provides additional proof of the legitimacy of the Spanish and, hence, the Argentine position. Discussing this convention as far back as 1927, the distinguished American

historian, Dr. Julius Goebel, Jr., in his classic work on this subject, "The Struggle for the Falkland Islands, a Study in Legal and Diplomatic History" (Yale University Press), writes: "The British had now (in 1790) in a solemn treaty recognized the status quo; the de facto occupation of the whole Falkland group was admitted by them to be an occupation in the legal sense . . . the British, by agreeing not to establish colonies to the South of regions already occupied by the Spanish, by implication recognized the sovereignty of Spain to all regions in fact occupied . . . The terms of the sixth article by inference forbade any landing at the Falklands as they were a place already occupied by Spain. Consequently, even if we could assume that the British had up to this time kept alive their claim to the group, it was extinguished by this instrument . . . It was only by possession that the British could transmute their claim into a right, and, the means having been formally renounced, the claim itself lapsed."

Professor Goebel makes it clear that, "The only ground on which title could be based was the de facto occupation . . . As between Spain and Britain, therefore, the equities lay with the former."

Similarly, U.S. Secretary of State Sumner Welles, writing in the Washington Post (March 2, 1948) declares:

"When the Spanish government established the viceroyalty of Buenos Aires in 1776, the Falklands were specifically included. Governors were appointed and resided in the islands. In the Nootka Sound convention . . . Britain recognized all existing Spanish occupations in South America . . . In this convention, Spain's right to the Falkland Islands would seem to have been admitted unequivocally by the British . . . Spain's right to the Falklands and their dependencies passed to the Argentine Republic."

The Republic of Argentina inherited from Spain the legitimate sovereignty and unchallenged possession of the Malvinas Islands when it achieved independence in 1810-16. Great Britain, during its era of imperial expansion, simply took the islands by force. Those Americans who believe that this hemisphere should be free of foreign control, those who oppose colonialism and those who carefully examine the historic will, I am confident, conclude that Argentina's case is both legitimate and just.

ESTERAN A. TAKACS,
Argentine Ambassador to the U.S.,
Washington, D.C.

A SMALL LIGHT OF TRUTH SHINING IN LITHUANIA

Mr. PROXMIER. Mr. President, the plight of ethnic and religious minorities in Soviet bloc countries would be almost impossible to discover without the courageous efforts of those who work for an underground newspaper. Today, I wish to pay tribute to all those Lithuanian Catholics who daily risk persecution, imprisonment, and even death to bring the truth to light from the darkness of Soviet domination through their work on a very important underground newspaper.

Nineteen hundred and eighty-two marks the 10th anniversary of The Chronicle of the Catholic Church in Lithuania. The Chronicle is a testa-

ment to the persecutions which the Catholic Church and its members are suffering at the hands of the Soviet authorities in Lithuania. Lithuania, a small, previously independent Baltic State, was forcefully occupied by the Soviet Union in 1940 when Hitler and Stalin signed a pact that divided up Poland and Eastern Europe between them. At the time, 85 percent of Lithuania's population was Roman Catholic. Since that time, the Soviets have moved to destroy the Church's influence through mass deportation, imprisonment, assassination, intimidation, disinformation, and other deplorable measures. But even though such measures continue today, the Soviets have not been able to break the spirit of these remarkable people.

Since 1972, *The Chronicle* has courageously reported hundreds of instances of anti-Catholic and antireligious activities by the Soviet authorities. On the occasion of the 10th anniversary of *The Chronicle*, the translation editor explained the paper's purpose.

In 1972, the *Chronicle*, clandestinely published in Lithuania, began to reach the free world at irregular intervals. Primarily intended to keep Catholics informed of the situation of the Church there, these Lithuanian underground newspapers also serve as a constant appeal to the free world not to forget the plight of a people struggling against overwhelming odds to defend their religious beliefs and to regain their basic human rights.

In a tribute to the *Chronicle* appearing in the Catholic *Twin Circle*, March 21, 1982, Dick Goldkamp provides insight into the newspaper's significance for persecuted religious groups:

What makes the *Chronicle* a remarkable testament to the human spirit is one thing and one thing alone: its unique stature as a human rights document. Its very survival, not to mention its continuous appearance at fairly regular intervals over the last decade, has required of its creators a degree of ingenuity and personal courage possessed by few journalists anywhere. The *Chronicle* is a running account of a people under siege for their religious beliefs. In short, it is the story of a modern Church of the Catacombs.

Mr. President, I am not suggesting that the acts of repression conducted against the Catholics in Lithuania as recorded in the *Chronicle* are specific instances of genocide. Yet, the pattern of consistent and constant violation of human rights of religious groups reveals a rather crude attempt by the Soviets to damage the stature of these groups and to dehumanize their members. The Soviets, by degrading and dehumanizing these groups, are attempting to create domestic environment where they are capable of deluding their own citizens into believing that these groups are the source of all the nation's problems. Half a century ago, Hitler similarly dehumanized the Jews and targeted national discontent against them with genocidal success. It

is just that type of occurrence that must be prevented from ever happening again.

I call on the Senate to demonstrate its support for the integrity and stature of all religious groups by giving its unwavering support for the Genocide Convention. I ask unanimous consent that Dick Goldkamp's article be printed in the *Record*.

There being no objection, the article was ordered to be printed in the *Record*, as follows:

PLIGHT OF LITHUANIA—UNDERGROUND NEWSPAPER TELLS GUTSY STORY OF THE CHURCH'S SURVIVAL

(By Dick Goldkamp)

March 19, 1982, marks a little known, but significant milestone in the annals of modern journalism. It is the 10th anniversary of the launching of the gutsy little *Chronicle of the Catholic Church in Lithuania*.

Most Americans with any knowledge of Lithuania at all can probably identify it only as the native land of Simas Kudirka, the Soviet seaman who tried to defect from a Russian fishing trawler plying the waters off the coast of Martha's Vineyard in Massachusetts in November of 1970. His famous escape attempt was later memorialized in a CBS television documentary aired in early 1978.

But there is a great deal more to be said about Kudirka's homeland, as *The Chronicle* eloquently demonstrates.

Typographically, its publication from the very beginning has been positively prosaic. It was generally typewritten on onionskin paper, in fact. It goes into print only five or six times a year. Its distribution system could charitably be described as archaic by sophisticated American standards. And in an era in which electronic innovation has become commonplace, it can claim no great technological "breakthroughs."

What makes it a remarkable testament to the human spirit is one thing and one thing alone: its unique stature as a human rights document.

Its very survival, not to mention its continuous appearance at fairly regular intervals over the last decade, has required of its creators a degree of ingenuity and personal courage possessed by few journalists anywhere. The *Chronicle—Lietuvos Kataliku Baznycios Kronika* in the mother tongue—is a running account of a people under constant siege for their religious beliefs. In short, it is the story of a modern Church of the Catacombs.

MAGAZINE'S UNVEILING

Its unveiling in early 1972 preceded by only a few days the presentation of an extraordinary petition to Kurt Waldheim, who was Secretary-General of the United Nations at the time.

Addressed to the attention of Leonid Brezhnev, General-Secretary of the Communist Party in Moscow, it was an appeal backed by the signatures of 17,054 Lithuanian Catholics, complaining of flagrant violations of their religious freedom by the Soviet Union. Specifically, it protested the treatment of Fathers Juozas Zdebskis of Prienai and Prosperas Bubnys of Girkalnys, both of whom were tried and sentenced to a year in prison. The charge against them: teaching catechism to children.

More than anything else, perhaps, those two trials in November 1971, opened a new

chapter in the history of one of the world's forgotten ethnic minorities.

For most of the period between the two great wars, the tiny country that lies on the east coast of the Baltic Sea adjacent to Poland had prospered as an independent nation, barely larger than the state of West Virginia. Though the country had been overwhelmingly Catholic for centuries, religious minorities were on the whole treated generously by the Republic of Lithuania.

Under terms of the secret protocol of 1939 between Stalinist Russia and Hitler's Germany, however, the Red Army invaded the country in 1940. Apart from a three-year Nazi occupation during World War II, the country has been under the domination of the Communists ever since.

For over a quarter of a century, little Lithuania was left to its own devices to deal with its totalitarian overload. While the United States has never officially recognized the Russian takeover, the New York Times Index very early bowed to the proletarian promise of a Marxist Utopia by quietly changing the listing in its annual reference guide from "Lithuania" to "USSR-Baltic Republics" between its 1945 and 1946 editions. Lithuania began losing its identity for the Western press, and accounts of life on the "amber coast" gradually became a matter of little interest.

GUERRILLA RESISTANCE

Only dribbles of information about guerrilla resistance leaked out of the country for some years after the war, despite the fact that an estimated 50,000 partisans were killed, and massive deportations were taking place during that time. But with the inauguration of the Vatican policy of *Ostpolitik* under Pope Paul VI in the 1960's and the advent of detente under the Nixon Administration in America, Lithuania's Catholic population gradually came to fear that Rome and the West could be misled by the Kremlin's officially laundered version of life in their homeland—viz., that Lithuanians had decided to adapt their country and their customs to the Soviet way of life as painlessly as possible.

The appearance of *The Chronicle* quickly shattered any such illusion.

Collaboration with the Soviet regime, in fact, came in for especially harsh criticism from its founders. "No one in Lithuania believes that dialogue is possible with the Soviet government," said the chroniclers in an early edition. They went on to add that "... the Catholic Church in Lithuania will lose the people if it should lose their confidence because of bootlicking the Soviet government. Something similar has already happened to the Russian Orthodox Church."

From infancy onward, *The Chronicle* began to develop a nationwide network of news gatherers dedicated to telling the truth as they saw it, not by boldly editorializing to dramatize their cause in the extreme. They were part of the *Samizdat* press: forced to work underground, outside the watchful eye of the KGB. "Staff members" couldn't afford the luxury of worrying about keeping up with the competition. They were more concerned about keeping themselves out of jail.

The *Chronicle* soon became a Baltic thorn in the side of Mother Russia.

The first of a periodic series of security sweeps by the KGB, in fact, was conducted on Nov. 19 and 20 of 1973. During succeeding months, the chroniclers began to detail the story of dozens of unannounced KGB

raids on homes, apartments, even church sanctuaries in their search for manuscripts, typewriters, prayer books or any other kind of incriminating evidence allegedly linked to publication of *The Chronicle*. Several people were arrested and sent to prison for their connection with the paper, including Petras Plumpa-Pluira for helping to duplicate the journal, and Nijole Sadunaite for typing manuscripts. The harshest sentence initially went to Sergei Kovalev, the Russian editor of *Moscow's Chronicle of Current Events*, for his complicity in reprinting information about Lithuania. But volunteers were always waiting in the wings to replace *Chronicle* personnel when they were incarcerated.

SECURITY POLICE

Over a period of time, the chroniclers detailed accounts of security police moves to recruit young seminarians as informers by the use of bribes, threats or any other means they could devise to create an espionage network within the Church. While there was no evidence of the KGB succeeding on a grand scale, *The Chronicle* faithfully recorded instances where they did win over susceptible students. What made the situation excruciating was the fact that the Church had, many years earlier, been forced to close all of its seminaries but the one in Kaunas. Thereafter, the government set annual limits on the number of young men allowed to enter it. In addition, all diocesan and parish appointments had to have the approval of the state Council for Religious Affairs.

Ironically, as Lithuanian authority V. Stanley Vardys of the University of Oklahoma points out, there was greater religious freedom allowed under Lenin's revolutionary decree on separation of Church and State in 1918 than under subsequent legal sanctions applied to Lithuania. Soviet law under Lenin allowed for the private teaching of religion. Under both the Stalin (1936) and Brezhnev (1977) constitutions, freedom to perform religious ceremonies was allowed, but the right to disseminate religious information was not. In effect, young men were permitted to become priests, but then were denied the chance to instruct children the Faith.

CHURCH INFLUENCE

It was merely another sample of a massive Soviet push to eliminate Church influence in an effort to control the population. Periodically, the *Chronicle* delved into Soviet efforts to undermine the beliefs students learned at home by means of forcible instruction in atheism in Lithuanian schools. In one ludicrous extreme drawn from a school in Kaunas, a teachers' manual for 3rd and 4th grade math classes contained detailed instructions on how to get pupils "to calculate the unnecessary expenses of people needed for maintaining churches and priests" by showing them how the money might be better used "for improving the life of the working people."

Perhaps the worst perversion of the government's officially proclaimed policy allowing freedom of religion, however, began in 1954 in the seaport city of Klaipeda. For years, the Catholic population had been allowed use of a small German church in the city, but had gradually outgrown it. During the thaw following the death of Stalin, the parish pastor was granted a permit by the government to construct a new church. Authorities even offered the use of stockpiled construction materials, despite the scarcity of such supplies in the war-torn city at the time.

While the chosen site was in a marshy area, enthusiastic volunteers pitched in after regular work hours to haul dirt in small carts and baskets with others collecting loose bricks lying in ruins throughout the city and hauling them to the work site. Over a period of six years, parishioners contributed about three million rubles to the cause as well.

Upon completion of construction, the faithful gathered at the church site on the feast of the Assumption of Mary in 1960 for a consecration ceremony, only to find the gates to the church boarded up by the government. The building was subjected to various acts of vandalism by army units in succeeding weeks; two priests were later arrested and sentenced to prison over the incident; and the church was eventually expropriated by the government and turned into a philharmonic hall.

REPEATED APPEALS

For some time, according to *The Chronicle*, neither Lithuanians nor Russians living in Klaipeda would attend scheduled concerts. On occasion, as many as 50 artists came to the hall to perform for an audience of as little as five people. Repeated appeals from the people to recover the building for use as a church were rebuffed by Soviet authorities.

In 1979, copies of a massive petition containing about 150,000 signatures were smuggled out of the country to America in an effort to enlist the support of world opinion behind the cause. Incredibly, it went by almost unnoticed by the American press. It did not even arouse the interest of the paper that prints "all the news that's fit to print" . . . purportedly because it involved a situation that was no longer "new."

"We've learned from experience, that whenever we bring anything to the attention of the New York Times after it surfaces with us, they automatically refer it to their Moscow bureau to check out," says Father Casimir Pugėvicius, a *Chronicle* translation editor for the Lithuanian Catholic Religious Aid Center in Brooklyn. "With their liberal bias, even human rights violations that are basically distasteful to them are generally relegated to conservative groups."

Despite the valiant efforts of *The Chronicle*, things apparently haven't changed much since 1972, when a copy of the smaller petition was handed out to Secretary-General Waldheim at the UN. While that appeal was ultimately aimed at Brezhnev, it was purposely routed through Waldheim with an accompanying memorandum, precisely because of the savage repression of human rights complained about in the petition itself. Queried about it at the time, Waldheim refused to comment; the appeal did not stem from an official government source, as required by normal UN procedures.

VARIOUS COMPLAINTS

Among various complaints, the 1972 petitioners stated: " . . . the children of believing parents are being taught atheism against their will in school; they are even being forced to speak, write and behave at variance with their conscience, yet no one reprimands such violators of freedom of conscience or tries to bring them to justice."

To this day, no one is certain anything was ever done about it . . . either by the Soviet Union or even by the United Nations.

THE CASE AGAINST THE MX NUCLEAR MISSILE GROWS

Mr. PROXMIRE. Mr. President, on July 21, the New York Times carried a letter by two Wyoming ranchers which makes a devastating case against at least one mode of basing for the MX missile. The case is primarily based on the failure of the Defense Department to frankly and fully explain to the citizens of the States where the missile might be based just what that missile will do to the communities they live in and love.

I ask unanimous consent that the letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

A CALL FROM THE PLAINS: WHERE ARE WE GOING WITH THE MX MISSILE?

DEAR SECRETARY WEINBERGER: Thank you, Mr. Secretary, for taking the time to visit with us here in Cheyenne, our "Magic City of the Plains," before you make your next MX decision.

Whether you decide to concentrate the missiles in a "dense pack" in a single state or to spread them out in several different parts of the country, we hold reservations about the proposed land-basing of the MX system here in Wyoming, and we would like to share them with you.

Many of your own advisers have counseled that submarines at sea would provide the cheapest and least vulnerable basing mode. Still, however, you pursue land basing.

We feel compelled to ask you—why are you preoccupied with land basing?

We are preoccupied with a fear of it. As ranchers, let us tell you what will happen if the MX comes to Western soil.

Our vital agricultural economy will suffer irreparable damages as rangeland, farmland and valuable water resources are appropriated for MX expansion. Existing water rights in our semiarid region will become weak and tentative as requirements and demands for water increase.

A boom syndrome will arise and hundreds of millions of dollars in public works projects will fall on the backs of present Western residents. The burden of impact will be awesome, as every aspect of our Western way of life becomes affected.

Mr. Secretary, public support for this MX proposal can be sustained only if our citizens, ranchers and farmers are kept from finding out about the extensive nature of deceptively basing the missiles.

And this is exactly what is happening. We are getting no answers, no discussion of impact. Officials ignore it, and the silence they create is deafening.

Here in the West, open discussion has always been our way of making decisions. In fact, the Democratic Party of the state of Wyoming has come out against land basing after just such discussion.

We believe our concerns are legitimate and full dialogue is the best way to get meaningful answers to our questions.

How much water will each variation of the MX system take?

How much land?

How will it affect our traditional economic activities centered on the land?

How big will the system grow to be?

One of America's strengths is its ability to thrive amid controversial debate.

Mr. Secretary, the stakes of the MX debate are no less than the economic survival of the agricultural community as we know it. The proposed trade-off of our rural heritage for a questionable MX program does not make good sense.

We who live in Wyoming, Nebraska and Colorado are doing our patriotic part right now as hosts to the Minuteman silos. We have a fine relationship with the Air Force and Warren Air Force Base, and we do not wish to risk altering this beneficial relationship with a barrage of unsettling MX deployment variations of political rather than strategic origin.

The latest "trial balloon" is your suggestion of the "dense pack" basing mode. That is, placing 100 missiles within a 10-square-mile area.

This foot-in-the-door approach could use the 100 new dense-pack silos to store the first 100 missiles while military and Government officials work to buy time to surmount the political obstacles and neutralize resident opposition.

The next step could be to bring in another 100 MX missiles to beef up the original system, thereby making it more survivable. Then would come the huge, deceptive mobile-basing umbrella to give the system adequate, protection.

The end result could easily be an immense MX compound, gobbling up our resources with the swiftness of a prairie fire.

Mr. Secretary, spare us this fate. Here in the high plains-Rocky Mountain region we are eager and proud to fulfill our obligation to our nation and state.

But we would like you to know that we also are earnestly moved by the words and thoughts of the noted Wyoming historian, T. A. Larson. His words may be destined to guide each of us through this period of national decision.

He said, "Perhaps it is not yet time to grieve, but surely it is time to reflect and to ponder whether what the world wants from Wyoming is worth more than what Wyoming already offers the world."

Lest we forget, Wyoming already offers our world a very special heritage.

With warm regards,

Sincerely,

ROD KIRKBRIDE,
MAE KIRKBRIDE.

TERRORISM IN PARIS

Mr. KENNEDY. Mr. President, I strongly deplore the vicious terrorist attack yesterday against a Jewish restaurant in Paris, which killed 6 persons and wounded 22 others. Among these were four Americans—two killed and two wounded—and I join in offering my deepest condolences to all the victims of this terrible incident. From the accounts of both the French Interior Minister and the mayor of Paris, there can be little doubt that anti-Semitism was the ugly motive, and that once again innocent men, women, and children are the victims of terrorist violence which has spread through the Middle East, Europe and other parts of the world.

The outrage of this attack is worsened by the fact that three other attacks have reportedly occurred against French businesses and people with

Jewish connections in recent days, and that authorities have been unable to make any arrests following the bombing and killing of four persons at a synagogue in Paris in October 1980.

I commend the President of France, Francois Mitterrand, for his strong and forthright repudiation of this latest act of terrorism, and for undertaking to do everything possible to bring the perpetrators to justice. Swift and effective action is essential to punish the terrorists, to deter such acts in the future, and to uphold the rule of law.

ORDER OF PROCEDURE

Mr. BAKER. Madam President, as I found over the years as minority leader and now as majority leader sometimes the Senate does what it wants to do instead of what the leadership suggests. Today is one of those days, obviously.

I had hoped and expected that we could have morning business until 11:30 a.m. and then a brief time to resume debate on the supplemental appropriations bill from 11:30 a.m. until 12 noon.

Unfortunately, that does not coincide with the schedule requirement of other Senators.

We will resume consideration of the supplemental appropriations bill at 2 p.m., but I find the cupboard is bare at this moment.

RECESS UNTIL 2 P.M.

Mr. BAKER. Therefore, Madam President, I ask unanimous consent that the Senate stand in recess now, instead of at 12 o'clock, and continue in recess until 2 p.m. today.

There being no objection, the Senate at 11:38 a.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. DANFORTH).

SUPPLEMENTAL APPROPRIATIONS ACT, 1982

The PRESIDING OFFICER. The Senate will now resume consideration of the pending business, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (H.R. 6863) making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes.

The Senate resumed consideration of the bill.

Mr. STAFFORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. (Mr. LUGAR). Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the bill H.R. 6863.

Mr. HATFIELD. Mr. President, I urge all of my colleagues who expect to offer amendments to the supplemental appropriations measure that is now pending to make those amendments known to the managers of the bill, Senator PROXMIER and myself, in order that we may be able to try to make a judgment on the time factor under which we have to operate.

I remind my colleagues that the leadership has indicated we will go at least until 9 o'clock tonight—I say at least; probably that will be the figure—the target time of 9 o'clock, hoping that we can perhaps complete all of the bill, but if not then at least to complete the bill early tomorrow because we have 140 committee amendments to this bill. It will require some time to work out the paperwork between the House and the Senate before we can go to conference. We have to go to conference by Thursday of this week and complete conference on Thursday in order to meet the time frames that we have to then complete the paperwork to get the bill back to the House floor by Wednesday of next week, to be voted on by Wednesday of next week, and then over to the Senate in order for the Senate to take action on the conference report by Thursday of next week.

Those are all within the time frames that had been agreed to as it relates to debt ceiling limitation, as it relates to other issues that may arise during the debt ceiling limitation question. So I put my colleagues on notice at this time that if we get into a situation where there are no amendments to be offered, I shall ask for third reading of the bill. We cannot tarry by having half-hour and 1-hour delays until someone decides to come to the floor to offer an amendment. We were here all day yesterday to do business and we had no business to do on this pending bill. I am very anxious to get this bill completed as much as possible, if not totally, today in order to meet that time frame.

I yield to the Senator from Vermont. Mr. STAFFORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. STAFFORD. Mr. President, I appreciate the able chairman yielding to me.

Mr. President, following discussions with the most able Senator from Florida last Thursday (Mr. CHILES), I find as chairman of the Committee on Environment and Public Works I am forced to raise a point of order with re-

spect to the committee amendment on page 67, lines 9 through 15. The point of order is that it is legislation on an appropriation bill and therefore in violation of rule XVI.

Mr. ANDREWS. Mr. President, we concede that point of order.

The PRESIDING OFFICER. The Chair sustains the point of order. The amendment specified by the Senator which begins on page 67, line 8 through line 15, is thereby stricken from the bill.

Mr. HATFIELD. Mr. President, if I understand the ruling of the Chair, the consequence of that ruling is that this amendment is now deleted that has been raised as a point of order by the Senator from Vermont. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. I thank the Chair.

Mr. DANFORTH and Mr. STAFFORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont still has the floor.

Mr. STAFFORD. Mr. President, I have an inquiry for the distinguished chairman of the Appropriations Transportation Subcommittee (Mr. ANDREWS). The report on the supplemental appropriations bill contains language which directs that of any uncommitted discretionary bridge funds currently and prospectively available, the highest level of attention shall be given to certain bridges which are listed.

There are now approximately 40 bridges that are under construction and that are being funded by the discretionary bridge program. In addition, approximately another 30 bridges have received legislative history as being eligible for funds from this program.

Am I correct that the language in the supplemental appropriations report listing five bridges is intended only to state that these bridges are eligible to be considered for discretionary bridge funds, and that this language is not intended to place a higher priority on these bridges than on those now under construction or those with legislative history?

Mr. ANDREWS. The distinguished Senator from Vermont is correct in his interpretation of this report language.

Mr. STAFFORD. I thank the distinguished chairman for his clarification of this language.

Mr. President, I have one additional inquiry for the distinguished chairman of the Transportation Appropriations Subcommittee (Mr. ANDREWS) and the distinguished ranking member (Mr. CHILES). The report under Federal-aid highways contains additional language concerning several high occupancy vehicle lane projects which include approaches and related parking structures. The continued eligibility for

Federal-aid interstate construction funds for these projects is discussed.

Am I to understand that it is the intention of the Appropriations Committee to direct the Department of Transportation to fund from the interstate account these parking garages?

Mr. ANDREWS. Mr. President, as the distinguished chairman of the Subcommittee on Transportation of the Committee on Environment and Public Works knows, the Highway Act of 1981, Public Law 97-134, stated that "those high occupancy vehicle lanes (including approaches and all directly related facilities) included in the interstate cost estimate for fiscal year 1981" will continue to be eligible. It has been brought to the subcommittee's attention that the Federal Highway Administration has applied a restrictive interpretation to the language which has eliminated several such projects even though their cost—including the cost of associated facilities—was included in the 1981 interstate cost estimate. We were merely attempting to add further clarity to the congressional intent on this matter because of the confusion.

Mr. STAFFORD. Mr. President, I thank the distinguished chairman for his remarks and wish to assure him and the Senator from Florida (Mr. CHILES) that the Committee on Environment and Public Works intends to review this matter when S. 2574, the Federal-Aid Highway Act of 1982, is considered by the Senate next month. Several questions regarding eligibility of parking structures associated with HOV lanes have been brought to our attention. The committee, under its jurisdiction as the authorizing committee, intends to further clarify the language contained in the 1981 Highway Act with respect to these problems and we will take action in regard to these matters at that time. Issues of this nature should be clarified by the authorizing committee since it knows what was intended by the statutory language.

Mr. ANDREWS. Since the Environment and Public Works Committee is the authorizing committee, we would welcome your review and resolution of this matter in light of the highway statute as adopted, including the appropriate legislative history made on the subject in the debate on the 1981 Highway Act.

The reason we mentioned it in the record was simply that there was confusion over where these funds would go and we wanted to make crystal clear what the intent of the Senate and the Congress was. We appreciate your colloquy and your joining us in making it beyond any type of misinterpretation.

Mr. STAFFORD. I very much appreciate, Mr. President, the cooperation of the chairman of the subcommittee and the cooperation of the chairman

of the full committee in getting this colloquy in the RECORD.

Mr. HOLLINGS. Mr. President, while we are discussing the need to repair our bridges, I am reminded of the terrible condition of some of our vital bridges in South Carolina.

We need to focus special attention on this problem in our Federal Highway System. Many of our States like my State have become dependent on the Federal Government for the construction, improvement, and replacement of bridges. Unless plans are made now, in the next 10 years we are going to find ourselves with staggering bridge replacement costs and no funds to accomplish needed projects.

In my home community of Charleston, S.C., our unique geography, and extensive rivers and marsh lands cause a severe problem in the construction of new highway facilities as well as maintaining and the replacement of existing bridges. Charleston, S.C., is a major U.S. port for general bulk and container cargo. We have extensive military facilities consisting of the U.S. naval base, U.S. naval weapons station, Polaris missile facility and U.S. Air Force base. Most military personnel are housed throughout the Greater Charleston area and are required to cross several bridges before reaching their military station. Many of our bridges are at a point that serious consideration needs to be given to their replacement. The amount of bridge replacement funds available to the State of South Carolina is nowhere sufficient to meet the needs of Charleston, along with other less known areas of South Carolina.

The continuing growth in automobile traffic, population increases in major Sun Belt urban areas and advancing age of many of the bridges on the Federal-aid highway system indicate an urgent need for Federal assistance in rehabilitation and replacement of many of our most severely deteriorating bridges.

The Grace Memorial Bridge located on U.S. Route 17 in Charleston, S.C., poses a serious health and safety problem for residents of that area. Because of its age and extreme obsolescence for today's traffic demands the Federal Government should move with Federal aid as soon as possible. The Grace Bridge traverses the Cooper River and Town Creek and connects U.S. Route 17 between Charleston and Mount Pleasant, S.C. The bridge carries two westbound lanes of traffic over a distance of 10,212 feet on a 20-foot-wide roadway.

The bridge was constructed in 1929 and has since been repaired or modified several times. Originally serving as the only connection across the Cooper River to the city of Charleston, the bridge was converted to one-way (westbound) traffic after the com-

pletion of a three-lane parallel facility (the Silas Pearman Bridge) in 1966.

The Grace Memorial Bridge is over 50 years old and repairs to correct major deficiencies in it have been necessary on five different occasions within the last 15 years, not counting over \$2 million worth of repairs currently underway. Moreover, the bridge was designed for a 15-ton, two-axle truck. A recent engineering report states that "the design capacity is deficient under present traffic as well as under current design standards for a bridge serving a primary highway. Thus repairs to damaged members will not make the bridge suitable for unrestricted traffic."

The average daily traffic on the Grace Memorial Bridge was approximately 19,000 vehicles per day in 1979. During the next 10 years, however, the population of the suburban area to the east of the bridge is expected to increase by over 32 percent. In addition, the South Carolina State Ports Authority has recently opened a new port facility east of the Cooper River, which will generate over 2,100 jobs in the Mt. Pleasant area. By 1995, the total daily traffic crossing the Cooper River (in both directions) is estimated to average 79,700.

The ramifications of a failure of the Grace Memorial Bridge would be devastating. The three primary effects would be:

First, loss of life and property. The potential immediate effects of the collapse of the bridge, or a portion of the bridge, are terrible to contemplate. Under normal flow conditions, during peak periods, as many as 131 vehicles are on the Grace Memorial Bridge at any one time. The bridge rises to a vertical clearance of 150 feet over the Cooper River and 135 feet over Town Creek.

Second, economic loss. If the Grace Memorial Bridge were impassible, the three-lane Pearman Bridge would have to carry all the traffic in both directions across the river. This would be over 42,000 vehicles per day using current figures, growing to over 79,000 vehicles per day by 1995. The traffic congestion caused by this situation would be severe enough to devastate the economy of the area east of the Cooper River and seriously damage the economy of lower South Carolina. The traffic congestion would become a detriment to residential location in the area, and commerce would likewise be deprived of anticipated growth. The Wando Terminal of the South Carolina State Ports Authority, will be generating up to 400 truck trips per day.

Third, threat to national security. Upriver from the Grace Memorial Bridge are the Charleston Naval Base and Shipyard, the Naval Weapons Station and the Polaris Missile Facility. Access to these major defense facilities could be easily be blocked should a

portion of the Cooper River Bridge collapse.

Preliminary estimates indicate that construction of a new three-lane replacement for the Grace Memorial Bridge with necessary approaches would cost over \$220 million in 10 years assuming an annual inflation rate of 7 percent. This new bridge would run parallel to the existing structure, and tie into existing streets at each end.

In either form, the project could not be funded via the Federal aid funds allocated to the Charleston area, since no more than \$31 million can be expected from existing Federal sources over the next 6 years.

The State of South Carolina receives an annual allocation of Federal bridge replacement and rehabilitation funds. However, the 1980 allocation for the whole State was only \$14 million.

The Federal Government should assist the State of South Carolina in replacing this bridge through the Federal bridge replacement program or some other appropriate funding source. Due to the high cost of replacing the structure, local officials should be allowed to pay any match of Federal funds through the use of toll revenues.

Other bridges serving the Charleston area should be replaced with the aid of additional Federal funds. These bridges include:

THE WAPPOO CUT BRIDGE ON SOUTH CAROLINA 171

This drawbridge, built in 1956, connects the primarily residential area of James Island with approximately 29,000 people to the mainland across the Intracoastal Waterway. Recent population projections place James Islands' population at approximately 43,000 by the year 2000. Frequent openings of the bridge's draw cause extended travel interruption, wasted energy, environmental pollution, and frustration on the part of the 29,000 motorists who cross it daily. Prolonged failure of the bridge is extremely hazardous in time of natural emergency such as that imposed by a hurricane or flooding. Failure of the bridge to open for waterway traffic poses dangerous conditions for commercial and pleasure water craft especially during a time of evacuation for a hurricane or other disaster.

MAYBANK HIGHWAY BRIDGE ON SOUTH CAROLINA ROUTE 700

This drawbridge, built in 1951, connects James Island with Johns Island the largest inland island in the eastern United States. Because of its advancing age and inadequate design, it is totally unsuited to today's traffic conditions which place approximately 10,000 vehicles per day on it. Additional demand is placed upon its operations by two marinas, one on each side of the bridge, which provide dockage for pleasure craft and access to

the Intracoastal Waterway and the Atlantic Ocean. Traffic loads have increased significantly in the past few years due to urban expansion and massive developments on the sea islands.

LIMEHOUSE BRIDGE ON MAIN ROAD, SOUTH CAROLINA ROUTE 20

This drawbridge connects Johns Island with the mainland. It was built in 1958 and currently carries approximately 6,900 vehicles per day. It provides vital linkage from the mainland to Johns Island, Wadmalaw Island, Klawah Island, and Seabrook Island.

BEN SAWYER BRIDGE ON SOUTH CAROLINA 703

The Ben Sawyer Bridge was built in 1945. This two-lane drawbridge over the Intracoastal Waterway connects the residential sea islands of Sullivan's Island and the Isle of Palms with the mainland.

Average weekday traffic on the bridge and causeway is about 11,000 vehicles per day. However, weekend traffic during the summer months will cause traffic volumes to exceed 28,000 vehicles per day. In the event of a natural disaster, such as with a hurricane threat, it is necessary to evacuate all 5,500 residents of the islands on short notice. Evacuation is hindered, however, because of the openings of the bridge for river traffic attempting to avoid the potential threat. The excessive traffic, age and deterioration of the draw, and high volume of river traffic on the waterway causing frequent bridge openings, requires that every consideration be given to replacing it at the earliest possible date.

COSGROVE AVENUE BRIDGE ON SOUTH CAROLINA ROUTE 7

This bridge crossing the Ashley River was originally built in 1953 and has been repaired and widened frequently since. It connects the West Ashley area of Charleston with the northernmost section of the city of Charleston and with North Charleston. This bridge is a major transportation facility for employees of the U.S. naval base and naval shipyard. Daily the approximately 57,500 vehicles per day crossing the six-lane facility create excessive peak-hour traffic congestion.

TWIN ASHLEY RIVER BRIDGES ON U.S. 17

These two drawbridges, operating as a one-way pair provide a vital link between the West Ashley area and Peninsula Charleston, as well as for through north-south movements along U.S. 17. Three lanes are provided on the southbound bridge which was built in 1926. Four lanes are provided in the northbound bridge which was built in 1961. Currently, they carry about 72,500 vehicles per day. The deterioration of these bridges, especially the southbound bridge, creates serious traffic problems for commuters traveling to and from Charleston on a daily basis.

JAMES ISLAND BRIDGE AND EXPRESSWAY

This bridge has been proposed for construction since 1968. It is designed to parallel the Ashley River bridges and to carry traffic between James Island, West Ashley, and Peninsula Charleston. The 1995 traffic assignments indicate this bridge will carry approximately 34,100 vehicles per day. Because of the serious conditions present with the existing Ashley River bridges, \$4.4 million was granted in Federal bridge replacement funds for final design and right-of-way purchase.

All of these bridges currently need replacement or will need to be replaced in the next 20 years. It currently takes over 10 years to adequately plan for bridge replacement. Therefore, it is imperative that we proceed as rapidly as possible to plan for their replacement.

UP AMENDMENT NO. 1193

(Purpose: Make amendment regarding appropriations for various railroad activities)

Mr. DANFORTH. Mr. President, on behalf of myself and Senator KASSEBAUM, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself and Mrs. KASSEBAUM, proposes an unprinted amendment numbered 1193.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 68, insert the following new paragraph immediately after line 9:

"Unobligated balances of appropriations under this heading in the Department of Transportation and Related Agencies Appropriation Act, 1982 (Public Law 97-102; 95 Stat. 1442) are hereby rescinded, and an amount equal to such balances is appropriated, to remain available until expended."

On page 69, strike line 19.

On page 70, line 6, strike "September 30, 1983," and insert in lieu thereof the following: "expended. Notwithstanding any other provision of law, the authority granted under this heading in the Department of Transportation and Related Agencies Appropriation Act, 1982 (Public Law 97-102; 95 Stat. 1442) and prior acts shall continue during the period in which appropriations remain available for this purpose under the following heading:

"DEPARTMENT OF THE TREASURY

"OFFICE OF THE SECRETARY

"Investment in Fund Anticipation Notes".

On page 73, strike line 4.

On page 73, line 11, strike "September 30, 1983," and insert in lieu thereof the following: "expended. Unexpended balances under this heading in the Department of Transportation and Related Agencies Appropriation Act, 1982 (Public Law 97-102; 95 Stat. 1442) and prior acts are hereby rescinded,

and an amount equal to such balances is appropriated, to remain available until expended."

Mr. DANFORTH. Mr. President, this amendment deals with appropriations for important railroad assistance programs. One of these programs is the railroad preference share program which provides low-interest loans for the rehabilitation and improvement of railroad lines and facilities. The second program is the local rail service assistance program which provides grants to States threatened with railroad abandonments. Congress has already authorized and appropriated funds for these programs. However, these funds will expire at the end of the fiscal year if not obligated by that time.

I, and other members of the Commerce Committee, believe that the expiration of these funds would have serious consequences in terms of failure to complete projects necessary to our national rail network.

The amendment I am offering on behalf of myself and Senator KASSEBAUM is one that does two things: It rescinds existing appropriations for these programs; and it provides new appropriations in equal amounts, which are to remain available until expended. This amendment has no net budgetary impact, and is one that has been agreed upon by the Appropriations, Budget, and Commerce Committees. I urge my colleagues to support the amendment.

Mrs. KASSEBAUM. Mr. President, I am pleased to join Senator DANFORTH in offering this amendment to the rail services assistance and the redeemable preference shares provisions of the supplemental appropriations bill presently before the Senate. This amendment will insure the continued availability of funds previously authorized and appropriated for the purchase and rehabilitation of railroad lines and, in particular, the lines of bankrupt carriers such as the Rock Island Railroad.

Congress established the redeemable preference program back in 1976 when the rail industry was in serious financial trouble and the rail network in need of repair and improvement. This program provides for Federal financial assistance for the rehabilitation of lines and the acquisition of lines abandoned by the bankrupt Rock Island and Milwaukee railroads. Nearly \$600 million has been appropriated under this program; \$500 million of that amount has already been obligated. These moneys have permitted some marginal but important railroads to eliminate deferred maintenance and to provide safer, more efficient rail service. The program has also helped States such as Kansas, which have been threatened with the loss of essential rail service due to railroad bankruptcies, to maintain such service.

Hearings conducted by the Senate Commerce Committee have confirmed

the success of this program. Unfortunately, because of delays, all of the appropriated funds have not been obligated. One of the primary reasons for the delay has been the difficult negotiations with the trustee of the Rock Island Railroad for the purchase of lines formerly operated by the Rock Island. These negotiations are now close to being completed. In view of this, I believe it is important that the funds which have previously been approved by Congress remain available.

The amendment which Senator DANFORTH and I offer today will permit the expenditure of these funds for those projects which have already been earmarked by Congress and are in the final stages of contract negotiations. This amendment will not have any net budgetary impact. Funds previously appropriated but not obligated by the end of this fiscal year would be rescinded and a like amount would be appropriated to remain available until expended.

Mr. President, I understand that the Budget Committee and the Appropriations Committee are in agreement with this amendment. I urge my Senate colleagues to join in support of this measure.

Mr. ANDREWS. Mr. President, as usual, the Senator from Missouri and the Senator from Kansas have come up with clarification language that would have been included by the subcommittee had it been called to our attention before the time of the markup of the bill. We are grateful to our two colleagues for calling it to our attention.

As the Senator from Missouri has pointed out, neither the Budget Committee nor the Commerce Committee has objection to this amendment.

The amendment will have no net impact on budget authority. With the included rescissions, we are assured the budget authority will be scored as offsetting in fiscal year 1982.

The committee will be pleased to accept this amendment. I thank the Senator from Missouri and the cosponsor, the Senator from Kansas, for their contribution.

Mr. PROXIMIRE. Mr. President, will the Senator from Missouri yield?

Mr. DANFORTH. I yield.

Mr. PROXIMIRE. I understand that the \$65 million number has already been authorized and appropriated. It covers railroads throughout the country. It is not any one area or one State. Is that correct?

Mr. DANFORTH. That is correct.

Mr. PROXIMIRE. I have also asked the staff the position of the Office of Management and Budget, and I understand they have no problems and that there is no objection.

Mr. ANDREWS. That is correct.

Mr. PROXMIRE. I missed the Senator's remarks, and I apologize. I have no objection.

Mr. DANFORTH. I thank the managers of the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1193) was agreed to.

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ANDREWS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MELCHER. Mr. President, on page 2 of the bill before the Senate, beginning on line 22 and extending over to line 4 of page 3, is a proposal by the Appropriations Committee that an amendment be enacted to the Child Nutrition Act of 1966. This particular act provides some guidance and some assistance to the school lunch programs in particular, to make sure that the program in each school follows good nutrition policies and provides good nutrition in the school lunches.

What Congress has done previous to today is to establish what the funding available for that particular program would be. The minimum for each State is \$75,000 under the act, and the language before us, which I have just referred to in this particular bill, would amend the bill to a minimum of only \$50,000 being available for each State.

While it is proper that Congress, through the appropriations process and through the budgetary process, establish what funds are to be available under the acts that authorize such funds, it certainly is not appropriate for the Appropriations Committee to make amendments to those acts in an appropriation bill, and certainly this language does that.

Perhaps this is considered a very small item in this total package of billions of dollars. Nevertheless, a principle is involved, and that principle is that if an authorizing act is to be amended, the authorization committee should do so. The authorization of this act is under the jurisdiction of the Senate Agriculture Committee.

I am not going to provide a great deal of additional funds for my State by the action I propose to take, but at least we will preserve a principle that should be safeguarded and should not be violated.

I propose to make a point of order against this particular section of the bill, but I will withhold doing so if the chairman should like to make some remarks.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. MELCHER. I yield.

Mr. HATFIELD. Mr. President, as the Senator may know, under the gen-

eral budgetary restrictions under which we are operating, and especially in the nondefense discretionary area of the Appropriations Committee, this program was reduced from \$26 million to \$5 million; and the amount appropriated was of such limited figure that we felt there should be some kind of minimum standard set for each State in order to make it a meaningful program.

We would have been at a \$75,000 level earlier on, so the reduction to a \$50,000 level, in effect, is trying to accommodate all the States rather than providing such a small distribution that it would be a meaningless gesture.

So what we are trying to do here, in effect, is to sustain the viability of the program. The language we have adopted here proceeds on that basis, that that limit within the total figure of the appropriation is what the limit could be for each State and is language which was requested by the administration as well.

I understand the Senator's concern, I suppose that, as in many other cases where we technically are legislating on an appropriation, it is nothing new. To deal with this matter on the basis of trying to maintain equity as between the States, we felt, was the trade off and the reason for adopting this kind of language in the appropriation measure. It is not the best way to do business, I say to the Senator from Montana, but under the exigencies of the time, it seems about the most practicable way to deal with a very difficult situation.

Mr. MELCHER. I thank the chairman for his very kind remarks, but I point out two things.

First of all, it is legislation on an appropriation bill, and I will be very delighted to carry the recommendation of the administration as well as of the Appropriations Committee to the authorizing committee.

I suggest that the authorizing committee, the Agriculture Committee, can consider those recommendations. But I repeat that violation of the principle involved here should not be allowed. Second, it is appropriate to address this particular problem on whether \$5 million is meaningful. We went all through the school lunch fiasco a few months ago when it was suggested by the Department of Agriculture that we scrap the standards, scrap the nutritional requirements, and the nutritional goals. We went all through the fiasco where catsup was supposed to be a vegetable or relish, was supposed to be a vegetable and rejected it, and we enlightened the Department not to get too fast and loose with their own regulations.

So I clearly state here I am going to object to the principles, first of all, and, second, I shall encourage the Senate in a subsequent amendment to increase this amount so that it is a

little bit more meaningful. But for the Appropriations Committee and not the Agriculture Committee to decide which should be the minimum does not seem to be appropriate to me.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. MELCHER. I am delighted to yield again.

Mr. HATFIELD. As the Senator knows, these allocations are being made at this time during this period and these are appropriate vehicles for the Agriculture Committee to act upon this. According to our information there was none. Does the Senator have a vehicle otherwise? What is the Senator's option? Increasing the amount of appropriations unless we have the vehicle to place it upon, I say to the Senator from Montana, does very little good, whether it is \$5 million or \$50 million. That is not the principle that I understand the Senator is making. What is the vehicle other than this vehicle we have before us that the Senator would use to get this program underway during this period with the allocations that are being made?

Mr. MELCHER. I reply to the very distinguished chairman and my good friend that first of all this is a proper vehicle for the amount that is available.

Mr. HATFIELD. Is it the amount or legislation on the appropriations bill?

Mr. MELCHER. It is two points. First, it is legislating on the appropriations.

Mr. HATFIELD. That is right.

Mr. MELCHER. And, second, it is the amount.

Mr. HATFIELD. All right. Then, I ask the Senator if we do not legislate on an appropriations using this vehicle, what is the other vehicle the Senator would offer in order to undertake this program which I know he supports and which I support as an individual and which the committee is trying to sustain under this rather extraordinary procedure that none of us really like?

Mr. MELCHER. My second proposal, I say to my friend, is having stricken the change in the minimum which is really the legislative part of this. Having changed that, the supplemental can have an additional amount added to it, not on the basis of a minimum, just on the basis of the total amount.

Mr. HATFIELD. If the Senator's amendment would fail in increasing the overall amount, what would then be the other option?

Mr. MELCHER. There would be no option other than the first amount, though small, which would be available and there would be an excess of \$1,250,000 over and above \$50,000 distributed to each of the 50 States that could be then prorated. While that is a

small amount of money to be prorated, I would say that that is the second problem and the amount of \$5 million should be increased.

Mr. HATFIELD. I remind the Senator that is not our understanding of the situation but rather that if the Senator's amendment to increase the funding does not pass then the rate of reduction would bring this figure back automatically where it would be a far less figure. So, consequently, what we are trying to do is establish a floor here in order to maintain some kind of reasonable, practicable program. I think the Senator and I are on the same track. I am not suggesting we are in conflict here except on the question of procedure that neither one of us really approves or enjoys doing but at the same time, under this particular timeframe within which we find ourselves, it is the only conceivable way we think we can maintain this program, especially if the Senator's amendment should fail. Then, in my opinion, we have in effect excised or we have made the program totally void.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum to allow more discussion of this subject with the distinguished chairman who I am certain desires a meaningful child nutrition program.

Mr. STEVENS. Mr. President, will the Senator withhold?

The PRESIDING OFFICER. Will the Senator withhold one moment?

Mr. MELCHER. Yes.

Mr. STEVENS. Is there a pending amendment now?

The PRESIDING OFFICER. There is no pending amendment.

Mr. STEVENS. Mr. President, while the Senator is studying that, would he mind if we did some noncontroversial items to get them out of the way?

Mr. MELCHER. No, indeed.

I shall yield the floor to attempt to solve the problem we have been discussing by further consultation with the chairman.

Mr. HATFIELD. Mr. President, let me assure the Senator from Montana that I will be very happy to work with him on this and within the restraints we are operating and try to work out some kind of a satisfactory arrangement. In the meantime I think the Senator from Missouri or the Senator from Alaska has an additional amendment.

Mr. STEVENS. I thank the Senator.

UP AMENDMENT NO. 1194

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 1194.

Mr. STEVENS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, insert the following new section:

"COMMISSION ON EXECUTIVE, LEGISLATIVE, AND JUDICIAL SALARIES—SALARIES AND EXPENSES

"For necessary expenses of the Commission on Executive, Legislative, and Judicial Salaries, authorized by section 225 of the Postal Revenue and Federal Salary Act of 1967 (81 Stat. 642-645), \$160,000, to remain available until expended; *Provided*, That, in accordance with such section 225 (except as otherwise provided in this section), the Commission shall be convened, conduct appropriate reviews as prescribed by section 225(f) of such Act, and submit to the President on or before November 15, 1982, a report as described in section 225(g) of such Act, and the President shall submit to the Congress, as soon as practicable after receipt of such report, his recommendations with respect to the rates of pay which he deems advisable for the offices and positions covered by such report, which recommendations shall become effective for pay periods which begin 30 calendar days after submission to the Congress, unless Congress disapproves such recommendations by concurrent resolution."

Mr. STEVENS. Mr. President, this is an amendment that will put into effect an ad hoc 1982 Quadrennial Commission. It reconvenes and appropriates \$160,000 for the Quadrennial Commission.

The Commission is directed to make recommendations in accordance with the current Quadrennial Commission legislation, which is title 2 of the United States Code, except as provided in this amendment.

The report by the Commission would be transmitted to the President no later than November 15 of this year and the President would promptly—and there is no time limit—formulate his recommendations and submit them to Congress for review.

The pay rate recommendation would become effective 30 days after they are transmitted to the Congress by the President unless Congress, by concurrent resolution, disapproves the recommendation. The recommendation would supercede any pay rate or pay cap established by prior provisions of law.

The positions covered would include those under the executive schedule (levels I through V), the senior executive service, Federal judges, Members of Congress, and any position subject to the level V pay ceiling.

This would be a one-time, ad hoc procedure. The existing Quadrennial Commission legislation would remain intact.

It is not intended to amend the basic quadrennial commission legislation.

I do call attention to the fact that it does change the procedure, however, and provides for a specific provision

for Congress, by concurrent resolution, to disapprove the recommendation if it does not want the recommendation of the Commission to go into effect.

I have discussed this with the managers of the bill. I am hopeful that they will allow us to reconstitute this Commission and have a study of the comparability of all of the salaries of the Federal Government under the existing circumstances within this current timeframe.

Mr. HATFIELD. Mr. President, the amendment of the Senator from Alaska has been reviewed, and we agree to accept it. In fact, I compliment the Senator from Alaska on making this amendment because I think it is very important and will bear some good results down the road.

It has been checked with the minority, and the minority accepts it as well.

Mr. STEVENS. Mr. President, I ask for adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 1194) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. I thank the Senator from Oregon.

UP AMENDMENT NO. 1195

(Purpose: Prohibit use of appropriations for judicial review of Federal Motor Vehicle Safety Standard No. 208)

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH) proposes unprinted amendment numbered 1195.

Mr. DANFORTH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 108, insert the following immediately after line 19:

"Sec. 304. None of the funds provided to the Department of Transportation by this Act shall be used to obtain judicial review under the National Traffic and Motor Vehicle Safety Act of 1966 or any other provision of law with respect to Federal Motor Vehicle Safety Standard No. 208 (49 CFR 571.208)."

Mr. DANFORTH. Mr. President, my amendment prohibits the National Highway Traffic Safety Administration from using any funds from this supplemental appropriation for judi-

cial appeals concerning Federal motor vehicle safety standard 208.

This amendment insures that congressional funding for NHTSA be used actively in safety programs rather than for fighting in court against implementation of the passive restraint standard.

Mr. President, I happen to favor the passive restraint standard. It would save an estimated 9,000 to 12,000 lives annually, prevent over 100,000 serious injuries, and save consumers \$10 for every \$1 of cost. However, whether one supports or opposes passive restraints is not the issue here. As the distinguished Senator from Utah, Mr. HATCH, has so eloquently put it, the issue is whether a Federal agency can effectively overrule Congress by accomplishing through administrative rulemaking what Congress has refused to do legislatively. Mr. President, this is exactly what NHTSA has done, and the U.S. court of appeals has told the agency that it is out of bounds. However, instead of complying with the decision of the court, there are indications that NHTSA may stall compliance by filing continuing motions and pressing additional appeals. Mr. President, such dilatory tactics only squander public funds, waste judicial resources, and undermine people's faith in our system of government. NHTSA has its mandate from Congress and its order from the court. If Congress wants to change the passive restraint standard, then it should do so, but it should not allow an agency to expend public moneys to filibuster.

Mr. ANDREWS. Mr. President, we understand the thrust of the amendment of the Senator from Missouri.

Let me say this: It raises some constitutional questions that I am concerned about. I recognize that my good friend, the Senator from Missouri, is an able attorney, and I am a farmer from North Dakota. So what I wish to propose is that we accept the amendment and take it to conference, and in the period between now and conference we can look into what the constitutional ramifications are of a prohibition on judicial review. With that caveat, I am more than happy to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment (UP No. 1195) was agreed to.

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I believe the Senator from Connecticut has an amendment to offer at this time. Does the Senator from Connecticut have an amendment to offer?

Mr. DODD. Yes, I do.

UP AMENDMENT NO. 1196

(Purpose: To increase the appropriations for Supplemental Educational Opportunity Grants by \$48,000,000.)

Mr. DODD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. DODD), for himself, Mr. RANDOLPH, Mr. RIEGLE, Mr. WEICKER, Mr. MOYNIHAN, Mr. SASSER, Mr. BURDICK, Mr. LEAHY, Mr. HUDDLESTON, Mr. BRADLEY, Mr. EAGLETON, Mr. PELL, Mr. DURENBERGER, Mr. KENNEDY, Mr. STAFFORD, and Mr. HOLLINGS, proposes an unprinted amendment numbered 1196.

Mr. DODD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 56, line 9, strike out "\$169,000,000" and insert in lieu thereof "\$217,000,000".

On page 56, line 12, strike out "\$29,000,000" and insert in lieu thereof "\$77,000,000".

SEOG FUNDING

Mr. DODD. Mr. President, I am offering this amendment for myself and on behalf of Senators RANDOLPH, RIEGLE, WEICKER, MOYNIHAN, SASSER, BURDICK, LEAHY, HUDDLESTON, BRADLEY, EAGLETON, PELL, HOLLINGS, DURENBERGER, STAFFORD, and KENNEDY.

The amendment restores an additional \$48 million to supplemental educational opportunity grants for needy college students. The additional funding is required to allow a fair distribution of grants to eligible schools and students.

SEOG is one of three programs, including college work-study and national direct student loans, that assist postsecondary schools in educating young people who cannot afford the rising cost of a college or technical degree. Funds are allocated to schools based on the number of low-income students who have been admitted to a higher degree program and the cost of educating those students. Supplemental educational opportunity grants are given to students who truly need them after all other avenues for paying the price of a degree have been exhausted. The program serves the neediest of America's students. Without supplemental educational opportunity grants, many of these students could not go to college.

In this year's continuing education, funding for grants for these students were reduced 25 percent. But the unforeseen result of this cut is to make less than half of last year's amount accessible to many of the students that need this money most: Schools with the highest number of low-income students have, in cases, had funding cut,

not 25 percent, but 35 percent, 45 percent, even 65 percent. There are schools with high proportions of poor students who are receiving only 30 percent of the funds they received last year.

The reason for this disparity is that the size of the cut has mandated that those schools that received additional funds in the past, because they had more students in need, must subtract that amount from their new allocation. The net result is that those schools with more needy students have in fact been cut more.

This amendment is a modest one. It would not restore full funding to SEOG students. But it would reduce the disparity between those schools with many poor students and those with fewer.

The Higher Education Act provides that each school within a State receive no less than the amount that school received 2 years ago—in the 1979-80 school year. After that guarantee has been met, additional funds are distributed according to a statutory "fair share" formula including the proportion of low-income students and the cost of education. Last year, the guarantee levels were met and fair share funds were distributed to schools where the need for such funds was greatest.

The funding reduction this year—from \$370 to \$278 million—makes it impossible even for those guarantee levels to be met and mandates that last year's fair share funds be subtracted from this year's allocation.

The \$29 million already in this bill will help—but not enough. Approximately 4,000 schools administering these funds will be able to assist, on the average, fewer than a dozen additional students. Funding would still be 14 percent less than the amount needed to continue the program at 1979 levels and 6 percent below the President's revised 1982 request for SEOG.

This amendment would bring the program to its 1979 level of operation, adding a total for the bill of \$77 million for needy students.

Seventy-seven million dollars would not reinstate full funding. In fact, it still makes an absolute cut in SEOG of 4 percent—just as this year's amount for college work-study and national direct student loans is 4 percent less than last year. Nor would \$77 million reinstate fair share funds to those schools and students that benefited from fair share funds last year; \$77 million does no more than meet statutory guarantee levels for each school. It reflects a policy that a student who cannot afford college on his own should not be penalized simply because he attends school with many other needy students.

Surely meeting the funding level that we have guaranteed by law is far more equitable than penalizing those institutions with the greatest need for funds.

Finally, we have to act now. The Department of Education will be sending tentative allocations for SEOG by August 20. Students must now decide whether they can afford to attend college or technical schools this fall. Without assurance of adequate funding, they simply cannot make those plans. Particularly compelling are those students who received SEOG funds last year and may have them denied now. If we do not act, some students very near to their degrees may be unable to obtain them. A school which has suffered a 60- or 70-percent cut in these funds may well not be able to continue to assist even those whose degrees are nearing completion. There are students with only a short time left to complete their degree who need this money to continue.

It is incredibly wasteful of our investment and theirs to stop short the education of these young people.

It is wasteful of their investment to force them to drop out a few credits short of a degree after putting their time, effort, and money into preparing for their futures.

It is wasteful of the Nation's investment, not only because of our past financial commitment, but because a citizenry educated to its full potential means a stronger and more prosperous America. Surely any legitimate definition of national security must take into account the morale, skills, and education of our people.

And the jobs of the 1980's require skills and training available only in our institutions of secondary education. Does it make any sense for us to cut grants for students at Greater New Haven State Technical College 60 percent, or at Norwalk State Technical College 70 percent because they have many low-income students? Is it not more equitable and constructive to at least meet the levels we have guaranteed students at those and hundreds of other schools across the country?

Should not talent and ability, not income, be the touchstone of excellence in this society?

I hope the Senate will act favorably on this amendment.

I appreciate the consideration of the chairman of the committee, the manager of the bill, and the ranking minority member.

Mr. SCHMITT. Mr. President, the Senator from Connecticut has put his amendment finger on the dilemma that the Appropriations Committee and particularly my Subcommittee on Labor, Health and Human Services, and Education has faced in trying to balance the needed increases in funding, such as for the supplemental edu-

cational opportunity grants, with the threat of a Presidential veto.

I have been informed by the administration that the generosity of the committee to date for educational programs is in excess of the generosity that the administration requested. We have indeed added, absent this amendment, \$347 million above the President's supplemental budget request for the Department of Education, including \$169 million for student financial assistance and \$148 million for elementary and secondary education, among other programs.

The amount proposed in the amendment would be in addition to the \$29 million added by the committee to this program. It would raise that total to \$355 million, which, as I understand it, would basically hold harmless the institutional programs in place, relative to the 1979-80 school year.

The SEOG program, Mr. President, was designed to assist institutions in providing grants to deserving students to supplement the assistance they need under the Pell grant program. The Pell grant program is the cornerstone of assistance to the neediest of students.

It may be of interest to our colleagues that 38 percent of the students receiving SEOG assistance are dependents from families with incomes below \$12,000. By contrast, in the Pell grant program, which provides a basic service of the Federal Government to the neediest students, 83 percent of the students are from families with income below \$12,000.

So I think appropriately the committee has focused the Federal assistance activity more in the area of the most needy through the Pell grant program than maybe we have through the SEOG program.

However, the situation that is faced by many institutions in this country as described by the distinguished Senator from Connecticut is a real one, and it would be my recommendation to the chairman of the committee and to the Senate as a whole that we accept this amendment, that we consider it further in conference as we look at the entire bill, and see if it is possible, to come up with a bill that indeed the President will sign.

Mr. DODD. Will my distinguished colleague yield?

Mr. SCHMITT. I am happy to yield.

Mr. DODD. I thank the Senator for yielding. I commend the Senator for his comments and thank him for his support of this amendment. I realize, as he does, how difficult these issues are. I considered offering an amendment earlier in the year on an appropriations bill but I did not do so in order to give the committee a chance to look into the matter more fully.

I particularly want to commend the Senator from New Mexico for his fine efforts in doing as much as he possibly

could for this program. I am particularly grateful for his help this afternoon in trying to support this request for the needs of our neediest students. I thank the Senator.

● Mr. SASSER. Mr. President, I rise today in support of the pending amendment of my distinguished colleague from Connecticut (Mr. DODD). I am a cosponsor of this amendment, and it is my belief that the supplemental educational opportunity grant program is simply too important to permit its untimely demise by withholding needed funding.

The SEOG program provides financial aid to the neediest of America's college students. SEOG recipients are those students who have exhausted every other avenue of financial assistance.

Last year, under the continuing appropriations resolution, SEOG's suffered a 25-percent reduction, some \$92 million. The new appropriations level, \$290 million, was further reduced 4 percent under the President's threatened veto. These cuts came despite the mandate of the Higher Education Act that institutions receiving SEOG funds receive no less than they did in 1979-80.

Due to the allocation formula, some institutions are showing losses of 40 to 50 percent in their Federal allocation, rather than a 25-percent loss. This is especially true of colleges and universities who have traditionally enrolled a high percentage of low-income students. These institutions have had last year's additional funds deducted from this year's allocation. The result is that students who have a right to a college education will be denied that opportunity simply because of financial inability. That, Mr. President, may mean the loss of higher education for 150,000 young Americans.

In 10 short days, the Department of Education will be sending tentative allocation notices to postsecondary institutions. Upon receipt of that notification, these schools must notify needy students of the amounts of financial assistance they might expect during the coming school year. But for many of the most needy, the amount will be too low to permit their return to classes.

It is important to note that even by accepting our amendment to restore \$48 million to the SEOG program, the total appropriation will still be below the level set for SEOG in the Omnibus Reconciliation Act of 1981. We are not "busting" the budget with this amendment; we are providing America's neediest students the opportunity to break through the economic barriers that keep them from obtaining higher education.

Years ago, the Federal Government forged a partnership with the Nation's postsecondary educational institu-

tions, to improve educational opportunities for all students. The Federal Government promised to share the financial burden of providing these opportunities. I urge the Senate to approve the Dodd amendment and reaffirm the national commitment to providing a strong system of higher education for all.

Mr. KENNEDY. Mr. President, I rise in support of the amendment by the Senator from Connecticut (Mr. Dodd). Senator Dodd has been tireless on the floor of the Senate in his support of supplemental education opportunity grants. This amendment is another example of his efforts. I commend the gentleman for his interest and his work.

The SEOG program is just one of a number of programs designed to meet the financial problems caused by skyrocketing college costs. It strives to lessen the economic barriers facing qualified but poor students. I think that we all agree that American colleges and universities must never become an enclave of the rich and the elite. Programs like SEOG are instrumental in preventing just such an occurrence.

Yet when faced with funding these programs, too often this Congress has chosen to reduce the funding—scale back the program and relegate thousands of young Americans to a future which does not and cannot include a college education. For example, in the last year SEOG has been cut by an incredible 25 percent—cutting off some 150,000 of the neediest students. Even the \$29 million supplemental appropriation in this bill does not provide sufficient funds to meet the statutory hold-harmless provisions. Without the funds provided in the Dodd amendment, there will be significant inequities between individual schools and individual students.

Mr. President, our Nation faces a future filled with challenges and dangers. The potential for disaster exists in so many situations. The struggle to prosper or even survive will be difficult enough without the handicap of an uneducated populace. But if we continue to cut funds for education programs that are successful and effective, we will be a crippled nation.

In the last year and a half, we have repeatedly cut Federal funding for elementary and secondary education, higher education, and student aid. Even those programs that have not been cut have been squeezed by inflationary cost increases. We have not been cutting the budgetary fat but the program muscle and bone. I have opposed those cuts because I felt they were wrong: wrong for our students, our schools, and our country.

We must now dedicate ourselves to investing funds in our future by investing in our greatest resource—our people. We must restore our historic

commitment to education that has been eroded since January 1981. It was that commitment that helped make America great.

I urge by colleagues to take this first step by restoring and expanding support for American education by voting in favor of the Dodd amendment.

(The name of the Senator from Mississippi, Mr. STENNIS, was added as a cosponsor of the amendment.)

Mr. RANDOLPH. Mr. President, I am gratified to be a cosponsor of the pending amendment restoring \$48 million to the supplemental educational opportunity grant program. I commend Senator Dodd for his leadership in this constructive effort.

The SEOG program is currently funded at \$278 million—a shortage of \$77 million if eligible students at all schools are to be aided with an equitable share of such funds.

The supplemental appropriations bill for fiscal year 1982, H.R. 6863, has a provision that would add back \$29 million for SEOG. I applaud the committee's action in understanding the importance of additional funding for SEOG students—the neediest students on campus.

But Mr. President, aside from the fact that SEOG funds go to the students who have demonstrated the most financial need after all other sources of aid have been exhausted, the other most important aspect of the program that my colleagues must be made aware of is that, statutorily, each institution within each State is supposed to receive no less than the amount received by the school in 1979–80.

Yet the continuing resolution in effect for fiscal year 1982 reduced SEOG by a disproportionately large—25 percent, and as a result, those statutory, hold-harmless levels will not—cannot—be met. This means that awards to nearly 150,000 students nationwide will be eliminated. Thus, thousands of qualified students having severe financial need—will literally be denied access to college.

In terms in a news release of West Virginia, this reduced funding will result in the loss of a total of 1,022 students, both public and private, and a dollar loss of \$610,358—nearly a million dollars, Mr. President.

SEOG dollars, while going to students with the most severe need, are also based on the cost of education. In other words SEOG's aid students who have chosen to attend higher cost private colleges—assisting them to exercise the freedom of choice—and if after counting all other sources of available financial aid there is a remaining need—it can be obtained under the SEOG program.

In West Virginia, in the past academic year, 1,625 students received \$1.09 million in SEOG funds at private institutions. Of those 1,625 students,

419 will not be able to continue as SEOG recipients if the funding level is not raised by \$77 million in this supplemental spending bill—meaning a total dollar loss of \$285,105.

Those may not seem to be large amounts of money and students to many of my colleagues from larger States receiving much larger allocations from SEOG funds. I can assure my colleagues that the loss of nearly \$1 million in one student aid program in West Virginia looms large for those 1,022 students barred from receiving enough aid to continue in college.

You have heard me speak of my own alma mater, Salem College, many times in this Chamber—and most recently I have expressed my concern for the very tenuous hold it, and other small, private colleges have on their very existence.

Salem College, as an example, currently has 320 students who receive SEOG assistance, for a total dollar amount of \$215,200.

If SEOG funding levels do not rise by \$77 million, Mr. President, Salem College will lose 82 eligible students for a dollar loss of \$55,347—as we can calculate.

These statistics, Mr. President, are for one small, independent, private, college that deserves to survive—but it is threatened as are hundreds of others if we eliminate funds that allow students the freedom of choice to attend a school that costs a little more. SEOG's provide that choice, Mr. President.

If this administration—indeed this Congress—continues its attack on higher education—not just SEOG's, but Pell grants, college work-study grants, direct loans, guaranteed loans, and incentive grants to States—the dreadful, cumulative effects on both private and public institutions will bring “fiscal strangulation” as already eloquently described by my able colleague from Missouri, Tom EAGLETON, who serves with me on the education subcommittee.

If cuts proposed in all programs by the administration are adopted, West Virginia is projected to lose 7,000 students and \$11.7 million in academic year 1982–83.

According to estimates, if additional cuts are approved in all student aid as proposed by the administration, then West Virginia stands to lose 18,705 students and \$20.5 million in academic year 1983–84.

We stand in support of increased funding for SEOG's, Mr. President, in fiscal year 1982.

But even as we debate funding needs in the current fiscal year, we are keenly aware that in less than 2 months we must have fiscal 1983 spending proposals ready for debate and final decisions made. In no time at all, we can expect to receive the Presi-

dent's fiscal 1984 requests—and none of us are optimistic enough to think that he will let student aid off the hook.

We are speaking for college aid today, and we must continue to stand strong and say no, and no, and no until we stop this unwarranted barrage on tomorrow's future.

I saw a bumper sticker the other day, and I recommend it to all my colleagues for their thoughtful consideration. The bumper sticker read as follows, Mr. President: "If you think education is expensive, try ignorance."

I feel our colleagues will vote in favor of the amendment, adding back \$48 million to fund supplemental grants.

Mr. WEICKER. Mr. President, I rise in support of increasing the funding for the supplemental education opportunity grant (SEOG) program by \$77 million for fiscal year 1982 as offered by Senator Dobb to H.R. 6863, the supplemental appropriations bill. This would bring the funding level for this campus-based student aid program to \$355 million, the level necessary to insure that all eligible students receive an equitable share of the funds.

The SEOG program has been available for needy students who must package several of the Federal student aid programs in order to meet their educational costs. This is a supplemental grant program which provides students with the greatest financial need some measure of choice when deciding on an institution of higher education. Without financial assistance from this program, many needy students will be denied the opportunity to attend a college which matches their abilities and aspirations.

In my State of Connecticut alone, funding has been reduced from \$5.1 million for fiscal year 1981 to \$3.8 million for fiscal year 1982. As a result of this reduction in funding approximately 2,000 students were eliminated from the SEOG program.

The SEOG program is limited to needy students who are accepted as undergraduates, are enrolled at least part time and maintain satisfactory progress. Women and minorities receive the greatest proportion of these grants. The grant reward at under \$2,000 each is minimal and yet the availability of this program is a critical factor in the ability for many students to pay for and to attend college.

Students should not be denied college access or choice based on an inability to pay. To deny educational opportunities to some is not only a promise unfulfilled, it is an ideal betrayed. It is misleading to say we are a democratic nation which takes pride in providing its citizens the opportunities to strive to maximize their potential—and achieve satisfying and meaningful adult lives—if, in fact, this principle is

conditional, depending upon one's financial situation.

Furthermore, the development of human resources enriches all our lives. An educated citizenry makes an invaluable contribution to our general well-being. We enjoy the standing in the world today because of our efforts to realize our ideals such as equal educational opportunity and quality education.

I urge my colleagues to join me in supporting Senator Dobb's amendment.

Mr. HATFIELD. Mr. President, I would only underscore the comments made by the subcommittee chairman, Senator SCHMITT, to indicate that I think this is a very desirable program and one that bears a great deal of return on the investment. But I think we have to recognize that it does not do much good to increase these programs if we cannot get a final approval from the White House. So we are moving, conscious of the great restrictions that we have.

I do feel that this is one of those matters that will ultimately have to be decided in conference anyway, so I support the action of the subcommittee chairman in accepting this amendment.

The question is on agreeing to the amendment.

The amendment (UP No. 1196) was agreed to.

Mr. DODD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1197

(Purpose: To require the Architect of the Capitol to cease the obligation, commitment, or expenditure of unallotted construction contingency funds for completion of the physical fitness facility in the Hart Senate Office Building.)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE), for himself and Mr. DeCONCINI, proposes an unprinted amendment numbered 1197.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, after line 17, insert the following:

HART SENATE OFFICE BUILDING

Notwithstanding the directive of the Senate Office Building Commission on Friday, March 19, 1982, the Architect of the

Capitol shall cease the obligation, commitment, or expenditure of any unallotted construction contingency funds (identified during the construction of the Hart Senate Office Building) for the purpose of completing the construction of the physical fitness facility in the Hart Senate Office Building. The Architect of the Capitol shall return to the Treasury of the United States, \$736,400 of any such identified, unallotted construction contingency funds not obligated, committed, or expended before the day on which the Senate passes this Act.

Mr. JOHNSTON. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. JOHNSTON. The amendment is patently legislation on an appropriations bill.

Mr. PROXMIRE. Mr. President, I did not yield to the Senator from Louisiana to make a point of order.

The PRESIDING OFFICER. The Chair rules that he did not again recognize the Senator from Wisconsin after the amendment had been sent to the desk for reading. Through the discretion of the Chair, the Chair recognized the Senator from Louisiana for the point of order to be made.

The Chair sustains the point of order that the amendment is legislation on an appropriations bill.

Mr. PROXMIRE. Mr. President, I appeal the ruling of the Chair. I will speak in opposition to the Chair's ruling, and I will ask for a rollcall vote.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, this amendment is an amendment that simply knocks out \$732,000 for the third gym, the third gym, gymnasium, for Members of the Senate. Let me explain this amendment. It is \$736,400.

Mr. President, as my colleagues may recall, back in 1978, after failing to kill the Hart Building project outright, I collaborated with former Senate Appropriations Committee Chairman Warren Magnuson to impose a \$137 million ceiling on the cost of the Hart Building, in the wake of GAO estimates that the cost of the building could hit \$230 million if left unchecked. Then, in 1979, in order to keep the cost of this ill-advised building under the ceiling, the Senate Office Building Commission agreed to delete a number of low-priority projects, including all of the projects now being given the green light. Then, on March 19, 1982, the Senate Office Building Commission, by a vote of 4 to 1 and over the objections of its chairman, Senator STAFFORD, authorized the Architect of the Capitol to spend as much as \$4.2 million in projected Hart Senate Office Building "unallotted construction contingency funds" to start or complete a number of new or partially completed projects in the new Hart Building—projects that had been deleted by this same Commission

in 1979. Among the projects now cleared for construction by the Architect and the Commission are \$736,400 for a third Senate gymnasium.

Mr. President, this amendment will delete only the savings targeted for completion of the physical fitness facility in the Hart Senate Office Building. The cost of this project is \$736,400, to be paid for out of identified, unallotted construction savings.

Now, Mr. President, I think we ought to consider the position we are in with this kind of expenditure.

For the past year and a half, this Congress, and especially this Senate, has been trying to hold down spending. Think of the sacrifices we have imposed. We have cut Federal assistance for disadvantaged school children. We have hammered down appropriations for handicapped men, women, and children. We have cut food stamps. We have reduced Medicaid. We have forced elderly people to make higher payments for their medical care.

Incidentally, I think I voted for every one of those reductions.

In the Senate tax bill we passed recently, we reduced the medical cost that our people can deduct in computing their income tax. We have sharply cut farm price supports.

Altogether, almost all Americans have been asked one way or another to make a sacrifice. And yet, now we will provide over \$700,000 for a third Senate gymnasium and over \$1 million for a new especially fancy and super-equipped media hearing room.

Why do we need still another gym? My amendment does not touch the hearing room and it does not touch a lot of other low-priority projects that I could have touched, but I felt I had even less chance of getting them adopted.

We now today have two gyms exclusively for 100 Senators. One of our gyms has a small swimming pool, a variety of exercise machines, rubdown tables and attendants to rub us down, shower stalls, and rooms for taking naps. That is just one gym in the Russell Office Building.

Then we have 100 Senators and we have a second gym with a locker room, six shower stalls, an exercise room with stationary bicycle machines, a punching bag, a mat, weightlifting equipment, and very, very few of us as patrons.

One of the most distinguished patrons is now occupying the Chair. That is why he is in such good shape.

Mr. President, that adds up to two gyms for 100 Senators. Neither staff nor family nor friends are allowed, just 100 Senators.

And now the Senate Building Commission wants to spend more than \$700,000 for a new gym, a third gym.

Consider the ridiculously selfish, self-serving nature of this public ex-

penditure. Here we are, middle-aged or older men, 98 of us, and two women. The women, incidentally, as far as I know, do not use the gym and they look in far better and far superior physical shape than any of us 98 who can and in many instances do use the gym. You would think, Mr. President, that we 98 male Senators who use these two gyms, with these facilities, would be physical paragons, lean, muscular, Jack LaLannes.

But look at us. Oh, yes, some of the newer Members, who have not yet been softened and enfeebled by years of Senate service, look reasonably fit, but most of us are too fat, too soft, or too beat, kept alive and breathing not by the gym but by the ministrations of our remarkably skillful Senate doctor who, fortunately, has such remarkable skill he can seem to find ways to keep us voting and talking years after rigor mortis has begun to sink in.

Mr. JOHNSTON. Will the Senator yield for a question?

Mr. PROXMIRE. I shall yield shortly.

Mr. President, most of us consider 15 minutes on the table absorbing a rubdown as a terrific workout.

Oh, sure, these days, \$700,000 seems like small change compared to the billions we pour into projects all over the world. But the example of this body spending \$700,000 on a wholly unnecessary, completely superfluous expenditure, a third gym for only 100 Senators, sends a message, it seems to me, that we really do not have any sensitivity or appreciation of the examples we set.

Mr. President, before I yield to my good friend from Louisiana, let me quote from an article from a very little paper, a small paper in northern Michigan. This is an article by a man named Ray Linders. Talking about the gym, he said:

What miffs me about this small travesty—and a \$750,000 gymnasium in a U.S. Senate office building is a small one considering all the travesties of greater magnitude we're exposed to—is that this facility is planned for a handful of men and women and their friends.

He did not realize that it is planned for just a handful of men—no women, no friends, no staff. He continues:

There are communities in this country—and right here in this area—with far more inhabitants than the U.S. Senate can claim which cannot afford three-quarters of a million for a gymnasium.

There are communities that can't even afford two cents for a gymnasium, or a new school, or a better educational program, or filled potholes in their respective streets.

They can't because, for one thing the spenders of the tax dollars here at home have to face the taxpayers on a daily basis, and take the flak when it's due.

And they can't because in many instances the hometown taxpayers have a direct voice in how they'll be taxed, and what the money will be used for.

In Washington, D.C., that far removed never-never land on the banks of the Poto-

mac, the occupants of the chairs of decisions do not have that albatross to worry about.

Mr. President, I do hope that the Senate will recognize that what the Senate Office Building Commission did over the objections of their chairman, the distinguished Senator from Vermont (Mr. STAFFORD), was wrong. The only way I can reach this is by appealing the decision of the Chair, because there was no other way that we could get at this particular appropriation. It certainly is on the right bill, and I do hope that the Senate will overrule the ruling of the Chair and give us an opportunity to rescind \$700,000 for the gym.

Now I am happy to yield to my friend from Louisiana.

Mr. JOHNSTON. Mr. President, I was just going to ask my friend from Wisconsin if he is not one of the pre-eminent exercisers in the Senate? In fact, does he not run to and from work virtually every day?

Mr. PROXMIRE. Mr. President, I am delighted to report to my good friend that I do run to work every day. When I get to work, I go in that second gym, which is almost always empty except for my good friend from Indiana, who is sometimes, there, and a few other physically fit Members. But I must say that I think I could run to work and I could use the facilities in my office, which I used to use before I found that gym was available. It would be a little less convenient. I would be delighted to give that up.

I certainly think we ought not to spend \$700,000 more for a third gym. What do we need it for?

Mr. JOHNSTON. Of course, Mr. President, I did not ask that question. I simply wanted to establish that the Senator thinks exercise is very important. I was going to reveal what I think may have been revealed or may not have been revealed before. That is that the Senator from Wisconsin, on two occasions, has been the subject of holdups, robberies, as it were, when he is running out on the street. I am wondering if the Senator from Wisconsin wants to subject his colleagues to that kind of treatment. [Laughter.]

The PRESIDING OFFICER (Mr. RUDMAN). The Senate will be in order.

Mr. PROXMIRE. I say to my good friend this city is relatively crime free. I am sure even in Baton Rouge or New Orleans, people are very often held up. In Baton Rouge, or New Orleans, people do not feel safe, either, even in their homes. Maybe they have large dogs that accompany them on their way, maybe their wives accompany and protect them.

Mr. JOHNSTON. Was the Senator held up? Seriously?

Mr. PROXMIRE. Neither time was I exercising, Mr. President. The first time I talked them out of harming me

by telling them I had cancer and was going to be dead in 3 months and they were doing me a favor.

Mr. JOHNSTON. Did the Senator look the part?

Mr. PROXMIRE. Probably. That is what exercise does for you, makes you look pretty hungry and beat.

Mr. JOHNSTON. Mr. President, I always enjoy debating with my distinguished friend from Wisconsin. We bring this issue up every year. Let me say I never enjoy being on this side of the question. I must hasten to establish my credentials.

I did not ask for the job as chairman of the Senate Office Building Commission. In fact, I am not now chairman. I am now ranking minority member. When I was chairman of the commission, we put together the compromise which passed the Senate and is now the law of the land; that is, to cut down the size of the Hart Senate Office Building to, if I recall correctly, something in the neighborhood of \$137 million.

Our status was, Mr. President, that back in the late 1960's, the Public Works Committee of the Senate authorized this building and then money was appropriated for it. Then a Senate Office Building Commission was created and charged with the duty of approving and overseeing the construction. Indeed, plans were concocted, actually not let out for bids—that was one of the problems here. The building was underway.

At the time I really arrived on the scene as Chairman of this Commission, we had a completed contract, completed plans, steel was all the way up the full five or six stories, whatever it is. Then the motion came in to stop the Senate Office Building at that point.

What was to be done with the Senate Office Building at that point, I do not know. I guess it was to be left to rust away as an eternal monument to the profligacy of the Senate and of the Congress. Perhaps in that respect, it would have been an apt monument, because the public believed that anyway. To be able to come to the city of Washington and see a rusting hulk right there on Capitol Hill would have, indeed, been graphic evidence of that profligacy.

Of course, that makes a good joke, Mr. President, and it might make a good example, but it would have been very poor policy because, of course, the Senate and the Congress could not have allowed that to happen. We had to put it together to finish the building. We were too far committed. You cannot allow an eyesore on Capitol Hill.

So, the distinguished majority leader asked me to take the chairmanship of that Senate Office Building Commission and over my vociferous objections, because I knew the Senate

Office Building was the delight of all of those who would—as they say, a demagog's delight. I certainly do not mean that to apply to my friend from Wisconsin, but there are those who see this as a juicy target to talk about every time it comes up.

In any event, I took the job. In any event, we put together the compromise at \$137 million. The Senate—the Congress—has supported that compromise on through.

Where are we now, Mr. President? We are now approaching completion of the Senate Office Building. A number of what we call the exclusions, which we excluded from the contract in order to get to the \$137 million, can now be put back in pursuant to the understanding, the express understanding we had when we last considered the matter on the floor, because savings have been made.

Those are such things as providing additional office space, which office space was already there; providing for energy savings equipment; providing for a whole host of things. Those matters can now be put in—vertical blinds, auxiliary office space, energy management systems, data communication tables, and so forth. With the savings, we put those back in under a certain schedule of priority. The physical fitness facility is about eighth or ninth in priority.

Mr. President, the physical fitness facility will constitute the only real gym in either of the buildings.

The so-called gymnasium referred to in the Dirksen Senate Office Building I have not seen. I doubt if any of my colleagues have seen it. The Architect of the Capitol advises me it is not a gymnasium at all. It is a single room, some 15 by 15 in dimension. I dare say that the Senator from Wisconsin could not jog in there.

Mr. PROXMIRE. Will the Senator yield on that?

Mr. JOHNSTON. Yes.

Mr. PROXMIRE. There are three rooms. There is one exercise room that has the equipment I described, including two stationary bicycles, including a mat, including weight-lifting machinery, including a punching bag. There is another room which has lockers in it, about 86 lockers. There is another room that has six shower stalls, as well as bathroom facilities. So it is a three-room gym.

Mr. JOHNSTON. The exercise part of it, which is what we refer to when we talk about a gymnasium, is 15 by 15, is it not, roughly?

Mr. PROXMIRE. No, no, no. It is bigger than that.

Mr. HATFIELD. Yes, it is 15 by 15.

Mr. JOHNSTON. The Architect of the Capitol, who is on the floor now, just advised me it is 15 by 15. I have not seen it. It hardly qualifies as a gymnasium, as a place in which any exercise can transpire.

Mr. PROXMIRE. I exercise there every single day.

Mr. JOHNSTON. The Senator runs to work every day.

Mr. PROXMIRE. I do 15 minutes on a stationary bike, and BILL BRADLEY, the Senator from New Jersey, comes in, the distinguished Senator from Indiana comes in, and a number of other Senators; the Senator from Oklahoma (Mr. NICKLES) lifts those weights. That is why they look so good.

Mr. JOHNSTON. The question is not whether we are going to have a physical fitness facility. The physical fitness facility in the new building is there. It exists. It has a roof, it has walls, it has sides. All this means is whether or not we are going to spend an additional \$736,000, and actually less than that, because the Architect of the Capitol, who again is on the floor—and I invite Senators to question him about the details—advises me we have already spent over \$100,000 to buy the equipment which would be put in—I do not know whether it is the flooring or the sides. Whatever it is, \$100,000 has already been spent, so we have to reduce that amount. The facility has many more uses than just a physical fitness facility. I invite the Senator to go up and see it. It will serve as a hearing room. It will serve as one of the largest hearing rooms in the entire Senate. It will serve many purposes, and for an additional what, 10 percent or less, not to finish it, knowing that some future Congress would finish it at a much greater cost, I think is very false economy.

Mr. President, the issue is not whether we are going to build a gym. The gym is built. The issue is whether we put the final, finishing touches on a facility which can, in addition to being used as a gym, have a multitude of other purposes and will constitute really the first gymnasium in the entire Senate.

Actually, Mr. President, if you want to know what the real question is, it is, Whether the ruling of the Chair as to legislation on an appropriation bill will be sustained or not?

What you ought to do is submit this back to the hearing process and have a hearing, as we did in the Senate Office Building Commission, where with only one dissenting vote it was very clear to everyone that you waste money if you do not finish this large, commodious room at this time. You waste a great deal of money because it is going to be finished. It would be a travesty to have a large room which could be used as a hearing room, it could be used as a gymnasium, it could be used for any number of purposes, not to be finished. Nobody seriously thinks that it will not be finished at some particular time.

Mr. President, I urge my colleagues to sustain the ruling of the Chair. I

was going to move to table the appeal, but if the Senator from Wisconsin wants to have another go at it, I will yield.

Mr. PROXMIRE. I will be quite brief.

Mr. President, let me point out that the Senator devoted most of his talk to matter that I did not touch. It is true that I at one time wanted to knock out all of the low-priority projects that the Building Commission 3 years ago decided should be lower priority and should be put off until another day because they might cost too much, over \$4 million, but the only one I knocked out was the gym. The vertical blinds, for instance, \$167,000 for vertical blinds instead of horizontal blinds, because some people think they might look a little better; central wing first floor office, the hearing facility that the Senator talked about—I think that is a waste of \$1,182,000—I do not touch. But the gym is so obviously unnecessary.

The Senator said nothing about the main gym we have in the Russell Building. That does have a swimming pool. That does have a much larger exercise room. It does have the facilities for rubdowns, and so forth. It is a substantial gym certainly for 100 people—98 people because, as I say, the ladies of the Senate do not use that.

Mr. President, my friend from Louisiana indicated that this had been a deliberative process. We never have had hearings in the Appropriations Committee. We ought to hold hearings on this. The hearings held by the Building Commission, as far as we know, have not been published. My staff has not been able to get ahold of them. We have not been able to examine them.

The fact is, also, that this was a low-priority project that the Building Commission itself, 3 years ago, decided to postpone. As I say, the \$4,217,000, which I think we ought to knock out, I tried to knock out in the Appropriations Committee meeting but did not succeed. Only the amount for the third gym would be deleted under my proposal, \$736,000.

Mr. President, furthermore, let me just point out that the additional amount would be \$269,000 for materials they do not have now, \$403,000 for labor, and all of that would seem to me to be a saving that we can well make.

It is true that they might have to use their ingenuity and use that space for something else. We can do that.

It also may be true that the wisest thing to do is just not spend the money at all. Somehow it is very hard for us in the Senate to resist going ahead and spending \$736,000.

Certainly if this were a small city in New Hampshire or a small city in Wisconsin or Oregon, you know perfectly well there is no way this money would

be spent. So I do hope that the Senate will not sustain the ruling of the Chair.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. JOHNSTON. Mr. President, I want to tell my colleagues that I certainly will miss this issue. I hope it is the last time it will come up. I certainly am going to miss it in future years. We have had a lot of fun with this each year it has come around. I know the Senate is prepared to be serious on this and look at the long-term saving. Frankly, if we could do away with the whole Hart Building, I bet this Senate would vote for it 100 to 0.

I think the Senate that first authorized it back in the late sixties is sorry it ever authorized it, sorry it had anything to do with it and, believe me, I am sorry I have had to be chairman of the Senate Office Building Commission.

However, Mr. President, we are in it now. We ought to make the best of what is an expensive and also a very nice building. I think we at least ought to say something nice about it, and that is about all I can find to say nice about it, that it is a pretty building. It also really is needed, although I would not vote for it if it were being authorized today.

Mr. SCHMITT. Will the Senator yield?

Mr. PROXMIRE. Will the Senator yield?

Mr. JOHNSTON. I hope it is the last time that I have to shoulder this duty.

Mr. PROXMIRE. Will the Senator yield?

Let me just say to my good friend I am delighted that if the Hart Building were up today, the Senator would not vote for it. As the Senator knows, the Architect of the Capitol has recommended a fourth Senate office building; he is going to push for it.

I predict that when that comes along, you will see the same old story we had when we had the Hart Building. I was the only one in the Appropriations Committee who voted against that when it began, the only one.

Mr. JOHNSTON. The Architect has not made that recommendation.

Mr. PROXMIRE. This is not the last one. We will not stop until every Senator has his own building. [Laughter.]

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, the Architect of the Capitol has made a lot of mistakes. Maybe he has made some on the Hart Senate Office Build-

ing, but he has not made what would be the most egregious mistake of his entire career by recommending still a fourth Senate office building. If he should, then I will be in the forefront fighting that building. But for the time being, let it be said for the Architect of the Capitol that he is not recommending it and not one single Senator is prepared to vote for it in this Senate.

I yield to my friend from New Mexico.

Mr. SCHMITT. Mr. President, I appreciate the Senator from Louisiana yielding. I just wanted to mention that I, coming here in 1977, had the privilege of voting against the Hart Building the first time that the issue arose on the floor.

I know that the distinguished Senator from Louisiana argued just as eloquently at that time, but at that time we could have saved, as I recall, \$60 million or \$70 million and put it into a parking lot or something else.

The next time the issue came up, it was too late. I think the Senator is exactly right in the way he characterizes the issue—it is too late on this. We have to make the best of what I think most of us believe was a bad deal, made more than a decade ago, and proceed to utilize this building in the best possible way.

Mr. MATTINGLY. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yield.

Mr. MATTINGLY. I am chairman of the Legislative Branch Committee, and I have been here for 1 year and 7 months, so I have even more current respect than the Senator from New Mexico. But it seems to the new Senators that we are talking about something already accomplished, the building is there; the money has been spent. The authority was given to the Senate Office Buildings Commission and the Architect of the Capitol to construct this building, to make it function.

I suggest that the expenditure that has already been allocated is probably less than 1 day's storage of dairy products in the United States.

The PRESIDING OFFICER. Is there further debate?

Mr. HATFIELD. Mr. President, what is the question before the Senate?

The PRESIDING OFFICER. The question before the Senate is, Shall the ruling of the Chair be sustained as the judgment of the Senate? The yeas and nays have been ordered.

Mr. HATFIELD. Mr. President, I move to table the appeal of the ruling of the Chair.

Mr. JOHNSTON and Mr. PROXMIRE requested the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the appeal of the ruling of the Chair. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Pennsylvania (Mr. HEINZ) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 50, nays 48, as follows:

[Rollcall Vote No. 300 Leg.]

YEAS—50

NOT VOTING—2

Heinz Mathias

So the motion to table the appeal of the ruling of the Chair was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HATFIELD. Mr. President, I wonder if I could have the attention of my colleagues to ask anyone who has an amendment to this supplemental appropriations bill to please alert the managers of the bill, Senator PROXMIER, now Senator LEAHY, acting on behalf of the minority, and myself as the manager on the majority side, because we want to get an idea of how many more hours we have on this bill. If we could get some notification list set up as to how many amendments we

have to consider, it would be very helpful.

Mr. President, I believe that the next Senator that has informed me of an amendment is the Senator from Connecticut.

Mr. WEICKER addressed the Chair. The PRESIDING OFFICER. The Senator from Connecticut.

UP AMENDMENT NO. 1198

(Purpose: To provide that it is the sense of the Congress that the proposed regulations implementing part B of the Education of the Handicapped Act should not become effective until after the 97th Congress reconvenes for a special session or the 98th Congress has convened, whichever first occurs)

Mr. WEICKER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER) proposes an unprinted amendment numbered 1198.

Mr. WEICKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SEC. . (a) The Congress finds that—

(1) since the enactment of Public Law 94-142, the Education for All Handicapped Children Act of 1975, amending part B of the Education of the Handicapped Act, significant numbers of handicapped youngsters have been successfully brought into the Nation's educational system;

(2) part B of the Education of the Handicapped Act has been consistently upheld since its enactment and any attempt to weaken the rights of handicapped children or the rights of parents of handicapped children has been rejected by the Congress;

(3) handicapped children have consistently demonstrated that they can and do take full advantage of the educational opportunities afforded to them;

(4) the success of part B of the Education of the Handicapped Act in States where it is in effect can be attributed in large measure to the statutory and regulatory provisions assuring the rights and participation of parents in determining the education of their children; and

(5) the Department of Education has on August 4, 1982 published proposed changes in the regulations implementing part B of the Education of the Handicapped Act designed to eliminate the assurances that the rights and participation of parents and handicapped school children be recognized.

(b) It is the sense of the Congress that—

(1) the proposed final regulations implementing part B of the Education of the Handicapped Act should not become effective, and should not be transmitted to the Congress under paragraph (1) of section 431 (d) of the General Education Provisions Act, until—(A) after the 97th Congress has returned from the recess which is scheduled to begin in October, 1982, or

(B) after the 98th Congress is convened, whichever first occurs;

(2) the forty-five day period specified in such paragraph (1) should begin on the day that such regulations are transmitted to the Congress in accordance with clause (1) of this subsection; and

(3) paragraph (2) (except the first sentence) of section 431(d) of such Act should not apply to such forty-five day periods.

The PRESIDING OFFICER. The Senate is not in order. Will those Senators wishing to converse, please retire to the back of the Chamber?

The Senator from Connecticut.

Mr. WEICKER. Mr. President, during the past 7 years since the enactment of Public Law 94-142, the Education for All Handicapped Children Act, we have witnessed as never before, millions of disabled youngsters taking their places alongside their nonhandicapped fellows in the mainstream of American society.

No longer are they confined in out-of-the-way places, their bodies, minds and talents left ignored to wither. Now these courageous youngsters, eager and capable to learn, sport the bright faces of self-esteem. They live at home, attend school and—most importantly—are giving it their all.

It has been tough, no doubt about it. These youngsters have had to work and work hard to overcome their disabilities. Parents have unselfishly given of their time and money to see that their children take advantage of all opportunities given them. And, yes, dedicated professionals—physical, occupational, and speech therapists among them—have teamed up with special education teachers and administrators to create the network of services necessary to get the job done.

Congress, too, has held the steady course. We have said loudly and clearly that we do not want to see the underpinnings of Public Law 94-142 weakened in any way. We have extended the life of the law and in the most difficult of financial times we have found the dollars to sustain our commitment to disabled youngsters.

Now, however, just at the time when virtually everyone agrees the big job is getting done and done well, the Department of Education dares to propose changes in the rules which govern the program.

The PRESIDING OFFICER. The Senator will please suspend.

The Senate is not in order. Those members of the staff who wish to converse will do so in the cloakrooms. The Senator from Connecticut has a right to be heard.

The Senator from Connecticut.

Mr. WEICKER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, why is this being done? To help children

learn better and progress faster? To make it easier for parents to cope? No, Mr. President, these are not the reasons.

As incredible as it may seem, what is in fact being proposed is to weaken kids' ability to join with their nondisabled peers. To reduce parents' ability to take part in their children's education—in short, the beginning of the end for Public Law 94-142.

Today, I offer a sense-of-the-Congress amendment to put the proposed changes on hold. This amendment would postpone the start of the 45-period allotted Congress for passage of a concurrent resolution of disapproval until Congress returns after sine die or the 98th session, should there be no lame duck session. This sense of the Senate amendment does not change the General Education Provision Act, which provides for the review period. It does, however, signal the Department of Education, the President and the public that we want to carefully examine the regulations. Rigorous review is necessary if we are to insure that the Department's regulations continue to result in the free appropriate public education Public Law 94-142 calls for.

Today, as chairman of the Subcommittee on the Handicapped, I held a hearing on the new regulations. Participating were Secretary Bell and a panel of professionals and experts in the area of special education. I heard testimony clearly stating that the proposed changes will wipe out regulatory assurances that the rights of parents and handicapped schoolchildren are recognized.

If, after further careful consideration, this proves to be the case, I am sure the Congress will want to express its displeasure with the new regulations. In the meantime, I urge my colleagues to adopt this amendment mandating a full 45-day review period.

Mr. President, it is important that the Congress reaffirm the support it has consistently given to Public Law 94-142. It is imperative that we let parents, professionals and disabled children from one end of this Nation to the other know that we continue to stand with them in their courageous fight.

I urge all my colleagues to vote to approve this amendment.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I rise to support the amendment of the Senator from Connecticut. I think the proposed regulations with respect to handicapped children do irreparable harm to a program that has great merit. I think that by enacting this amendment and indicating the sense of Congress there should be a delay in the implementation of the regulations,

it would give Congress the opportunity to deal more accurately with this program.

I think the program is retrogressing. I think that it would be a disservice to the handicapped children of this country.

I believe that enactment of this amendment indicating the Congress attitude with respect to the implementation of the program is entirely appropriate and hope that every Member of the Senate will see fit to join with the Senator from Connecticut in support of this proposal.

I ask that I be made a cosponsor, Mr. President.

Mr. WEICKER. I ask unanimous consent that the Senator from Ohio (Mr. METZENBAUM) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Mexico.

Mr. SCHMITT. Mr. President, I compliment the Senator from Connecticut for his continued leadership in these issues. I think he has been a great source of strength in the subcommittee in enabling us not only to understand but to provide funding commensurate with the needs of the handicapped.

The sense-of-the-Congress resolution that the Senator has proposed states that new regulations for the Education of the Handicapped Act should not become effective until after the 97th Congress reconvenes for a special session, or the 98th Congress convenes, whichever occurs first.

The Department of Education published a notice of proposed rulemaking on August 4 that would considerably revise the regulations governing part B of the Education of the Handicapped Act—State grants. The proposed regs are complicated and controversial, having evoked an immediate negative response from advocacy groups for the handicapped, as well as just the general concern of those of us who watch governmental rulemaking with a jaundiced eye to begin with.

The regs have a 90-day public comment period which would end in early November. Technically, the Department could very quickly publish the final rules and send them to Congress for the required 45-day approval period. The 45-day period would then end during recess, or during a lame-duck session, thus sidestepping legislative review, that has been incorporated into the law.

The resolution will make clear to the Department of Education that the Congress places a great deal of importance not only on the full implementation of the law mandating a free, appropriate, public education to handicapped children, but also on the process of legislative review, which, unfortunately, the Carter administration

declined to follow and fought the Congress tooth and nail.

The present administration also is reluctant to endorse the concept of legislative review. We hope that that reluctance will gradually disappear.

It is my understanding that the Department of Education estimates that it will take months to analyze and respond to the public comments received during the 90-day period. Therefore, the final rules would not be published and sent to the Congress for review until the spring of 1982.

I believe the Senator from Connecticut is exactly right in making this very clear statement and allowing the entire Congress also to clarify what we expect that progress to be.

I compliment him on his amendment.

Mr. MITCHELL. Mr. President, I rise in support of the Weicker amendment, expressing the sense of the Congress that the start of the legislative review period for proposed regulations on special education will be postponed. The effect of the amendment is to delay the implementation date for the regulatory changes being suggested.

On Wednesday, August 4, the Department of Education published in the Federal Register proposed changes to existing regulations under part B of the Education of the Handicapped Act, Public Law 94-142. Congress passed this law in 1975 to insure that all handicapped children would have a free appropriate public education, that their rights and those of their parents would be protected, and that States and localities would receive assistance in providing that education.

Passage of the Education of the Handicapped Act recognized that government at all levels must do more to improve educational opportunities for handicapped children and integrate them into society. Since that time, great strides have been made in that direction. However, we must not retreat on our commitment to the disabled. By helping them overcome their handicaps, we enable them to become productive members of society, to take their place beside those of us who are more fortunate and can function without assistance.

In promoting certain rule changes, the Secretary of Education has said he wants to streamline Federal policy and reduce costs and administrative burdens on local school districts. However, this action has provoked the immediate opposition of advocacy groups who believe that the rights of handicapped children and their parents will be nullified if the proposals are adopted.

Officials of two Maine organizations, the Maine Association of Handicapped Persons and Parents of Learning Disabled Students, Inc., have spoken strongly against the proposed rules. Among their primary concerns are the

potential erosion in parental rights, the granting of authority to school systems for exclusion of handicapped children from regular classrooms and from nonacademic activities such as meals and recreation, and relaxation of the requirement that handicapped children must be placed in a program as near their home as possible.

The sponsor of this amendment, my distinguished colleague from Connecticut, held a hearing on the proposed regulations this morning in the Subcommittee on the Handicapped which he chairs. I understand that several professionals expressed considerable concern about the effect of the rule changes on educational opportunities for the handicapped.

By delaying the implementation of these rules, Congress is giving a clear signal that it, too, is concerned about the rights of the handicapped and wants ample opportunity to review the proposals before any action is taken on them. I join my colleagues in supporting this amendment because I believe that special education is too important for it to escape scrutiny whenever changes in the fabric of the program are considered.

During the comment period, Congress and the public must examine the effect of the rules on all of the States. Some have relatively weak protections for the handicapped and others, like my own State of Maine, have stronger protections. I am proud to say that the Maine Legislature enacted special education legislation in 1973, 2 years before approval of the Federal statute. State leaders have thus for almost a decade showed great interest in working with the handicapped to improve opportunities throughout the State.

During the next few weeks, I intend to review these rule changes with great care. On September 13 and 14, the Department of Education will hold a public hearing on them in Portland, Maine. I hope all those interested in my State will take that opportunity to express their thoughts and concerns on this area so vital to the handicapped.

I commend my fellow New Englander for his leadership in the field of handicapped rights and for his sponsorship of this amendment.

Mr. HATFIELD. Mr. President, I suggest we vote.

The PRESIDING OFFICER. Is there further debate?

Mr. WEICKER. Mr. President, I ask unanimous consent that the Senator from West Virginia (Mr. RANDOLPH) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Connecticut. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER) the Senator from Maryland (Mr. MATHIAS) and the Senator from Delaware (Mr. ROTH) are necessarily absent.

The PRESIDING OFFICER. (Mr. BRADY). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 93, nays 4, as follows:

(Rollcall Vote No. 301 Leg.)

NOT VOTING—3

Baker	Mathias	Roth
-------	---------	------

So Mr. WEICKER's amendment (UP No. 1198) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, I ask unanimous consent that Senators PERCY, STAFFORD, and QUAYLE be added as original cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, while we are in Labor-HHS matters, may I ask the Senator from New Mexico, the chairman of the Labor, Health and Human Services and Education Subcommittee, about language in the committee report concerning adolescent family life program? There has been some concern expressed that the report language could somehow be interpreted to apply the "parental consent and notification" provisions of the adolescent family life program to other programs under the jurisdiction of the Department of Health and Human Services. Can the Senator tell

me whether the language does apply to Health and Human Services programs other than adolescent family life?

Mr. SCHMITT. It does not.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I should like to recite the list of amendments that we have pending that I have been notified about: Senator PERCY, Senator BRADLEY, Senator LEAHY, Senator ARMSTRONG—

Mr. LEAHY. Mr. President, I cannot hear the Senator. I am sorry.

Mr. HATFIELD. I am reading the list of amendments that I am informed will possibly be offered: Senator PERCY, Senator BRADLEY, Senator LEAHY, Senator ARMSTRONG, Senator SCHMITT, Senator KENNEDY, Senator CHAFFEE, Senator MATTINGLY, and Senator DODD.

I again invite any other Senator who expects to offer an amendment to provide us with that information so that we might proceed in an orderly fashion.

Mr. President, I hope that we could get all the amendments dealing with one subject handled in sequence following the introduction of that subject, which I think we are about ready to embark upon. Senator PERCY, I believe, would be next on the pecking list, if we follow that, although the Chair should recognize whoever he wishes. Once Senator PERCY raises CBI, Caribbean Basin Initiative, I imagine then that Senator LEAHY would offer his point of order. Once that is disposed of, I urge, if there are other amendments that are pending on the CBI subject even though they are not listed in this particular order, that we deal and dispose of each one of those and complete that subject. I think that would be by far the most practicable procedure.

With that in mind, I yield to the Senator from Illinois.

Mr. PERCY. Mr. President, I thank my distinguished colleague, the chairman of the committee and floor manager, for yielding.

UP AMENDMENT NO. 1199

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1199:

On page 31, line 15, delete the period and insert in lieu thereof the following: "Provided, That none of the funds appropriated for this purpose may be obligated until September 15, 1982, or until the enactment of authorizing legislation, whichever comes first."

Mr. PERCY. Mr. President, this amendment is designed to protect the legitimate interests of the authorizing committee for the Caribbean Basin Initiative in a way which does not undercut the chances of funding this important program in fiscal year 1982.

The amendment stipulates that none of the funds appropriated for the purposes of the Caribbean Basin Initiative may be obligated until September 15, 1982, or until the enactment of authorizing legislation, whichever comes first.

This gives the authorization committees another 5 weeks to take their legislation to the floor and provide policy guidelines for this program. I believe we can meet this deadline. I have talked to the majority leader (Mr. BAKER) and he has assured me that there will be time available on the floor for the authorizing bill prior to September 15.

The House Foreign Affairs Committee will seek a rule this Thursday for the authorization of these foreign aid funds, and they may take their bill to the floor on Thursday.

Under normal circumstances, I would not agree to any waiver of authorization requirements, but this is a special case which requires special procedures. Fiscal year 1982 is over in less than 2 months. If the administration is unable to begin obligating funds for this important program by mid-September, the outlays for CBI will all appear in fiscal year 1983. As the chairman of the Foreign Operations Subcommittee (Mr. KASTEN) knows, we already have severe problems with foreign affairs outlays in fiscal year 1983. With this amendment in place, the administration will be able to begin obligating funds for this program on September 15, 1982 and the fiscal year 1983 outlay problem will be made less severe.

This amendment further protects the prerogatives of the authorizing process with regard to earmarks. I do not necessarily agree with all of the earmarks contained in this bill. But the Foreign Relations Committee will have the opportunity to address that issue in the authorizing bill and to supersede these earmarks if that is desired.

Finally I say to my friend and colleague, the Senator from Connecticut (Mr. DODD), a valued member of our committee, that I believe this amendment protects his rights to address his desires to channel some or all of these funds through the World Bank. We will have another opportunity on the floor to review this proposal.

Mr. President, before yielding the floor, I should like to make a general statement on the importance of the Caribbean Basin Initiative, the Presidential initiative that has been thought through very carefully, supported very vigorously by the contrib-

uting nations, such as Mexico, Colombia, and Canada, and supported by all nations with whom I have discussed this matter in Latin America.

The \$350 million in supplemental assistance authorized in this section of the bill are absolutely critical to meeting the immediate financial needs of a number of Caribbean Basin economies. In many cases, lending from other sources—our European friends, Japan, the World Bank and Canada—remains in abeyance until the United States makes its commitment of assistance to the Caribbean Basin.

In the past several months, I and other Members of Congress have been visited by citizens of the Caribbean countries. All have come to speak to the importance of the Caribbean Basin Initiative. More recently, the Presidents of Costa Rica and Honduras have both met with members of the Foreign Relations Committee as well as with members of the Finance Committee to speak to the absolute necessity of the aid and trade portions of the Caribbean package.

The Caribbean Basin is a region of profound interest and concern to the United States. It is economically important to us. A good share of our trade, especially raw materials and petroleum, passes through the Caribbean. It is militarily important to us. It guards the access to the Panama Canal and to the Atlantic Ocean. If hostile bases were established in the region, we would have to engage in costly defense preparations quite different from what we have now. The Caribbean Basin is also politically important to the United States. The countries of the region are our neighbors. It is important to us and to them that we all pursue positive, mutually cooperative and beneficial relations in the region. No one gains from hostilities.

Mr. President, I yield to the distinguished Senator from Wisconsin (Mr. KASTEN).

Mr. KASTEN. I thank the Senator from Illinois, the chairman of the Foreign Relations Committee.

As chairman of the Foreign Operations Subcommittee, I accept this amendment, assuming that the managers of the bill will accept it, also.

Senator PERCY's efforts on what could have been a touchy subject are to be commended. He has protected his interests, while at the same time insuring that funding for this very important foreign policy initiative is not jeopardized. I compliment the chairman of the Foreign Relations Committee, and I thank him for his cooperation. I know that he and I will continue to work together on these very difficult issues in the future.

Mr. President, the amendment offered by the distinguished chairman of the Foreign Relations Committee is self-explanatory. It provides that

funding for the Caribbean Basin Initiative will not be obligated until September 15, or until enactment of authorizing legislation, whichever comes first. This basically keeps intact the Appropriations Committee's action on this matter, although it gives the authorizing committees a specific amount of time in which to take action. I believe this is a good accommodation, a fair compromise, and I commend the chairman of the Foreign Relations Committee for it.

One of the reasons the waiver provision in the bill and the chairman's amendment is necessary is because of the severe outlay constraints that will affect the function 150 account in fiscal year 1983. If expenditures under the CBI are delayed beyond September 15, the impact on this outlay problem for fiscal year 1983 will be severe.

We have been told that the Agency for International Development expects to expend approximately \$200 million before the end of fiscal year 1982 from CBI funds. I also understand that there may be problems with respect to GAO concerns that expenditures should not exceed the immediate needs of a particular program. However, although I recognize these concerns as valid, I believe that the serious balance of payments problems existing throughout the Caribbean region, and our own outlay concerns, justify expenditures in the amounts contemplated by the CBO. I would, therefore, strongly encourage the Agency for International Development to expend approximately \$270 million in fiscal year 1982, utilizing appropriate mechanisms, including trust arrangements or escrow accounts or other similar methods of controls.

Mr. LEAHY. Mr. President, I have heard the discussion of the distinguished chairman of the Foreign Relations Committee and the distinguished chairman of the Foreign Operations Subcommittee, but I must say that the amendment that has been proposed by my good friend from Illinois does not really address the question, because it is an either/or situation.

It says that if we have authorizing legislation—that is, legislation that has passed both bodies and is signed by the President—by September 15, that will control. Or, if we do not do it, which is a very real possibility—I would say nearly a probability—then we will just go ahead and spend this money willy-nilly, anyway. That is the rub.

The President of the United States has spoken of a need for a Caribbean Basin Initiative, and I agree with President Reagan on that. I will support him in efforts for a Caribbean Basin Initiative but I want to know what is in it.

Maybe it is a bit of my Vermont background, but we Vermonters like to

know what we are paying for before we put out the money.

Specifically, this bill appropriates \$280 million for various foreign military assistance programs, \$355 million for the Caribbean Basin Initiative, and \$635 million in foreign aid, without any prior authorization.

There is no Caribbean Basin Initiative as yet. I do not believe we should blindly fund a program of this magnitude and controversy. The administration has already agreed to a compromise package in the House which would have reduced the request for military aid from \$301 million to only \$52 million. That is not reflected anywhere in this appropriation.

More important, the administration dropped its military aid request for El Salvador altogether, and there is a letter from Under Secretary Buckley—which letter I will put in the RECORD this afternoon—which says that they offered that. That compromise package was later taken down in the House on a point of order that the CBI had not been authorized.

Mr. President, I go home to my State of Vermont almost every week, and I have had people tell me that they are concerned about the cuts in housing, the cuts in veterans programs, the cuts in aid for education, the cuts in school lunch, the cuts in medical programs, the cuts in nutrition programs, the cuts in aid to the disabled and the elderly, the cuts in farm programs—and cut after cut after cut.

Mr. President, I feel awfully nervous about going back home to Vermont this weekend and telling them that I voted for more than a half billion dollars in foreign aid. Then somebody will say to me, "Exactly what is that going to go for?" I will have to say, "I don't know. It has not been authorized yet."

However, if we get an authorization by September 15, that will carry. But then, I suspect, the next question is going to be, "Aha, but if you don't get the authorization by September 15, what happens then?" Well, then it can be spent in some vague fashion.

I do not think any one of us wants to explain that we are voting for a half-billion dollar foreign aid bill at a time when we are cutting everything else, and we do not know how we are going to spend it.

This has not been authorized. So I am going to request the Chair to rule on whether, under rule XV, paragraph 5, a point of order lies against the material beginning on line 1 of page 31 through line 17 of page 33.

My point of order will be that this material contains significant matter not within the jurisdiction of the Appropriations Committee, which has proposed the amendment, and that the changes in substantive law included herein properly lie within the juris-

diction of the Committee on Foreign Relations.

Mr. President, I raise a point of order under rule XV and I ask for a ruling on my point of order.

Mr. KASTEN addressed the Chair.

Mr. LEAHY. I ask the Chair to rule on my point of order.

Mr. KASTEN addressed the Chair.

The PRESIDING OFFICER. The Chair asks the Senator from Vermont whether he is making the point of order against the Percy amendment or the underlying amendment.

Mr. LEAHY. I make the point of order against the underlying amendment, the committee amendment, beginning on line 1, page 31, through line 17, page 33.

Mr. KASTEN. Mr. President, I raise the defense of germaneness.

Mr. LEAHY. A parliamentary inquiry, Mr. President. Under the precedents of the Senate, is there any precedent for the defense of germaneness against a point of order raised under rule XV, paragraph 5?

The PRESIDING OFFICER. The Chair states that this is a case of first impression, as to whether or not the defense of germaneness is a permissible defense against a point of order based on rule XV. For that reason, the Chair will submit the question to the Senate for its determination.

Mr. LEAHY. Mr. President, I ask again, is there any precedent whatsoever for the action of the Chair?

The PRESIDING OFFICER. Since the Chair is aware of no precedent on the point—

Mr. LEAHY. Is there any precedent for the use of germaneness against XV-5?

The PRESIDING OFFICER. The Chair stated that there are no precedents on the point, and for that reason, the Chair will submit the question to the Senate.

Mr. LEAHY. Can the Chair, in its discretion, permit debate on the defense of germaneness?

The PRESIDING OFFICER. The Chair, in its discretion, can entertain debate on the question it has submitted to the Senate—namely, is the defense of germaneness an appropriate defense to a point of order based on rule XV, paragraph 5?

The PRESIDING OFFICER. The Chair will entertain debate.

Mr. LEAHY. Mr. President, I made the point of order. It is obvious a point of order would lie after the defense of germaneness. There are no precedents for the defense of germaneness. I assume that the parties making the defense of germaneness would raise some points which show that such a defense is justified.

Mr. KASTEN. Mr. President, I think the question and the issue is clear. I am prepared to have the issue considered by the Senate.

Mr. LEAHY. Mr. President, it has been contended that a point of order should not lie against a \$600 million amendment which has been reported by the committee. The defense of germaneness would exist where the other body has legislated on an appropriations bill. That is why we have it, so the Senate would not have its hands tied by its rules. That is not the case here.

I wish to make a couple of points:

The House of Representatives obeyed its own rules in this matter. When the point of order was raised in the House of Representatives, the matter was taken down. It struck the entire matter from the bill because it was legislation on an appropriation bill.

Second, the legislation that does exist in the House version of Foreign Operations under this bill has nothing to do with the Caribbean Basin Initiative or \$280 million for military aid. It is only related to other matters.

In sum, the House of Representatives obeyed its own rules. We should do the same. It would be the most enormous stretch of any sense of germaneness to say that under the committee amendment we have before us today this would be germane and that the point of order would not lie.

The PRESIDING OFFICER. The question is, Is a defense of germaneness a valid defense against a point of order based on rule XV?

Mr. LEAHY. I am sorry, Mr. President, I cannot hear the Chair. Will the Chair begin again?

The PRESIDING OFFICER. The question is, Is the defense of germaneness a valid defense against the point of order based on rule XV, paragraph 5?

This question is being submitted to the Senate for its decision. An "aye" vote maintains the appropriateness of raising the defense of germaneness. A "nay" vote holds that the defense of germaneness is not appropriate against a point of order under rule XV, paragraph 5.

Mr. LEAHY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. Did the Chair rule on whether rule XV, paragraph 5 a point of order lies against the material after the question of germaneness?

The PRESIDING OFFICER. The Chair has not ruled on that point.

Mr. LEAHY. Will the Chair rule on that point?

The PRESIDING OFFICER. The Chair will wait for the Senate to decide whether germaneness is or is not an appropriate defense.

If the Senate holds that germaneness is not an appropriate defense or if the Senate decides germaneness is a satisfactory defense generally but is

not applicable to this case, then the Chair will rule on the point of order.

Mr. LEAHY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. Then what the Chair—

Mr. CHILES. Mr. President, will the Senator yield?

Mr. LEAHY. I yield.

Mr. CHILES. Will the Senator explain to the Senator from Florida, is he raising a point of order on rule XV, paragraph 5?

Mr. LEAHY. I am.

Mr. CHILES. Then it would seem to me, Mr. President, if the point is being raised on rule XV, paragraph 5, as well as the point on the other, then the Chair should rule and the Chair should not skirt this by saying he is going to wait and rule after the Senate has had a vote on germaneness.

I think a Member of this body is entitled to raise one or more points that he wishes if he has those points and the Chair should rule on all of those points.

The PRESIDING OFFICER. The question is, Is the defense of germaneness an appropriate defense?

All those in favor signify—

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. If the Chair were to rule on the point of order and even if the Chair were to rule in favor of the Senator from Vermont on that point of order, and even assuming that the Chair was sustained in the ruling on that point of order, that would not preclude a subsequent effort to raise a defense of germaneness, would it?

The PRESIDING OFFICER. Once the Chair has ruled on the point of order, the defense of germaneness is too late.

Mr. LEAHY. Mr. President, is there any precedent for that?

The PRESIDING OFFICER. Under rule XVI when points of order are made against amendments on the grounds that they are legislation a Senator may raise a defense against that point of order on the grounds that the amendment is germane, but that Senator must raise that defense of germaneness before the Chair rules on the point of order.

Mr. LEAHY. We are operating under rule XV, paragraph 5 when there is no House text. There is no House text under rule XV 5 or under rule XVI. Must not the Chair rule on the point of order when there is no House text at all on this subject, this having all been stricken out in the House already on a point of order?

Mr. President, the point is there is no House text whatsoever here.

The PRESIDING OFFICER. Since this is a case of first impression the Chair is submitting the question to the Senate for its decision. The question is debatable, and the Chair is entertaining debate.

Mr. LEAHY. Mr. President, I suggest the absence of a quorum.

Mr. BUMPERS. Mr. President, will the Senator withhold for just a second?

Mr. LEAHY. I withhold.

Mr. BUMPERS. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUMPERS. If we vote on the germaneness issue, the point of order dealing with germaneness, first, and the Chair is not upheld, then would the second point of order that this is legislation on an appropriation bill, would that be a second vote then?

The PRESIDING OFFICER. No point of order has been made that this is legislation on an appropriation bill.

Mr. BUMPERS. Well, the question of germaneness, if the Chair is not sustained on that, would there be a second vote on the other point of order?

The PRESIDING OFFICER. The Chair has made no ruling. The Chair is submitting the question to the Senate.

Mr. LEAHY. Mr. President, under the precedents of the Senate, the Chair is referred to rule XVI. Is it not true that we have a precedent in a case where after the question of germaneness was raised, but before the Chair submitted the question to the Senate for a decision, the majority leader made a second point of order that there was no House language in the House-passed bill to which the question of germaneness could be raised? The Chair sustained that point of order from which an appeal was taken, but the appeal was tabled, sustaining the ruling of the Chair, which sustained the point of order that there was no House language in the bill to which the question could be raised. The Chair then sustained the first point of order that the amendment was legislation on a general appropriations bill.

Is that not a precedent of the Senate for a ruling on the original point of order?

The PRESIDING OFFICER. The Senator from Vermont is correct, and this understanding is consistent with the question as stated by the Chair. The Chair is submitting the general question as to whether germaneness could be a valid defense under the circumstances.

Mr. HATFIELD. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Only if the Senate holds that germaneness could be a valid defense—

Mr. HATFIELD. Will the Senator yield for just one question? The Sena-

tor is looking for a particular right here, and I think it can be accommodated. I would like to suggest that we have a call of a quorum to get the Parliamentarian together with the leadership, which has been alerted in this matter, because I think we ought to be careful as to what kind of precedent we set in this matter at the moment. Let us work this out if we can with the Parliamentarian. Therefore, if the Senator will not object, I would like to suggest the absence of a quorum.

Mr. LEAHY. Mr. President, if the Senator will withhold in order that I may make a parliamentary inquiry, I understand the Chair has allowed time for debate. Would there be any time for debate on this matter after the call for a quorum, and that the Senator from Vermont be assured that he would be recognized?

Mr. HATFIELD. Mr. President, I ask unanimous consent that following the call for the quorum it be in order that the Senator from Vermont be recognized to pickup where we have left off at this moment, hopefully for a solution of the parliamentary tangle.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Now, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. EAST). Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I should have done this earlier. I apologize to anyone who has been inconvenienced by my delay.

I indicated earlier this morning that we should expect to be in late tonight. I have consulted with managers of the bill and with others, it appears that in order to make significant progress on this measure and perhaps to finish it tomorrow or the next day at the very latest, it will be necessary to stay in this evening. I advise Senators, then, that I expect us to be here until about 9 o'clock tonight, maybe a little later. Members should be on notice of the possibility of a late evening tomorrow as well.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Oregon.

Mr. HATFIELD. Mr. President, what is the pending question?

Mr. LEAHY. I cannot hear the Senator.

Mr. HATFIELD. What is the question pending before the Senate?

The PRESIDING OFFICER. The question that has been submitted to the Senate is, Is germaneness an appropriate defense generally against the point of order lodged against an amendment to a general appropriations bill on the grounds that it violates rule XV, paragraph 5?

Mr. HATFIELD. Mr. President, I wonder if the Senator from Vermont would clarify for the benefit of the Senate whether he intends to pursue this question or if he has other parliamentary procedure in mind?

Mr. LEAHY. I appreciate the question, Mr. President. My concern, as I have expressed it to the distinguished chairman of the Appropriations Committee, is that we have totally usurped the powers of the Committee on Foreign Relations; that the Appropriations Committee has passed a Caribbean Basin Initiative, aid to El Salvador, and a whole lot of other things that have not been authorized. We have no deadline for when they might be authorized. We have waived the necessity for them to be authorized. What we would be doing is voting a half-a-billion dollars in foreign aid and never be able to explain to our constituents what it is for. Therefore, I raise rule XV-5, that this is substantially going into the jurisdiction of another committee.

I had hoped that the Chair might rule one way or the other on it. I think it is very clear that it is. The Chair declined, as is the Chair's prerogative, to rule on that.

The distinguished Senator from Wisconsin raised a defense of germaneness. The Chair has submitted that to the Senate and has graciously allowed time for debate on it, which we have had.

I also feel that it is not germane because there is not adequate language in the underlying House bill to make it germane.

Now, if the question of germaneness is going to be the question, then I would, of course, if we are going to do that, ask for the yeas and nays on that question, naturally.

My concerns are twofold, and I understand that I would still have the ability to move to strike such things as the language allowing us to bypass the Foreign Relations Committee and also have the ability to ask for the yeas and nays on the committee amendment itself.

In fact, a parliamentary inquiry, Mr. President: Is it in order to ask at this time for the yeas and nays on the committee amendment on foreign aid?

The PRESIDING OFFICER. It is not in order to ask for the yeas and

nays on a first-degree amendment to which a second-degree amendment is pending.

Mr. LEAHY. I thank the Chair.

Mr. HATFIELD. I wonder if the Senator then would be willing to proceed along the line of raising a point of order against the section on the basis that it is legislation on appropriation and then let the Senator from Wisconsin raise the defense of germaneness to the question raised by the Senator from Vermont and let the Senate proceed to vote on that question?

Mr. LEAHY. I suspect that the vote is going to be the same in either instance, so we might as well stay with XV-5, if we are going to have to face the question of germaneness.

Mr. HATFIELD. I wonder, in light of the counsel from leadership and others to the Senator and other parties to this discussion about attempting to not raise the question on rule XV-5, which may set forth a precedent in the Senate, if the Senator from Vermont would be willing to avoid that type of issue at this point?

Mr. LEAHY. I tell my distinguished friend and colleague from Oregon that there are precedents on the germaneness issue on XVI. I would be happy to go under rule XVI if the defense of germaneness is not being raised so we do not have further precedent, but otherwise I feel strongly enough on this issue that I would risk precedent by going under XV-5. Again, I suspect the final vote would be the same under either one. I am being asked to give up a number of my rights. The other side does not seem to give up any of theirs, so I would rather go under that procedure. I have great faith in the collective wisdom of the Senate.

I am sure we would not set a precedent we would regret later on.

Mr. HATFIELD. Will the Senator yield?

Mr. LEAHY. Sure.

Mr. HATFIELD. Is the Senator not aware, as far as the Appropriations Committee is concerned, that we are willing to give the Senator from Vermont a vote on any part of this bill, an up-or-down vote on any question he should raise concerning the foreign aid section or any other section and in any form in which he wishes to raise that question as far as El Salvador, arms, economic aid, security aid? Would that not be satisfactory to the Senator as far as getting us out of this parliamentary entanglement?

Mr. LEAHY. Mr. President, I appreciate what the Senator from Oregon has said. The distinguished chairman of the Senate Appropriations Committee, Mr. HATFIELD, has always protected the rights of the Senator from Vermont and has always allowed a vote whenever I wanted one.

Mr. HATFIELD. And voted with him frequently.

Mr. LEAHY. And that is greatly appreciated.

I do not intend to go through this on a line-by-line basis. I think that would be unnecessary. I have no intention of taking the time of the Senate for that.

Mr. President, I make a parliamentary inquiry. Would it be in order for the Senator from Vermont to withdraw his rule XV-5 point of order and go to the usual point of order under rule XVI? Would that be in order?

The PRESIDING OFFICER. The Senator has a right, under the circumstances to withdraw his point of order, since the Senate has taken no action on the point of order, and the Senator then would have a right to make a new point of order.

Mr. LEAHY. Mr. President, I have an enormous amount of respect not only for the Senator from Oregon but also for my own leader, Mr. ROBERT C. BYRD, and for the majority leader, Mr. BAKER. I have listened to their concerns expressed during the quorum call, regarding some dangerous precedents we might enter into with respect to rule XV-5.

It is with reluctance that I withdraw my point of order under rule XV-5 and raise a point of order that under rule XVI, the language on line 6, page 31, of H.R. 6863, as reported by the committee, is legislation on an appropriation matter.

Mr. KASTEN addressed the Chair.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. LEAHY. I yield.

Mr. HATFIELD. First, I thank the Senator for withdrawing his original point of order and for rephrasing it under rule XVI. I express my appreciation to the Senator from Vermont for that.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Wisconsin yield to me? I know he wants to raise the point of germaneness. That has to be voted on immediately, and I should like to make a remark.

Mr. KASTEN. I am pleased to yield to the minority leader.

Mr. ROBERT C. BYRD. Mr. President, I join the distinguished Senator from Oregon in congratulating the Senator from Vermont and in expressing appreciation to him for withdrawing the point of order involving Senate rule XV, paragraph 5. I think that to have that rule upheld by submitting to the Senate the question of germaneness would create serious problems down the road, especially in connection with reconciliation bills. I thank the Senator, and I thank the Senator for yielding.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. KASTEN. I yield.

Mr. BAKER. Mr. President, I take this opportunity to join the minority leader in congratulating the distinguished Senator from Vermont. What he did was highly responsible and perhaps inimical to his parliamentary interests in this situation. I believe that, in the long term, it is in the interests of the Senate, the Senator from Vermont, and all of us, in that we have time to give careful thought and consideration to the appropriate application by precedent and example of rule XV. I thank the Senator for forbearing in connection with the precedent at this time.

Mr. KASTEN. Mr. President, I raise the defense of germaneness.

The PRESIDING OFFICER. Under the precedents of the Senate and rule XVI, the question of germaneness having been raised, the Chair must submit the question to the Senate for a vote, without debate.

Mr. LEAHY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Is the committee amendment dealing with the Caribbean Basin Initiative germane? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS), is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The yeas and nays resulted—yeas 53, nays 46, as follows:

[Rollcall Vote No. 302 Leg.]

YEAS—53

Abdnor	Gorton	Nickles
Andrews	Grassley	Packwood
Armstrong	Hatch	Percy
Baker	Hatfield	Pressler
Boschwitz	Hawkins	Quayle
Brady	Hayakawa	Roth
Chafee	Helms	Rudman
Cochran	Helms	Schmitt
Cohen	Humphrey	Simpson
D'Amato	Inouye	Specter
Danforth	Jepsen	Stevens
Denton	Kassebaum	Symms

NOT VOTING—1

Mathias

The PRESIDING OFFICER (Mr. East). On this vote the yeas are 53, the nays are 46. Therefore, the amendment is germane and the point of order fails.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was held to be germane.

Mr. D'AMATO. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON UP AMENDMENT NO. 1199

Mr. KASTEN. Mr. President, what is the issue now before the Senate, the Percy amendment?

The PRESIDING OFFICER. The matter before the Chamber would be the amendment of the Senator from Illinois (Mr. PERCY).

Mr. KASTEN. I know of no more Senators seeking to debate that particular issue.

Mr. LEAHY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I ask for the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

Mr. DeCONCINI. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. DeCONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate will be in order. The Senator from Oregon has the floor.

Mr. HATFIELD. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The Senator from Arizona has asked for the yeas and nays.

Mr. HATFIELD. No, Mr. President—

Mr. DeCONCINI. Mr. President, I ask unanimous consent to withdraw my request.

The PRESIDING OFFICER. The Senator did withdraw his request.

Mr. HATFIELD. Mr. President, the Senator from Arizona having withdrawn his request for the yeas and nays, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment (UP No. 1199) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER THAT VOTES BE STACKED UNTIL 7 P.M.

Mr. BAKER. Mr. President, I have discussed this with the minority leader and other Members. Mr. President, I ask unanimous consent that any roll-call votes ordered between now and the hour of 7 p.m. be stacked to occur beginning at 7 p.m. in sequence, the same sequence in which they were ordered back to back.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1200

(Purpose: To strike out supplemental appropriations for economic support fund assistance, military assistance, international military education and training, and foreign military credit sales, and for other purposes)

Mr. LEAHY. Mr. President, I send to the desk an amendment on behalf of myself and Mr. PELL and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Vermont (Mr. LEAHY) (for himself and Mr. PELL) proposes an unprinted amendment numbered 1200:

Beginning on page 31 with line 1, strike out all through line 17 on page 33.

Mr. LEAHY. Mr. President, I ask unanimous consent that Mr. Dodd of Connecticut be listed as a cosponsor as well as Mr. DeCONCINI from Arizona.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, before the Senator commences his discussion of his amendment—

Mr. LEAHY. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator's point is well taken. The Senate is not in order.

The Senator from Vermont has the floor, and under the rules of this Chamber he is entitled to be heard. The Senator from Vermont.

Mr. LEAHY. Mr. President, I do not want to unduly hold up my colleagues here. I have expressed my concern on the floor of the Senate in some considerable detail about the section referring to foreign aid in this supplemental bill.

The administration is asking for a total supplemental of almost \$1 billion for foreign aid, mainly security and military aid. It is asking for \$401 million in bilateral economic assistance and \$301 million in military aid. It has already agreed to a military aid package of \$52 million, with no funds for El Salvador, on the House side. The security arguments, therefore, really have less meaning here since the administration was apparently willing to give this away in the other body.

I ask unanimous consent that a letter dated July 28, 1982, from James L. Buckley, the Under Secretary of State, be printed in the RECORD. This bolsters the comments I have made about the administration's position.

There being no objection, the letter was ordered to be printed in the Record, as follows:

UNDER SECRETARY OF STATE,
Washington, D.C., July 28, 1982.

HON. CLARENCE D. LONG,
Chairman, House Subcommittee on Foreign
Appropriations, Washington, D.C.

DEAR MR. CHAIRMAN: This is to inform you that the Administration finds that it has no responsible choice but to accept a compromise on the security assistance supplemental we have requested for FY 82. The compromise will include an overall total of \$52 million of new MAP and FMS credits, for the purpose of funding programs for Sudan, Somalia, Honduras, Portugal and Costa Rica; and \$350 million of ESF to carry out the President's Caribbean Basin Initiative.

In so stating, I emphasize that the President's original request was specifically drawn to meet the most pressing needs of key allies; to improve stability in the Middle East, the Caribbean and Central America; and to pursue our national security objectives in Europe and elsewhere.

We remain convinced that the requested amount is necessary. Nonetheless, we are prepared to accept this arrangement because of your assessment that it is this, or nothing; and we will seek no further funding under our FY 82 supplemental request.

Sincerely,

JAMES L. BUCKLEY.

Mr. LEAHY. Mr. President, we have already enacted over \$2.5 billion for security assistance this year, \$176 million in grant military aid and \$750 million in foreign military sales credits.

When you look at the current economic crisis facing this country, can we really talk about another \$½ billion here, especially \$½ billion that has not gone through the crucible of the authorizing process, one that has not been debated in the authorizing process and apparently will not be? Are there real security needs?

The administration is willing to give up its request for military funds for El Salvador. Can we really vote this much money in foreign aid—and I would just repeat what the distinguished chairman of the Appropriations Committee said yesterday:

Although the committee made reductions in several programs below the levels provided in the House-passed bill, our final prod-

uct is still over the House bill by \$225 million.

Mr. HATFIELD continues to say:

It should be pointed out, however, that the overage is, in large part, attributable to the committee's recommendation of \$426,531,000 in foreign assistance, including \$355 million for the President's Caribbean Basin Initiative.

(Mr. SCHMITT assumed the chair.)

Mr. PELL. Will the Senator yield for a question?

Mr. LEAHY. Certainly.

Mr. PELL. Would it not be the case, if we left things as they are now, exactly the same as if we in the Foreign Relations Committee decided to appropriate some money and did that?

Mr. LEAHY. It would be that exactly. It would really be saying that we do not need the committee system in the U.S. Senate and that we do not need both an authorizing and appropriating committee. We lose the checks and balances. I would say to my good friend, the distinguished Senator from Rhode Island, that we lose the checks and balances which assure the public that at least there will be full consideration of what we do here on the floor of the Senate.

Mr. PELL. And this waives, one step further, the specific provision of the law saying the Appropriations Committee should not take an action of this sort which does not apply to the Foreign Relations Committee until they decided to appropriate some money. Would that not be true?

Mr. LEAHY. Exactly. We would be saying that the rules apply to everybody but they do not apply to us.

Mr. PELL. I congratulate the Senator from Vermont for bringing up this amendment and I hope the amendment prevails.

Mr. LEAHY. I appreciate the comments of the ranking member of the Foreign Relations Committee.

Mr. President, last week this body ratified a constitutional amendment to balance the budget. This week we toss in one-half billion dollars in foreign aid without really even saying what it is going to be used for.

I have stated earlier that I go back to Vermont virtually every week and have doing this now for most of 8 years. I like to go around my State. I feel it is about the most beautiful State in the country. I enjoy talking with the people. I enjoy visiting them, and I enjoy hearing what is on their minds.

I do not think it comes as any surprise to Members of this body on either side of the aisle that the things I hear on their minds these days are cuts in housing, cuts in school lunches, cuts in nutrition, cuts in health, cuts in veterans benefits, cuts in aid to the elderly, cuts in energy, cuts and cuts and cuts.

Mr. President, I will be going back home either this week or next and I

really am not too anxious to have somebody come up to me and say:

Pat, we heard you voted for a half a billion dollars in foreign aid, having voted just last week in the reconciliation bill to make more cuts in all these programs that affect everybody in the country. You voted for a half billion dollars in foreign aid and that was not even authorized. You couldn't even point to a Foreign Relations Committee vote or a Senate vote or a law saying that that money had been authorized for what it is going for. You can cut our farm program, you cut us everywhere else, but you cannot cut this.

To paraphrase a distinguished colleague and friend of mine on April 29, "at a time when domestic programs are being reduced, this increase in foreign aid is hard for me to swallow." That was said by the distinguished chairman of the Subcommittee on Foreign Operations, Mr. KASTEN, and I agree with him.

Mr. CHAFEE. Will the Senator yield for a question?

Mr. LEAHY. Of course.

Mr. CHAFEE. Is this indicative of the intense opposition that the Senator will bring against the \$2.4 billion aid for Israel? Is this a harbinger of his views on that?

Mr. LEAHY. I would assume that we will look at the Israeli aid on the basis of has it been authorized and what is the status of it. The position I am taking is consistent with one I have taken over and over again in this body on the questions of authorization.

Mr. CHAFEE. The authorization is the key element?

Mr. LEAHY. The authorization on a major program, a new program, one that has really no precedent, weighs very heavily with me, yes, it does. We have some items in this bill that probably follow past legislation, past precedent. But there has been no legislation for the Caribbean Basin legislation, no legislation that has passed the Senate, no legislation that has passed the House of Representatives. Actually, nothing that has been voted on the floor here on the Caribbean Basin Initiative. It makes it very difficult for me to support a whole new program solely on the appropriations process.

To give an example, as we have had at times when we have voted appropriations bills, the distinguished Senator from Rhode Island and I and others have voted appropriations bills that may have exceeded the authorization. I would say that those are bills that normally are just following year after year after year of precedent. But it is very hard to vote on the appropriation level for something that is brand new.

I will support the Caribbean Basin Initiative once they tell me what it is going to be. I am delighted to see that the administration wants to have a policy in Central America. After 1½ years, it is high time. I am delighted

that they are now willing to do so. But I think what they should do is come here and say, "This is what our policy will be. This is what the Caribbean Basin Initiative is going to be." Then we will debate it with the majority of the President's party in this body, and then vote the dollar needs.

Mr. CHAFEE. As I understand the Senator's explanation to my prior question, it is not the dollars involved, but it is the lack of authorization and what the program is. If that is what he is following, I think it would be better not to constantly refer to the amount, sort of describing the Nation going into bankruptcy, which obviously it is not.

Mr. LEAHY. I think the dollars are an issue. I do not think we should willy-nilly vote \$128 million for El Salvador. This bill includes \$128 million for El Salvador. I would like to see some authorizing legislation on that.

I am not too sure that there are very many Vermonters, Republicans or Democrats, who expect me to be voting \$128 million for El Salvador without some darn good reasons for it. The dollars are part of the issue. But the dollars in fact become an overwhelming issue without authorization. A half billion dollars is a half billion dollars. That is far more than the whole budget of my State for a year. That is far more than the taxpayers of the State of Vermont will spend in a year, in 1½ years. If we are going to give that away in foreign aid, I think we ought to have it authorized. We ought to know exactly where the foreign aid is going to go before we do it.

So the dollars are important to me, I tell my good friend from Rhode Island, whether they are going to El Salvador or anywhere else.

The dollars may be justified. Maybe notwithstanding our balanced budget constitutional amendment that we passed last week, this half billion dollar increase is justified. Maybe it is. But none of us can really know without the authorizing legislation.

Mr. PROXMIRE. Will the Senator yield briefly?

Mr. LEAHY. I yield to my distinguished colleague.

Mr. PROXMIRE. Mr. President, I commend the distinguished Senator from Vermont on what he is doing here. I think it is so important to respect the integrity of our authorizing committees. We should have an authorization, particularly with a new program and a new big program.

May I ask my good friend from Vermont how he would explain, for example, the fact that on page 31, line 13, the amendment provides \$5 million for Haiti, and on line 14 it provides \$50 million for Jamaica? Does that mean that Haiti is less needy, that Jamaica is 10 times as needy as Haiti? Is that the kind of division of aid that we ought to have a solid record on, that

we ought to have a knowledge about, that we ought to have a demonstrated case showing that we should provide that kind of disproportionate assistance to Jamaica compared to Haiti?

Mr. LEAHY. I have to agree with my good friend and seatmate from Wisconsin. There is no record that I can look back to and say why it is in here.

You can look at these things all the way through. The bill asks for an additional \$12 million for military aid to Honduras. That is in addition to \$10 million appropriated last year in military aid, \$40 million in the proposed CBI, \$20 million in last year's development aid, \$28 million proposed for next year's aid, \$25 million proposed in next year's ESF, \$5 million in Public Law 480, \$20 million in military construction, and another \$15 million in military aid request for fiscal year 1983.

I asked the administration what their policy was in Honduras, what the money was for. I did not get many answers. It is a small and poor country. It does need economic assistance. But what is the military threat? What requires this supplemental?

I share the concern of the Senator from Wisconsin (Mr. PROXMIRE). Just look at the numbers floating across the page. In El Salvador, the Economic Support Fund, \$40 million; military assistance, \$82 million; Public Law 480, title I, \$22.4 million.

That may not be an awful lot of money to Foggy Bottom, but to Middlesex, Vt., it is a fair amount of change.

Mr. DODD. Will the Senator yield?

Mr. LEAHY. I yield.

Mr. DODD. I thank the Senator for yielding. I commend the Senator for offering this amendment. I cosponsored the amendment but I did so with great reluctance. Frankly, the Caribbean Basin Initiative, Mr. President, is the first such initiative in Central and South America in 20 years. The last program that was anything like this at all was the Alliance for Progress, offered by President Kennedy as a way of trying to deal with economic and social injustice in this hemisphere.

So it is with a great deal of reluctance that I stand as a cosponsor of the amendment being offered by the Senator from Vermont and the Senator from Rhode Island. But I do so quite frankly because I think our colleagues ought to know what this issue is.

Despite the fact that Caribbean Basin Initiative has been called an economic development program for the region, it is nothing like that at all.

We are talking about \$230-odd million to go to four countries, the balance of that money to go to the rest of the entire Caribbean. We are talking about \$128 million going to a country that is in the middle of a civil war, El Salvador. Does anyone in this Cham-

ber believe for 1 second that \$128 million in economic assistance is actually going to provide economic help to El Salvador at this hour? Granted they have problems, but does anyone really believe we are going to achieve that?

Do you know why we are providing \$128 million for El Salvador? Because the very rich in El Salvador are taking their money out and sending it to Miami and to Switzerland. We are going to jump in with \$128 million of this country's money to bail out the capital flight from El Salvador. That is what it is all about. We are not going to see 1 red cent of this money going toward a food program, a housing program, a road program. It is balance-of-payments money, capital flight issues in El Salvador.

In addition to the \$20 million in military assistance, we are now going to bail out a nation economically where its own people, the very affluent of this country, will not invest in it. That is No. 1. That is a major issue we have. It is really not an economic development program.

We are going to provide \$5 million for Haiti. We do not even show \$5 million in the budget. I cannot remember when we authorized \$5 million for anything. In the last few weeks the Haitian Government has eliminated some of the best people they put into their Government a few months ago, such as the finance minister. Well, \$5 million may not be a lot but one of the reasons they are getting it quite frankly is because they claim to be an ally.

We are going to provide \$50 million for Jamaica. I have a great deal of respect for the prime minister there. I think he is doing the best job he can. But let us be honest with ourselves. The economic problems of Jamaica are certainly not as serious as the economic problems of the Dominican Republic. Yet there is disparity there.

The point is this: Call this what you will—call it a Caribbean Basin Initiative, call it economic assistance to the region. It is nothing of the kind. It is not even integrated. In fact, the committee, by a vote of 9 to 8, voted to eliminate these markings and identifications and to put all of the funds, the \$350-odd million, into a trust fund. That is what the committee did. That is what the authorizing committee has done. But the appropriating process here has said, no, that does not really count at all, we are going to do what we want anyway, regardless of what the committee has done.

Granted, the Senate as a body has not done anything. I have not voted on a foreign aid bill that came to the floor. I believe foreign aid is absolutely essential. It helps America's prestige around the world. It certainly fulfills obligations we have to our neighbors. But I do hope our colleagues understand what we are doing here today.

The \$350 million in just the Caribbean Basin Initiative proposal—this is an end run. It is an effort to avoid the kind of painstaking process that the authorizing committee has engaged in.

We have gone through days of markup, days of hearings, to try to figure out what we ought to do and what made sense. We made a decision in the committee and, frankly, the committee decision now is not even being considered.

Let me make something also clear to my colleagues here. Nothing is going to happen on the second and third leg of the Caribbean Basin Initiative. This is just a bilateral aid program. That is all this is, \$128 million for El Salvador. That is basically what it is.

What happened to the tax and trade issues? I shall tell you where they are, Mr. President. They are in the Finance Committee. And they are not coming out, either. There is no way those bills are going to come out of the Finance Committee this year.

They talk about economic development in the region and tax incentives and aid issues could play a role in Caribbean Basin development. But they are not going to see the light of day. All we are going to see is this, without any consideration at all for the real economic need of the region.

I strongly urge my colleagues to support the amendment being offered by the Senator from Vermont and the Senator from Rhode Island, because I think it is about time we said no. This has not been well thought out. We are not going to subsidize capital flight, which is what we are doing.

We are not going to sit back and support the sending of our tax dollars to a country where people who have the financial capability fail to do it themselves. That is what we have here.

If we have the will, we will accept this amendment and allow the committee to do its work and come before this body with a well-thought-out bill, and then proceed on it.

I thank the Senator from Vermont for yielding.

Mr. LEAHY. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second.

The yeas and nays were ordered.

Mr. LEAHY. Mr. President, I wish to echo much of what my good friend from Connecticut has just said. I support a great deal of our efforts in foreign aid. I have done this on a bipartisan basis. I have voted for foreign aid bills of President Ford's, of President Carter's, and of President Reagan's. But every time I voted for foreign aid, I have at least known what is in the bill. I have at least known where the money is going to, or at least known where we wanted it to go. Now we are dealing, we must be quite frank about it, not only with an issue in this Carib-

bean Basin Initiative, or a great deal of it, not only of not knowing where the money is going to go, but not even knowing where we want it to go. We are going to have a difficult enough time when we finally have a CBI bill before us, when we finally lay out what our policy is going to be, getting assurances that the money will actually go where we want it to go. We are going to have a difficult time being sure that if a land reform program is part of it, indeed, they will have land reform.

We are going to have a difficult time knowing, if American money goes in for economic development in a particular country, it does not end up in a Miami bank account.

We are going to have a difficult time knowing that, when we have a certification of human rights progress, indeed, human rights progress has been obtained.

We are going to have to know for sure that if we are told that killing has stopped, for example, in El Salvador or the killings have slowed in El Salvador, indeed, if that is because there has been a change in attitudes and not simply that most of the likely targets are already dead and that is why the killings have slowed. There are so many issues, all of which would be debated if authorizing legislation is before us.

Mr. President, I have stated before that I have supported foreign aid bills in the past of three Presidents—two Republican, one Democrat—I intend to do it in the future. I intend to with President Reagan. I hope to see a Caribbean Basin Initiative that I can support. I would like to see one that would have the bipartisan support of this body, one that cuts across the ideological, geographical, political, or partisan lines. But I am not going to be able to do it, in a time of great austerity, by writing a blank check.

I know when the President's fiscal 1983 foreign aid request came before Congress. I remember well what the Foreign Relations Committee Chairman Senator PERCY, told Under Secretary of State James Buckley.

Having spent the weekend in Peoria for three days two weeks ago, I can tell you that foreign assistance doesn't fly too well in Peoria or in most other parts of the country.

I remember what Senator HELMS, chairman of the Committee on Agriculture, said:

It's a little tough for me to look at foreign aid with farmers in Illinois, North Carolina, South Dakota, going down the tube because they can't get money.

This may well be an issue that is in the best interests of our country, notwithstanding austerity at home, notwithstanding cuts in programs at home; maybe it is best to continue foreign aid and to continue spending money in these other countries. But if

that is the case, then the case has to be made. On the floor of the Senate, the case has not been made.

If we are in a time of great austerity; if we are in a time when things are so rough that we must vote in this body on a constitutional amendment to balance the budget; if things are so tough that we must cut back on our school lunch program, on our aid to farmers, on housing for the elderly; if we must cut back on medicare and medicaid; if we must cut back on our educational efforts; if we must cut back on our health efforts; if we must cut back even on vaccinations; if we must raise catsup to the level of a vegetable—if we must do all of those things, then I think it behooves us, Mr. President, at least when we are talking about sending money to foreign countries, to sit down and ask first, what is it for?

If we are going to have to be making all these cuts, and I believe that many we have to make in this country because of our economic situation, but if we are cutting everything in our own country, let us not sign blank checks for other countries. Let us make sure that the interests of the United States are being protected when it goes abroad.

Let us make sure, when we shell out a half billion dollars in foreign aid, that we know what it is going to be used for. Let us have a little bit of responsibility. Let it at least be argued, let us know what the overall policy of the United States is going to be: Is this the beginning of the Caribbean Basin Initiative? How much is that going to cost? Is it going to be eventually \$1 billion, \$2 billion, \$5 billion? Nobody has said yet. What do we hope to gain by it?

Is it a case maybe of too little too late? Will it bring stability in Central America? Will the killings stop in El Salvador? Will the human rights be respected? Will we keep some of the countries out of the orbit of the Soviet Union? Those are the appropriate questions before we start out with all of this money, because be assured, my friends, this is only the camel's nose. There is nobody I have talked with that suggests for one moment that this is all the money that is going to be requested. We are embarking on the beginning of billions of dollars of aid.

Did the Senator from Arizona seek recognition? I would be happy to yield to my colleague, the Senator from Arizona.

Mr. DECONCINI. I thank the Senator from Vermont, and I want to compliment the Senator first for locating this particular area in the supplemental appropriations bill and the outstanding presentation he has made this evening in opposition to it.

I rise in support of the amendment of the Senator from Vermont for the

same reason I have risen with the Senator from Montana (Mr. MELCHER) during the budget resolution debate, to try to put some curbs on the excessive expenditures in the foreign aid area.

I find it absolutely ludicrous for us to continue to advance hard-earned taxpayers' dollars when we are all voting—not all of us but most of us, 69 of us—for a constitutional amendment after much debate to balance the budget. Now we have a chance to reduce that deficit by a nifty little 800 some million dollars, and I hope that those who sincerely want to see this budget brought under control will agree that this is a good place to start.

It is very hard to talk to constituents when you talk about putting a pay cap on retired military personnel and civil servants, when you talk about cutting veterans' health care benefits, and many other areas, and then have to hear, "Well, how do you explain this year, 1982, \$3.1 billion more in foreign assistance than the year before?"

Here is a perfect example of putting the cart before the horse when it has not been authorized, No. 1; No. 2, when the priorities have certainly not been set down, and, No. 3, when we flat cannot afford it. We cannot afford an additional \$800 million today. It is time the American people know that on the floor this evening there is going to be an opportunity to decide whether or not we have our priorities in the right perspective, whether or not we think it is important that we do something about the needs in this country and also about the need to reduce that deficit.

I thank the Senator from Vermont for bringing this to the attention of the Senate. I compliment him for it and I hope our colleagues will join us.

Mr. DODD addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, let me make a few other points, if I may, in support of the amendment offered by the Senator from Vermont.

There has been an extensive debate over the past year and a half on the issue of our financial support for the Government of El Salvador. Without debating that issue, Mr. President, as to whether or not we should or should not be supporting the Government in El Salvador, I think all of our colleagues in the Chamber would agree on one point, and that is that it deserves to be debated. Regardless of where one comes down on the issue of El Salvador, very few other issues have captured as much of the attention of the American public or the press as the issue of El Salvador. In the last 3 years, between economic and military assistance almost a quarter of a billion dollars has gone into El Salvador.

I might add that that amount of money is more money than we have spent in three and one-half or four decades in El Salvador in economic aid, just to put it into perspective.

But certainly it has been an issue in hot debate. There have been countless editorials, op-ed pieces in newspapers, TV debates, radio debates, debates in committees in both bodies of this Congress. What we are being asked to do in effect in this particular bill is to agree almost without debate that El Salvador should get almost a third of all the money that is going to go to the Caribbean Basin Initiative, \$128 million just sort of put in the bill despite the fact that the committees charged with the responsibility of debating the merits of such a program have taken a different position. By a vote of 9 to 8 the Foreign Relations Committee decided that it made more sense to multilateralize this assistance, to better coordinate with the donor countries of Canada, Venezuela, Mexico, and Colombia so that the Caribbean Basin Initiative would work in a most efficient possible way. What we are doing is totally obviating that discussion and that debate. We are saying it did not really matter at all.

What I am suggesting is, whether or not you agree or disagree with the conclusion of the authorizing committee, certainly the authorizing committee deserves more respect than the treatment it is getting by just totally disregarding the hours of debate that preceded the vote in the committee to multilateralize this assistance, rather to make it a bilateral aid program that we have done by earmarking the funds specifically for the countries that we think deserve that assistance.

Mr. President, I emphasize again that I happen to feel very strongly about the need for a Caribbean Basin Initiative. The region needs it desperately. It is the best hedge we have against the kind of tragedy we see in El Salvador, we saw in Nicaragua, that we are seeing in Guatemala, we may see in Costa Rica before the year is out. The best hedge against totalitarianism, against the Marxists, the Leninists, is to have a country that is economically sound based on democratic principles and the right of self-determination.

The Cubans and others have never been successful in penetrating those societies, but what we are doing with this bill is to provide a disproportionate amount of funds to one nation for the simple reason that the people who live there have failed to make the investment in their own nation. We are not suggesting that there ought to be a slowdown in capital flight, not making these funds contingent upon El Salvadorans investing in their own country. We are saying we will bail you out, we will provide the \$128 million so that you can continue to take

your money out of El Salvador and put it in accounts in other nations including our own. That is what we are really doing.

For the reasons I have identified, the reasons that have been identified by the distinguished Senator from Vermont, the distinguished Senator from Arizona, and the distinguished Senator from Rhode Island, I hope that our colleagues agree to this amendment and allow for a normal process to proceed. If we are truly interested in providing the kind of economic assistance that the President has described, through the vehicle of the Caribbean Basin Initiative, then let us do it intelligently. Let us do it so it will make a difference, so that it will reach the people we would like to see these funds reach, the people who are desperately trying to get their countries back on their feet. The present process will not achieve that. We are wasting money through this proposal. I strongly urge the adoption of the amendment. I yield back the floor.

Mr. KASTEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Mr. President, the Appropriations Committee is recommending approval of the administration's economic assistance portion of the Caribbean Basin Initiative including an add-on of \$5 million for Honduras. I point out to the Senate that that \$5 million add-on has been offset by a similar reduction in the military assistance request for that country.

Mr. President, the Caribbean Basin Initiative is the single most important program the administration has suggested for Latin America. It represents the most comprehensive economic cooperation package since the Kennedy administration's Alliance for Progress 20 years ago.

The CBI is going to provide badly needed budget and balance-of-payment support for the economies of several important countries in the Caribbean.

It is important to recognize that we have had five different hearings touching on subjects dealt with here, one being a special hearing on the CBI itself.

It is also important to recognize that we have worked with the Foreign Relations Committee and with the chairman of the Foreign Relations Committee in a compromise amendment on the authorizing legislation. The amendment which was offered by the distinguished chairman of the Foreign Relations Committee and which was adopted provides that funding for the CBI will not be obligated until September 15 or until enactment of authorizing legislation, whichever comes first.

So, basically, that keeps intact the Appropriations Committee action on

this matter, although it gives the authorizing committees sufficient time in which to take action.

This is a good accommodation, a fair compromise, and we are under a time constraint in connection with this matter.

One reason why the waiver provision of that bill and the chairman's amendment were necessary was the severe outlay restraints that will affect function 150 in fiscal year 1983. If all expenditures under the CBI are delayed beyond September 15, the impact of this outlay problem for fiscal year 1983 will be severe.

I yield at this time to the ranking minority member of the Foreign Operations Subcommittee, the distinguished Senator from Hawaii. I thank him for his help, his support, and his work. I know that he joins me in trying to work through the difficult and serious problems we have in the Caribbean.

I hope this amendment is defeated.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUE. Mr. President, I find myself in a very uncomfortable position, debating this issue in opposition to my beloved colleagues on the Democratic side of the Senate Chamber. But before proceeding, I think a few items should be clarified.

This is not the first time we have appropriated moneys without authorization. As many Members are aware, I was chairman of the subcommittee for many years. I can recall at least two occasions when we appropriated huge sums of money for the migration and refugee programs covering Indochina, and this was a new program. The authorizing committee, the Foreign Relations Committee, for reasons of its own, had failed to act. An emergency was upon us, and on two occasions we appropriated millions of dollars.

I can also recall at least two occasions when we appropriated funds without authorization on another new program, the international narcotics control program. Narcotics abuse was a problem that was reaching crisis proportions, especially in our port cities and our huge urban areas, and we felt that the time had come for us to become involved not just within our localities but at the source.

On at least four occasions, we appropriated funds for the international financial institutions, without authorization. These are the funds we set aside for the multilateral development banks.

I am certain it is common knowledge to all of us here that on countless occasions we have appropriated funds under continuing resolutions without authorization; and when one speaks of continuing resolutions, we are talking about the whole foreign assistance package.

We have appropriated funds for programs in the Middle East for Egypt, for Israel, for Lebanon, for Jordan, all without authorization.

In looking over the measure presently before the Senate, under appropriations for the Department of State, I can see, on one page alone, four items totaling more than \$60 million that will be appropriated without authorization.

So I think the record should show that this is not the first time. The question is: Should we wait?

Second, it has been suggested in opposition throughout the debate that the military assistance program, the foreign military sales program, and the military education program have not been authorized. I am certain that all of us know they have been authorized.

I believe the chairman of the committee has adequately covered the reasons why the Caribbean Basin Initiative is worthy of our support. It is true that we are supporting the El Salvador Government and economy; and it is true that many of their wealthy people have taken out their funds. But why are they taking out their funds? Because of instability and because of terrorism in that country.

I know that it is tempting for all of us to close our eyes and look inward, within our own country, in times of need and crisis; that we wish to close our eyes to any relationships and concerns we may have with foreign countries. But I think we should remind ourselves that, notwithstanding the greatness of this country, we are not independent. We are dependent upon other countries. Our colleagues should be reminded that about 15 years ago, a very important commission made a very important study to determine that 100 most essential strategic goods that are required to maintain our economy and keep our Republic afloat. Of the 100 items—such as cobalt, manganese, titanium, iron, copper, platinum—it was found that we could provide only 15 percent. Eighty-five percent had to come from the outside.

For example, Jamaica provides most of our bauxite. The only bauxite deposits we have in the United States are found on the island of Kauai, in the Hawaiian chain, under the city of Lihue, and I do not believe that the people of Lihue will dig up the city for the bauxite.

What do we find in the Caribbean that is so important to us? Why does the committee feel that money should be set aside for these countries—these foreign countries—at a time when we are denying our people? For one thing, we find that one-half of our exports and imports that are carried by ships have to go through the Caribbean; they have to go through the Panama Canal. Three-fourths of all our oil im-

ports have to follow sealanes through the Caribbean. It would be most uncomfortable if these important countries in the Caribbean were in unfriendly hands.

Third, this is a time when we are concerned about illegal immigrants. We are going to debate in a few days the matter of immigration—about the Haitians, about the Mexicans, about the Indonesians, about South Americans who are illegally entering the United States.

Every study has indicated that the economic pressures in the Caribbean nations have contributed heavily to the illegal immigration to the United States. If we want those people to remain where they are, I believe the time has come for us to address these economic conditions of these countries.

Fourth, I think it should be noted that the economies of the countries in the Caribbean Basin are very important to our economy. Even under poor conditions, they have been purchasing at least \$7 billion of U.S. goods. This was last year.

Fifth, I believe it should be noted that of the \$350 million that will be appropriated in this bill for the Caribbean Basin Initiative, much, if not all of it, will be spent in the United States.

It is true that this is not truly an economic support program. As my colleague from Connecticut said, this program will help these countries by assisting them on their balance of payments deficits. Without this assistance we will find several of these countries not only on the verge of bankruptcy but possibly going into bankruptcy.

So we have a choice, I say to my dear colleagues, of closing our eyes to the problems of the foreign countries, or concerning ourselves with their problems because I am always convinced that if there is a riot in Bangladesh, it will affect us; if there is a civil war in El Salvador, it will affect us, if Nicaragua falls to an element that is not friendly to us, it will affect us.

And if we are to maintain this democracy which we cherish so much, we cannot uphold ourselves as an island. We are not an island. We are part of the world.

It is a large sum. But when one considers the economic health and political stability of our country, I think it is a small investment to make.

I hope that my colleagues will uphold a position of the committee. As indicated earlier I find it very uncomfortable speaking against my colleagues on the Democratic side. But I want to be consistent, whether in the majority or in the minority.

I thank the Chair.

Mr. SYMMS and Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, I wish to compliment my colleague from Hawaii for those very incisive remarks.

I shall be very brief. I know the chairman of the Foreign Relations Committee is seeking time.

I would like to point out that there are 100 million people who live between the borders of the United States on the southern side and the Panama Canal. We hear this hue and cry about our immigration problem, and the Senator from Hawaii touched on the immigration problem that I think is ahead for us, and surely the United States with billions and billions of dollars that we have poured overseas in the Far East, in Europe, in the Middle East, in terms of foreign aid, can come up with a little bit of support to try to help people right here in this hemisphere.

I had the opportunity to visit Central America earlier this year, and I have filed a report with the majority leader and made it available to all my colleagues on what I observed in Central America.

I only say to my colleagues that I think without America's aid right now in El Salvador surely things will be very, very difficult in the future.

I believe that the Senator from Hawaii makes a very, very good argument in terms of safeguarding the supply of minerals and resources that we are relying on in this country, in terms of the Caribbean, the oil flow that comes in through the Caribbean Basin, in terms of its essential importance to the future security of the United States. If we fail to defend freedom in El Salvador and in Central America, we are going to have immigration problems in this country that will be unimaginable when compared to anything we have had in the past. There is no question about it, in my judgment.

If we apply the rule of 10 percent, we will be talking about at least 10 million immigrants walking through Central America and across that 2,100-mile unmaned border with Mexico. There are already a half million El Salvadorans in the United States. If the efforts of the government in power there now to defend freedom should fail and the efforts we are making should fail, then I think we could probably anticipate seeing not next year, not 5 years from now, but immediately, another half million in the United States, and there are problems that we as Members of this body will have to cope with.

So I believe it would be very shortsighted for the Senate here tonight to support the amendment of my good friend from Vermont. We should stand with the Foreign Relations Committee, and I believe that the wise deci-

sion would be to vote down the Leahy amendment.

I yield the floor to the Senator from Illinois.

Mr. PERCY. Mr. President, I express appreciation to both the Senator from Hawaii and Senator SYMMS for what I consider to be a very sound evaluation of programs that are in the United States national interest.

We are talking about security assistance. We are not just talking about the CBI. This amendment strikes programs that have been authorized for a year in the Foreign Relations Committee. This strikes supplemental appropriations for military assistance, military training, military credit sales, and the special defense acquisition funds. We are striking at the heart of things that we have worked on to strengthen our own national security interest and the security interest of our friends.

In a period when the President has placed the highest priority on security, why would we strike at the very programs and funds that strengthen others and by so doing strengthen the common defense? That is the most self-defeating thing that I have ever heard.

This amendment strikes at the heart of these security assistance programs, and we have to realize that.

We will deal later with CBI and we will have other amendments when we can talk about that. But I think at this particular point it is well to just indicate how closely allied these programs are that will be cut out with our own national security interests.

All of these programs, as I say, have been authorized except the CBI, and I have reiterated and will repeat again that the CBI can be authorized by September 15. This amendment strikes funds for NATO allies that have bases used by U.S. military forces, Portugal and Spain.

The Ambassador from Portugal came in today to say goodbye as he now leaves to go back to be Foreign Minister of Portugal. I can just imagine what his reaction would be as foreign minister of a fine NATO ally if we strike at the heart of funds that he feels are small indeed compared to the real overall need.

It strikes funds for U.S. allies in South Korea and Thailand that are under constant military pressure.

Have we forgotten that we fought a war in Korea? Have we forgotten that and we won freedom for South Korea? Are we going to endanger that by sending a signal out there that we think the danger is all over?

Just take a trip out there, just talk to them, talk to anyone who has been in that area and he will tell you the danger is not over, the danger is ever present, and the buildup in North Korea is very real indeed.

This strikes funds for Sudan.

Mr. LEAHY. Mr. President, will the Senator yield?

Mr. PERCY. I will be finished in just a moment and be happy to yield.

This strikes funds for Sudan and Tunisia that are under constant political and military pressure from Libya's Qadhafi. I was in Sudan at the time of the riots there in January when they had thousands of people rioting and a death as a result of pressure on them economically and because they had to increase the price of sugar some 60 percent.

Certainly we know that Tunisia is one of the staunchest friends we have, but they are under constant threat from Qadhafi. This is the wrong time, the wrong time indeed to take this kind of a measure.

A prominent diplomat from Europe today reported that today for the first time in his memory it is popular in Europe to be anti-American. They feel some of our policies have been very inconsistent. We know the problems we are facing in the Middle East today, all over the area where the credibility of the United States has dropped down drastically.

You do not buy friends but you also do not destroy programs that have been worked out in cooperation with friends, allies, and supporters of the free world. We do not just pull the rug out from under them precipitately this way. I trust the amendment will be defeated.

Mr. LEAHY. Mr. President, I listened to what the distinguished chairman and my good friend from the Foreign Relations Committee has said. Incidentally, when he mentioned Sudan I point out they are now substantially in default of their FMS guaranteed loans as are some of the other countries listed in a recent GAO report, including El Salvador.

When he speaks of the urgency, I would remind the Senate of the letter that has already been placed in the Record from Mr. Buckley in which the administration suddenly found they could do without nearly a quarter of a billion dollars of MAP and FMS credits.

Now, this is why we should vote on this only when we have an authorization. It is obvious the one hand does not know what the other hand is doing. I want to know where a half-billion dollars of the taxpayers' money is going before I vote for it.

Mr. THURMOND. Mr. President, I rise today in support of the appropriations included in this bill to carry out the President's Caribbean Basin Initiative.

This program will target much needed assistance to several small developing countries in Central America, the Caribbean, and South America. This initiative addresses the poor eco-

conomic conditions which threatened political and social stability in the region.

The program includes provisions for improved trade agreements with these countries, tax incentives for U.S. industries willing to invest in these areas, and direct economic and technical assistance to these nations.

Mr. President, I feel it is imperative that we undertake this initiative to improve our ties with our neighbors to the South. This is an excellent opportunity to strengthen our commitment to freedom and independence for the peoples of the Western Hemisphere.

It would be a grave strategic error to allow subversive forces such as Cuba and the Soviet Union to continue being the dominant influence in this area of our hemisphere. If this program is implemented, a clear message will be sent to our adversaries that we are willing to assist our neighbors in their attempt to preserve their freedom, peace, and security.

The peoples of Central America and the Caribbean are our fellow Americans. The most effective way of maintaining and improving our relations with our fellow Americans is to insure that they are not forced to exist under economic depression and misery. This program will allow us to answer their call for assistance, and at the same time, it will allow us to improve our strategic position in the area. The results will be a free, prospering hemisphere whose countries have a better understanding of each other.

Mr. President, I am pleased to lend my support to this progressive and imaginative initiative, and I hope that my colleagues will be able to support it also.

The PRESIDING OFFICER (Mr. HAYAKAWA). Under the previous order, a vote has been ordered for 7 o'clock.

Mr. LEAHY. Have the yeas and nays been ordered, Mr. President?

The PRESIDING OFFICER. The hour of 7 having arrived, the question is on agreeing to the unprinted amendment of Senator LEAHY, UP No. 1200. The yeas and nays have been ordered, and the clerk will call the roll.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Vermont. The yeas and nays have been ordered, and the clerk will call the roll. The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Georgia (Mr. NUNN), the Senator from Michigan (Mr. LEVIN), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan (Mr. LEVIN) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 42, nays 54, as follows:

[Roll Call Vote No. 303 Leg.]

YEAS—42

Baucus	Dodd	Melcher
Bentsen	Eagleton	Metzenbaum
Biden	Exon	Mitchell
Boren	Ford	Moynihan
Bradley	Glenn	Pell
Bumpers	Hart	Proxmire
Burdick	Hefflin	Pryor
Byrd	Hollings	Randolph
Harry P., Jr.	Huddleston	Sarbanes

Garn	McClure	Warner
Goldwater	Murkowski	Weicker

NOT VOTING—4

Levin	Nunn
Mathias	Riegle

So Mr. LEAHY's amendment (UP No. 1200) was rejected.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. INOUE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1201

(Purpose: Perfecting amendment to the committee amendment.)

Mr. SYMMS. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. SYMMS) proposes an unprinted amendment numbered 1201.

Mr. SYMMS. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the Committee Amendment on page 31 at the end of the paragraph, insert the following: Notwithstanding any other provision of this Act, none of the funds appropriated in this paragraph may be obligated or expended in any manner inconsistent with the policy hereby reaffirmed, which is stated in S.J. Res. 230 (76 Stat 697), to wit:

"Whereas President James Monroe, announcing the Monroe Doctrine in 1823, declared that the United States would consider any attempt on the part of European powers 'To extend their system to any portion of this Hemisphere as dangerous to our peace and Safety'; and

Whereas in the Rio Treaty of 1947 the parties agreed that 'an armed attack by any State against all the American States, and, consequently, each one of the said contracting parties undertakes to assist in meeting the attack in the exercise of the inherent right of individual or collective self-defense recognized by article 51 of the Charter of the United Nations'; and

Whereas the Foreign Ministers of the Organization of American States of Punta del Este in January 1962 declared: 'The present Government of Cuba has identified itself with the principles of Marxist-Leninist ideology, has established a political, economic, and social system based on that doctrine, and accepts military assistance from extra-continental Communist powers, including even threat of military intervention in America on the part of the Soviet Union'; and Whereas the international Communist movement has increasingly extended into Cuba, its political, economic, and military sphere of influence: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States is determined—

(a) to prevent by whatever means may be necessary, including the use of arms, the Marxist-Leninist regime in Cuba from extending by force or the threat of force its aggressive or subversive activities to any part of this hemisphere;

(b) to prevent in Cuba the creation or use of an externally supported military capability endangering the security of the United States; and

(c) to work with the Organization of American States and with freedom-loving Cubans to support the aspirations of the Cuban people for self-determination;

Mr. SYMMS. Mr. President, I yield to the Senator from Wisconsin (Mr. KASTEN). I think he wants to set the amendment aside.

Mr. KASTEN. I would prefer that the committee had an opportunity to review the amendment. We had an understanding with other Senators that, at this point, we would proceed with their amendments. I wish the Senator would withdraw his amendment at this time and give the committee members an opportunity to study it, then it can be taken up following the amendment on Greece and Turkey.

Mr. SYMMS. Mr. President, would it be in order to ask unanimous consent to set the amendment aside so we can consider the other amendments first?

Mr. HATFIELD. I would object to that, Mr. President.

I implore the Senator from Idaho please to withdraw his amendment at this time, for the simple reason that we have asked Senators, on two previous occasions, to give us an understanding of what amendments are going to be offered. We have been trying to deal with subject matter, to keep them together, such as CBI. To intervene at this time would be very difficult and change the whole procedure.

Mr. SYMMS. Mr. President, it is not my wish to impose upon the committee. This amendment is perfectly germane to the CBI amendment. I thought it was the understanding of the Senator from Wisconsin—

Mr. HATFIELD. Mr. President, in all fairness to Senators who have given us notification, we have set up a schedule here. We have called Senators to the floor with the expectation of having their amendments considered in orderly procedure. I ask the Senator to let us follow this procedure, to let us get this matter moving.

Mr. SYMMS. I ask unanimous consent to withdraw the amendment.

Mr. HATFIELD. I thank the Senator.

Mr. KASTEN. I thank the Senator from Idaho and I look forward to working with him on this amendment.

The amendment (UP No. 1201) was withdrawn.

UP AMENDMENT NO. 1202

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes an unprinted amendment numbered 1202.

On page 33, line 3, strike all after the comma following "Spain," through line 12, and insert in lieu thereof, the following:

"Greece, and Turkey: *Provided further*, That of the commitments provided only to guarantee loans for the countries referred to in the first proviso \$26,000,000 shall be provided only for Korea, \$25,000,000 shall be provided only for Thailand, \$20,000,000 shall be provided only for Morocco, \$10,000,000 shall be provided only for Tunisia, \$20,000,000 shall be provided only for Portugal, \$25,000,000 shall be provided only for Spain, \$35,000,000 shall be provided only for Greece, and \$50,000,000 shall be provided only for Turkey."

Mr. KASTEN. Mr. President, a number of Senators have indicated some concern with regard to the FMS guarantee supplemental we are providing for Turkey. As I understand that concern, it relates to a need for balance that many Senators feel between our assistance programs to Greece and our assistance program to Turkey. The committee has simply approved the supplemental request for Turkey, as requested by the administration. It agrees that this assistance is urgently

required to modernize that country's armed forces.

The PRESIDING OFFICER. The Senate will be in order so we may hear the Senator from Wisconsin.

Mr. KASTEN. The committee agrees that this assistance is urgently required to modernize that country's armed forces so that Turkey may meet vital NATO commitments. I do recognize, however, the question of balance brought up by a number of Senators, particularly the Senators from Maryland and Delaware. They have been concerned about this issue. The amendment I am offering, I believe, will alleviate this concern by providing \$35 million in FMS for Greece and \$50 million for Turkey. This will keep the ratio a number of my colleagues are interested in and, at the same time, not jeopardize the additional assistance required by Turkey.

I yield to the Senator from Delaware.

Mr. BIDEN. Mr. President, I shall be brief. Let me begin by thanking the Senator from Wisconsin for this amendment changing U.S. military assistance to Greece and Turkey from a 7-to-12 ratio back to the 7-to-10 ratio.

I shall not belabor the Senator on the merits of this proposal, only to say that I think the position we originally took in the Committee on Foreign Relations for fiscal years 1982 and 1983, which was one of rejecting the argument for additional money for Turkey in the first place, is the best of all positions. That is not what is before us.

What is before us is a compromise moving us back to a position where, at a minimum, we maintain the 7-to-10 ratio, which is vital.

I think it is important that a message go forward from here, that the U.S. Senate is not about to deviate from that ratio and that we believe that is vitally important.

I also think it is very important not to upset the balance which we have abided by for so long around here, for several very specific reasons. One, Turkey still occupies 40 percent of Cyprus and it still has a military government.

Second, Greece and Turkey have a new agreement for a moratorium on provocations and for foreign ministers to enter discussions in October, and now is not the time to change the game plan. There is much more that can and should be said to this, but I think in light of what is a reasonable compromise it would do me well to say no more and yield the floor.

Mr. SARBANES addressed the Chair.

Mr. KASTEN. I yield to the Senator from Maryland.

Mr. SARBANES. Mr. President, the amendment offered by the distinguished chairman of the subcommittee is an improvement over the committee-reported bill since the amend-

ment recognizes the 10-to-7 ratio between aid to Turkey and aid to Greece heretofore established as necessary to maintain the balance of forces in the eastern Mediterranean. By reducing the amount of aid to Turkey and by providing \$35 million in assistance to Greece, the amendment underscores the continuing concern of the Congress with the situation in the eastern Mediterranean.

However, I regret that any increase of assistance is being provided to Turkey which has remained intransigent in resolving the tragic situation in Cyprus and other outstanding issues in the eastern Mediterranean. Constructive solution of these issues would greatly enhance relations between Greece and Turkey and between each of these countries and the United States. American policy should be pressing for such solution and clearly large amounts of American assistance ought not to be granted if a positive response by Turkey is not forthcoming. In the absence of such a response, there is no basis for an increase in assistance, and I hope the final version of this legislation will not so provide.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I do not understand exactly what we are doing tonight. As I understood what was happening was that the administration asked for a certain amount of money for aid to Turkey, and that that amount was approved by the Appropriations Committee. Now we are coming to the floor tonight and suddenly it has come up that there is some magic formula that has to exist in the aid that is given to certain countries.

I would like to know the explanation for doing that. If x amount of dollars should go to Turkey, fine. If x amount of dollars should go to Greece, fine. But I do not think we should be strapped by some formula that in perpetuity says that if you give x to Turkey, you must give y to Greece. I would be interested in the proponents of this amendment giving us some explanation, based on a deeper reasoning than the fact that some formula has been struck that we all must observe. We are giving U.S. taxpayers' dollars away.

Mr. BIDEN. I would be happy to attempt to respond.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. CHAFEE. On what basis, the Senator is giving the explanation on what basis?

Mr. BIDEN. The Senator said proponents of the amendment. I am not the author. If the Senator would like me to respond, I would be delighted to. I think I have a cogent answer for the

Senator, but if he would rather someone else respond, fine.

Mr. CHAFEE. No; I could not get a better source than the Senator from Delaware, who is always very persuasive.

Mr. BIDEN. Let me respond to what is a very valid question in the following way. First of all, a bit of immediate past history. The Foreign Relations Committee previously rejected additional arms sales for Turkey. The Appropriations Committee in its wisdom decided to put it back in. But that does not respond specifically to the Senator's question. His question was why this ratio of 7 to 10. The answer can be had very simply by pointing out that Greece and Turkey are both deemed to be vital to U.S. security interests, and years ago in order to maintain what was believed to be the physical structure that each country needed and the relative balance of power between them so that they would both maintain their continued positions in NATO, it was concluded that a 7-to-10 ratio, was in fact, one that would enable Turkey and Greece to meet their NATO commitments but not enable Turkey and/or Greece to gain military power that would, in fact, put their other long-term adversary at a position they would not have been in but for U.S. aid. Or to put it another way, 7 to 10 means that Turkey does not have the wherewithal to militarily do in Greece and vice versa. That is a formula upon which both the Turks and the Greeks have known we have been operating for some time. It is against U.S. interests for us, in the name of preserving a NATO commitment and NATO capability, to put one of our two allies in that region of the world in a position of military preponderance over the other.

Mr. CHAFEE. May I ask a question?

Mr. BIDEN. Yes.

Mr. CHAFEE. The distinguished Senator from Delaware says it is against U.S. interests. Says who? Who is to determine U.S. interests?

Let me follow that with, What did the administration ask? Does anybody know? I am not saying the Senator should know. Somebody must know in this Chamber.

Mr. BIDEN. Yes. The administration asked for \$82 million not be divided in the 7-to-10 ratio but an additional \$82 million to go to Turkey.

Mr. CHAFEE. But the Senator said it was against U.S. interests. Now, there is an administration who asked this. Were they operating against the interests of the United States?

Mr. BIDEN. I believe that this administration is misguided in what they believe to be in our best interests. The better way to put it would be that it has been viewed by the past three administrations—

Mr. CHAFEE. I am not so sure that is true either.

Mr. BIDEN. Wait. Let me finish. It has been viewed by the past three administrations that the ratio of 7-to-10 was in fact a ratio that best met our interests in the region. What I am arguing is, in the face of the lack of movement on Cyprus, coupled with what are peaceful overtures by the Greek Government and the Turkish military regime to talk about their mutual problem, now is not the time to change what heretofore has been the game plan.

Mr. CHAFEE. Mr. President, is the Senator through?

Mr. BIDEN. Yes.

Mr. CHAFEE. Mr. President, this bothers me. I do not know the answer to these problems, but I know that getting locked into some permanent formula is the wrong way to do business. The needs of the two countries vary as the exigencies of the time vary. The needs of Turkey at one time are x dollars, another time perhaps it might be Greece requires more than that. But I think we are making a tremendous mistake to say that regardless of the conditions we must follow some pattern that somebody at one time has set.

What is magic about 7 to 10? For every \$7 you give Greece, you must give \$10 to Turkey; for every \$20 you give Turkey, you have to give \$14 to Greece. That does not make any sense at all, Mr. President.

Mr. BIDEN. If the Senator will yield—

Mr. CHAFEE. And nobody has given us a rational explanation of this.

Mr. BIDEN. If the Senator will yield on that point, foreign policy is not always rational. The important point is that we continue to have a firm alliance with both Turkey and with Greece. The fact of the matter is if we shift the amount of aid in such a way that either nation perceives the involvement of U.S. aid as being detrimental to their interests, causing them to do what Mr. Papandreou was threatening to do prior to his election and what is constantly a real threat in that part of the world, and that is receding from NATO or their NATO obligations, it seems to me purely from a naked self-interest point of view it is important that the United States strike upon a balance which does three things:

One. It provides both our NATO allies with the military wherewithal to be able to fulfill their responsibilities.

Two. It does it in such a way that neither believes that military aid puts their national sovereignty in jeopardy relative to our other allies.

Three. It is relatively cost effective. I said at the outset the wisest thing to do would be not to give any increase in aid but if the Senator wants to, I would be glad to go into the merits of whether or not the Turks need an additional \$82 million. The Foreign Rela-

tions Committee concluded the administration did not make the case for that, and we did not go along with it, purely on military grounds.

So it seems to me that although this is not the best solution—the best solution is to wipe out the \$82 million, period—it does, in fact, meet a legitimate, reasonable requirement of American foreign policy, and for us to have our aid go forward in such a way that we keep a balance between both parties, which we believe to be essential to our security. It is a judgmental call on the part of the administration and Congress as to whether or not a certain allocation meets that requirement. But that is the end objective. There is nothing magic about a formula.

Mr. CHAFEE. Mr. President, I think we make a great mistake by being locked into certain formulas.

In a prior incarnation within the Navy Department, we had a set formula to always keep two carriers in the Caribbean. If you did not keep two carriers in the Caribbean, everything went to pieces.

That was a terrible mistake, because that meant when we had only one there, everybody became excited; or, if we had three there, it appeared that we were warmongers.

Mr. President, I believe that this country is becoming locked into a set formula such as that, or this 7-10 formula, with the aid to these countries, both of whom are our allies, both of whom are associated with us in NATO, is the wrong way to proceed.

The administration, as I understand it, has asked for \$82 million for Turkey. I ask the chairman of the committee if that is correct.

Mr. KASTEN. The Senator is correct.

Mr. CHAFEE. They have arrived at that formula, presumably, because they thought that was needed for Turkey. It turns out that if you do that, that is going to upset everybody, or so it is said. Apparently, the administration did not think so.

We have dealt here in past years with other matters affecting these two countries. What is said by the administration is not always wrong.

What has happened, as I understand the proposal, is that we take the \$82 million and chop it up so that it ends up with 10 of those units to Turkey and 7 of those units to Greece. Is that correct?

Mr. KASTEN. The amendment provides \$35 million for Greece and \$50 million for Turkey, both in FMS guarantees.

Mr. CHAFEE. Mr. President, I see where the votes are here tonight, so I will not press this to a vote. But I hope that in the future we will be able to look at each country individually and its needs. It may well be that we will

have evenings such as this in the future when the requirements of Greece are greater than those of Turkey; and if so, we should meet them, or vice versa.

What we want is the strongest possible alliance and the best help from either of those countries, as it might be, in accordance with the precepts of NATO. But I think a set formula such as this is the wrong way to proceed.

Mr. TSONGAS. Mr. President, I support my colleagues, Senator BIDEN, Senator KASTEN, Senator PELL, and Senator SARBANES, in opposing an increase of \$82 million in foreign military credit sales to Turkey included in the fiscal year 1982 Supplemental Appropriations Act. I agree that the present compromise of splitting the increase between Greece and Turkey so as to maintain the 7-to-10 ratio is acceptable.

This proposed committee increase would send a clear message both to Greece as well as Turkey, that the United States is not committed to maintaining a military balance among the nations in the eastern Mediterranean region. Nor would the United States honor its agreement to maintain the 7-to-10 ratio in military assistance payments to Greece and Turkey. Also, this proposed increase ignores the unstable situation in Cyprus, and could further enhance Turkish intransigence there. The United States can play a role in reducing tensions and insuring the return of stability in this region, but not by increasing military assistance to Turkey with no corresponding increase to Greece.

With negotiations over renewal of U.S. base contracts in Greece expected to begin late September or early October, this \$82 million increase would only be viewed by the Greek Government as an insensitive response to the concerns of Greeks, Cypriots, and Greek Americans alike. We must expect serious consequences which may jeopardize these base negotiations.

I urge my colleagues to support this amendment in the interest of maintaining our own security positions in the eastern Mediterranean, as well as continuing cordial relations with Greece and Cyprus.

Mr. President, I was in Cyprus about 2½ weeks ago. As Senators know, the Greeks and the Turks are negotiating on the issue of Cyprus, and after a long time there has been some inching toward each other, with miles to go.

I recall that when I first came to Congress 8 years ago, we were on the verge of solving this, if only we would continue aid to Turkey and Greece, and so forth. That never took place. We went through the embargo period, the post embargo period, and, in my mind, we have made precious little progress.

The point is that those negotiations are intricate and are involved in the same symbolism that is involved in foreign policy. I do not think the issue is rationality or irrationality. The issue is symbolism.

The last thing we need is to have the Greeks and the Turks on Cyprus spending the next year or so figuring out what this vote meant.

The 7-to-10 ratio, which arguably could be dispensed with—and would be none the worse for wear—has a certain relevance because of what is happening in Cyprus.

I urge that the amendment be adopted. I would favor it all being taken out, but that is not the case. At least, let us not upset the balance of negotiations which have been going on and which I think will reconvene in September.

Mr. CHAFEE. Mr. President, I find the argument of the Senator from Massachusetts very appealing.

I say this: We are going to be confronted in this Chamber with many, many votes in which we are told, "Don't do anything because the negotiations are so tender at this moment."

We have been through this problem and this situation as it exists with those two countries for many years. Maybe the Senator is right: Do not do anything, because the negotiations are at a fragile stage, just about to reach culmination of years of difficult diplomacy. I hope he is right. But I do not find that argument all-persuasive.

Mr. TSONGAS. Mr. President, will the Senator yield?

Mr. CHAFEE. I yield.

Mr. TSONGAS. I did not mean to imply that they are close to fruition. They are a long way from fruition. I just want to make that clear. I did not intend to imply that whatsoever.

Mr. PELL. Mr. President, last December Congress passed, and the President signed, a 2-year foreign aid bill providing military and economic assistance authorizations for fiscal years 1982 and 1983. In that bill, Congress allocated military aid to Greece and Turkey in a 7:10 ratio. In previous years, aid to those two countries had been apportioned in the same ratio and, given the sensitive state of relations in the eastern Mediterranean, it was a considered congressional judgment that the 7:10 ratio should be maintained. Accordingly, for each year—fiscal year 1982 and fiscal year 1983—some \$280 million in credit guarantee authority was earmarked for Greece, while report language specified that the sum of military grants and guarantees for Turkey should not exceed \$400 million.

Earlier this year, the administration submitted a fiscal year 1983 aid request which went beyond the levels already authorized for that fiscal year. Although reluctantly, the Foreign Relations Committee considered the pro-

posed increases and approved a considerable number, raising the overall authorization of appropriations for fiscal year 1983 foreign aid by some \$786 million, primarily for security assistance. The committee also raised the ceiling on military sales credit guarantees by an additional \$710 million. These two increases produced an overall program increase of nearly \$1.5 billion for fiscal year 1983—from \$9.2 billion to \$10.7 billion.

One proposed increase for fiscal year 1983 which the committee specifically and carefully considered involved aid to Turkey. The committee was mindful of Turkish security needs and Turkish economic difficulties, but also concerned that Congress continue to abide by the legally mandated commitment, placed into law in 1978, to provide U.S. aid in such a manner as to foster military balance among the countries of the eastern Mediterranean region, meaning essentially Greece and Turkey. Acting on these considerations, the committee approved additional military grants for Turkey while stipulating that the overall level of military assistance to Turkey should remain at \$400 million. Thus, the economic burden on Turkey was lightened by shifting the Turkish program further in the direction of grant aid—but without violation of the 7-to-10 ratio, which the committee judged to be particularly important for United States-Greek relations.

It was for this reason that I view with serious concern the appearance in this supplemental appropriations bill of some \$82 million in additional fiscal year 1982 military credit guarantees for Turkey. On two occasions within the last year, the Foreign Relations Committee addressed the question of aid to Greece and Turkey; and on both occasions the committee determined that the U.S. interest in that region was best served by preservation of the 7-to-10 ratio. The enactment of the fiscal year 1982 augmentation for Turkey would not only break that ratio, but would also violate the limitation which the committee implicitly attached to its original authorization of the fiscal year 1982 military credit guarantee program. I therefore support the modification proposed by the chairman of the Foreign Operations Subcommittee which would restore the 7-to-10 ratio.

Mr. KENNEDY. Mr. President, I am pleased to join with my friends and colleagues in sponsoring this amendment which limits supplemental military aid to Turkey. The Turkish Government is currently receiving \$704 million in economic and military assistance for fiscal year 1982. At this time of urgent fiscal restraint and persisting Turkish inflexibility on the Cyprus question, an additional \$82

million for Turkish military modernization is unwarranted and unwise.

The continued occupation of Cyprus by Turkish military forces denies the Cypriot people the right to determine their own future. Turkey's refusal to cooperate in resolving the Cyprus conflict should not be rewarded by generous increases in military aid. The United States should not subsidize the illegal occupation of Cyprus. Instead of providing military support to Turkey, the administration should devote more diplomatic effort to an immediate solution for Cyprus.

The request for an increase of \$82 million in military aid to Turkey would also upset the 10-to-7 ratio that has long been maintained between aid to Turkey and to Greece. This ratio has been helpful in maintaining balanced relations among the United States and its allies on the southern flank of NATO, and it should be maintained as a symbol of U.S. commitment to peace and a strong Atlantic alliance.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1202) was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1203

(Purpose: To reduce the CBI appropriation by \$177.5 million)

Mr. DODD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Connecticut (Mr. Dodd) proposes an unprinted amendment numbered 1203:

On page 31, line 5 strike everything after "1961" through line 15, and in lieu thereof, insert "\$177.5 million."

Mr. DODD. Mr. President, the effect of this amendment is to cut the funding we are appropriating in this measure for the Caribbean Basin Initiative by one-half. The \$177.5 million is exactly one-half of the request contained in the bill.

Before going into the more substantive arguments as to why we should cut this amount in half, I should like to bring up a matter which should be of deep concern to all of us in this Chamber when it comes to dealing with the budget in the next fiscal year, fiscal year 1983.

This money for the CBI, as we all know, is a supplemental appropriation for fiscal year 1982, a fiscal year that is going to draw to a close in a little over 1 month.

I ask my colleagues whether or not it makes any sense that, in the 11th

hour, we seek to increase aid to that region, the Caribbean Basin, by some 40 percent over normal levels at the same time we are asking domestic programs to take significant cuts.

I point out that the first budget resolution of Congress has established ceilings in the foreign affairs accounts and outlays for fiscal year 1983; and if the fiscal year 1982 money that is provided cannot be obligated in fiscal year 1982 due to insufficient time, these funds could be scored in fiscal year 1983 against the foreign affairs accounts. This may result in foreign affairs accounts being over the ceilings that already have been established, thereby necessitating a cut in other foreign aid programs where we do not know they are going to occur.

In effect, we will have to spend this money in a little more than a month; and if we do not, it will be scored against fiscal year 1983 accounts. Of course, we have no idea where those cuts may come in the overall foreign aid bill.

What this is, substantively, is an effort to try to appeal to those who opposed the amendment offered by the Senator from Vermont, when an effort was made to cut all the funds, some \$860 million, that included the Caribbean Basin Initiative.

This proposal just cuts in half \$177.5 million of that program.

Again, many of the arguments that were raised by the Senator from Vermont and others can be raised here.

Very briefly, let me reiterate some of those arguments as they affect the CBI. I have stated over and over again that I believe the Caribbean Basin Initiative is a sound idea. It has been 20 years since we have had such a program at all. My hope is we will be able to see a Caribbean Basin Initiative go forward.

The problem is that the appropriations bill identifies specifically where these moneys are to go. Yet the Foreign Affairs Committee has reached a different conclusion. I grant you that is not a decision by this full body. But after several days of hearings, at least a couple of days of markup, it was the conclusion of the Foreign Relations Committee that we should deal with those funds in a different manner than as suggested by this particular proposal.

So there is some significant debate not only as to the quantity of funds and how they should be allocated but in fact whether or not there should be this kind of a program at all and whether or not it should be multilateralized or dealt with in some different manner.

If we are going to deal with a new program such as this, one that could bring great economic relief to the Caribbean basin, then it should be dealt with in a far more intelligent fashion than just doing an end run on the authorizing process.

It has been argued earlier today that this is not precedent setting, that there have been numerous other instances in recent times where the Appropriations Committee has appropriated funds prior to authorizations actually occurring and that in fact that has occurred in areas that were new initiatives.

I respect that, I understand that has happened.

The difference between those events and the one that is before us this evening is the fact that the Foreign Relations Committee is prepared to move on the foreign assistance bill. We are prepared to move on the Caribbean basin initiative. We completed our markup some weeks ago, and we have been prepared to come forward.

That is really not the issue. It is not a question of whether or not the committee has acted or not acted. We have done our business. We have done our job. And we are being told here this evening that despite what we have done, another committee is going to decide another program, and that is really what the issue is here.

It seems to me that, before that process gains the kind of momentum it seems to have already this evening in this Chamber, we should be allowed to debate these issues to their fullest through the authorizing process, particularly one that is going to have the long-term effects that the Caribbean Basin Initiative may have.

Therefore, Mr. President, I offer this amendment to reduce by one-half the request for the funds for the Caribbean Basin Initiative. It still is a lot of money; \$177.5 million is not a small amount of funds. But it seems to me to appropriate the full amount, the \$355 million, with less or little more than 1 month remaining in this fiscal year is not a reasonable way to proceed and that it is a rush to judgment on a program that should be debated more thoroughly.

So, Mr. President, I urge the adoption of this amendment as one that will save some funds this year and allow us to debate the issue and deal with it in a more intelligent fashion.

Mr. President, before yielding back, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DODD. Mr. President, I yield back the floor.

Mr. KASTEN. Mr. President, I wish to respond briefly to the Senator from Connecticut.

We have been told that the Agency for International Development expects to expend approximately \$200 million before the end of fiscal year 1982 from CBI funds.

I also understand that there may be problems with respect to GAO concerns that expenditures should not exceed the immediate needs of a particular program.

However, although I recognize these concerns as valid, I believe that the serious balance-of-payments problems existing throughout the Caribbean region and our own outlay concerns, justify expenditures in the amount contemplated by the CBO.

Therefore, I strongly encourage the Agency for International Development to expend approximately \$270 million in fiscal year 1982, utilizing appropriate mechanisms including trust arrangements, escrow accounts, or other similar kinds of methods or controls, and we have been told—

Mr. DODD. Mr. President, will the Senator yield?

Mr. KASTEN. Let me just complete. We have been told that they in fact do intend to do this. So we examined this particular subject with them and they have assured us that they do intend to expend these funds.

Mr. DODD. Mr. President, will the Senator yield?

Mr. KASTEN. I am pleased to yield.

Mr. DODD. This is called an economic development program. Can the Senator identify for me whether or not we are going to build or provide any economic assistance in the sense of contributing to the land reform program in El Salvador? What is the money going to be used for? What is the \$128 million in El Salvador going to be used for?

Mr. KASTEN. The funds for El Salvador's economy will be used primarily to stimulate production and employment in the private sector and develop and help maintain some of the economic infrastructure, to help rebuild and maintain some of the infrastructure that has been destroyed by the guerrilla attacks. I am told that the foreign exchange potential of our assistance will be directed through the banking system for financing.

Mr. DODD. Mr. President, if the Senator will yield further, what percentage of these funds is going toward the balance of payments in El Salvador?

Mr. KASTEN. I do not know exactly what percentage of the funds will be going for the balance of payments in El Salvador.

Mr. DODD. The Senator does not know?

Mr. KASTEN. I do know that a number of—

Mr. DODD. How much is going for land reform? How much is going to economic reform? How much is going to agriculture development? How much is going to urban development? Do we know that?

Mr. KASTEN. We know the general area it is going to be used in, and I do not think it is necessary to sit here

and earmark the money. We are having enough trouble earmarking country by country let alone earmarking a number of dollars for land reform and a number of dollars for this project or that. We have enough trouble with roads and bridges in our own country let alone getting involved with roads and bridges in El Salvador. As the Senator knows, our assistance has two effects—one being the hard currency effect, the other what is done with the local currency which is generated.

Mr. DODD. I respect the Senator's response.

The point has been made by others that this money is going to the balance of payments. That is what it is going for. The truth of the matter is there is not going to be one red cent of these funds used for economic development in the traditional sense. It is going to balance of payments. That is all it is going to. That is the truth.

Let me tell the Senate why it is going for balance of payments. It is because there has been \$1.5 billion in capital flight from El Salvador because the El Salvadorans with the money are not investing in their own country. It is going to Swiss bank accounts. It is going to Miami. It is going to other places other than their own country. We are being asked here tonight to spend \$128 million, and I listened to debate after debate over the last year and a half how we cannot spend money here at home, and we are going to bail out those people who fail to invest in their own nation. That is what we are doing. There is not a nickel of this money being used for the things the Senator from Wisconsin has suggested.

None of it is going to allow them to buy more arms, that is not what it is going to do. It is not going to go toward an economic support program or to assist a country that is in desperate shape at all. It is balance of payments, which is the only reason it is going. So this amendment I am suggesting would halve that amount across the board and then let us deal with it in a thoughtful manner. Let us find out what is going on. We do not even know. We are appropriating \$350 million to a region in the world and we cannot be told here this evening where the money is going. We would not tolerate such a proposal if it were going into the 50 States of the United States.

Can you imagine someone standing up and saying, "I am proposing that we spend \$128 million but I am sorry I cannot tell you where it is going to be spent?"

Yet no one is sitting here prepared to tell us where the \$128 million is going to be spent in El Salvador; where \$40 million is going to be spent in Honduras; \$5 million in Haiti, one of the most corrupt governments on

the face of the Earth, not only in this hemisphere, and yet we are being told to go along, to support this program, when we would subject our own domestic programs to far greater scrutiny than we are to this particular program.

We are talking about fiscal austerity. We are being told by the President that we cannot spend more, we have got to cut, we have got to cut further, we have got to cut into the marrow. Yet tonight we are being asked to support \$350 million for a program where we do not even know where the money is going to be spent, except some people believe, and I happen to believe, it is a balance of payments, and it is a bailout.

We had a longer debate over Chrysler than we are having on the bailout in El Salvador.

I thank the Senator.

(Mr. MATTINGLY assumed the chair.)

Mr. HATFIELD. Mr. President, I would like to just say that I understand the remarks on the argument made by the Senator from Connecticut because in many ways I share some of those views. But I want to put this into a little different context for just a moment.

We have a bill here that we have to get a Presidential signature to. It will not do us very much good to put anything in this bill or to delete anything in this bill if we end up with a veto and have to go back to redrafting it.

This bill is \$1.2 billion under the President's request. That is the total figure. But it is, in effect, about \$400 million over the nondefense discretionary areas of the President's request. Now, because the President is pursuing a point of analysis that separates defense spending from nondefense spending, I really feel that we are facing a very serious crisis in many of these programs, such as the Older Americans Act, such as nutrition, food, health, the infrastructure of agriculture, transportation, all of these other areas that constantly have received the cutting ax of the appropriations process.

The House has not entered into their bill this provision we have adopted in the Senate of the CBI of \$355 million plus the \$70 million of the other programs in foreign aid. This is going to go to conference anyway, and I want to say really right up front that we need some bargaining measure with the House, not only with the House but we need it with the administration. We need to be able to say to the administration that we are going to be forced to go back to the drafting board, and then the \$355 million, plus the \$70 million could become a very important issue in getting an agreement for a Presidential signature.

Now this, perhaps, is not traditional or this is not kosher to be discussing the strategy of trying to get a Presidential signature, but I want to be very up front with the Senator from Connecticut and say I really feel that as well-argued as his issue is, that in the other context which I am discussing it tends to fall short of what I think is very important, to protect these other programs.

I know the Senator, and other Senators such as the Senator from Connecticut, is deeply committed to, involved in and concerned about these programs, and I really feel we have gone to the marrow of the bone, as the Senator has indicated, in many of these other programs. Yet if we have a Presidential veto, where are we going to cut further? That is why I would like to see—the Senator has made his point, and I wonder if the Senator will consider pulling his amendment down on the basis that we probably will not get the full amount in the Senate bill nor the configuration of this amount when we go to conference. The Senator knows that Doc Long and the committee from the House with whom we will be meeting are not at all enamored of this particular structured provision we have in the CBI, and I am sure we are going to have to make some concessions and some compromises with the House.

But we do need, I think, as Senator KASTEN has indicated, the full latitude to bargain with the House and, very frankly, to get some leverage with the White House on getting a signature to the overall supplemental.

Mr. DODD. Mr. President, if the distinguished Senator will yield, I first of all want to commend him. I want him to know and others to know that my remarks in no way are directed at the Senator from Oregon, the distinguished chairman of the Appropriations Committee, who has been a leader on the issue of Central America, has been outspoken in his criticism of what he has perceived, and I agree with him, in some of the tragedies going on in Central America, and I want to thank him for the candor of his remarks, more candor than I have heard in my short tenure, as to why this has gone on.

The Senator is saying to the junior Senator from Connecticut, and I may be wrong, that the price we have to pay to get a President to sign a bill that has cut domestic programs to the very bone is to include a \$355 million request, one-third of which goes to one particular country in Central America, and if we will give him that increase then he will support the drastic cuts we have had to make in the domestic programs. In effect, is that what the distinguished chairman of the Appropriations Committee has said?

Mr. HATFIELD. No, I would not walk into that analysis whatsoever. I

would not be as candid with the Senator from Connecticut on that issue as I have been on the general strategy of getting the appropriation measure through.

But I would say simply that I believe it is a question of perception and of priorities where men of good faith can differ.

I happen to believe, as does the Senator from Connecticut, that the El Salvadoran situation is another quicksand that we find ourselves getting more and more engulfed in, and I would like to see us extricated, and I would support many actions that the Senator from Connecticut would take, as he has already taken, to restrict the flow of arms, to restrict the American involvement in El Salvador.

But I would only say this: That because of the Caribbean initiative, the President has, I think, very sincerely created or has offered or suggested, and I can support that on the developmental aspect, not perhaps on the military because I believe that that is the key to stability in the Caribbean, and that is the economic development rather than more arms to try to create more of an armed camp than is already there. But I do not think it is a question of whether we are trading off one for the other. I think it is a matter of where we can find the leverage, and I think the Senator from Connecticut is aware, as I am, that up to this time all of the major cuts in Federal spending have been taken in the nondefense discretionary area.

I would say to the Senator from Connecticut that we could abolish all those programs and still not balance the budget, and it is, I think a poor reason to think we can make further cuts there and without excising those programs and make them still a practicable, viable program. It is not possible.

But I do think this is something we have to do constant battle with the administration on, there is no question about it, and we have been doing and I continue to do so. I differ with them on this. But I do not believe it is one that one can say it is purely a tradeoff of American interests for Caribbean interests. I think it is a matter of perception, and it is not my perception. I would not charge the Senator or the President or anybody else with ill motives out of their pursuit of this policy, and I do not know that I could read into this action the motives of anyone. But I do think we have to face the reality that we are dealing with the proposition of how do we get a signature. I do feel that this is part of the leverage we ought to try to sustain at least to the conference with the House and then, hopefully, that we can get some commitments by that time from the administration.

Mr. DODD. Again, Senator, I thank the chairman for his candor in ex-

plaining his rationale for being for this amount. With all due respect to his request, I must respectfully regret that I cannot pull the amendment down. I do believe that I cannot do so not only for the reasons I have tried to articulate earlier, but because of the procedural process as well of appropriating funds before we have even had an opportunity to bring that matter before the floor, particularly when we have debated so long in committee. I think it would be a mistake, particularly when we are prepared to come forward with our authorization, which is the position we are in in the Committee on Foreign Relations.

But I do want to reiterate, if I can, Mr. President, my deep, deep respect for the chairman of the committee, Senator HATFIELD, for his work in the general area of the Caribbean Basin and his outspoken candor here this evening in explaining the rationale for his particular position. I thank him for yielding.

Mr. DENTON. Mr. President, may I ask for a brief time from the Senator from Wisconsin?

Mr. KASTEN. The Senator has been recognized.

Mr. DENTON. Mr. President, I just want to remark that not everyone in this body agrees with the point of view expressed by the junior Senator from Connecticut nor by the wise and experienced chairman of the Appropriations Committee.

I for one, and I believe many in this body, believe that the Caribbean Basin initiative is well-founded. Having been there, I can say that, that there is an external threat militarily which does have to be met. I do not oppose the Caribbean initiative on that matter. It is an insufficient effort to improve things economically.

I think it is absurd for us, from our perspective, to try to earmark funds for incremental disbursements in El Salvador. That is arrogant. I believe this body with all due respect, fails to recognize the relationship between failed foreign policy, failures in foreign policy, and disastrous effects in the domestic economy.

I believe if one were to track history and take a look, for example, at the rise in the price of oil back to 1973, could correlate that with failures in foreign policy, perhaps mostly in Southeast Asia.

If the recognition were made of the importance of the relationship between foreign policy success or failure and the domestic economy, we would not continue to make the blunder of posturing one against the other, whether we spend for defense or foreign aid, on the one hand, or for the domestic economy, on the other. They are interrelated directly. The first social service a government must provide its people is national security.

Our national security and our international commerce depend a great deal upon our respecting the President and Secretaries of State as they make judgments in this field. I believe we should be more respectful than we are, not meaning this to apply to any individual here.

I would conclude by quoting Dean Rusk's article in the Washington Post several Sundays ago, in which he said that Secretaries of State throughout recent decades would have an advantage in dealing with the Congress if they had the experience of raising a couple of teenagers.

We are schooled and experienced individually in various fields, but they are appointed, and the President is elected, to take the leadership in these fields. I believe we should show, in general, more respect for their initiatives in this area.

I thank the Senator.

Mr. KASTEN. Mr. President, it is my understanding the Senator from Illinois, the chairman of the Foreign Relations Committee, may wish to speak.

Mr. PERCY. I thank my distinguished colleague, and I will speak very briefly.

This legislation is not just about the Caribbean. It is about the central point of American interests in this whole hemisphere. It is a litmus test as to whether we mean what we say, whether we really do feel that stability in the Caribbean area is in our national interest and whether we are willing to reach out and do something about it.

Other nations have interfered and reached into this area. They have done so on a massive basis and they have made some progress.

The question we must deal with is do we really care, are we concerned about the Caribbean Basin? And if we are, what are we going to do about it? What the administration has come up with is an imaginative program that certainly is not of the bold nature of, say, a Marshall plan for Europe. It does not depend upon aid. It depends upon laying a foundation with modest amounts of aid but primarily based on trade and on investment. But you have

to create the climate to attract that investment.

Many of the countries in this area, as we know, are struggling democracies. We have had the presidents of several of them just recently here telling us of what they are doing, what they are accomplishing, and what they are trying to accomplish under the democratic principles in which they deeply believe. But they need help; they need assistance; and this is the chance that we have to step up and give it.

Representatives of nearly every one of these countries at some time or other have made representations to us and have indicated how much our help, not only our symbolic help but meaningful aid, will enable them to do the kind of a job that they are undertaking in building the democratic process.

Not only do they want our help, but they are also asking us to help them create opportunities for their country to expand in production efforts, in production and output, in creating employment opportunities for their people, so that they can build a stable country the kind that can only come through a stable economy. They are struggling to do this and they have asked for our help. These business opportunities we will have to be developed one at a time. But you have to lay a foundation and a base under them.

We have a role and a responsibility in this region and we cannot shirk it; we cannot shrug it and we cannot minimize its impact on our own security here.

I ask unanimous consent, Mr. President, that a table be printed in the RECORD at the conclusion of my remarks that will show the balance of payments gap in the Caribbean Basin countries and what their present deficit is, what their capital account will be, as made up from other aid agencies, international organizations, the additional financing they need, and what the CBI supplemental will help them accomplish.

The PRESIDING OFFICER. Without objection, it is so ordered. (See Exhibit 1.)

Mr. PERCY. Without our assistance at this time, the balance of payments gap in a great number of these countries will double what it presently is forecast to be. Let there be no doubt about the fact that our participation in overall aid programs for these countries is absolutely critical in the planning presently underway in the World Bank, in the IMF and in the development cooperation agencies of our allies in Canada, Europe and Japan.

Because we have not yet acted to make our commitment clear, meetings have been canceled with the other regional donors. They have been canceled with Canada, Mexico, Venezuela, and Colombia. Meetings with our European allies in which they might act to double their own assistance in this region have not been held, simply because this Congress has not yet declared its commitment to the future economic development and stability of the Caribbean Basin area. An area that is an integral part of our Western Hemisphere's security and defense and stability.

This is leverage that we offer. It is seed money that we are putting in. A great deal more will follow and from a great variety of other donors. This legislation is only the first step in a very important multilateral effort.

I just give another example. The Association of Commerce and Industry in Chicago is the largest association of its kind in the United States, if not in the world—12,000 members. They have pledged their full, total support for this effort. They are ready to go. Thousands of manufacturers will be contacted to see what they can do to invest in this area, to help in furthering our national security interest in the stability of a region important to this country. But this cannot be done if we just walk away and say we are not going to take care of the financing of the CBI.

In conclusion, I would like to comment on what Senator Dobb has previously indicated, that El Salvador would get one-third of the aid in this

EXHIBIT 1

CARIBBEAN BASIN COUNTRIES 1982 BALANCE OF PAYMENTS GAP

	Belize	Costa Rica	Dominican Republic	Eastern Caribbean	Haiti	El Salvador	Honduras	Jamaica

bill. This is wrong, because the amendment that has been accepted by the distinguished manager of the bill, Senator KASTEN, the amendment that I offered provides for authorizing legislation to take effect before money can be appropriated under this bill—unless we go to the very deadline of September 15. At that time, if we simply have not been able to act by then, then certainly we want to go ahead with this program. That only gives them 2 weeks to implement the program. But we have from now until September 15 to have an authorization bill.

The Foreign Relations Committee, in accordance with the procedures of the Senate, can then determine and register its opinion on the level of assistance to El Salvador. That is the impact we could have at that time. That is what the law and our procedures provide.

Still more importantly, this package is not just about El Salvador, it is about an entire geographical region that is of critical importance to the United States. Time is running out. It is time for us to take a first step in the launching of the Caribbean Basin package, and I urge the defeat of the pending amendment.

Mr. KASTEN. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Wisconsin (Mr. KASTEN) to table the amendment of the Senator from Connecticut (Mr. DODD). The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Michigan (Mr. LEVIN), the Senator from Michigan (Mr. RIEGLE), the Senator from Arizona (Mr. DECONCINI) and the Senator from Maryland (Mr. SARBANES) are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan (Mr. LEVIN) and the Senator from Michigan (Mr. RIEGLE) would each vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 55, nays 40, as follows:

[Rollcall Vote No. 304 Leg.]

YEAS—55

Abdnor	Grassley	Nunn

NOT VOTING—5

DeConcini	Riegle
Levin	Sarbanes
Mathias	

So the motion to lay on the table Mr. Dodd's amendment (UP No. 1203) was agreed to.

Mr. KASTEN. I move to reconsider the vote by which the motion was agreed to, Mr. President.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, may we have the attention of the Senate?

The PRESIDING OFFICER. The Senate will be in order.

TIME LIMITATION AGREEMENT

Mr. HATFIELD. Mr. President, I wish to announce to the Senate the program we have for the rest of the evening. It is our hope to be able to finish this section dealing with foreign aid tonight. With the amendments that we are aware of at this point, I think we can finish in a very short order. In fact, I have now cleared with the minority side of the aisle and the majority side of the aisle and the proponents and the opponents the next amendment, which is the Symms amendment. It is agreed that they will limit themselves to a half hour equally divided, Senator SYMMS being the sponsor of the amendment, Senator PERCY being the opponent.

Mr. President, at this point, on the basis of that understanding between

the minority and the majority side, I ask unanimous consent that a half-hour, equally divided, be agreed to for the Symms amendment, which will be the next amendment up.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, if I may have the attention of the Senate and if the distinguished manager will yield me 1 minute, this should complete this section. We do not anticipate the requirement for a record vote on the section, so it looks like we will have one more vote tonight. It will be the intention of the leadership then to go out until 10 a.m. tomorrow. Members should be on notice that we will be in late tomorrow, and that it is our intention to finish this bill tomorrow, if it is humanly possible to do so.

Mr. President, I will not make the request to set the hour at this time, but if the distinguished manager wants to get on this bill earlier than that, I will be glad to do that.

Mr. HATFIELD. Mr. President, I ask the leader to perhaps make that 9 o'clock or 8:30.

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9 o'clock tomorrow.

The PRESIDING OFFICER. Is there objection?

Mr. THURMOND. Mr. President, will the distinguished Senator yield, the manager of the bill?

Mr. SCHMITT. Mr. President, reserving the right to object, I will not object. I am just curious if the leadership and the distinguished manager of the bill would be amenable to laying down the amendment that we have been trying to get up all day before we go out tonight?

Mr. BAKER. Mr. President, I am agreeable to having the amendment laid down tonight, and I yield to the Senator from Oregon, who is the manager, to negotiate that.

Did the Chair grant my request for tomorrow?

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, it is the intention of the leadership to ask the Senate to resume consideration of this measure as soon as possible tomorrow. I hope Senators may avoid asking for special orders, and I will address the minority leader late about abbreviat-

ing our times so that we can be back on this bill at 9:30 in the morning.

I yield, if I may and with the consent of the manager, to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I have an amendment I intend to offer and then withdraw it. Also, I have a colloquy to put in the Record. It will just take a half a minute.

Does the Senator want to do that now or later?

Mr. HATFIELD. I am happy to yield to the Senator.

AMENDMENT UP NO. 1204

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) proposes an unprinted amendment numbered 1204.

Mr. THURMOND. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 39, line 13, strike the figure "\$29,000,000," and insert in lieu thereof the figure "\$54,000,000." On page 39, line 19, strike the word "and". On page 39, line 20, strike the period, insert in lieu thereof a semicolon, and add the following: "and \$25,000,000 for the Congaree Swamp National Monument, South Carolina."

Mr. THURMOND. Mr. President, this amendment would increase the appropriation for land acquisition and State assistance by the National Park Service by \$25 million. The purpose of these additional funds is to pay any deficiency in the award of the court for the condemnation of lands within the Congaree Swamp National Monument in South Carolina.

In October of 1976, then President Ford signed Public Law 94-545, authorizing the establishment of the Congaree Swamp National Monument. This legislation provided a land acquisition ceiling of \$35.5 million, and directed the Secretary of the Interior to develop and transmit to Congress a general management plan for the use and development of the monument by October 1979.

Three tracts, consisting of approximately 360 acres, were acquired by declaration of taking in October 1977. The vast bulk of the property within the monument was not acquired until February 1980, however, when a declaration of taking was filed against the 14,665-acre Beidler tract. On March 10 of this year, a court-appointed commission recommended a fair market value of \$47,009,000 for this tract, but this issue has since been recommitted to the commission to correct certain alleged computational errors.

Mr. President, in light of the clerical nature of the errors asserted, it is not inconceivable that a final ruling as to the fair market value of this tract may be made before the end of the current fiscal year. This amendment, if adopted, should provide sufficient funds to pay any judgment rendered in this matter, including any interest which may have accrued since the date of taking. This, in turn, would remove the only remaining impediment to the adoption of a general management plan, which is now almost 3 years overdue, and would be a major step toward the beneficial use and enjoyment of this valuable national asset.

Mr. President, I call upon my colleagues to support this amendment.

Mr. McCURE. Will the distinguished Senator from South Carolina yield?

Mr. THURMOND. I will be happy to yield to the distinguished Senator and my good friend from Idaho.

Mr. McCURE. Mr. President, while I can sympathize with the desire of the distinguished Senators from South Carolina to see the land acquisition issue at the Congaree Swamp National Monument finally resolved, I must object to this amendment on three grounds.

First, this amendment would make appropriations without the necessary authorizing legislation. As the distinguished Senator from South Carolina stated, Public Law 94-545 authorized only \$35.5 million for land acquisition for the monument. This entire authorization has already been expended, and legislation to increase the authorized level of spending has yet to be introduced.

Second, the intent of the Interior Subcommittee in providing land and water conservation funding in this supplemental appropriations bill is simply to enable the Secretary of the Interior to be in a position to satisfy deficiencies and court awards as promptly as possible. The projects included are those projects which in the judgment of the Secretary, are likely to need funds first. As a practical matter, funding for Congaree Swamp was not included in this bill because, in the Department of Interior's opinion, funds would not be required in fiscal year 1982.

Third, and perhaps most important, the appropriations recommended by this chapter already exceed the administration's request by \$27 million, and this amendment, if adopted, would add \$25 million to this figure.

Mr. THURMOND. If legislation increasing the authorized land acquisition ceiling for the Congaree Swamp National Monument were to be introduced tomorrow, would that satisfy the first objection of the distinguished Senator from Idaho?

Mr. McCURE. It would be a good starting point. Hearings must also be

held by the appropriate committee to determine the amount of any increase which would need to be made.

Mr. THURMOND. Is not the appropriate committee for considering any increase in the authorized land acquisition ceiling for the Congaree Swamp National Monument the Committee on Energy and Natural Resources, of which the distinguished Senator from Idaho is chairman?

Mr. McCURE. It is, and I am.

Mr. THURMOND. If legislation increasing the authorized land acquisition ceiling for the Congaree Swamp National Monument were to be introduced tomorrow, would the distinguished Senator from Idaho be willing to schedule hearings on that measure?

Mr. McCURE. Knowing of the concern of the distinguished Senators from South Carolina, I would do everything in my power to see that hearings would be scheduled on that measure.

Mr. THURMOND. If legislation increasing the authorized land acquisition ceiling for the Congaree Swamp National Monument were to be introduced tomorrow, would the distinguished Senator from Idaho, as chairman of the Subcommittee on Interior and Related Agencies of the Senate Committee on Appropriations, consider recommending appropriations sufficient to meet any deficiency in the land acquisition ceiling for the Congaree Swamp National Monument in this bill or in the regular appropriations measure for fiscal year 1983?

Mr. McCURE. For the reasons I have already stated, I could not recommend such an increase in the bill now before the Senate.

As for fiscal year 1983, it is the policy of the Subcommittee on Interior and Related Agencies to recommend appropriations in matters of this sort only where a judgment has already been rendered or may be anticipated to be rendered within the applicable fiscal year, and the probability of a successful appeal is unlikely.

Mr. THURMOND. If a judgment is rendered or may be anticipated to be rendered with respect to the Beidler property and the probability of a successful appeal from that judgment appears unlikely, would the distinguished Senator from Idaho then recommend appropriations for this purpose in fiscal year 1983?

Mr. McCURE. While I cannot give an unqualified answer to the question from the distinguished Senator from South Carolina, I can assure him that I will follow the policy of the Subcommittee on Interior and Related Agencies and, if such a recommendation complies with this policy, will do everything possible within the budget constraints we face to assure its adoption.

Mr. THURMOND. Mr. President, based upon the answers I have received from the distinguished Senator from Idaho, I ask that the amendment be withdrawn from consideration at this time. I thank the distinguished Senator from Idaho for his cooperation in this matter.

Mr. McCLURE. I thank the Senator.

Mr. THURMOND. Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The Senator has that right. The amendment is withdrawn.

UP AMENDMENT 1201

(Subsequently numbered amendment No. 2020.)

Mr. SYMMS addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. SYMMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. Symms) proposes an unprinted amendment numbered 1201.

Mr. SYMMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Idaho.

Mr. DODD. I object, Mr. President.

The PRESIDING OFFICER. Will the Senate please come to order.

The Senator from Idaho.

Mr. SYMMS. Mr. President, I yield myself 5 minutes.

Mr. DODD. Mr. President, objection is heard to the unanimous-consent request.

The PRESIDING OFFICER. The unanimous consent has been granted for the time agreement on this amendment.

Mr. DODD. The unanimous consent was dispensing of the reading of the amendment. I object.

The PRESIDING OFFICER. The clerk will continue to read the amendment.

The assistant legislative clerk read as follows:

In the Committee Amendment on page 31 at the end of the paragraph, insert the following: Notwithstanding any other provision of this act, none of the funds appropriated in this paragraph may be obligated or expended in any manner inconsistent with the policy hereby reaffirmed, which is stated in S.J. Res. 230 (76 Stat 697), to wit:

Whereas President James Monroe, announcing the Monroe Doctrine in 1823, declared that the United States would consider any attempt on the part of European powers "To extend their system to any portion of this Hemisphere as dangerous to our peace and safety," and

Whereas in the Rio treaty of 1947 the parties agreed that "an armed attack by any State against all the American States, and,

consequently, each one of the said contracting parties undertakes to assist in meeting the attack in the exercise of the inherent right of individual or collective self-defense recognized by article 51 of the Charter of the United Nations", and

Whereas the Foreign Ministers of the Organization of American States of Punta del Este in January 1962 declared: "The present Government of Cuba has identified itself with the principles of Marxist-Leninist ideology, has established a political, economic, and social system based on that doctrine, and accepts military assistance from extra-continental Communist powers, including even threat of military intervention in America on the part of the Soviet Union", and

Whereas the international Communist movement has increasingly extended into Cuba, its political, economic, and military sphere of influence; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States is determined—

(a) to prevent by whatever means may be necessary, including the use of arms, the Marxist-Leninist regime in Cuba from extending by force or the threat of force its aggressive or subversive activities to any part of this hemisphere;

(b) to prevent in Cuba the creation or use of an externally supported military capability endangering the security of the United States; and

(c) to work with the Organization of American States and with freedom-loving Cubans to support the aspirations of the Cuban people for self-determination;

Mr. SYMMS. Mr. President, I thank my colleagues for the opportunity to present arguments again on my amendment reaffirming the 1962 Cuba resolution and U.S. policy toward Cuba.

As the Senate knows, I offered Senate Joint Resolution 158 as an amendment to another Senate resolution a few weeks ago. After considerable debate, the Senate, by a vote of 41 to 39, on April 14, 1982, tabled the amendment in order that the Foreign Relations Committee might hold hearings on this issue.

Regardless of the tabling action, I was pleased that the Senate had an opportunity to discuss the issue. I was, of course, disturbed that the Senate did not see fit at that time to send a strong, clear message to the Soviet Union and Cuba that at least the Senate believes aggression and subversion in the Caribbean should be resisted. However, I hope the Senate will now approve the resolution.

The purposes of my resolution are threefold. First and most significantly, the resolution reaffirms the law of the land on American policy toward Cuba, as embodied in Senate Joint Resolution 230, passed overwhelmingly by bipartisan majorities of both Houses in September 1962. Second, it reaffirms the Monroe Doctrine first announced in 1823. Third, my amendment has several policy thrusts:

It expresses the determination of the United States to prevent, by force

if necessary, the Soviet-backed Communist regime in Cuba from engaging in aggressive or subversive activities in any part of the Western Hemisphere;

It expresses American determination to prevent the Soviets from establishing a military base in Cuba;

It states American support for the freedom and self-determination of the Cuban people.

Mr. Chairman, I could not agree more with a statement by William Safire in his recent New York Times column entitled "Is Castro Convertible." He said:

Now is the time to deal with a threat before it becomes a crisis.

Indeed, we do need to fully understand and recognize the Soviet threat from Cuba, both subversive and nuclear. The President has acknowledged that the Soviet threat from Cuba is as great or even greater than it was in 1962. He warned the Caribbean nations during his visit to Barbados in early April 1982 about the "Soviet-Cuban virus." My resolution is an attempt to bring into focus that cancer in our underbelly so it can be properly diagnosed by the Congress, understood by the American people, and dealt with through a clear expression of policy.

This resolution is aimed merely at strengthening our national will, which is the key to resisting any challenges to freedom and liberty. If we cannot muster the national will to oppose threats and dangers to our security, then we may never be able to safeguard our heritage.

I am not advocating the use of force in the Caribbean. Quite the contrary, I am merely trying to strengthen our first line of defense, which is diplomacy. By reaffirming the 1962 resolution, U.S. diplomatic leverage should be strengthened. Any option of initial deployment of military force in the Caribbean is wholly up to the President, with subsequent consultation with the Congress. My resolution does not change that. It is designed only to reinforce present U.S. law and foreign policy toward Cuba, and the resolution is fully consistent with and supportive of President Reagan's Caribbean policy announced on February 24, 1982.

Mr. President, despite what I considered unclear and often conflicting signals from the State Department regarding their position on this resolution during the time it was considered on the floor of the Senate, I am pleased that the State Department expressed its strong support for the resolution before the Senate Foreign Relations Committee on April 20. In a letter addressed to me that same day the State Department said that the Symms resolution—and I quote:

Is a restatement of actual U.S. policy toward Cuba—and the sentiment behind it,

we believe, remains valid today just as it was valid in 1962 when the resolution was first stated. . . . We support the resolution.

In testimony before the Senate Foreign Relations Committee on April 20, Deputy Assistant Secretary of State Stephen Bosworth stated:

The (Symms) resolution . . . reflects the policy of six administrations, certainly this one. As we told Senator Symms, we have always endorsed the thrust of his resolution . . . After it has been given the appropriate committee consideration, we fully intend to support the Symms resolution.

On April 20, 1982, Bosworth testified further in answer to a question I posed that the official U.S. policy position is now in support of the resolution. Bosworth stated further:

Our position remains one of full support for the thrust of that resolution . . . I can assure you that the finding that the thrust of your resolution is fully consistent with the policy of this administration, was made at the very highest level of the State Department by the Secretary of State himself.

Mr. President, the gravity of the Cuban threat to the Caribbean was also made explicit in Bosworth's testimony. He pointed out that Cuban arms shipments to Nicaragua and El Salvador have not diminished. He declared Cuba "To be a threat to U.S. security interests . . . in Central America and the Caribbean." Bosworth agreed that the present level of military capability in Cuba endangers U.S. security interests.

When asked what effect a Senate reaffirmation of the Cuba resolution of 1962 would have on our relationship with either Cuba or the Soviet Union, Bosworth answered:

. . . to the extent that it tends . . . to present the views of Congress, in addition to the views of the administration, I think it would probably be seen by the Government of Cuba as a rather firm statement of U.S. views regarding the unacceptability of Cuban behavior . . .

When asked if the State Department had specifically assessed whether or not the Symms resolution was inconsistent with the War Powers Act, Mr. Michel from the State Department Legal Advisor's Office stated:

The Legal Advisor's Office reviewed the Symms amendment in terms of the War Powers Resolution in order to make a judgment as to whether on its face it would affect the provisions of the War Powers Resolution in any way, and we concluded that it did not.

Finally, when asked if the State Department supported reintroduction of the Symms resolution, Bosworth answered "yes." He added that: "The administration finds this resolution is consistent with our policy, and we support it."

The administration's position should now be clear and this position of support, of course, is welcomed, as is the support of my colleague, the distinguished Senator PERCY as expressed in his letter to our colleagues before the debate of my resolution on the Senate

floor a few weeks ago. As Senator PERCY stated so well:

The purposes of the Symms resolution are ones we can all support: Resistance to Cuban aggression and subversion in the hemisphere, prevention of Soviet bases in Cuba, and support for the self-determination of the Cuban people.

I urge the Senate to approve the resolution as originally proposed. I fear any action otherwise might be further misread as a sign that we do not have the will and the determination to defend this Nation and its neighbors—to stand up to nuclear blackmail by the Soviet Union.

Mr. President, should we show our strong support for the Commander in Chief by reaffirming existing U.S. policy and law of the land expressing opposition to Soviet military bases in Cuba? Are we for enforcing the Monroe Doctrine with regard to the Soviet Union and Cuba, or are we not? Do we support the Soviet/Cuban-backed aggression in the Western Hemisphere, or do we oppose it?

If we cannot resist aggression and blackmail in our own backyard, where can we draw the line? If we cannot reaffirm long standing American policy in defense of freedom among our neighbors now, when and where and how will we ever be able to stem the spread of Marxism and terrorism?

Mr. President, my amendment attempts to provide the Senate at least with an opportunity to answer in part those questions, and express its will regarding American policy toward Cuba.

Mr. President, I should like to read for the record the following letter:

THE WHITE HOUSE,
Washington, April 29, 1982.

HON. STEVEN D. SYMMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SYMMS: I am gratified to have the opportunity to enthusiastically endorse your amendment, S.J. Resolution 158 as an abiding expression of the Reagan administration's policy toward Cuba.

The principles embodied in your Resolution have the full support of the President. He clearly expressed these same sentiments during his speech before the Organization of American States on February 24, 1982.

Again, many thanks for this opportunity to make our views known to you and your colleagues.

Sincerely,

WILLIAM P. CLARK.

I have a similar letter from Fred Ikle, Under Secretary of Defense for Policy, also indicating that the administration fully support the resolution:

We fully support this resolution and commend you and your colleagues for introducing it. Passage of the resolution is important for U.S. policy toward Cuba.

Mr. President, I ask that Under Secretary Ikle's letter also be printed in the RECORD.

Mr. President, many may ask how the mixup came about when we had this before the Senate at an earlier date this year. I have the transcript

provided to me by Mr. Jack Anderson which I should like to insert in the RECORD. Many of my colleagues may have seen this as it was reported in the press. It is the transcript of a conversation from Air Force 1 between Steve Bosworth and Tom Enders.

Before that, I ask unanimous consent to have printed in the RECORD the testimony of Mr. Steve Bosworth before the Foreign Relations Committee on April 20, 1982, indicating that the administration and the Assistant Secretary support the amendment, and a cover letter from Mr. Powell Moore, Assistant Secretary for Congressional Relations.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE UNDER SECRETARY OF DEFENSE
Washington, D.C., April 29, 1982.

HON. STEVEN D. SYMMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: Thank you for your letter of 26 April 1982 requesting our views on SJ Resolution 158 which reaffirms SJ Resolution 230 of 1962. As a restatement of actual U.S. policy toward Cuba, Resolution 158 reflects the policy of this Administration and is certainly strongly supported by the Department of Defense.

In testimony before the Senate, this Department has highlighted the threat from Cuban aggression and subversion, (including the use of terrorism), as well as from the Soviet military presence on Cuba. Should the Soviet and Castro regimes be successful in their efforts to install Marxist-Leninist governments aligned with them in Central America, this could lead to an expanded Soviet military presence in the Caribbean Basin that would have significant adverse consequences for the defense of the United States. Such a new military threat to the South of the United States would require further increases in the U.S. defense burden, since a major hostile military presence would then exist in an area previously considered militarily secure.

We fully support this resolution and commend you and your colleagues for introducing it. Passage of the resolution is important for U.S. policy toward Cuba.

Sincerely,

FRED C. IKLE.

STATEMENT BY DEPUTY ASSISTANT SECRETARY FOR INTER-AMERICAN AFFAIRS STEPHEN W. BOSWORTH

Mr. Chairman, I am pleased to have this opportunity to discuss with the committee our request for security assistance for fiscal year 1983 for Latin America and the Caribbean. The Administration is requesting \$326 million in Economic Support Funds (ESF), which with \$274.6 million in development assistance and \$183 million of Public Law 480 from the separate A.I.D. appropriation, would bring our proposed fiscal year 1983 economic assistance for the region to a total of \$783 million. We are also asking for \$138.6 million in funds for FMS financing and military training (IMET).

The bulk of this projected assistance is for the countries of the Caribbean and Central America. These fiscal year 1983 requests are substantially higher than those provided for in the fiscal year 1982 budget. As such, they reflect the high priority the Administration

attaches to United States interests in Central America and the Caribbean. They are essential elements of an integrated approach to the economic, political, and security problems of the region.

Let me summarize briefly the overall framework of U.S. interests, analysis, and objectives within which the Administration's assistance requests should be addressed.

President Reagan in his address at the Organization of American States on February 24 outlined the U.S. national interests in the Caribbean Basin region. As the President said, the "well being and security of our neighbors in the region are in our own vital interest."

Economic progress, peace, and security are in serious danger in the Caribbean Basin. Almost without exception, the countries of the region face economic difficulties of a potentially catastrophic nature. Their economies are for the most part small, fragile, and extremely vulnerable to disruption. Developments in the international economic system can seriously exacerbate long-standing internal problems. The current slowdown in the world economy is a case in point. Prices for the raw materials which are the principal exports of these countries—sugar, coffee, bananas, and bauxite—have fallen sharply. Simultaneously, most of the region is still struggling with the need to adjust to increases in the costs of essential imports, particularly petroleum. High interest rates have imposed a new burden in countries needing to borrow money or refinance existing debt. Tourism, important to many, has stagnated. Certain of the economies of Central America, particularly in El Salvador and Guatemala, have been further damaged by guerrilla-sponsored violence and the general political instability of the area.

At the same time, Cuba and now Nicaragua are both seeking to exploit the region-wide economic crisis for their own political objectives. These instruments are anti-democratic minorities predisposed to extremism, violence and systematic armed conflict. Cuba and Nicaragua are providing political organization, guerrilla training, and other support to insurgent groups in El Salvador and Guatemala, and there are disquieting signs of their aggressive intent in several other countries.

We do not, for our part, seek to involve our neighbors in the political and military competition between East and West. And certainly they do not want to be involved. They are independent, and they hope their countries and the waters of the Caribbean can be free of international tension and conflict. They need our help to overcome economic difficulties, to defend themselves, and to keep alive their faith in freedom and democracy. With our assistance, they can manage their own affairs and find their way out of their present troubles.

The complexity and urgency of the problems which I have outlined make clear that our response must be comprehensive. It must respond to both immediate and longer-term needs, and it must address all aspects—economic, political, and security—in their separate individual requirements while recognizing that in fact, these aspects are also interdependent in important ways. The overall strategy will not succeed unless we move forward in all areas.

First, the economic.—On March 17, the President sent to the Congress a set of integrated proposals for a major new program of economic cooperation for the Caribbean

Basin. We were pleased that you invited Ambassador Brock and Ambassador Stoessel to present our views on the Caribbean Basin initiative at an early point in your deliberations. As you are aware, the President's program includes three major elements:

Authority to extend duty free treatment in the U.S. for agricultural and industrial products, except textiles, from countries of the Caribbean Basin;

Authority to extend tax incentives to U.S. investors in Basin countries; and

Substantial increases in levels of U.S. economic assistance to countries of the region, including a requested \$350 million supplemental in ESF funds for fiscal year 1982.

Over the medium-term, the trade and investment authorities requested by the President will make a major contribution to the economic well-being of the region. Together with the self-help efforts of these countries themselves, we can contribute to an economic climate of expanded production, new employment, and rising exports. These measures will also convey a political message. The United States is saying in effect that the economic well-being and political health of these countries is of such direct importance to us that we are willing to extend special treatment to them on a long-term basis. Our commitment is both serious and sustained.

The President's program also recognizes that many of these countries face major short-term problems which must be addressed if they are going to be able to benefit from the trade and investment initiatives. In some countries, including El Salvador, Honduras, and Costa Rica, major balance of payments problems threaten immediately their ability to import foodstuffs and critical raw materials for industry and agriculture. Jamaica will need increased assistance to sustain a still vulnerable economic recovery. Other countries, for example the small nations of the Eastern Caribbean, need additional assistance to develop the economic infrastructure required to capitalize on the new trade and investment opportunities.

Because of the urgency of these problems the President has requested an additional \$350 million in ESF in the current fiscal year to supplement the funds already approved by the Congress. But that \$350 million, vital though it is, will not be enough to meet the needs of the next few years. Therefore, we have requested \$326 million in ESF for fiscal year 1983. Combined with development assistance and Public Law 480, our economic assistance for the region would total \$783 million. This is a 47 percent increase over the amount budgeted for the current fiscal year. It reflects both the large and urgent needs of these countries and the high priority which the Administration attaches to our interests in the Caribbean Basin area.

A large share of our fiscal year 1983 ESF request, \$105 million, would go to El Salvador. Its economy has been brought to the point of collapse by terrorism and economic sabotage directed against the country's transportation and power systems, businesses and workers. Investment has dried up and the private sector cannot even obtain the credits essential to its survival. Output declined 10 percent in 1980; and 10 percent again in 1981. With the assistance we and other donors plan for this year, this decline should be significantly reduced by the end of the year. We expect further improvement next year with the economic assistance we are requesting in fiscal year 1983.

Other major recipients of ESF would include:

\$55 million to Jamaica to support President Seaga's efforts to revitalize his nation's economy.

\$60 million for Costa Rica, to help that country address one of the most severe crises in its history.

\$25 million for Honduras to help bolster confidence and provide critically needed credits to the struggling private sector.

\$30 million to the Eastern Caribbean to stimulate economic activity and generate employment.

Second, the political.—The Caribbean Basin is not, as some suppose, a region of repressive, right wing military dictatorships. Of the twenty four governments in the Basin, not including the United States, sixteen have democratically elected governments. Support for the establishment and consolidation of democratic institutions is a central element of our approach. Not just because it is our own system of government, but also because we believe it is the system best able to produce social justice, economic progress, and political stability in the Caribbean Basin itself.

We have been encouraged by last year's electoral success in Honduras. We were similarly heartened by February's peaceful elections in Costa Rica as the people of that country demonstrated again the strength of their commitment to democratic institutions. Now the Dominican Republic is preparing again for elections, extending the democratic achievements made during the last generation.

In Guatemala, the military coup last month may have ended the political paralysis which had gripped that country. It was led by junior officers apparently seeking to give the Guatemalan people a better government. General Rios Montt, who has emerged as leader of the junta, was the presidential candidate of the Christian Democratic coalition in 1974. Since the coup, violence not directly connected to the insurgency has been brought virtually to an end. Concrete measures have been taken against corruption. All political forces have been called to join in national reconciliation. We are watching these developments closely. We hope that the new government of Guatemala will continue to make progress in these areas, and that we in turn will be able to establish a closer, more collaborative relationship with this key country that faces both economic difficulty and an active Cuban-supported insurgency.

In El Salvador, the elections of March 28 were a fundamental first step in the democratic process, but it was only the beginning. Discussions are now underway among the political parties concerning the organization of a new provisional government and the launching of the work of the newly-elected Constituent Assembly. That newly-elected Constituent Assembly must carry forward political reform, and, importantly, establish procedures for the election of a President.

Discussions on the composition of the provisional government and the actual form of the political reforms are ones which can only be made by the Salvadorans themselves. For our part, we have made clear our desire to continue to support El Salvador in their programs of economic recovery and in their battle against the guerrillas of the extreme left. We have also made clear, however, that our continued support must not be taken for granted. In particular, we have emphasized our expectation that the new provisional government will carry forward

political and economic reform, including land reform, and continue to make substantial progress in controlling violence.

I would like, Mr. Chairman, to say a word here on the question of negotiations. On March 28, the people of El Salvador massively signaled their choice for a democratic process of elections as the method for resolving political conflict and ending the violence. They did this despite a concerted attempt by the guerrillas first to dissuade people from voting and then to intimidate them. Thus, the results of the March 28 election clearly stand as a massive political defeat for the FMLN/FDR. The guerrillas had advocated, as an alternative to these elections, direct negotiation of an overall division of political power, the results of which could later—perhaps—be submitted to a plebiscite.

In the light of the March 28 results and in view of the on-going political process in El Salvador, it is our hope that elements of the FMLN/FDR which can accommodate to democracy will now decide to participate peacefully in that process. Such a decision would be in the interests of El Salvador. We for our part believe that mechanisms could be found to facilitate the entry of these groups into the democratic process. We will be prepared to be of assistance in the discussions or negotiations which might be required. However, we remain firmly and unalterably opposed to negotiations on the division of political power in El Salvador outside the democratic process.

Third, Security.—Freedom and prosperity are impossible without security. The purpose of our FMS and IMET programs is quite simply to help small countries defend themselves against an immediate threat. Many of our neighbors have neither the resources nor a long-term need to develop and maintain large military establishments. Faced with a sudden threat, they need help in the form of equipment and training from friends.

We do not believe that only the strong should be secure. With appropriate help, our neighbors all have the capability and will to turn back outside threats. They do not want us to do their fighting for them. That would not serve anyone's interest, and is not needed. All they ask is to be provided the training and equipment they cannot afford.

We are requesting \$125.3 million in FMS financing for fiscal year 1983. To keep this in perspective, I would note that this is less than two percent of our global FMS program. The increases over our request last year are largely for El Salvador, Honduras and Jamaica. We are again requesting a portion of the FMS—\$74 million—in direct concessional credits for those countries facing severe economic problems and where high interest guaranteed loans would further add to their heavy debt burden.

About one half of our FMS request for the region—\$60 million—is for El Salvador. Fifty million dollars of this is being requested on concessional terms. This program is critically important to provide the resources to enable the Salvadoran government to protect the peoples' right to choose their own future and carry forward the important economic, political and social reforms underway. Our military assistance program is designed in part to enable the Salvadoran armed forces to employ small unit tactics, considered more effective against the guerrillas and less likely to cause casualties among non-combatants in the battle zone. The growing effectiveness of El Salvador's

armed forces was evident in the exemplary way in which they turned back the guerrillas effort to launch a major pre-election offensive. They protected voters, polling places, and election officials from guerrilla attacks and harassment last March 28.

We are also seeking an increase in our FMS program for Honduras to \$14.5 million, \$9 million of which would be on concessional terms. The democratic Government of Honduras is threatened by the illegal use of its territory by those supporting the insurgencies in El Salvador and Guatemala as well as by the unprecedented military buildup in Nicaragua. Honduras needs additional help to develop its transportation, patrol and communications capabilities to defend itself from these threats.

Elsewhere in the Caribbean Basin, we are requesting an increase in our program in Jamaica—\$6.5 million in concessional credits—to help the democratic, pro-western Seaga government modernize its defense force to deal with potential subversion and to protect its coastal waters from illegal traffic. We are also seeking concessional credits and training for the small democratic states of the Eastern Caribbean to improve their coast guards.

Finally, a small part of the FMS program is for South America. We propose \$12 million for Colombia and \$6 million each for Peru and Ecuador to enable them to meet essential military needs.

Our request for \$13.3 million in IMET includes 23 country programs and our regional program for the Eastern Caribbean. We believe that training and education under the IMET program will strengthen the professional qualities of defense forces, improve our military to military relations, and ensure continued orientation toward U.S. doctrine and security goals. We have asked for \$250,000 in IMET for Guatemala in the expectation that conditions there may improve sufficiently for us to consider a small training program.

Cooperation.—The strategy I have outlined cannot rest on our efforts alone. We neither can nor should try to carry the burden by ourselves. Solutions designed exclusively in Washington are not desired, and would probably not work. Our response must be in cooperation with our neighbors.

We find today a consensus among the nations of the hemisphere over the danger of foreign intervention, the importance of democracy and free market policies, and the need to take collective responsibility.

At this point, Mr. Chairman, I would like to make some remarks on our policies toward Nicaragua and Cuba.

Over the past several months, we have tried to establish a dialogue with Nicaragua. As members of this Committee are aware, the United States is acutely concerned by several of the policies and activities being pursued by the Sandinista Government. First and foremost, like countries in the region themselves, we are concerned by Nicaragua's continuing large-scale support for the guerrillas in El Salvador and its similar activities in other Central American countries. This, together with Nicaragua's extraordinary arms buildup and the large-scale presence of Cuban military advisers, is the fundamental cause of tension within the region.

On April 8, our Ambassador in Managua conveyed to the Nicaraguan Government several proposals which would address our concerns and, we believe, address the alleged concerns of the Sandinistas. On April 14, the Nicaraguan Ambassador in Washing-

ton presented to us a response. We are now evaluating that response and expect to decide soon our possible next steps.

I would stress, however, as we have stressed to the Nicaraguans that no progress is possible in the areas of our relationship of concern and interest to them unless and until they cease their active support for insurgencies in the region.

In the case of Cuba, we continue to oppose fundamentally all efforts to export subversion and terrorism in Central America and the Caribbean. In this connection, Senator Symms has introduced a resolution reaffirming the resolution adopted in 1962 on the U.S. determination to oppose the efforts of Cuba to expand its sphere of influence. The resolution, which is scheduled to be considered by the Committee, reflects the policy of six administrations, certainly this one. As we told Senator Symms, we have always endorsed the thrust of his resolution. While we supported the tabling motion on the Senate floor, we did so only because we believed it was appropriate that the resolution be fully addressed in committee before coming to the Senate floor. After it has been given the appropriate committee consideration, we fully intend to support the Symms resolution.

We will not accept that the future of the Caribbean Basin be manipulated from Havana. Support for self-determination and democracy was evident at the OAS meeting in St. Lucia, and in the hemisphere's wide support for the elections in El Salvador. It was evident in the formation this year of the Central American Democratic Community by Costa Rica, Honduras and El Salvador to cooperate toward the common goals of economic development, democracy and mutual security against outside threats.

The momentum of greater cooperation is in our interest and we will seek to strengthen and widen it. That is why we have joined Colombia and Venezuela in supporting the Central American Democratic Community. This was the spirit in which we discussed with Mexico, the proposals of the Mexican President aimed at reducing tensions throughout Central America.

The Caribbean Basin program is in many ways a model of the type of regional cooperation we seek. The overall program and the U.S. contribution to it was developed over a period of some eight months of intensive consultations and joint analysis. The United States, Venezuela, Mexico, and Canada, later joined by Colombia, recognizing our common interest in the economic health of the region, are each undertaking major efforts under a common set of objectives. This, at bottom, is what we are asking the Congress to support: programs that will make cooperation possible in support of an emerging democratic consensus among our closest neighbors.

DEPARTMENT OF STATE,

Washington, D.C., April 20, 1982.

HON. STEVEN D. SYMMS,
U.S. Senate.

DEAR SENATOR SYMMS: Enclosed is the statement which Deputy Assistant Secretary Stephen Bosworth will give today before the full Senate Foreign Relations Committee hearings on Caribbean and Central American issues, among others. You will note that contained in that statement is a portion relating to your resolution regarding U.S. policy toward Cuba. I hope that this statement and amplification which Deputy Assistant Secretary Bosworth will make will clarify any confusion which might

have surrounded our support for the tabling motion last week.

As Mr. Bosworth says in the enclosed statement, we did not oppose your resolution and we do not oppose it now. It is a re-statement of actual U.S. policy toward Cuba and the sentiment behind it, we believe, remains valid today just as it was valid in 1962 when the resolution was first stated. We were reluctant, however, to give full public support for the resolution when it was on the floor of the Senate since we felt that it would be more appropriate to have the resolution considered in committee before full floor consideration. Deputy Assistant Secretary Bosworth will now have the opportunity to articulate exactly where we stand on the issue and exactly why we support the resolution. This will preclude any misinterpretation which might have been possible without the opportunity for Administration representatives to present our position fully.

With cordial regards,

Sincerely,

POWELL A. MOORE,
Assistant Secretary for
Congressional Relations.

Mr. SYMMS. Mr. President, after the mixup, when there was some confusion on the floor, this is the transcript of what occurred, and I should like to relay some of this to my colleagues:

OPERATOR. Mr. Bosworth's still on. I'm waiting for ambassador Enders.

ENDERS. Would you get me Steve Bosworth, please.

OPERATOR. Ambassador Enders, please.

ENDERS. Yes, this is Enders. Over.

OPERATOR. Just one moment, we have Mr. Bosworth on the line.

ENDERS. Hello, Steve, how are you? Over.

BOSWORTH. Fine, Tom. How are you?

ENDERS. Steve, I'm calling about the vote on Cuba in the Senate yesterday. Apparently the radio said this morning the State Department opposed * * * these authorities. Is that correct?

BOSWORTH. It is rather complicated, Tom. There are no authorities in question. It is a resolution which is non-binding. Through a screwup, a letter did go forward indicating, as you said, that we opposed the resolution and found that it was inappropriate at this time. Now, for the record, this bureau did not see or know of that letter until it was delivered.

ENDERS. Steve, that's an incredible screwup. How did that happen?

BOSWORTH. Well, there have been cases like this. Always it is difficult now to figure out exactly what did happen.

I think the bottom line was this: Mr. Enders said: "Let me talk to the Secretary." Then he came back and said:

ENDERS. Would you also go * * * find out, I mean, check further on what the hell happened because it does seem incredible that after a year of working to get a strong position on Cuba that something like this could have happened. I don't understand it.

I ask unanimous consent to have the entire transcript printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

Air Force One Transcript—transcribed by Mr. Dale Van Atta of Jack Anderson's office—conversation between Steve Bosworth and Thomas Enders, on April 15, 1982:

OPERATOR. Mr. Bosworth's still on. I'm waiting for Ambassador Enders.

ENDERS. Would you get me Steve Bosworth, please.

OPERATOR. Ambassador Enders, please.

ENDERS. Yes, this is Enders. Over.

OPERATOR. Just one moment, we have Mr. Bosworth on the line.

ENDERS. Hello, Steve, how are you? Over.

BOSWORTH. Fine, Tom. How are you?

ENDERS. Steve, I'm calling about the vote on Cuba in the Senate yesterday. Apparently the radio said this morning the State Department opposed * * * these authorities. Is that correct?

BOSWORTH. It is rather complicated, Tom. There are no authorities in question. It is a resolution which is non-binding. Through a screwup, a letter did go forward indicating, as you said, that we opposed the resolution and found that it was inappropriate at this time. Now, for the record, this bureau did not see or know of that letter until it was delivered. Over.

ENDERS. Steve, that's an incredible screwup. How did that happen?

BOSWORTH. Well, there have been cases like this. Always it is difficult how to figure out exactly what did happen. All I've been able to do is qualify that no one here in this bureau knew about it. Now, we are now engaged in an effort to try and walk this cat backwards in the noon briefing, which I think is highly desirable. On the other hand, we can't leave the majority leader sitting out there on the end of that limb all by himself. Over.

ENDERS. Steve, take me back over this part slowly because I don't understand. Where did the letter come from and to whom did it go?

BOSWORTH. As I understand it, Tom, the letter was in response to a request from the majority leader to the White House for a written statement of the administration's position on this issue. It all happened yesterday when Al Drischler was up on the hill. Al was told by his staff that the letter had been fully cleared, which is not true. They did have an NSC clearance, but they did not have an ARA clearance. The letter was subsequently signed and delivered to the majority leader.

ENDERS. You mean it was signed by Al Drischler * * * and it was a letter which was * * * within H?

BOSWORTH. That is right. That is as close as I can come to figuring it out. We're still trying to discover exactly what happened. But that sounds to me like what did happen. All I do know for sure is that it was not cleared in ARA.

ENDERS. Was it cleared in the office by Larry Eagleburger?

BOSWORTH. No, it was not. Over.

ENDERS. Steve, what can we do about this now, if anything? Over.

BOSWORTH. We will try in a public statement in the noon briefing to make it clear that, while we are not disavowing our letter, we nonetheless do believe that the sentiments expressed in the resolution are consistent with general administration policy. Over.

ENDERS. Well, more than that, it is an expression of administration policy. Uh, can we make a strong statement even if it does disavow the letter? Over.

BOSWORTH. We will go as far as possible in that direction, Tom, without creating difficulty with the majority leader, who is the one who asked for the letter. Over.

ENDERS. Hold the line for a minute and let me talk to the secretary and I will carry on the conversation. Just a minute. Over.

TONY. Tom, just a minute. Over.

ENDERS. Tony? Over.

TONY. This is Tony. Tom, Al Drischler read me a piece of the letter. We still haven't seen it. But it does indicate that the resolution is fully consistent with administration policy, but that the passage of the resolution at this time may not be necessary or helpful. I'm not sure what the words are. Over.

ENDERS. I still don't understand that. I would have thought at this time it would have been particularly helpful. Over.

TONY. Well, that is a view which we probably would have expressed had we had an opportunity. . . .

ENDERS. OK, let me talk to the secretary. Hang on, please. Over.

(Tony here, and he said he talked to Miles the day before on this, that this had an NSC clearance and that this is the line that has been used for the past 60 days. And on the basis of that, he told Al Drischler that the thing was OK. . . .)

ENDERS. Hello. Steve, is that you still? Over.

BOSWORTH. I'm still here, Tom.

ENDERS. Steve, I talked to the secretary and he would like (us) to get together and work out a denial of this so our position is clear.

BOSWORTH. Would you repeat that please, Tom, there was a lot of static. You would like to find a way in which the resolution or some variant of it could be reintroduced and passed. Over. Did you hear me? Thank you.

I got that, Tom. I will get on it. Over.

ENDERS. Would you also go * * * find out, I mean, check further on what the hell happened because it does seem incredible that after a year of working to get a strong position on Cuba that something like this could have happened * * *. I don't understand it.

I say to my colleagues that I think it is very important that we give a very strong signal of the will on the part of the United States to resist what is going on in Latin America, where the base camps of those operations in the Caribbean Basin and into Central America are working out of Cuba.

I reserve the remainder of my time, and I ask unanimous consent that the following additional pieces be inserted into the RECORD. First, some points in rebuttal to critiques of the Symms Cuba amendment. Second, a Heritage Foundation Background of June 11, 1982 entitled "The Soviet Military Buildup In Cuba" by Christopher Whalen. Third, a letter from Judge William P. Clark to Mr. John Fisher, president of the American Security Council, dated March 11, 1982. This letter shows further support for the principles of the Symms Cuba amendment, and suggests how it is related to President Reagan's Caribbean Basin Initiative.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

POINTS IN REBUTTAL TO CRITIQUE OF SYMMS CUBA AMENDMENT

The July 1980 Republican Party platform contains language which fully supports the Symms Cuba amendment. The platform, which in

the area of foreign policy should receive bipartisan support, states:

Republicans pledge our continued support for the people of Cuba . . . in their hope to achieve self determination . . . We will make it clear to the Soviet Union and Cuba that their subversion and their build-up of offensive military forces is unacceptable.

The platform added:

Republicans deplore the dangerous and incomprehensible Carter administration policies toward Cuba. The administration has done nothing about the Soviet combat brigade stationed there, or about the transfer of new Soviet offensive weapons to Cuba in the form of modern Mig aircraft and submarines. It has done nothing about the Soviet pilots flying air defense missions in Cuba or about the extensive improvements to Soviet military bases, particularly the submarine facilities at Cienfuegos and the Soviet intelligence facilities near Havana.

One, all critics concede that the Symms Cuba amendment is at least reasonable. Senator PERCY has written that all Senators can support the objectives of the Symms Cuba amendment. Some critics have conceded that it has a certain political appeal.

Two, it is contended that the Cuba amendment does not advance U.S. security and foreign policy interests in the Western Hemisphere. This argument rests upon the fallacious assumption that American foreign policy should be passive and should adapt itself to the goals of our friends and appease our adversaries. To the contrary, the Cuba amendment would advance U.S. foreign policy and security interests in the Western Hemisphere. It should not be necessary to argue that the United States have a firm, strong foreign policy which advances American national security interests. Thus to argue against the Cuba amendment is to argue for a foreign policy of accommodation of our friends and appeasement of our enemies.

Three, it is argued that passage of the Symms Cuba amendment could be compared to the Gulf of Tonkin resolution. This is a false analogy, because the Cuba amendment merely authorizes the President to threaten to use of force in the Caribbean to protect U.S. security interests against Soviet-Cuba aggression and to prevent a Soviet military base in Cuba. The contingencies and scenarios for this are general, unspecified, ambiguous, and rightly so.

We in the Senate do not want to put ourselves in the position of telling the President when or where to actually use force. First, this would tip our hand to our enemies, Brezhnev and Castro, and would reveal our military plans. Second, the Senate does not have the power to tell the President to actually use force. Under the Constitution, it is the President who must make this decision as the Commander in Chief. Moreover, the President must consult with the Congress on any extended use of force and get its approval.

On the other hand, by opposing the Symms Cuba amendment, Senators are sending a dangerous message to our friends and enemies alike. Senators would be telling the world that the United States refuses to even threaten to use force to defend our vital national security interest in our own front yard, the Caribbean. Voting against the Symms amendment would send precisely this dangerous message. Our enemies in the Kremlin and in Havana would be delighted to hear that America now declares itself defenseless, that the Senate refused to use force to defend our vital national interest against Soviet-Cuban aggression. Even third-rate adversaries of the United States around the world could then feel free to attack U.S. interests with impunity after such a dangerous signal was sent.

Four, critics of the Symms Cuba amendment state that the Reagan administration has claimed that Cuba has provided significant material support for the guerrillas in El Salvador. Do they doubt the hard evidence which the administration has publicly provided? In fact, there is conclusive evidence of extensive Soviet-Cuban material support to the revolutionary guerrillas throughout the Caribbean.

Five, critics have contended that "their greatest concern . . . was that the resolution would threaten the use of force without detailing how and when to enforce the threat." Critics are correct in focusing on this point. But instead of being a drawback, this is precisely the virtue of the Cuba resolution. As noted, it does not specify the scenario for using force or the contingency. This is deliberately left ambiguous, and wisely so. Not only would it be beyond the constitutional power of the Senate to direct the President to use force in a specific future contingency, but doing so would reveal a secret military plan to the advantage of our enemies. Thus the Senate would be unwise to try to specify how and when the United States should use force. It is the threat of force itself which should deter further Soviet-Cuban aggression in the Caribbean. The threat of force is the best deterrent, and deterrence is the bedrock of U.S. national security policy.

Six, the canards of potential conflict with the Monroe Doctrine and the Rio Treaty can be dealt with easily. The Monroe Doctrine is an old and valuable principle of U.S. foreign policy, but its specific application comes at the discretion of the President. U.S. support for our ally Great Britain in the Falklands crisis was decided upon by the President for reasons of state of higher priority than the Monroe Doctrine. Likewise, the Rio Treaty can be invoked or ignored at the discretion of the President, who has the responsibility to initiate U.S. foreign policy. The suggestion that possible U.S. covert ac-

tions against Nicaragua or Cuba violate the Rio Treaty are not persuasive. U.S. covert actions, should they be decided upon by the President in consultation with the relevant congressional committees, are designed to be plausibly deniable. Hence by their very nature, U.S. covert actions cannot violate the Rio Treaty.

Seven, critics argue that the Cuba amendment would establish a double standard in U.S. Latin American policy, to wit, that force can be used by big powers but not by small powers. This criticism is naive at best. The United States cannot deny that it is a superpower, incapable of defending its vital national interests, unless of course the Symms amendment is defeated. The international state system is, in reality, a jungle where, despite the U.N. and the fabric of international law, force and the threat of force, are the only ultimate sanctions. If the United States is willing to eschew the use of force to defend our security, then we really do not need armed forces at all. One critic, a former Assistant Secretary of State for Inter-American Affairs in a Republican administration actually testified against passage of the Symms amendment on the ground that it would be a "vindication of the principle that resort to arms is appropriate if the case is serious enough." We will not dispute this point at all. It goes without saying that America must defend its vital national security interests, and the Symms amendment does indeed vindicate this principle. We should be proud to defend our liberties and freedoms against all threats.

Eight, the critics believe that their most telling argument is as follows: "A vote for the Symms resolution is in effect a vote directing the President to use the Armed Forces of the United States anywhere in the hemisphere where he sees a direct or indirect threat from Cuba." But this distorts the Symms amendment. The threat or use of force is not directed or required, merely authorized if the President decides. We also ask, What is so bad threatening the use of force to defend America? Are we in fact going to tell the world that the United States will not threaten to use force to defend its vital national security interests? Of course we must stand up now and defend American liberty, freedom, and our way of life.

In summary, the arguments of the critics amount to nothing more than shameful appeasement. We remember the result of Neville Chamberlain's appeasement of Hitler. It failed to halt aggression, and World War II occurred anyway. We must be prepared for war in order to defend the peace. Appeasement is not only dishonorable and un-American, it is also ultimately ineffective in preventing war.

A vote against the Symms amendment is in fact a vote for Marxist-Leninist tyranny in our own front yard.

THE SOVIET MILITARY BUILDUP IN CUBA INTRODUCTION

Over the past decade, the Soviet Union has been emplacing offensive weapons in Cuba. Based both in and around Cuba, on planes, ships, and missiles, these weapons are operated by members of the Soviet armed forces. Soviet warships conduct exercises in the Gulf of Mexico, their bombers fly reconnaissance missions along the Atlantic coast from airfields in Cuba, and their pilots operate "Cuban" fighter aircraft. The presence of these offensive strategic systems in Cuba threatens the basic foundation of U.S. security policy in the region.

The Soviets' quiet, slow, but steady, buildup of military forces in Cuba has coincided with the broader Marxist challenge throughout Central America. The precise nature of these actions by the Soviets necessitates a careful review of the 1962 Cuban missile crisis "agreement" and of whether continued compliance with this agreement by United States is still warranted. Clearly, if the Soviet Union has violated both the letter and spirit of mutual military restraint agreed to after the 1962 crisis, a prompt American response is necessary.

THE 1962 MISSILE CRISIS

Fidel Castro's seizure of power and the subsequent Cuban-American break in relations in 1959 created the first real opportunity for an outside power to penetrate the Western Hemisphere since the Spanish-American War. Although, in 1960, Moscow was not ready to challenge the United States in the Caribbean, Castro's rise to power provided an irresistible opportunity to expand Soviet influence in the area. When the United States cut off Cuban access to the American market, the USSR immediately moved in, though cautiously. The Bay of Pigs affair indicated to Moscow that America would not take concrete action against Castro. Following the ill-fated invasion, the Soviets became bolder, even to the point of sending missiles to Cuba, ostensibly to defend Castro from invasion, but in fact to offset the global strategic superiority of the United States. Khrushchev's opportunism triggered the 1962 missile crisis, a direct challenge to the United States. It ended with a U.S. naval "quarantine" and the humiliating pullout of the missiles by the Soviets. This action may have removed the immediate danger, but it left intact the political-military presence of the Soviet Union.

The agreement between President Kennedy and Nikita Khrushchev was a personal understanding between the two leaders, never embodied in a public document. It was agreed that all offensive weapons, including missiles and IL-28 Beagle strike aircraft, would be removed. In return, the United States promised not to invade the island or support other groups attempting to do so. Implicit in this agreement was the further understanding that the USSR would not introduce offensive weapons into Cuba in the future. The understanding between Kennedy and Khrushchev dealt only with the immediate political problem of strategic offensive weapons. It did not address the question of whether the Soviets could operate with impunity in the Caribbean. Thus, while President Kennedy won a great personal victory, the United States accepted a long-term strategic defeat, the first in a

series of reverses that would change the balance of power in the Caribbean.

CASTRO: "INDEPENDENT" REVOLUTIONARY

After the 1962 crisis, tension arose between Moscow and Havana, caused by both distrust and ideological differences. Castro felt betrayed by the USSR because Khrushchev had dealt directly with the United States without consulting him. Castro wanted to confront the United States and was incensed when Moscow backed away from the crisis. Disillusioned and angry, Castro sought to broaden his relations with the non-industrialized world in order to gain sources of support independent of the Soviet Union. He wished to spread his revolution throughout Latin America by violent means, a course in direct opposition to the official policy of "peaceful coexistence" followed by the Kremlin at the time. After the 1966 Tri-Continental Conference, where Castro broke openly with Moscow over the question of support for world revolution, relations between the USSR and Cuba reached an all-time low.

By 1968, Castro was in serious trouble. His revolutionary offensive in Latin America was a dismal failure and had cost him the life of his comrade and ideologist, Che Guevara. Cuba's economy had come to a complete standstill after a decade of "revolutionary development," and the support Castro sought from relations with the Third World did not materialize. Cuba's dependency on the U.S.S.R. had grown, but Moscow refused to increase material or economic aid, and initiated a slowdown of oil deliveries to put pressure on Havana. These and other factors forced Castro to abandon his independent course and humbly accommodate himself to Soviet desires.

A new dependence emerged in 1968-69 between Moscow and Havana, including increased economic and military aid. Two events symbolized it: the statements made by Fidel Castro supporting the Soviet invasion of Czechoslovakia and the visit of a Soviet naval squadron to Havana in July 1969.

EARLY STAGES OF THE SOVIET MILITARY BUILDUP

The renewed presence of the Soviet military in Cuba in 1969 stands in sharp contrast to the adventurous policies of Khrushchev seven years earlier. Experience had taught the Kremlin that sudden, openly aggressive moves would only alert the United States to their activities and force a response. Therefore, a new policy was initiated using incremental means to build up the Soviet military capacity in Cuba. The Soviets began to pursue long-range goals rather than instant success. Each small step was a test, each minor success a precedent to build on. By combining patience, propaganda, and deceit, the Soviets set out to re-establish themselves in Cuba on a permanent basis.

The naval squadron which arrived on July 10, 1969, demonstrated the character of this new offensive. Included in the squadron was a Kynda class guided missile carrier, two guided missile destroyers, two *Foxrot* class attack submarines, a *November* class nuclear attack submarine, and several support ships. The *November* class boat did not put into any Cuban ports, but several surface vessels visited Cienfuegos. The presence of these sophisticated, nuclear capable vessels in the Caribbean flew directly in the face of the 1962 agreement. However, there was no American response.

Encouraged by this success, the Soviets decided to include Cuba in their first global

naval exercises, Okean '70. The Cuban role included providing landing bases for TU-95D "Bear" bombers configured for reconnaissance, but capable of carrying nuclear bombs or launching nuclear missiles. This action set a new precedent whereby Bear bombers, or even Backfires, could fly to Cuba. This again was a clear challenge to the 1962 agreement, although the Soviets did not base the planes in Cuba. And again, there was no American response.

A second naval squadron visited Cuba in 1970, including a *Kresta-I* class guided missile cruiser, a *Kanin* class guided missile destroyer, two *Foxrot* class submarines, and an *Echo II* class nuclear-powered cruise missile submarine equipped to carry nuclear warheads. The deliberate choice of a nuclear, but non-ballistic, missile-carrying submarine again illustrates the incremental Soviet approach. The *Echo II* boat was not a "strategic" platform, but so positioned in the Caribbean that it could deliver nuclear devices against targets in the United States. Thus, the level of Soviet military presence was moved up another notch. Again this deployment violated the spirit and substance of the 1962 agreement, and again there was no significant American response. On this visit, the Russian ships conducted maneuvers and openly used Cuban ports for resupply, thus setting another precedent.

THE SUBMARINE BASE CONTROVERSY WITH THE U.S.

Prior to the second naval deployment to Cuba, Soviet planners had decided to build a submarine base at Cienfuegos to extend the range of their fleet. Indeed, the decision to build the base was made in November of 1969, less than a year after the first Russian submarine visited Cuban waters. By July 1970, when construction of the base drew considered attention among the top echelons of the American intelligence community, it was nearly completed. In September, submarine tenders arrived, including a barge to handle nuclear waste. The Soviets had established the capability to support nuclear and conventional submarines, thus advancing their presence yet another step. However, they had moved too rapidly, and their actions could not be ignored by the United States.

The matter reached the crisis stage in the fall of 1970. American congressional leaders called for action, and once again the Soviet leadership found itself in a confrontation with Washington over Cuba, a situation the incremental approach was intended to preclude. Quiet negotiations followed. In November, Washington announced that "an understanding" was reached and that Moscow had agreed that "No nuclear submarines would be serviced in or from Cuban ports." Once again the Soviets seemingly were forced to "back down" by the United States; yet within a month of the so-called understanding, a similar Soviet naval squadron arrived—minus the nuclear submarine—to reassert the right of the Soviet navy to operate in the Caribbean.

Less than three months after the 1970 "understanding," testing the U.S. reaction to the presence of Soviet weapons was again set in motion. Another nuclear-powered *November* class submarine visited Cuba in February 1971, accompanied by a *Kresta-I* guided missile cruiser and a submarine tender, but instead of remaining off the coast, the boat put into Cienfuegos and was serviced. There was no American response, or even public recognition of this blatant challenge. In May 1971, the Soviets tested

the United States again, this time with another Echo II nuclear cruise missile submarine. The boat put into Cienfuegos openly, but still there was no American reaction.

DE-SENSITIZING AMERICAN VIGILANCE

After the precedent-setting visit in May, the Soviets bided their time before testing American sensitivities any further. The 1970 Cienfuegos incident was a dangerous mistake, but the error had proved instructive. Moscow had learned that, if it presented the appearance of backing down, it could carry on its strategy as soon as U.S. attention was diverted. Moscow waited nearly a year, therefore, before making another naval deployment, though flights of TU-95 bombers between Cuba and the Kola peninsula continued unabated. Carefully concealed beneath the rhetoric of detente, the process of desensitization persisted.

The visit of President Nixon to Moscow to sign the SALT I treaty in May 1972 provided the ideal situation for the Soviet Union's next test. The U.S. was anxious to maintain tranquility during the talks—so much so that American naval commanders were advised to avoid confrontations with the Soviets at sea. Moscow chose the Golf II class diesel-powered ballistic missile submarine as the vehicle for this next initiative. Though not a modern boat, the Golf was a strategic platform and thus well suited to test American resolve. As an added precaution, the Golf met its tender at Bahia de Nipe, a quiet harbor on the opposite side of the island from Guantanamo. The submarine remained there for five days and then departed to join its escorts.

A mystery surrounds this particular episode, for outside the harbor were elements of U.S. destroyer Squadron 18, part of a unit assigned to monitor Soviet activities in Cuba. As the Russian submarine left the harbor, the American warships made sonar contact and were able to follow the submarine for three days. During this time the Golf made numerous attempts to escape, but guided by P-3 Orion aircraft based at Key West, Florida, the destroyers maintained contact. The American warships were involved in several encounters with Soviet warships attempting to aid the Golf's escape. No public mention was made by the Nixon Administration, however, concerning the presence of a Soviet ballistic missile submarine in the Caribbean, the use of Cuban facilities to service the vessel, or the confrontation between American and Soviet warships on the high seas.

The lack of a strong American response to this latest incursion again encouraged the Soviets. Less than two years after the 1970 crisis, the American position regarding the use of Cuba as a base for Soviet ballistic submarines had been completely circumvented. Steady, patient pursuit of limited objectives by the Soviets had yielded the desired results without arousing the United States. Soviet naval visits continued throughout the 1970s, including a joint Cuban-Soviet exercise during Okean '75. Vessels from the USSR now call frequently on Cuban ports, train with Cuban vessels, and patrol the southern and eastern coast of the United States after replenishment from Cuba. In addition, construction began in 1978 on a new Cuban naval base, and the facilities at Cienfuegos were expanded to include submarine piers and a handling area for nuclear warheads.

OTHER SOVIET VIOLATIONS OF THE 1962 AGREEMENT

Although naval forces have initiated the most visible Soviet activities in Cuba, there

are other instances in which the 1962 agreement has been violated by the introduction of offensive weapons. The distinction between offensive and defensive weapons ultimately depends on how they are used. A tank or a plane is defensive so long as it remains within the borders of a nation, but when used for aggressive purposes, a weapon becomes offensive. There are certain weapons in Cuba which clearly pose offensive threats to the United States.

In 1978, two squadrons of MIG 23/27 fighter-bombers arrived in Cuba, flown by Soviet pilots. Both are far superior to the IL-28s President Kennedy had forced the Soviets to remove in 1962 and clearly give Cuba a significant offensive potential. The MIG-27 configuration is an effective attack aircraft capable of carrying nuclear or conventional payloads up to 1,500 miles, and since these planes are based in Cuba, they should be considered "strategic" weapons systems. Recent deliveries by the Soviet Union have brought the total MIG 23/27 force level to approximately 75 aircraft, with half of them the more advanced MIG 27. These aircraft are frequently flown by pilots from the Soviet Union, Warsaw Pact countries, and Soviet client states. Of even greater significance is the existence of at least three and as many as six airfields that can handle the Backfire strategic bomber. Certain American defense sources predict that the Soviets will eventually move a squadron of these sophisticated planes to Cuba. From Cuban bases, the Soviet Backfire could hit any target in North America and easily make it back to the Soviet Union.

THE CONTINUING SOVIET BUILDUP

In 1979, just prior to the uproar following Senator Church's disclosure of a Soviet "Combat Brigade" in Cuba, the Soviets sent twenty-four AN-26 transport planes to the island. These aircraft are capable of carrying troops anywhere in the Caribbean region. The public debate generated by the apparent prospect of Cuban and/or Soviet troops being used in Central America helped obscure the true purpose of the now infamous brigade. A 1979 article in The Washington Post identified this unit, which had been transferred from East Europe, as being configured to guard and handle tactical nuclear weapons. This implied that the unit's role was to protect the storage of such weapons as well as other sensitive Soviet installations on the island. For instance, the Soviets maintain a very large communications complex in Cuba, the largest in the world outside the Soviet Union, which is used both to relay transmissions to Soviet military units around the world and to monitor and collect American military transmissions.

Suggestions that this unit is stationed in Cuba to back up Castro against internal opposition are simply not credible. The security of sensitive listening and intelligence-gathering installations on the island and tight Soviet control of the nuclear weapons possibly stored there must surely be of far greater importance to Moscow than Castro's stability. Elements of the "combat brigade" came from East Germany and Czechoslovakia, where they guarded nuclear weapons depots and mobile missile launchers. They are now stationed around the Punta Movida complex, a Soviet built facility linked by rail to Cienfuegos, which is now off limits to the Cuban population in the area. Intelligence reports indicate that this facility is being used to service nuclear weapons from Soviet submarines, but weapons for the MIG-27 could also be stored there. The Carter Ad-

ministration should have been aware of these developments in 1979, but no public announcement was made.

Another aspect of the increasing Soviet offensive capability in Cuba surfaced in 1979 when batteries of modified SA-2 anti-aircraft missiles were identified by air reconnaissance in Cuba. These large missiles, often equipped with nuclear weapons, can be employed quickly in a surface-to-surface mode by the simple addition of a booster. They have an operational range in excess of 150 miles and could be used against ground targets in Florida.

Overall during 1981 the Soviets exported more weapons to Cuba than in any year since 1962, at least triple the level of just two years earlier, rising to 66,000 tons.

In testimony before a Senate committee in January 1982, Secretary of State Haig pointed out that with the increasing flow of arms into Cuba, "All of the countries in the Caribbean are confronted by a growing threat from Cuba and its new-found ally Nicaragua."¹ In the first five months of 1982 the same expanded level of military shipments to Cuba has continued unabated.

THE AMERICAN FAILURE IN CUBA

Since 1973, the Soviets have deployed various naval and air units in Cuba, but the presence of nuclear-capable surface vessels, particularly *Kresta-II* class guided missile cruisers, has raised the level of force currently tolerated by the United States to an alarming degree. Naval formations made up of ships armed with surface-to-surface missiles could easily strike the Gulf coast of the United States or Mexico's oilfields. Such an open display of power may be ignored in Washington, but it is highly visible to many smaller nations in this hemisphere, who are justifiably concerned over American irresolution.

During this period, the U.S. has become unilaterally attached to the illusion of "stability" in the triangular American-Soviet-Cuban relationship, while the Soviets have steadily subverted the status quo and overturned all bilateral "understandings." The United States has meanwhile failed to recognize that the Soviets understand and respect deeds, not words, and that they measure resolve by willingness to act.

The central point regarding the Soviet presence in Cuba is that Moscow has always operated under the assumption that it could advance only as far as the U.S. allowed it to. Since experience has proved that American sensitivity to their military activities is not great, the Kremlin assumes that America will not act unless suddenly provoked and that they may pursue any course of action provided it progresses slowly. The U.S. position in the Caribbean has gone from an active to a passive posture, precisely the state of mind most desired by Castro and the Soviets.

A POSSIBLE RESOLUTION

The United States must first acknowledge the threat posed by the present situation and demand the immediate removal of all nuclear and potentially nuclear Soviet weapons systems from Cuba. Only a direct demand could have a powerful impact on Soviet thinking. Such an approach by the U.S. to the Soviets in Cuba should follow two tracks: diplomacy and preparation for potential actions.

¹ "Second Unit of MIG-23s Identified in Cuban Hands," "Aviation Week and Space Technology," February 8, 1982.

Diplomatic efforts should make it clear that the United States is aware of the scope of Soviet activities in Cuba and will no longer tolerate the present level of Soviet involvement. Privately at first, the new American stance concerning Cuba would be communicated to the Kremlin. Diplomacy would not only spell out the U.S. position concerning the weapons systems in Cuba, but more important, give the Soviets an alternative to confrontation. Past experience suggests that Moscow would reject American demands that it alter its position in Cuba. Therefore, the United States should make active preparations to remove the weapons by force while continuing the dialogue.

A crucial element of American strategy to remove the Soviet weapons is the status to be assigned to Cuba. Cuba is a subcontractor of the Soviet Union, and the U.S. must deal directly with the Soviets. Thus, at no time should Havana be consulted or recognized in the negotiations. The United States is concerned about Soviet weapons, Soviet personnel, and the use of Cuba as a staging base for Soviet operations.

Removing that influence from Cuba will be a risky and dangerous task, primarily because the Soviets do not believe that the U.S. and its leaders are willing to do what is required. To eliminate the Soviet presence from Cuba, the United States must first convince Moscow that it is fully aware of what is occurring, and that this country is serious about altering the "correlation of forces" vis-a-vis Cuba. The most important step toward this goal is for the U.S. government to educate the American public concerning past Soviet violations of the 1962 agreement and, at the proper moment, to confront Moscow publicly concerning their present involvement in Cuba and the Caribbean region. Because of the refusal of four American administrations to deal with the problem of Soviet activities in Cuba, and the secrecy with which they are treated by Washington, both American and Soviet perceptions would be shocked by such a reversal.

PUBLIC OPINION AND CUBA

A recent public opinion poll conducted on behalf of The Heritage Foundation revealed that the American people already are profoundly disturbed over the threat to U.S. interests posed by Cuba. Over two-thirds of those polled, 68 percent, considered the Castro government to be a threat to the security of the United States. Less than half that number (30.9 percent) perceived no such threat.

An even larger percentage, over three-fourths of the sample, believed "that the Castro regime in Cuba is attempting to export revolution in this hemisphere." Only 17 percent denied this proposition.

Finally, by a margin of nearly two to one, Americans want the United States to pursue tougher policies toward Cuba. Specifically 60.3 percent believed that United States policy toward Cuba is "too soft." A minuscule 0.6 percent believed the U.S. was being too tough on Cuba while 35.9 percent endorsed the status quo.

Thus, a popular foundation exists for the Reagan Administration to deal much more decisively with the threat posed by Cuba to the U.S. directly and the Western hemisphere in general.

The results of the poll are:

[Polling Dates: February 25 through March 24, 1982]

Do you consider the Castro government a threat to the security of the United States?

	Percent
1. Yes	68.0
2. No	30.9
3. Don't know	1.1

Do you believe that the Castro regime in Cuba is attempting to export revolution in this hemisphere?

	Percent
1. Yes	78.4
2. No	17.3
3. Don't know	4.3

How do you evaluate United States policy toward Cuba?

	Percent
1. Too tough6
2. Satisfactory	35.9
3. Too soft	60.3
4. Don't know	3.2

CONCLUSION

Despite their formidable military buildup, the Soviets are no more willing today than they were in 1962 to engage in thermonuclear war against the U.S. over Cuba. The Soviet military presence in Cuba is a strategic asset for Moscow, but the island is not essential to their overall global position. Fidel Castro is a costly and unpredictable client, who is at present useful to Soviet designs. Because Moscow recognizes that Cuba is ultimately in America's sphere of influence, the Soviets have never formalized by treaty any obligation to defend the island. Cuba has asked, but has not been invited, to join the Warsaw Pact. The Soviets will exploit their opportunities in Cuba as long as possible, but if confronted by genuine American resolve, the Soviets quite likely will abandon Cuba as they tentatively began to do twenty years ago. And, in the absence of continued massive Soviet support, the Castro regime would quickly collapse.

The strategic lesson of the 1962 missile crisis remains valid today: we can deal with the Soviet presence in Cuba only from a position of visible, overwhelming strength. President Kennedy was able to compel the Soviets to withdraw their weapons only because he was willing to confront them with a great sense of urgency and determination. The same principle applies today, but the situation has changed. Cuba is now a forward base for Soviet military operations and therefore poses a military threat to the countries in the region and potentially the United States. For over a decade, U.S. political leaders have ignored the gradually escalating Soviet presence in Cuba until it has become a deadly threat. The U.S. will change this situation only when its leaders recognize the Soviet activities for what they are: a clear and present danger to U.S. security and regional stability.

CHRISTOPHER WHALEN.*

THE WHITE HOUSE

Washington, D.C., March 11, 1982.

Mr. JOHN FISHER,
President, American Security Council,
Washington, D.C.

DEAR JOHN: As you know, our Caribbean Basin and Central American policy presented by President Reagan on February 24th to the OAS represented a year-long effort. It encompasses economic, political and security measures to combat underdevelopment in the region and to support our friends in warding off the brutal assaults of Cuban

*Christopher Whalen wrote this study while a Research Assistant at The Heritage Foundation. Currently, he is a Legislative Analyst for the House Republican Conference Committee.

and Nicaraguan supported insurgents in the region.

To a great extent, our successful implementation of the policy will hinge upon a greater appreciation of the threat by the American people and the Congress. Unfortunately, the media coverage has been fraught with both misinformation and disinformation, making this requirement all the more difficult.

On the other hand, the film that the American Security Council produced entitled "Attack on the Americas" was an effective and accurate portrayal of both the current and potential threats to our vital interests in the region. I congratulate you for the effort. I understand that some thought has been given to producing an update of the film. Since the successful implementation of our announced policy toward the region is a major goal of the President, such an initiative would be especially appreciated.

Please accept my personal thanks to you and your staff for the continued and abiding support for our national security. I look forward to working with you in the future.

Sincerely,

WILLIAM P. CLARK.

Mr. HELMS. Mr. President, will the Senator yield for a question?

Mr. SYMMS. I am happy to yield to the distinguished Senator from North Carolina.

Mr. HELMS. As I understand the Senator's amendment, he is simply calling on the Reagan administration to comply with and implement the congressional joint resolution, Senate Joint Resolution 230, approved on October 3, 1962. Is that correct?

Mr. SYMMS. That is correct.

Mr. HELMS. Did the Senator read into the RECORD the text of that resolution?

Mr. SYMMS. The text of the resolution has been read into the RECORD.

Mr. HELMS. It has not been?

Mr. SYMMS. The clerk read the text of the amendment.

Mr. HELMS. Mr. President, I commend the distinguished Senator for again raising this question, and I ask him to honor me by permitting me to cosponsor his amendment.

I ask unanimous consent in that regard, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Let me read just one statement that I think sums it all up, a statement by a respected former President of the United States. He said:

The evidence is clear—and the hour is late. We and our Latin friends will have to face the fact that we cannot postpone any longer the real issue of the survival of freedom in this hemisphere itself. On that issue, unlike perhaps some others, there can be no middle ground. Together we must build a hemisphere where freedom can flourish and where any free nations under outside attack of any kind can be assured that all of our resources stand ready to respond to any request for assistance.

Those words were spoken in 1962 by the late President John F. Kennedy.

I think that is precisely what the Senator from Idaho is saying, and I hope the Senate will approve his amendment, which I am cosponsoring, by a resounding vote.

I thank the Senator.

Mr. SYMMS. I thank the distinguished Senator from North Carolina for his support.

I reserve the remainder of my time.

Mr. PERCY. Mr. President, I should like to make it clear that I find myself in agreement with the intent of the Symms amendment.

Mr. STENNIS. Mr. President, will the Senator speak louder?

Mr. PERCY. I will be happy to do so.

Mr. President, I do not argue at all with the intent of the amendment offered by the distinguished Senator. Certainly the United States must remain firm in its resolve to resist and ultimately prevail over Cuban efforts to subvert the nations of this hemisphere. We have no intention to lie down in the face of that kind of threat.

One way we are doing this is by passing the CBI appropriation and trying to build up the economic base of countries in the region; because if they are economically unstable, they will be politically unstable. If they are economically sound, they can be politically sound. The struggling democracies in this hemisphere are working very hard to strengthen themselves and lift themselves up by their bootstraps. Jamaica is a very good example of this, and there are others.

I simply argue very strongly that the specific language of the Symms amendment is troublesome, and it has been troublesome to a number of members of the Foreign Relations Committee.

We have held hearings on this subject. We believe that the world is not quite as simple as it was back in 1962 when we had a clear nuclear threat and when the security of this Nation was very much at stake. Conditions are different today.

No one is presuming today that Cuba can be a threat to the security of the United States itself. We have seen to that. We faced up to it at that time. But the exact language that was pertinent at that particular time is troublesome a decade later. It is particularly troublesome when we consider that this is our own hemisphere and we are having trouble in other parts of the world. I was shocked today, as I mentioned earlier, when one of our distinguished diplomats from Europe came in to tell me that it is popular in Europe—and it shock him—to be anti-American today, for a variety of reasons. Our stock has sunk pretty low among our allies. We have differences of opinion with them which have been expressed in public opinion and attitude. We do not have the unity of pur-

pose in NATO today, and we have to fight hard to get it back.

Anyone who wants to see trouble for the United States should travel any place in the Middle East. There we are in trouble every place you go. Every single report we have had back from ambassadors in the area—in the Arab countries, from diplomats, and from our own Senators who have come back from that area have all reported that we are in trouble in the Middle East. We did endanger our relationships in the Western Hemisphere too in the Falkland Islands crisis. Fortunately, we think that has dissipated a good deal now, and there is perhaps better understanding of the position we took.

However, I think we have to move very carefully. For that reason, the Foreign Relations Committee gave a great deal of thought to this. Some of us found the Symms amendment troublesome because it does not serve U.S. efforts to build support in the hemisphere. It raises certain serious difficulties with respect to the War Powers Act. After all, our distinguished former chairman and now ranking minority member of the Armed Services Committee, together with our distinguished former colleague Jack Javits, authored the War Powers Act, which has stood the test of time.

We did not have that in place at the time of the resolution back in 1962. We do have it now. This particular Symms amendment I think raises certain serious difficulties with respect to the War Powers Act.

To speak specifically on this particular point, when Congress enacted the War Powers Act in 1973 all previous legislation was brought within its purview. The Cuban resolution of 1962 which Senator SYMMS repeats in his amendment was also brought under the purview of the War Powers Act.

The troublesome clause is "to resist by whatever means possible, including the use of arms." This was thus subject to consideration of the War Powers Act. The question today is, Is this the way we are going to threaten and rattle our sabers, and what are we going to do about it?

We have seen the American reaction when talking about sending 800 to 1,000 American forces into Lebanon. What are we going to do, wage war on Cuba? Who intends to back that up? For what reason are we raising that specter, or can we find other means that are just as effective?

New efforts would be more appropriate than language that was used when we were threatened with the possibility that nuclear weapons would be 90 miles from our shore. That issue was resolved back in 1962. That same situation does not exist today.

I would seriously question whether this 1962 clause reinvigorates and gives the President new license to use troops without prior consultation with

Congress in trouble spots around the world. To pass a resolution now which implies the use of arms without the advice and consent of Congress, as provided for in the War Powers Act, I think would be quite contrary to the long debate and the careful work we did on the War Powers Act. That act provides a certain degree of protection and goes to the fact that only Congress can declare war. Authorizing the use of troops against Cuba in this language I think would be dangerous.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. HATFIELD. Is the Senator going to offer an alternative then for the Senate to consider tonight?

Mr. PERCY. The Senator will offer an alternative which will essentially be the amendment that has been worked on by the Foreign Relations Committee.

I will read the language. The language is I think tough and yet consistent with conditions that exist today.

The amendment that I will offer:

Declared by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That the United States reaffirms its longstanding determination—

(a) to prevent in Cuba the stationing of nuclear weapons by the Soviet Union, the development or acquisition of nuclear weapons, or any other externally supported military capability endangering the security of the United States;

(b) to resist efforts by Cuba to extend its Marxist-Leninist ideology or political system in the hemisphere by force or the threat of force in violation of the Charter of the United Nations;

(c) to pursue any diplomatic opportunity, including those afforded by the Organization of American States, with a reasonable prospect of leading to the reduction of aggressive or subversive activities by Cuba or any other state in the hemisphere; and

(d) to work through the Organization of American States and with peoples throughout the hemisphere to achieve peaceful and democratic self-determination in Cuba and in all states and territories of the hemisphere.

This language I think is strong. It is powerful language. It embraces the fact that collective security and other nations in this hemisphere should be taken into account. All freedom-loving nations should resist this kind of encroachment, and it is not just a job to be cleaned up and done by American force of arms.

What do we intend to do—invade? Do we intend to rally up the Forces? Are we going to initiate the draft? Maybe we should for other reasons but are not going to do it for this reason. We will never get a referendum to support it.

I think the committee language is good language, and for that reason at the proper moment and the proper time I will move to table the Symms amendment and on disposition of that

amendment would then substitute or offer as amendment the language that was adopted by the committee.

I am happy to yield such time as the distinguished minority leader of the Foreign Relations Committee desires.

Mr. PELL. I thank my colleague very much indeed.

It was Talleyrand who once said that: "When you are dealing with an adversary you ought to spend 10 minutes of every 60 in the skin of your adversary."

I am just looking at this from the Cuban viewpoint. They have been the victims of one pseudo-invasion, and efforts have been made to assassinate their chief of government. They naturally have a certain leanness about the United States.

For us to talk about them, one twenty-fifth the size of our country in population, as a threat is, I think we will agree, ridiculous.

The main danger in the resolution before us is the use of the phrase "including the use of arms." For a nation as Cuba that has been at the receiving end of many efforts to destabilize her government over the years, that would strike terror in many Cubans.

Also this resolution is silent on the question of nuclear arms.

For these reasons, I believe the substitute that we worked up in the Foreign Relations Committee, and that the chairman will offer, meets the requirements of our security, and meets the requirements that we seek as individual politicians in trying to appear to our constituents that we are true-blue Americans. I hope that the amendment before us will be defeated and that the one offered by the chairman of the committee will be acceptable.

Mr. PERCY. I thank my distinguished colleague.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. The amendment which I will offer immediately following disposition of the Symms amendment will be offered as an amendment to supersede the Symms amendment.

The amendment received apparently 14 votes for it and 1 vote present in the committee.

I ask once again and in conclusion whether or not Congress wants now to enact legislation that would raise the question about the requirements of the War Powers Act, that would enact this new sort of Cuba revolution and raise the serious question as to whether the clause is reinvigorated and the President is given new license to use troops without prior consultation with Congress in trouble spots around the world including Cuba.

I think that would be abdicating our responsibility, that would be walking out on the months of debate, over 1 year, that we had particularly when

we overrode the veto of the President in passing the War Powers Act.

The Foreign Relations Committee dealt at length with this issue. In hearings this spring, we determined in a fully bipartisan decision, 14 affirmative votes, to draft substitute legislation that contains the essence of Senator Symms' amendment but that qualified that language so as not to compromise our understanding of current war powers legislation.

Mr. SYMMS. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Idaho has 7 minutes and 35 seconds; the Senator from Illinois, 2 minutes and 7 seconds.

Mr. SYMMS. Mr. President, I demand the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SYMMS. Mr. President, I yield 6 minutes to the distinguished President pro tem, Senator THURMOND.

Mr. THURMOND. Mr. President, I rise in support of the Symms amendment.

On April 14 of this past year, I stood before this body in strong support of the proposal offered by the distinguished Senator from Idaho, relating to U.S. policy toward the Government of Cuba. Unfortunately, by a narrow margin, the Senate tabled that Symms amendment, partially in deferral to the Foreign Relations Committee for further evaluation of the issue.

During the committee's consideration of this legislation, critical language was removed, resulting in a "watered-down" version of what once was a clear, straightforward, and firm statement of American foreign policy.

However, Mr. President, I am glad to see that Senator SYMMS has given the full Senate another opportunity to consider the undiluted version of this legislation.

Mr. President, I wish to reiterate my continued backing of this Symms amendment. It is a misperception that this amendment alters or changes any present law.

Mr. President, let us see what this amendment says. I think we should know exactly what we are voting on. It merely reaffirms and supports existing U.S. law, signed by President Kennedy in 1962, with respect to the situation in Cuba.

This amendment basically calls for U.S. resistance to Cuban aggression and subversion in this hemisphere, prevention of escalation in the number of Soviet military bases and Soviet influences in Cuba, and support for the basic principle of self-determination for the Cuban people.

What is wrong with that? Who can object to that? Are we not all in favor

of those things? That is all the resolution of Senator SYMMS does.

Now, Mr. President, I want to say I think these are fundamental principles that I am certain each Member of this distinguished body can support.

Mr. President, let me counter the argument that the strong reaffirmation of our presently existing policy relating to Cuba is not necessary in this day and time. I fear that too few Americans actually realize the seriousness of the threat that the present Communist government of this island country poses to the well-being of the hemisphere in which we live. The Marxist Castro regime in Cuba has exported its subversion to Central America. Cuban activities have assisted in the overthrow of the government in Nicaragua, in deterioration of the situation in Guatemala, and in the guerrilla violence that has resulted in bloody civil war in El Salvador. How long must we stand idly by as our neighbors to the South are engulfed by the Communist cancer?

Mr. President, there are also internal factors within Cuba that are a source of great concern. Over the past decade, the Soviet Union has been emplacing offensive weapons in Cuba. Defense analysts estimate Soviet military shipments to Cuba tripled in 1981 over 1980, and are increasing again this year. This places Russian military exports to Cuba at their highest level since 1962.

Mr. President, Soviet-made heavy bombers, of the Tu-95 class, based west of Havana, fly reconnaissance missions along our very own Atlantic coast daily. Recently, a second squadron of MiG-23 ground attack fighters was uncrated in Cuba, and they are being manned by Soviet pilots. These intercontinental aircraft allow Castro to maintain an air force second only to the United States here in the Western Hemisphere.

Mr. President, the fact remains that the controversial 4,000-member Soviet combat brigade is still stationed in Cuba. It has been reported that this very same brigade was recently sent to East Germany on a nuclear weapons securing training mission.

Additionally, we must be reminded of the new nuclear submarine facility that is being built along the Cuban coast, along with the fact that Soviet warships regularly conduct exercises in the Gulf of Mexico.

Finally, Mr. President, we must not be oblivious to the announced threat of Soviet President Leonid Brezhnev to place SS-20 nuclear warhead missiles in Cuba if the United States goes ahead with its plans to place Pershing missiles in Europe.

Mr. President, we are not speaking of a country, or a problem that exists thousands of miles away from our borders. The geographical proximity of

this situation demands that we address this problem with authority and firmness.

That is the only language the Communists know. It is the only language the Soviets know, and it seems to me we ought to take a firm stand here, not equivocate, not offer some weaker resolution which does not carry any strength to it and any firmness. If we are going to avoid a war we have got to have a clear signal to the Soviets and a clear signal to Cuba that here we stand, a continent of free people, and we are not going to stand idly by and see all of this take place here and say nothing or do nothing. This resolution to me should be passed, and I hope the Senate will pass it. Too often in the past we have handled similar situations with a weak and apathetic policy. As a result, too often we have had to stand by and witness a substantial reduction of U.S. influence in areas of vital American interest.

Mr. President, I want to make it clear that I am not calling for the use of force as the only answer to this problem, and I am confident that no one in this body is an advocate of misguided or unnecessary military action in this or any other similar situation. We must be cognizant, however, of the consequences that are likely to arise if we should formulate a policy in regard to Cuba that precludes or suggests that we would be unwilling to employ the use of force in containing Cuba's aggression. A weak stand in this area will only strengthen Castro's desire to establish a paralyzing grip on both Central and South America. The United States should not have its hands tied in this matter. We must have all means and options available to us if we are to maintain stability in this hemisphere and counter Castro's Soviet-oriented, subversive goals.

Mr. President, why should we play into the hands of our adversaries? Why should the United States send a message to the Soviet-backed regime in Cuba, that we are no longer willing to protect our own vital interests in this hemisphere? The defeat of this amendment will send that very message to Fidel Castro, and we will have passed up an excellent opportunity for this body to clearly express its desire to see the United States maintain an influential policy in our own backyard.

Moreover, Mr. President, this amendment is fully consistent with the administration's recent Caribbean policy proposals. The President views the Caribbean region as a vital strategic and commercial area for the United States. We cannot afford to allow Cuba to be the dominant force in this region. We must take steps to insure that Castro does not continue to hamper our efforts to improve the social and economic well-being of the people in the Caribbean Basin and in Central America.

Mr. President, let us not be so naive as to believe that this matter is not of extreme importance. I feel that it is essential that we take a strong stance in our relations with Cuba. It would be a most serious mistake to be submissive or imprudent in our dealings with Castro. The adverse ramifications of allowing this Russian surrogate to spread its destabilizing influence throughout our hemisphere are totally unmeasurable.

Mr. President, as I did in the past, I will vote in favor of this initiative, and I hope that my Senate colleagues will also go on record in favor of the Symms amendment, and in favor of a strong U.S. policy in regard to Cuba.

Mr. LEAHY addressed the Chair.
The PRESIDING OFFICER. Who yields time?

Mr. LEAHY. Mr. President, will Mr. PERCY yield me 30 seconds?

Mr. PERCY. Yes, of course, I would be happy to yield.

Mr. LEAHY. Mr. President, the distinguished President pro tempore has spoken of the brigade in Cuba. He is absolutely right, the Soviets do have them down there.

I am reminded of what somebody said to me during 1980 in Vermont, "By golly, if Ronald Reagan was President, we wouldn't have any Soviet brigade in Cuba."

The PRESIDING OFFICER. Who yields time?

Mr. BAKER. Mr. President, before we do that, I ask unanimous consent to proceed for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, it is 9:25, and I had promised the Senate would be out at 9 o'clock, which for me is better than average. But I do want to try to get us out as soon as possible.

As I understand it, there is going to be a tabling motion made by the chairman of the Committee on Foreign Relations. If that succeeds then there would be an amendment offered by the Senator from Illinois (Mr. PERCY). If that does not succeed we will have a record vote on the Symms amendment itself, and then we have got the Schmitt amendment to deal with which, perhaps, will be accepted. But the long and short of it is—I mean the Mattingly amendment. The long and short of it is we could be here another hour at that rate.

I have discussed this with the two managers of the bill, with the distinguished Senator from Idaho (Mr. SYMMS), the chairman of the committee, and I have consulted with the minority leader. Mr. President, I do not think we can finish this section tonight.

Therefore, I ask unanimous consent that after the disposition of the Symms amendment that only a possible amendment by the Senator from

Illinois (Mr. PERCY) and an amendment by the Senator from Georgia (Mr. MATTINGLY) be in order for this section tomorrow when we resume consideration of this bill.

Before the Chair rules or puts the question, after that is done if we can lock down that nothing else to this section is to be offered and would be in order, then I would ask the Senate to recess after the disposition of the Symms amendment or the tabling motion.

Mr. PERCY. Mr. President, reserving the right to object, and I shall not, I would like to indicate a willingness on the amendment that I would be offering, which would supersede the Symms amendment, even if adopted, that we have a time limitation of 10 minutes equally divided and a 10-minute rollcall vote.

Mr. BAKER. Mr. President, I would be glad to put that request.

Mr. SYMMS. Mr. President, reserving the right to object, you are talking about doing this tomorrow, though?

Mr. BAKER. Yes.

Mr. SYMMS. I would think 10 minutes would be a little bit short.

Mr. PERCY. I thought this was to be tonight.

Mr. BAKER. Mr. President, let me postpone that for the time being then. Let me put the request I just stated to the Chair.

The PRESIDING OFFICER. Is there objection?

Mr. GLENN. Reserving the right to object—

Mr. HELMS. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, after we have the next vote I will ask the Senate to recess until in the morning.

The PRESIDING OFFICER. Who yields time?

Mr. MOYNIHAN. Mr. President, will the Senator from Illinois yield me 15 seconds for a question?

Mr. SYMMS. Mr. President, has all time expired?

The PRESIDING OFFICER. All time has not expired. Who yields time?

Mr. MOYNIHAN. Will the distinguished chairman yield 15 seconds for a question?

Mr. PERCY. Yes, of course.

Mr. MOYNIHAN. I believe on this side of the aisle it would be important for us to know does the President of the United States support or oppose the Symms amendment?

Mr. SYMMS. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 2 minutes and 22 seconds.

Mr. SYMMS. This is a letter from Mr. William Clark, Bill Clark. On my time I will read this letter into the Record for the distinguished Senator

from New York. This is from Mr. William Clark:

The principles embodied in your resolution have the full support of the President. He clearly expressed these same sentiments during his speech before the Organization of American States on February 24, 1982.

This is dated April 29, 1982.

Mr. MOYNIHAN. Is the President prepared to go to war if the terms of the resolution are not met?

Mr. SYMMS. On my time again, I would say that the President is the Commander in Chief. I am not making such a judgment. But the principle here is to announce that anything less is surrender to Soviet intervention into this hemisphere, and I am sure my good friend from New York does not want to do that.

What this amendment expresses is political will, whether we as Americans have the resolve to resist expansionism of the Soviet puppet Castro in the Caribbean Basin. That is what the question is. It is a question of a strong signal; it is not a question of whether or not we are going to go to war tomorrow, next week, or the week after. It is a question of what the American position is. We need a clear-cut, concise statement of what we will or will not tolerate right off our front door, 90 miles from home.

Mr. MOYNIHAN. I thank the Senator.

Mr. PERCY. Mr. President, to respond further to the distinguished Senator from New York, after the Committee on Foreign Relations adopted by a 14 aye vote the resolution which I will present for adoption by the Senate tonight, I did send the resolution to Secretary Shultz. We have not had a reaction back from Secretary Shultz.

I also indicated that there were 14 aye votes and 1 present. Senator HELMS voted present originally but then, I note in the RECORD, he did wish later to be recorded in the negative. So it was 14 to 1.

But I do feel, for the reasons I have previously stated, the amendment that I will be offering, subject to the disposition of this amendment, will offer the opportunity to the Senate to vote on it.

The PRESIDING OFFICER. The time of the Senator from Illinois has expired.

Mr. PERCY. Mr. President, I move to table the Symms amendment.

The PRESIDING OFFICER. Does the Senator from Idaho yield back his time?

Mr. SYMMS. Mr. President, I yield the remaining time to the Senator from North Carolina.

Mr. HELMS. Mr. President, I will only take 30 seconds. What we are talking about with respect to the substitute, which the Senator from Illinois will offer in the event that the Symms amendment is not tabled, is re-

ducing the Monroe Doctrine in half. Now, of course, half is better than zero. But it is time to put up or shut up.

This amendment by the Senator from Idaho does not rattle any saber. It just has America acting like America again.

I will repeat the quote from John F. Kennedy in 1962, when he said:

The evidence is clear now and the hour is late. We and our Latin friends will have to face the fact that we cannot postpone any longer the real issue of the survival of freedom in this Hemisphere.

That is what we are talking about. We can mess around with words all we want to, but we are talking really about the survival of freedom in this hemisphere.

The PRESIDING OFFICER. All the time of the Senator has expired.

Mr. PERCY. Mr. President, I move to table the Symms amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Illinois (Mr. PERCY) to table the amendment of the Senator from Idaho (Mr. SYMMS). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HART), the Senator from Michigan (Mr. LEVIN), the Senator from Michigan (Mr. RIEGLE) and the Senator from Maryland (Mr. SARBANES), are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan (Mr. LEVIN), and the Senator from Michigan (Mr. RIEGLE), would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 30, nays 65, as follows:

[Rollcall Vote No. 305 Leg.]

YEAS—30

Baucus	Ford	Long
Biden	Glenn	Matsunaga
Bumpers	Gorton	Moynihan
Chafee	Hatfield	Packwood
Cranston	Huddleston	Pell
Danforth	Inouye	Percy

Sarbanes

So the motion to lay on the table UP amendment No. 1201 was rejected.

Mr. SYMMS. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNANIMOUS-CONSENT AGREEMENT— AMENDMENTS TO CHAPTER VI

Mr. BAKER. Mr. President, I believe I have indicated and the minority leader agrees that there will be no more record votes tonight. I have a unanimous-consent request I wish to propound that I have submitted to the minority leader, managers, and other Senators.

I ask unanimous consent that no other amendments be in order to chapter VI of H.R. 6863 after disposition of the pending Symms amendment except a Percy amendment dealing with Cuba, a Mattingly amendment dealing with drug traffic, and also remaining Appropriations Committee amendments.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, does the Senator mean by that last phrase, "and also remaining Appropriations Committee amendments" to chapter VI?

Mr. BAKER. Yes, Mr. President, to chapter VI.

Mr. ROBERT C. BYRD. I thank the Senator. I have no objection.

Mr. MOYNIHAN. Mr. President, reserving the right to object, and I shall not object, I should like to offer an amendment to this section tomorrow.

Mr. BAKER. Mr. President, will the Senator tell us the subject of this amendment?

Mr. MOYNIHAN. On the drug traffic.

Mr. BAKER. Mr. President, I include that in the request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, in the committee's rush to file and have printed its committee report on the supplemental appropriations bill, a number of minor typographical errors occurred. To clarify any confusion, I shall ask unanimous consent to have a

list of corrections printed in the RECORD. These have been checked with the manager for the minority side.

Mr. President, included in these corrections is a technical reclassification of spending authority, which because of a transfer, is no longer counted as new budget authority. As a result, the total budget authority contained in the reported bill for program supplementals totals \$2,857,707,459. This is \$17.4 million less than is shown in the printed report. Tabular corrections in the pay supplemental title reduce the reported bill total by \$312,000 for a revised total of \$6,106,872,640. The corrected overall bill total then is \$8,964,580,099.

I ask unanimous consent that the list I referred to be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

TECHNICAL CORRECTIONS OF TYPOGRAPHICAL ERRORS IN THE COMMITTEE REPORT (S. REPT. 97-518)

Page 51, in the table at the top of the page in column 3 entitled, "Committee recommendation" aligning with the line entitled "variable housing allowance", strike out "5,000" and insert: "5,500".

Page 97, line 16, after "resources" insert: "if necessary, otherwise these funds could be deferred for use in fiscal year 1983."

Page 97, line 22, after "eliminating" strike out "the" and insert: "OMB's proposal".

Page 99, line 20, strike out "registration" and insert: "registration".

Page 100, line 19, after "provided" and insert: "the".

Page 102, line 3, strike out "October 1, 1983" and insert: "September 30, 1983".

Page 113, line 11, strike out "\$450,000" and insert: "\$540,000".

Page 113, line 15, strike out "(\$40,000)" and insert: "(\$20,000)".

Page 238, line 27, at the beginning of the paragraph, insert: "Section 303."

Page 238, line 29, strike out "1982" and insert: "1983".

House bill: Strike "_____ " and insert: "-300,000".

Mr. HATFIELD. Mr. President,

there are no other amendments to be taken up on this bill at this time. I yield the floor.

Mr. PERCY. Mr. President, I would like to discuss for a few minutes with the Senator from New Mexico the matter of the \$8.5 million in the House version of the supplemental which has been earmarked for repair and construction of the Job Corps Center in Joliet, Ill.

I ask unanimous consent that a fact-sheet on the Job Corps Center and the appropriations bill be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JOLIET JOB CORPS CENTER

The fiscal 1982 general supplemental appropriations bill, as passed by the House, provided \$8.5 million to rebuild a major portion of the Joliet Job Corps Center in Illinois. This item was left out of the Senate version.

The Joliet center, located 50 miles southwest of downtown Chicago, opened in July, 1979 with a rated capacity for 400 young men and women between the ages of 16 and 21. A fire in November, 1981, reduced the center's capacity to 150 youth. They are being trained as auto mechanics, clerk-typists, nursing assistants, cooks, welders and maintenance workers.

The fire destroyed a building which had been used as a dormitory for 200 male youth and also for administrative offices and for an infirmary. The House Appropriations Committee, in its report, said it wanted to see the center rebuilt "at the earliest possible date" with priority for enrollment given to youth living within 200 miles of Chicago, an area that includes major cities of Illinois, Indiana, Michigan, Wisconsin and Iowa. Here are some of the compelling reasons for the committee's decision:

(1) The Chicago area has one of the highest concentrations of unemployed minority youth in the country. Of the current enrollees, 87.6% are black, 2.4% are hispanic and 9.2% are white.

(2) There is only one other Job Corps Center in Illinois, a conservation center for 230 males operated by the Forest Service near Golconda in the southern part of the state.

(3) The Joliet center is housed in buildings leased from the Army at the "moth-balled" Joliet Army Ammunition Plant. The burned building was part of the plant's defense mobilization base so it will have to be replaced at Labor department expense in any case.

(4) The RCA Service Company was the original operator of the Joliet center. Since the contract was awarded last year to Res-Care, Inc. of Louisville, Kentucky, the operating efficiency of the center has greatly improved under its able director, James E. Daniels.

Mr. PERCY. I think the Job Corps program is a good one and this particular center in Joliet has had a good record—a placement rate of 80 to 95 percent before the recession reached its deepest point. Since it serves such a widespread area in the central Midwest, and since the repairs required by the extensive fire damage are certainly more than routine, I agree with the House that some special funding is needed. I wonder if I could call upon the Senator from New Mexico for his comments on this matter?

Mr. SCHMITT. Mr. President, I can certainly understand the concern of the Senator from Illinois in this regard. It is unfortunate that the Joliet Center has been reduced to so small a portion of its original training capacity. As the Senator knows, the House language was reviewed by the committee and we did not feel it was possible to earmark such funding in our own bill at this time.

Mr. PERCY. I appreciate the understanding of the Senator from New Mexico, who chairs the Appropriations Subcommittee on Labor, Health, and Human Services, and Education, and I wonder if he would indulge me for a few minutes in a discussion about what options may be open to us in pursuit of this matter.

Mr. SCHMITT. I would be happy to discuss the matter with the Senator from Illinois.

Mr. PERCY. Mr. President, aside from a Job Corps Center near Golconda, Ill., which is used by the Forest Service to train people in conservation and forestry, there is not now a facili-

ty within a reasonable distance—other than Joliet—that conducts training in skills that are marketable in urban areas and which is accessible to residents from adjacent States such as Wisconsin and Indiana. Does my colleague not agree that some effort should be made, at some point, to look into the problem of this severely reduced training capacity in the Chicago area, one which affects other States as well?

Mr. SCHMITT. Mr. President, we understand the concern of the Senator from Illinois. He has brought to the attention of both the committee and the Senate a very real problem and we would like to work closely with him to arrive at an appropriate solution at the appropriate time.

Mr. PERCY. I thank the Senator for his interest and concern. I wonder if the distinguished subcommittee chairman would be able to give me his assurances that he will keep an open mind on this matter as the Senate proceeds to conference on the bill.

Mr. SCHMITT. I can assure the Senator that we will have an open mind on the House provision when we go to conference. It may be, however, that this matter will have to be resolved in connection with subsequent action on funding for the entire Job Corps program for fiscal year 1983.

Mr. PERCY. I thank the Senator very much. I appreciate his willingness to discuss the problem here on the floor and his kind offer to work with us on it. His assurances have been very helpful to me and I know he will, as usual, do his best to follow up on them.

REGARDING TITLE I SUPPLEMENTAL

Mr. D'AMATO. As chairman of the Labor-HHS-Education Appropriations Subcommittee, is it the Senator's understanding that the \$148 million fiscal year 1982 supplemental appropriation for title I is to be used in conjunction with the regular appropriation to assure each county of a total title I allocation for the 1982-83 school year that is the higher of the amount under either the 1970 or 1980 census data?

Mr. SCHMITT. Yes, that is correct.

Mr. D'AMATO. Since the Department of Education has already distributed the amount appropriated according to the 1970 census, is it your understanding that the \$148 million fiscal year 1982 supplemental is to be distributed in such a way as to assure that only those counties that do better under the 1980 census data will get the amount they would have received if the 1980 data had been used?

Mr. SCHMITT. Yes, that is correct. Because the previous appropriation has now been distributed according to the 1970 data, the Department will distribute the new \$148 million to each State that has even a single county that would have done better under the

1980 census had it been used. This will insure that each State's total title I allocation will be the higher of the amount distributed under the 1970 or 1980 census data. No county, of course, will receive more than the higher of the 1970 or 1980 census data allocation.

Mr. D'AMATO. In other words, this new title I supplemental could not, therefore, be used to grant additional dollars to counties that do better under the 1970 census, but would apply only to counties that do better under the criteria for poverty in the 1980 census?

Mr. SCHMITT. Yes, exactly.

Mr. D'AMATO. And finally, what do you see as happening should the courts rule, following enactment of the supplemental, in favor of using the 1980 census data for the 1982-83 school year? Would the \$148 million then be distributed only to counties that do better under the 1970 census than under the 1980 census?

Mr. SCHMITT. Any comment would be speculative at this point. We would need to look very carefully at any court decision that is made. However, I am sure the Members would want to do everything possible to insure that there be no disruption to the school year due to court action.

Mr. D'AMATO. Is there any indication among local school administrators that they would oppose this special supplemental?

Mr. SCHMITT. I am aware of none. Many education organizations including the Council of Great City Schools; the American Association of School Administrators, whose members would administer these new funds; the National School Boards Association; and so forth have indicated they support the supplemental.

Mr. D'AMATO. I thank the Senator for this clarification.

Mr. CRANSTON. Mr. President, as the ranking minority member of the Veterans' Affairs Committee, I would like to discuss one point regarding the pending measure with the distinguished chairman of the HUD-Independent Agencies Subcommittee, my good friend from Utah (Mr. GARN). In the report to accompany this measure—Senate Report No. 97-516—the Appropriations Committee stated it concurs with the action of the House of Representatives in transferring \$8 million to the VA's medical administration and miscellaneous operating expenses account from the agency's medical care account in order to support the VA's nurse scholarship program through September 1983. The report further referred to the source of the \$8 million from the medical care account as certain funds available for the VA's vet center readjustment counseling program, more specifically from the fiscal year 1982 funds allocated to that program for contracting

with non-VA entities to provide readjustment counseling.

Mr. President, as further noted in the report, the Appropriations Committee considers the VA nurse scholarship program a high priority, and since the VA has informed the committee that it would not be able to obligate \$8 to \$10 million of the \$11.2 million allocated to the contracting-out portion of the readjustment counseling program in fiscal year 1982, the committee provided for a transfer of \$8 million of those funds rather than have the funds lapse.

As I indicated in my August 4 letter on this subject to the distinguished chairman and the distinguished ranking minority member of the subcommittee (Mr. HUDDLESTON), I very much share the Appropriations Committee's support for the VA's plan under its health professional scholarship program to finance the training and upgrading of VA nurses and fully endorse the increase in and extended availability of funding for that program that would be provided for in the pending measure.

I realize that the VA's unfortunate delay, until very recently, in developing a mechanism for fee-for-service contracts for readjustment counseling may mean that not all of the funds earmarked for that effort in fiscal year 1982 can be effectively expended for that specific purpose by the end of the current fiscal year. I do not support, however, transferring funds away from the readjustment counseling program—a program that is of great importance to many Vietnam veterans.

Mr. GARN. Mr. President, I know that my friend from California (Mr. CRANSTON) is strongly committed to meeting the needs of Vietnam veterans. I share that commitment, and I certainly would not endorse any action that would diminish the efforts of the Federal Government to assist those veterans. Although it is correct that the committee report mentions readjustment counseling fee-for-service funding as the source for the \$8 million to be transferred from the medical care account to support the nurse scholarship program, that reference was intended only as an example of a source in the medical care account from which funds could be drawn. As was noted in the committee report, the reason that source was mentioned was that the VA had advised the Appropriations Committee that the readjustment counseling fee-for-service funds would otherwise lapse. The Administrator would certainly have discretion to identify another source, or other sources, to effectuate the transfer which this act will make possible and bring that proposal to the attention of the Appropriations Committees in the usual manner.

Mr. CRANSTON. Mr. President, I appreciate the support of the chairman (Mr. GARN) for Vietnam veterans and his clarification of the committee's intent regarding the use of readjustment counseling program funds. As I urged in my August 4 letter, I would hope that, before the VA would use any of the funds earmarked for that program to support the transfer of funds for the nurse scholarship program, the agency would make an immediate, concerted effort to use those funds for the purposes intended or for other purposes related to the readjustment counseling program. For example, every consideration should be given to the possible use of such funds to support some part-time employees for the balance of the current fiscal year to bolster the existing readjustment counseling efforts, to support increased travel in conjunction with ongoing training efforts that are designed to improve the skills of those working in the program, to fund research into the effectiveness of the vet centers in addressing problems related to combat stress, and to fund a VA effort to monitor the efforts of the various contractors providing fee-for-service counseling.

Mr. GARN. Mr. President, the suggestions made by Senator CRANSTON for ways in which the VA might use these fee-for-service money that cannot be otherwise obligated by the end of fiscal year 1982 all have merit and the VA should consider them. In any event, I know that we are in agreement that these funds should not be allowed to lapse. I also trust that there will not be a repeat of this situation in the next fiscal year but rather that, in fiscal year 1983 and subsequent years, the agency will effectively use for the intended purpose all the funds earmarked for the fee-for-service portion as well as the in-house vet center aspect of the readjustment counseling program.

I will raise the concerns we have discussed regarding funding for the readjustment counseling program with my counterparts on the House Appropriations Committee during the conference on this bill and make it clear that the Administrator has the discretion to find the most appropriate source within the medical care account to provide for the transfer to MAMOE of the \$8 million for the nurse scholarships.

Mr. CRANSTON. Mr. President, I am very grateful to my good friend from Utah for this clarification and, as always, his excellent cooperation and helpfulness. I ask unanimous consent, Mr. President, that the text of my August 4 letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, D.C., August 3, 1982.

Hon. JAKE GARN,
Chairman,
Hon. WALTER D. HUDDLESTON,
Ranking Minority Member,
Subcommittee on HUD-Independent Agencies,
Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR JAKE AND DEE: I noticed that H.R. 6863, a supplemental appropriations Act for fiscal year 1982, as passed by the House of Representatives on July 29, contains a provision to transfer \$8 million from the Veterans' Administration's medical care account to the agency's medical administration and miscellaneous operating expenses account in order to provide funding support for the VA's Health Professional Scholarship Program. Once transferred, these fiscal year 1982 funds would continue to be available until September 1983.

I strongly support the VA's plan under its Scholarship Program to finance the training and upgrading of VA nurses and fully endorse the increase in and extended availability of funding for that program. I am very concerned, however, that the House Appropriations Committee recommended in its report (H. Rept. No. 97-673) to accompany H.R. 6863 that the source for this \$8 million transfer be funds previously intended to fund the fee-for-service portion of the VA's "Vet Center" readjustment counseling program. I believe that diverting funds from that source would be inappropriate, and I urge that the Senate Committee not ratify that recommendation.

As the author of the legislation establishing the VA's readjustment counseling program, I have long advocated the timely establishment of a fee-for-service counseling effort so as to provide assistance to those veterans in need of readjustment counseling who are unable to take advantage of the Vet Centers. Thus, I have been very disappointed that it took the VA until earlier this year to establish a fee mechanism and begin to implement it. Although I appreciate that the delays already incurred may mean that not all of the monies originally allocated for fee-for-service efforts in fiscal year 1982—\$11.2 million—can be effectively utilized for such purposes during this fiscal year, I would hope that your Subcommittee would first assure itself that a good faith effort has been made to utilize as much of those funds as possible before endorsing any proposal to allow the funds to be used for other purposes.

Moreover, to the extent that the Subcommittee is satisfied that some of the funds allocated for the fee-for-service portion of the readjustment counseling program in fiscal year 1982 will lapse unless they are reallocated, I urge that efforts be made to retain in that program for other uses such funds as can be effectively used by that program. For example, I believe that such funds could be effectively used for supporting some part-time FTEE's to bolster the existing Vet Centers' efforts between now and the end of the fiscal year, for supporting increased travel in conjunction with on-going training efforts that are designed to improve the skills of those conducting the program, for funding research into the effectiveness of the program in addressing problems related to combat stress, and for funding a VA effort to monitor the efforts of the various fee-for-service contractors. To the extent that funds remain after such readjustment counseling activities are funded, I

would urge that the Subcommittee favorably consider either authorization to transfer such funds for use in support of other programs targeted on Vietnam-era veterans, such as the VA's various Agent Orange activities, or an amendment to permit an appropriate amount of funds to be utilized for some or all of the foregoing purposes relating to Vietnam veterans, or for fee counseling, beyond September 30, 1982—or some combination of these actions.

I realize that, to the extent your Subcommittee does not rely on funds from the readjustment counseling program to support the VA Scholarship Program, there will be a need to identify other VA programs that could be offset so as to provide additional funding for the Scholarship Program. I understand that the Veterans' Administration plans to give you some suggestions in that respect prior to your Subcommittee's next meeting. I believe that finding an alternative transfer source would be far preferable to shifting monies intended to meet Vietnam veterans' needs to programs not directly related to their needs.

I am, as always, ready to work with your Subcommittee as appropriate and greatly appreciate your consideration of my views on these issues.

With warm regards,
Cordially,

ALAN CRANSTON,
Ranking Minority Member.

TUBERCULOSIS CONTROL

● Mr. HAWKINS. Mr. President, I had intended to offer an amendment to the Supplemental Appropriations bill to appropriate \$9 million for tuberculosis control programs. In fact, I first introduced this amendment last year in anticipation of the Labor, HHS, and Education Appropriations bill being considered by the Senate. The appropriations for programs under these departments were funded under a year-long continuing resolution that did not provide for funding under either the old 314(d) block grant or the new categorical tuberculosis control grant program. Therefore, for over a year no Federal support has been earmarked for controlling the spread of tuberculosis.

I believe wholeheartedly in providing adequate funding for tuberculosis control. I am still very much committed to assisting the States and local governments in combating this serious health threat. The action of the Senate Appropriations Committee is indeed encouraging. They hope to provide \$1 million in supplemental appropriations for the chronic disease program of the Center for Disease Control. I want to thank Senator SCHMITT, the chairman of the Subcommittee on Labor, HHS, and Education Appropriations, for accepting the House provision that earmarks \$1 million for tuberculosis control. Senator SCHMITT has been patient in listening to my concerns over cuts that jeopardize a vital health program. I appreciated his courtesy in inviting me to submit testimony during the February 3 hearing on supplemental appropriations.

While I prefer that the full \$9 million authorized for tuberculosis in fiscal year 1982 be appropriated, I can understand and agree with the concern of limiting funds for tuberculosis control to \$1 million in this particular bill, since in fact, only 1 month remains in this fiscal year. I am concerned, however, that withholding my amendment does not affect the appropriations for this program in fiscal year 1983.

Can the Senator from New Mexico assure me that this program is of such vital importance that he will give every attention to this health program during the subcommittee's consideration of appropriation levels for the next fiscal year?

Mr. SCHMITT. You can be assured that the problem of controlling the spread of tuberculosis is one which will receive every consideration when the subcommittee establishes its spending priorities for health programs for fiscal year 1983.

Ms. HAWKINS. With that assurance, I will not offer my amendment for supplemental funding for tuberculosis control programs. I do hope that the funding signals a growing awareness in Congress of the need for Federal support for tuberculosis control. It is my hope that Congress will appropriate the full authorized level for tuberculosis control for fiscal year 1983.

The Senate Labor and Human Resources Committee, of which I am a member, considered the need for increased funding during last year's omnibus reconciliation bill. We received disturbing testimony about the increase in the number of tuberculosis cases in 20 States and the discovery of a drug-resistant strain of tuberculosis. These findings prompted Congress to authorize \$9 million in fiscal year 1982 and \$10 million in fiscal year 1983 for project grants for tuberculosis control. Unfortunately, despite this action by the authorization committees, no funds were appropriated for the program. I agree with the need to make additional budget cuts through the appropriations process. I feel, however, that total elimination of funding for this preventive health program is shortsighted and will cost us dearly in the future.

Tuberculosis is a dread and vicious threat to the health of this country. Active prevention is our best defense against tuberculosis—and other health threats too. Since the victims of tuberculosis frequently are Medicaid and Medicare patients, the Federal Government, frankly, can pay now, or will have to pay later. Attacking tuberculosis right away through prevention therefore can save thousands from needlessly acquiring tuberculosis and it also makes good sense from an economic viewpoint. Briefly, prevention is cheaper than the cure.

The committee decision to eliminate funding for tuberculosis control was clearly based on a decision to not fund any new programs. This is not a new program, though. It is merely a shift in funds. From 1959 to 1970 the Federal Government initiated a program of special project grants through the Center for Disease Control's tuberculosis control program. In the 1970's funds for controlling tuberculosis were transferred to a block grant to be distributed by the States through the 314(d) block grant. That program expired in October 1981. The need, however, for Federal funding for tuberculosis has not expired.

Tuberculosis is not a disease of the past. The problem is not under control. Federal health officials have determined that tuberculosis is still a serious health problem, particularly among children. The Public Health Service reported that last year, for the first time in 18 years, the number of new cases of tuberculosis in the United States exceeded those in the preceding year. The Center for Disease Control reported that the number of tuberculosis cases increased in 30 States, and the District of Columbia last year indicated that the steady 35-year decline in reported TB cases may have reversed.

An alarming increase in the incidence of tuberculosis among children was reported in 1979. A total of 1,620 new cases of tuberculosis was reported among children, 900 of which were in children under 5 years of age. That is an increase of 18 percent over the preceding year and the highest increase for this age group since 1975. Tuberculosis in children is especially dangerous because of the risk of meningitis. The national health planning goals of the Public Health Service states:

Tuberculosis is a serious disease of children because of the potential complications of meningitis, which may lead to severe brain damage and death. Because of its severity, special efforts should be made toward eliminating tuberculosis among children.

Twenty-two children died in 1979 from this preventable and curable disease. This increase in the number of tuberculosis cases among children proves that this infectious disease is currently being transmitted and is not under control.

Twenty thousand people have active cases of tuberculosis. More than 15 million Americans are infected with dormant forms of this disease. Decreased immunity, caused by old age, illness, or improper nutrition, is often responsible for activating dormant infections. Because the symptoms of TB, bad cough, weight loss, fever, and malaise are often ignored by those affected, the virulent spread of this highly infectious disease continues.

The American Lung Association and the American Thoracic Society have

testified that a minimum of \$15 million per year in project grants is needed to treat and prevent the spread of tuberculosis. After considering the merits and financial needs of this program, Congress agreed to create a new categorical grant program within the Center for Disease Control. This new funding mechanism will assist us in eradicating this infectious disease by concentrating funding on the most troubled areas. Insufficient funds to combat tuberculosis will severely cripple efforts to combat the disease. De-emphasizing tuberculosis control will have dreadful consequences.

Now essentially all preventive treatment is conducted by public tuberculosis control programs. Presently, about 25,000 persons per year complete a course of preventive treatment, thereby preventing an estimated 2,500 cases of tuberculosis over the next 20 to 40 years. Hence, without tuberculosis control, preventive treatment would virtually cease at savings of \$4.7 million per year.

Nearly all contact investigation is conducted by public tuberculosis control programs. Contact investigation uncovers nearly 2,000 early cases of tuberculosis. If failure to identify these cases early produces two additional weeks of hospitalization per case, it would cost an additional \$2.8 million per year. Hence, without tuberculosis control, contact investigation would virtually cease.

Rapid progress in the control of tuberculosis promises even more savings. There would be a continued decline in the number of cases, a reduction in the number of treatment failures and relapses, and no need for short-course chemotherapy regimens all of which would result in savings of over \$10 million per year.

The elimination of tuberculosis control programs poses grave problems for the care of Indochinese, Cuban, and Haitian refugees with tuberculosis—nearly all of whom are treated by the public tuberculosis programs.

The precise effect of public programs on the annual tuberculosis case rate cannot be predicted. If the annual rate of decrease changed from 5 percent to 2.5 percent then the increased cost would be about \$4.1 million in the first year, rising to \$17.8 million in the fifth year.

A report prepared by the Subcommittee on Health and Environment of the House Energy and Commerce Committee stated, "Large numbers of infectious persons are not being effectively treated, and transmissions continue to occur." While we have developed drugs that can effectively treat tuberculosis, the medication must be taken for at least 9 months and sometimes for as long as 2 years. Many of the patients stop taking medication as soon as the symptoms disappear, how-

ever. Therefore, the TB bacteria develops a resistance to antibiotics. The Health Subcommittee report attributed part of the problem in treating this disease to the low priority given to tuberculosis. The local health departments are faced with a problem of not only locating patients with tuberculosis and treating them, but following and supervising patients for long periods of time to insure that they take their medication. They are also faced with the additional burden of finding and evaluating contacts of infected persons to prevent transmission of the disease.

Tremendous progress was made during the 1960's in treating and preventing the spread of tuberculosis. The progress made then was not continued between 1970 and 1980, however. According to "Tuberculosis in the United States: 1978," the percentage of those patients on drug treatment who had followup bacteriologic examinations for tuberculosis actually declined, showing retrogression in the treatment of tuberculosis.

Much of the decrease in combating tuberculosis can be attributed to a shift in the funding mechanism for tuberculosis programs. In fact, funding for tuberculosis control programs suffered during the 314(d) block grant. The impact of this transfer was felt the most by those States with the greatest incidence of tuberculosis. The reason was that categorical grants had been based on need, and the 314(d) block grant moneys were based on an income/population formula. For example, in 1980, the Florida Department of Health and Rehabilitative Services estimated that they would need \$2,133,000 for tuberculosis funding, but they only received \$365,000 from the 314(d) block grant. There was great concern over the ability of the block-grant funding properly to fund tuberculosis control programs. Congress was prompted to establish a categorical grant program for tuberculosis instead of including it in the preventive health block grant.

Tuberculosis, once a leading cause of death in the United States, continues to take a heavy toll in death and disability despite our efforts for prevention and control. I hope that the inclusion of \$1 million for tuberculosis control in the supplemental appropriations bill this year signals an awareness of the necessity to combat this highly infectious and dangerous disease. ●

LABOR-HHS-EDUCATION CHAPTER OF REGULAR SUPPLEMENTAL

● Mr. SCHMITT. I am glad to recommend adoption of the Labor-HHS-Education chapter of the supplemental.

Our proposals take account of long-standing concerns in health, education, and other programs. I believe we have been as generous as possible but still prudent.

While our bill is \$143.6 million above the budget requests, it is \$96 million below the House levels. Indeed, were we not to count the funds for the older workers program because they have no outlay impact in this fiscal year, we would be some \$67 million below the President.

Let me give you a few highlights from our committee recommendations. We provide the following:

Sum of \$211 million for the older workers program to put it back on a forward-funded basis.

Sum of \$1.5 million to deal with tuberculosis and an acquired disease of the immune system, which has reached epidemic proportions.

Sum of \$10 million for alcohol, drug abuse, and mental health research. The additional funds will support about 100 new grants in all three research areas.

Bill language to modify the staffing requirements for health systems agencies under health planning. Under this provision the minimum staff an HSA must have on board would be three instead of five. This goes along with the reduced workload and reduced funding provided HSA's under the Omnibus Reconciliation Act.

Sum of \$112 million for Medicaid. The Department of HHS substantially revised downward its estimate of supplemental needs. Also the Department's request for millions to pay retroactive claims is premature until it is decided whether to pay any of these claims.

We have also provided an additional \$148 million for compensatory education for the disadvantaged, to protect States and counties from a sudden loss of funds resulting from the unresolved outcome of the controversy over whether the 1970 census or the 1980 census data base should be used in allocating these funds for the 1982-83 school year.

Sum of \$26.5 million for several categorical programs under education of the handicapped.

Sum of \$140 million to increase funding for Pell grants and \$29 million to increase funds for supplemental education opportunity grants to \$307 million.

Sum of \$5 million for developing institutions with bill language to put emphasis on assisting Hispanic and other Native Americans.

Sum of \$11 million for 2 months of windfall funding for railroad retirement beneficiaries.

The full details of our proposals are laid out in the committee report, and I commend the report to your attention.

Mr. President, I believe we have developed a generous but realistic series of recommendations and I urge that chapter IX be adopted as reported to the Senate. ●

SUPPLEMENTAL FUNDS FOR DEVELOPING INSTITUTIONS

● Mr. CHILES. Mr. President, I would like to have a short colloquy with Senator SCHMITT, the distinguished chairman of our Subcommittee on Labor, HHS, and Education. I want to start out by complimenting Senator SCHMITT for adding the \$5.2 million for developing institutions of higher education, and for bringing attention to the problem of serving large numbers of Hispanic students. This is certainly a problem we are familiar with in Florida. I have been a strong supporter of the title III program, and intend to continue supporting its efforts to assist historically black colleges and universities. This assistance has been vital to many Florida colleges, such as Miami-Dade Community College, Florida A. & M., and Edward Waters.

But we do have a growing need to meet the special education needs of colleges which are serving the rapidly growing Hispanic population. In Florida, we get our increases of Hispanic students in huge waves, and everybody has to scramble to meet new needs. I am thinking of small colleges like Biscayne College in Miami, which now has 75 percent of its student body Hispanics, most of them low income.

I would like to clarify with the distinguished subcommittee chairman how this program will operate.

First, am I correct that this is going to be a new appropriation for this special need, and will not take funds away from the predominantly black colleges which are currently receiving funds?

Mr. SCHMITT. The Senator is correct.

Mr. CHILES. I thank the chairman for his response. Am I also correct that this is going to be an entirely new competition, and rankings and scores from previous applications will not be applied?

Mr. SCHMITT. The Senator from Florida is correct. This will be an entirely new competition, and we expect the Department to publish new guidelines telling the schools how to apply. Moreover, we have directed the Department to provide technical assistance, particularly to small schools, to help them understand the guidelines and make their way through the application process.

Mr. CHILES. I thank the chairman for his assurances. Once again, I congratulate him on bringing this growing need before the Congress. The only way we can keep support for our Federal education programs is to keep them growing and changing to meet new national needs as they arise. ●

● Mr. BRADLEY. The committee report states that the payment of any transition funding to any agency will be made specifically dependent upon the agency having met its obligation

for continuation payments to Conrail under the various contractual operations with respect to 1982 or having escrowed funds or otherwise assured that those payments will be made in 1983. I seek clarification from the chairman on whether costs that are in dispute among transit authorities, Conrail, and Amtrak are viewed differently than the basic payments made by those authorities. Specifically, I am concerned that local transit authorities would be required to pay additional sums of money for use of the corridor prior to the settlement of cost disputes among the transit authorities, Conrail, and Amtrak.

Is it my understanding, Mr. Chairman, that valid disputes such as the dispute regarding the sharing of propulsion costs on the corridor, which is currently before the ICC for resolution, are not included in the committee's definition of having met its obligations for continuation payment?

Mr. ANDREWS. I appreciate the concern of the Senator from New Jersey. It is not the intent of the committee to become involved in any cost-sharing dispute among the agencies that operate on the Northeast corridor. Valid disputes among the agencies should be resolved by the ICC, or other appropriate authorities which can make the legal determination of the issues.

Mr. BRADLEY. Mr. Chairman, am I correct in assuming that no transit authority transition assistance will be withheld because of valid cost disputes which are to be resolved by the ICC or are dependent upon the interpretation of existing laws?

Mr. ANDREWS. The Senator from New Jersey is correct; his interpretation of the Senate Appropriation Committee's report language is the intent of the committee.

Mr. BRADLEY. I thank the chairman for the clarification. I fully support the intent of the committee in insuring that all continuation payments owed to Conrail are promptly paid. At the same time, however, I do not want to see transit authorities forced into making payments that exceed those amounts due to Conrail based on existing law.

CHAPTER VII OF H.R. 6863—FISCAL YEAR 1982
SUPPLEMENTAL APPROPRIATIONS

● Mr. GARN. Mr. President, on Tuesday, August 3, 1982, the full Appropriations Committee accepted my recommendations regarding the HUD-Independent Agencies chapter of H.R. 6863. I would like to highlight the items contained in this chapter of the bill.

DEPARTMENT OF HOUSING AND URBAN
DEVELOPMENT

HOUSING PROGRAMS: ANNUAL CONTRIBUTIONS
FOR ASSISTED HOUSING

Mr. President, on April 15, the Secretary of HUD announced that the administration would support the com-

pletion of approximately 70,000 housing units in the pipeline by requesting the use of \$3,700,000,000 for financing adjustment and \$2,650,000,000 for cost amendments. The administration's plan assumed the availability of approximately \$7,400,000,000 in recaptured authority.

When Public Law 97-216 was enacted, the Congress assumed that only \$5,000,000,000 of recaptures would be available to fund the planned buyout of the pipeline and, consequently, reduced the amount rescinded. Due to the uncertainties associated with the recapture estimates, the Congress included language which provided that an additional \$1,750,000,000 of fiscal year 1982 funds could be merged with recaptures to assure sufficient resources if necessary or otherwise it would be deferred for use in fiscal year 1983.

It now appears that OMB will not release this \$1,750,000,000 even though recaptures to date are only approximately \$2,400,000,000. The availability of the additional \$1,750,000,000 would assist approximately 34,000 housing units. Therefore, the committee included bill language which will have the effect of reducing the amount of recaptures necessary to fund the program by eliminating OMB's proposed deferral of the \$1,750,000,000.

LIMITATIONS ON GUARANTEED LOANS

The administration proposed reducing the 1982 limitations on Government National Mortgage Association mortgage-backed securities program and the section 108 community development loan guarantee program. The mortgage-backed securities limitation was to be reduced from \$68,250,000,000 to \$48,000,000,000 and the section 108 program was to be reduced from \$225,000,000 to \$125,000,000. Mr. President, the committee has not recommended that the limitations be reduced at this time.

FEDERAL EMERGENCY MANAGEMENT AGENCY:
SALARIES AND EXPENSES

Mr. President, the Federal Emergency Management Agency (FEMA) is responsible for helping to plan and evaluate the adequacy of State and local radiological emergency plans. The Agency requested an additional \$1,000,000 in order to plan, review and exercise evaluations related to commercial nuclear powerplants and to hire and train the 30 additional staff FTE—that would be used to test and evaluate the radiological emergency plans at the various nuclear facilities across the country.

The committee denied the request because we do not believe there is sufficient time remaining in the fiscal year for FEMA to utilize these funds.

STATE AND LOCAL ASSISTANCE

FEMA, in conjunction with the funds requested in the salaries and expenses account, requested an addition-

al \$1,408,000 for radiological emergency preparedness. The Agency intended these funds be used to initiate a program to review State and local governments' emergency warning systems, including acoustical tests, specification review, and expanded citizen awareness of radiological emergency preparedness plans.

Mr. President, as I indicated in the previous section, the committee denied the request because we do not believe that FEMA has sufficient time to utilize these additional funds before the end of the fiscal year.

NATIONAL FLOOD INSURANCE FUND

The committee included bill language which permits FEMA to use funds from the flood insurance fund to pay for the salaries and expenses of staff involved in flood insurance activities. The use of flood insurance funds for salaries and expenses is consistent with the congressional intent of putting the flood insurance fund on a more actuarially sound basis. Mr. President, I might point out that rates for flood insurance will not be increased as a result of use of funds from the program for salaries and expenses. In addition, FEMA does not receive authority to use funds from the flood insurance program for salaries and expenses, the Agency will be forced to furlough employees.

SELECTIVE SERVICE: SALARIES AND EXPENSES

Mr. President, of the \$1,367,000 requested by the Selective Service System, \$400,000 was requested for a public information program; \$153,000 to reimburse the U.S. Postal Service for registration costs; \$400,000 for printing and postage costs; \$42,000 for personnel to enter data on the expanding data base; \$48,000 for bulletproof glass; and \$304,000 for the development of automated data processing claims and alternative service systems.

The committee did not approve the \$400,000 for the public service program. Recent registration experience indicates that such a campaign is not warranted at this time. However, the committee recommended providing the \$304,000 for data processing systems development. These systems form the backbone of the Selective Service System program and should be made operational as soon as possible. These systems will support registration, induction, claims/appeals and the assignment of conscientious objectors to civilian jobs. Furthermore, the committee received information that the Selective Service can absorb the other items contained in their supplemental request. The committee did not provide funding for these activities.

Finally, the committee has recognized that some alternative service workers—ASW—will raise objections to their job assignments. Current draft Selective Service procedures do

not provide for an appeals process. In order to assure that a procedure exists to address these concerns, the committee believes that the Director of the Selective Service should include in the final alternative service program regulations a provision establishing civilian review boards for the purpose of reviewing ASW work assignments which ASW's view as unacceptable. The committee, therefore, included bill language which would require Selective Service to establish, in the event of a mobilization, civilian review boards. Therefore, the committee expects that such boards would be comprised of individuals selected by the Director to represent a broad spectrum of the civilian population—similar to local draft boards.

VETERANS' ADMINISTRATION: MEDICAL AND PROSTHETIC RESEARCH

Mr. President, the committee was recently informed that the VA would require a reprogramming in the medical care account and the medical administration and miscellaneous operating expenses—MAMOE—in order to accommodate research efforts and mandate studies—Public Law 96-151—on agent orange. The committee believed that such medical R. & D. should be managed within the VA's medical and prosthetic research account and has, therefore, included bill language transferring the required funds to this account.

This transfer would provide funds to assist in carrying out the Veterans' Administration agent orange program to support: First, the pilot phase of the epidemiology study, \$3,020,000; second, the Vietnam veteran twin study, a study of identical twin veterans where one twin served in Vietnam during the period of herbicide orange spraying and the twin sibling did not serve in Southeast Asia, \$65,000; and third, the mortality study, \$1,113,000, a study comparing the rates and causes of death in veterans who served in Vietnam to those veterans who did not serve in the Republic of Vietnam.

In addition, the VA proposed that the first and second study above be funded within the medical care account and the third study through MAMOE. Because the bill transferred the entire \$4,198,000 from the medical care account, the MAMOE account will have an excess of \$1,113,000, which more than offsets the VA's pay supplemental request of \$1,078,000 for MAMOE. The committee, therefore, did not provide the pay supplemental appropriations for MAMOE in title II of the bill.

MEDICAL ADMINISTRATION AND MISCELLANEOUS OPERATING EXPENSES

The committee transferred \$8,000,000 to the medical administration and miscellaneous operating expenses appropriation from the medical care appropriation for the nurse scholarship program. This amount, togeth-

er with \$4,000,000 provided in the 1982 HUD-Independent Agencies Appropriation Act, will permit the VA to operate the nurse scholarship program at a \$6,000,000 level in both fiscal years 1982 and 1983. To carry out this recommendation it is necessary to provide that the funds will remain available until September 1983. Because both the House and Senate committees consider the nurse scholarship program a high priority, it is appropriate that unutilized medical care funds be transferred to that activity rather than lapse.

GRANTS TO THE REPUBLIC OF THE PHILIPPINES

On June 30, 1982, the administration proposed a 1982 appropriation of \$500,000 for grants to the Republic of the Philippines to be derived from transfer from medical care. The committee included the requested bill language. The funds are to assure the continued effective care and treatment of U.S. veterans at the Veterans Memorial Medical Center at Manila.

ADMINISTRATION PROVISION

Mr. President, section 501(4) of title V of the 1982 Department of Housing and Urban Development-Independent Agencies Appropriation Act placed a limitation of \$34,000,000 on the total amount of funds available for the Department of Housing and Urban Development's data processing services. Since this time, the Department indicated a need for additional data processing funds. The House passed version of H.R. 6863 contains language increasing the limitation on the Department of Housing and Urban Development's data processing services from \$34,000,000 to \$35,500,000. The committee believed that this modification in the limitation was sufficient to provide for high-priority data processing requirements and was, therefore, recommended retaining the House language. The committee also retained the House language restricting the Department of Housing and Urban Development from implementing its May 11, 1982, rules concerning the section 202 housing program.

INCREASED PAY COSTS

The committee recommended \$257,060,000 in new budget authority for pay costs for agencies under the jurisdiction of the HUD-Independent Agencies Subcommittee.

The committee recommended that a change in FEMA's proposed funding of its increased pay cost requirements. The committee approved the full request but directed that \$1,000,000 be transferred from radiological defense, as proposed by FEMA, and the remaining \$1,084,000 be transferred from the civil defense program, other than State and local assistance.

In addition, the Veterans' Administration proposed transferring \$50,000,000 from the compensation and pensions appropriation to the

medical care appropriation. The committee agreed with the House that entitlement funds should not be transferred to offset supplemental pay requirements and, therefore, provide a direct appropriation of \$50,000,000.

The committee also included an additional \$48,950,000 for the National Aeronautics and Space Administration. This amount is provided to offset the transfer of up to \$50,000,000 authorized to meet certain minimums carried in Public Law 97-216. In this regard, the committee added a proviso to the House-passed version of H.R. 6863 making the \$50,000,000 available for obligation until September 30, 1983. Finally, Mr. President, as previously explained, the only change which the committee made to the House allowance for increased pay costs consists of a reduction of \$1,078,000 in the VA's medical administration and miscellaneous operating expenses.

Mr. HAYAKAWA. Mr. President, our great Nation has been termed a melting pot and so it is. We open our doors to people from around the world, not the least of which are refugees of whom a great many settle in my home State of California. We as Americans have accepted the responsibility of helping these refugees establish themselves in our society and we must live up to all it entails. In this regard, I have some concerns and questions I would like to address.

It is my understanding that in the past the Committee has supported full funding for the cost of the refugee program. I commend the committee for recognizing and following through on this humanitarian initiative. However, I am concerned for the future should full appropriations not be approved for the program. These are times when fiscal restraint and responsibility have to be taken seriously, but the Federal Government is not alone. The State and local governments are experiencing a need to cut back on expenditures in various programs as well. And we in Congress need to do all we can to see that our obligations and responsibilities to all the people of this Nation are met. Does the committee expect to continue their policy of fully funding the refugee program?

Mr. SCHMITT. I appreciate the Senator's recognition of the Committee's past support and certainly understand his concerns. As he has expressed, these are difficult times and the future is uncertain. The committee will remain committed to its responsibilities to refugees and will do what we can to help them establish their lives in our great country.

Mr. HAYAKAWA. In considering the many difficult decisions regarding budget cutbacks especially within social services, I can imagine a situa-

tion wherein Congress may not appropriate adequately for the refugee program. Should this occur, will the legitimate claims made by State and local governments be funded as they were in the past? Since significant deficit burdens rest upon the State and local governments in cases of inadequate Federal appropriation, we as representatives have a responsibility to guarantee relief of monetary difficulty. Can this Senator have any assurance that legitimate claims for full funding will be considered?

Mr. SCHMITT. The committee recognizes the serious burden that may be inflicted upon the State and local governments and will carefully evaluate all legitimate claims.

Mr. HAYAKAWA. The Department of Health and Human Services (HHS) receives quarterly reports of refugee program expenditures from States which assist in the assessment of revenue distribution. Careful analysis of these statistics can be quite valuable to our task. The House of Representatives has passed language which requires HHS to do an evaluation of projected fiscal year 1982 State costs by August 15, 1982, based on third-quarter data from the States. I would encourage the committee to seriously consider this request and support the requirement for such a report.

Mr. SCHMITT. The request shall be given serious consideration. ●

FUNDING FOR THE GULF OF MAINE CASE

● Mr. COHEN. Mr. President, I rise to draw the Senate's attention to a small but extremely significant item in the supplemental appropriations bill now before us. Included within this bill is the funding for the presentation of the United States case before the international tribunal that will decide our dispute with Canada over the maritime boundary in the Gulf of Maine.

Last year, the Senate ratified a treaty with Canada to place our longstanding disagreement over the international boundary in the Gulf of Maine before a Chamber of the International Court of Justice. The treaty provides that the decision of the Court will be final and will bind both countries in perpetuity.

Pursuant to the treaty, the United States and Canada have begun preparing their cases. Accordingly, the State Department has advised the Congress that it requires \$1,600,000 for the research, analysis, and other work that is necessary to the preparation of its case. The Senate Appropriations Committee has agreed with this figure and included it in the bill before us today. I would like to take just a moment to impress upon my colleagues the importance of the issues at stake in the Gulf of Maine dispute.

To begin with, the area in question covers more than 12,000 square miles and the ocean column as well. Included in this area are mineral resources

of undetermined value and a fishery in the Georges Bank that is considered the richest in the northwest Atlantic Ocean. Every coastal state in New England and many of the mid-Atlantic States are the homes to fishermen, fish processors, fish marketers and so forth who find their livelihood in the remarkable living resources of this region.

Both the United States and Canada will find few precedents to guide the legal arguments that they will present to the International Court of Justice. Only three boundary disputes have been decided in recent years and none of these concerned the exact geographical configuration that exists in the Gulf of Maine. Consequently, Canada and the United States will have to anticipate a host of issues, many of them novel, which could determine the outcome of the case. In addition, submissions to the International Court of Justice will have to include elaborate and detailed charts of the ocean floor and each country's coastlines, such items are expensive in the extreme.

Mr. WEICKER. I agree with Senator COHEN that the Gulf of Maine case is of great importance to New England and particularly to its fishing industry. An unfavorable decision could result in the loss of as much as one-half of the Georges Bank to Canadian jurisdiction. The Georges Bank has, from the beginning of our Nation's history, been viewed as a rich and valuable resource. The preservation of our rights, which have been exercised in this area, is important to the continued revival of fishing in New England.

I believe that the United States owes its citizens in New England the highest quality presentation of its case. The amount requested by the State Department should enable this country to fulfill that obligation.

Mr. COHEN. Mr. President, I thank my colleague from Connecticut for his keen appreciation of the importance of the Gulf of Maine case. I would note that the amount slated for this case in the Senate supplemental appropriations bill, which is in accord with the State Department's recommendation, is higher than that contained in the House supplemental appropriations bill. Under the House recommendation, the United States would present its case with only \$1,000,000, a figure that would place us at only slightly more than 40 percent of the Canadian funding level of \$2.4 million in U.S. currency.

Again, I thank Senator WEICKER for his understanding of this matter and urge my Senate colleagues to seek House concurrence in this matter when it arises in conference. ●

● Mr. WEICKER. Mr. President, for the agencies funded under chapter II of this bill, the administration has re-

quested \$171,294,000 in appropriations, of which \$40,000,000 was proposed by transfer from an account under the jurisdiction of the Foreign Operations Subcommittee. The committee recommends an appropriation of \$151,086,000 in new budget authority and \$12,550,000 by transfer to meet these program needs. In addition, the committee recommends the rescission of \$2,000,000 in foreign currency gain which is excess to the fiscal year 1982 program requirements of the Board for International Broadcasting. Thus, the committee's recommendation for program supplementals is \$7,658,000 less than the budget request.

In title II, the committee recommends \$133,733,000 in new budget authority to meet agency pay requirements. The amount recommended is \$114,000 more than the administration's request and is \$5,945,000 less than the House allowance. The highlights of the committee's recommendation follow.

HIGHLIGHTS OF RECOMMENDATION

For the Department of Commerce, the recommendation provides a total of \$15,663,000 in new budget authority and \$5,750,000 in transfers funding the following programs: \$10,000,000 for U.S. participation in the Louisiana World Exposition in 1984; \$2,500,000 for the "Patent and Trademark Office" for the hire of new patent examiners; \$7,163,000 for mandatory expenses incurred by NOAA, of which \$5,000,000 is to be provided by transfer from unobligated balances in the coastal energy impact fund; and \$3,000,000 funding the first year of New York's coastal zone management program. The recommendation of \$73,046,000 in new budget authority for the Department of Justice provides the full program requested for the Department's legal activities, U.S. attorneys and marshals, support of U.S. prisoners, fees and expenses of witnesses, the FBI, and the DEA. The reduction in appropriation for the U.S. attorneys and marshals reflects the time which has lapsed in fiscal year 1982 since the budget request was prepared. The following program changes are also included in the committee recommendation: \$750,000 is provided for the FBI to hire fingerprint identification clerks and language is included in the bill to allow the FBI to charge noncriminal justice agencies for this service. A similar provision was adopted by the Senate last year.

The recommendation provides \$4,000,000 more than the amount requested by the Bureau of the Prisons. Rather than provide for two detention facilities for INS, the recommendation provides \$17,000,000 for construction of one detention facility and \$22,000,000 for the construction of one new prison for prisoners in the west, completing a project initially approved

in 1981. Given the 16-percent increase in Federal prisoners, the committee believes this is a higher priority. The revised recommendation also includes \$1,250,000 requested for the activation of a minimum security camp in Mount Laguna, Calif., and relieves overcrowding in Federal prisons.

The recommendation also includes \$900,000 from LEAA reversionary funds which is earmarked for a Bureau of Justice statistics crime victimization study of the Metropolitan Washington Area, including the area immediately around the Capitol and will include a survey of employees of the Congress.

Provided for supplemental program is \$60,587,000 requirements of the Department of State. This request includes \$40,000,000 for additional security requirements in posts primarily in Western Europe. Because a fiscal year 1982 authorization bill for the Department of State has not yet been enacted, the bill waives relevant sections of law to permit the Department to expend appropriated funds in the absence of an authorization. Although the conference report on the authorization bill has passed the Senate, there remains some uncertainty about its passage in the House. I have consulted with the Foreign Relations Committee and, we believe that prudence warrants its retention.

Significant changes in the request for the related agencies include:

Rejection of one-half the proposed deferral from SBA business loan and investment fund and the rejection of the entire deferral for surety bond guarantee funds.

No funds are recommended for Radio Broadcasting to Cuba, Inc. As of this date, an authorization bill has yet to be reported to the Senate.

A rescission of \$2,000,000 from the Board for International Broadcasting is recommended. These funds are in excess to the planned fiscal year 1982 program for Radio Free Europe and Radio Liberty as they represent the value of foreign currency gains earned since the beginning of the year.●

THE WAHPETON INDIAN SCHOOL APPROPRIATIONS

● Mr. BURDICK. Mr. President, during committee consideration of this bill, the manager's of the bill may recall a discussion about the future operation of the Wahpeton Indian School. Senator ANDREWS and myself took exception to proposed report language which would have restricted future enrollment at the school by not allowing any new students to enroll during the coming school year. The managers will recall that the committee voted overwhelmingly to accept our amendment to delete the language and to adopt the policy that a new class of students shall be admitted to the school this fall. Since the committee report does not make any refer-

ence whatsoever to the Wahpeton School, the legislative history of this bill should reflect the committee's demonstrated concern that it remain open and operating at full enrollment levels until the House and Senate have had the opportunity to officially act on this issue in the context of the appropriations process.

Mr. ANDREWS. Mr. President, my colleague from North Dakota is correct in his concern that the legislative intent on this matter must be clear. It was my understanding also that the committee clearly intended the school to remain open at current enrollment levels until the Congress officially takes action on the fiscal year 1983 Interior budget. In addition to clarifying the committee's position, this explanation should also serve as a directive to the Bureau of Indian Affairs in their future deliberations on the school.

Mr. HATFIELD. I appreciate the concern of my two colleagues from North Dakota on this matter. I understand the BIA is under court order to operate the Wahpeton School until Congress takes action to close the school and no such action has yet been taken.●

ORDER TO CONVENE TOMORROW AT 9:30 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that the time of convening tomorrow be changed from 9 o'clock to 9:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR WEDNESDAY

Mr. BAKER. Mr. President, I ask unanimous consent that, on tomorrow only, the time allocated to the two leaders under the standing order be reduced to 3 minutes each; that after the execution of the general order time of the leaders, the Senator from Georgia (Mr. NUNN) be recognized under a special order not to exceed 5 minutes.

I further ask unanimous consent that any time remaining after the disposition of the leadership time and the special order time be devoted to the transaction of routine morning business, in which Senators may speak for not more than 2 minutes each; that such time for the transaction of routine morning business extend to not later than 10 a.m.; and that, at 10 a.m. tomorrow, the Senate resume consideration of the pending business.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, we shall be back on this bill at 10 a.m. Senators should be on notice that there is no more time on the Symms amendment, so there will be a record vote tomorrow at 10 a.m.

I yield the floor.

ROUTINE MORNING BUSINESS

Mr. TOWER. Mr. President, I ask unanimous consent that the Senate turn to a period for the transaction of routine morning business not to extend beyond 5 minutes and that statements made by Senators therein not extend beyond 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISAPPROVAL OF CERTAIN REGULATIONS WITH RESPECT TO EDUCATION CONSOLIDATION AND IMPROVEMENT ACT OF 1981

Mr. TOWER. Mr. President, I ask unanimous consent that the Senate turn to consideration of House Concurrent Resolution 388, a resolution disapproving the final regulations for the Education Consolidation and Improvement Act.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the resolution by title.

The legislative clerk read as follows:

A House Concurrent Resolution (H. Con. Res. 388) disapproving certain regulations submitted to the Congress on July 29, 1982, with respect to the Education Consolidation and Improvement Act of 1981.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 388) was agreed to.

ORDER FOR STAR PRINT— REPORT ON S. 1468

Mr. TOWER. Mr. President, the committee report on the bill S. 1468, Report No. 97-508, contains a printing error in one of the dollar figures. Therefore, I ask unanimous consent that the report be star printed to show the correct figure. I send a corrected version to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTION OF SECRECY

Mr. TOWER. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the Tax Convention with the Republic of Austria, Treaty Document 97-26, transmitted to the Senate today by the President of the United States; and ask that the treaty be considered as having been read the first time; that it be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's message be printed in the Record.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

I transmit herewith, for Senate advice and consent to ratification, the Convention between the United States of America and the Republic of Austria for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Estates, Inheritances, Gifts, and Generation-skipping Transfers, signed at Vienna on June 21, 1982.

The Convention is the first of its kind to be negotiated between the United States and Austria. It will apply, in the United States, to the Federal estate tax, the Federal gift tax and the Federal tax on generation-skipping transfers and, in Austria, to the inheritance and gift tax.

A principal feature of the Convention is that the country of the transferor's domicile may tax transfers of estates and gifts and generation-skipping transfers on a worldwide basis, provided that it relieves the tax on specified types of property taxable on a situs basis.

I recommend that the Senate give early and favorable consideration to the Convention and give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, August 10, 1982.

ORDER OF BUSINESS TOMORROW

Mr. TOWER. Mr. President, to repeat the words of the majority leader, a rollcall vote is expected as early as 10 a.m. tomorrow morning on the pending Symms amendment. I think the Senate should be advised of that.

STATE JUSTICE INSTITUTE ACT OF 1981

Mr. TOWER. Mr. President, I ask the Chair to lay before the Senate, Calendar Order 248, S. 537.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 537) to aid State and local governments in strengthening and improving their judicial systems through the creation of a State Justice Institute.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with amendments, as follows:

On page 26, line 17, strike "1982," and insert "1983,".

On page 26, line 18, strike "1983," and insert "1984,"; and

On page 26, line 19, strike "1984," and insert "1985,".

So as to make the bill read:

S. 537

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "State Justice Institute Act of 1981".

DEFINITIONS

Sec. 2. As used in this Act, the term—

(1) "Institute" means the State Justice Institute;

(2) "Board" means the Board of Directors of the Institute;

(3) "Director" means the Executive Director of the Institute;

(4) "Governor" means the Chief Executive Officer of a State;

(5) "recipient" means any grantee, contractor, or recipient of financial assistance under this Act;

(6) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States; and

(7) "Supreme Court" means the highest appellate court within a State unless, for the purposes of this Act, a constitutionally or legislatively established judicial council acts in place of that court.

ESTABLISHMENT OF INSTITUTE; DUTIES

Sec. 3. (a) There is established a private nonprofit corporation which shall be known as the State Justice Institute. The purpose of the Institute shall be to further the development and adoption of improved judicial administration in State courts in the United States. The Institute may be incorporated in the District of Columbia or in any other State. To the extent consistent with the provisions of this Act, the Institute shall exercise the powers conferred upon a nonprofit corporation by the laws of the State in which it is incorporated.

(b) The Institute shall—

(1) direct a national program of assistance designed to assure each person ready access to a fair and effective system of justice by providing funds to—

(A) State courts;

(B) national organizations which support and are supported by State courts; and

(C) any other nonprofit organization that will support and achieve the purposes of this Act;

(2) foster coordination and cooperation with the Federal judiciary in areas of mutual concern;

(3) make recommendations concerning the proper allocation of responsibility between the State and Federal court systems;

(4) promote recognition of the importance of the separation of powers doctrine to an independent judiciary; and

(5) encourage education for judges and support personnel of State court systems through national and State organizations, including universities.

(c) The Institute shall not duplicate functions adequately performed by existing nonprofit organizations and shall promote, on the part of agencies of State judicial administration, responsibility for success and effectiveness of State court improvement programs supported by Federal funding.

(d) The Institute shall maintain its principal offices in the State in which it is incorporated and shall maintain therein a designated agent to accept service of process for the Institute. Notice to or service upon the agent shall be deemed notice to or service upon the Institute.

(e) The Institute, and any program assisted by the Institute, shall be eligible to be treated as an organization described in section 170(c)(2)(B) of the Internal Revenue Code of 1954 and as an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 which is exempt from

taxation under section 501(a) of such Code. If such treatments are conferred in accordance with the provisions of such Code, the Institute, and programs assisted by the Institute, shall be subject to all provisions of such Code relevant to the conduct of organizations exempt from taxation.

(f) The Institute shall afford notice and reasonable opportunity for comment to interested parties prior to issuing rules, regulations, guidelines, and instructions under this Act, and it shall publish in the Federal Register, at least thirty days prior to their effective date, all rules, regulations, guidelines, and instructions.

BOARD OF DIRECTORS

Sec. 4. (a)(1) The Institute shall be supervised by a Board of Directors, consisting of eleven voting members to be appointed by the President, by and with the advice and consent of the Senate. The Board shall have both judicial and nonjudicial members, and shall, to the extent practicable, have a membership representing a variety of backgrounds and reflecting participation and interest in the administration of justice.

(2) The Board shall consist of—

(A) six judges, to be appointed in the manner provided in paragraph (3);

(B) one State court administrator, to be appointed in the manner provided in paragraph (3); and

(C) four public members, no more than two of whom shall be of the same political party, to be appointed in the manner provided in paragraph (4).

(3) The President shall appoint six judges and one State court administrator from a list of candidates submitted by the Conference of Chief Justices. The Conference of Chief Justices shall submit a list of at least fourteen individuals, including judges and State court administrators, whom the conference considers best qualified to serve on the Board. Prior to consulting with or submitting a list to the President, the Conference of Chief Justices shall obtain and consider the recommendations of all interested organizations and individuals concerned with the administration of justice and the objectives of this Act.

(4) In addition to those members appointed under paragraph (3), the President shall appoint four members from the public sector to serve on the Board.

(5) The President shall appoint the members under this subsection within sixty days from the date of enactment of this Act.

(6) The members of the Board of Directors shall be the incorporators of the Institute and shall determine the State in which the Institute is to be incorporated.

(b)(1) Except as provided in paragraph (2), the term of each voting member of the Board shall be three years. Each member of the Board shall continue to serve until the successor to such member has been appointed and qualified.

(2) Five of the members first appointed by the President shall serve for a term of two years. Any member appointed to serve for an unexpired term arising by virtue of the death, disability, retirement, or resignation of a member shall be appointed only for such unexpired term, but shall be eligible for reappointment.

(3) The term of initial members shall commence from the date of the first meeting of the Board, and the term of each member other than an initial member shall commence from the date of termination of the preceding term.

(c) No member shall be reappointed to more than two consecutive terms immediately following such member's initial term.

(d) Members of the Board shall serve without compensation, but shall be reimbursed for actual and necessary expenses incurred in the performance of their official duties.

(e) The members of the Board shall not, by reason of such membership, be considered officers or employees of the United States.

(f) Each member of the Board shall be entitled to one vote. A simple majority of the membership shall constitute a quorum for the conduct of business. The Board shall act upon the concurrence of a simple majority of the membership present and voting.

(g) The Board shall select from among the voting members of the Board a chairman, the first of whom shall serve for a term of three years. Thereafter, the Board shall annually elect a chairman from among its voting members.

(h) A member of the Board may be removed by a vote of seven members for malfeasance in office, persistent neglect of, or inability to discharge duties, or for any offense involving moral turpitude, but for no other cause.

(i) Regular meetings of the Board shall be held quarterly. Special meetings shall be held from time to time upon the call of the chairman, acting at his own discretion or pursuant to the petition of any seven members.

(j) All meetings of the Board, any executive committee of the Board, and any council established in connection with this Act, shall be open and subject to the requirements and provisions of section 552b of title 5, United States Code, relating to open meetings.

(k) In its direction and supervision of the activities of the Institute, the Board shall—

(1) establish such policies and develop such programs for the Institute as will further achievement of its purpose and performance of its functions;

(2) establish policy and funding priorities and issue rules, regulations, guidelines, and instructions pursuant to such priorities;

(3) appoint and fix the duties of the Executive Director of the Institute, who shall serve at the pleasure of the Board and shall be a nonvoting ex officio member of the Board;

(4) present to other Government departments, agencies, and instrumentalities whose programs or activities relate to the administration of justice in the State judiciaries of the United States, the recommendations of the Institute for the improvement of such programs or activities;

(5) consider and recommend to both public and private agencies aspects of the operation of the State courts of the United States considered worthy of special study; and

(6) award grants and enter into cooperative agreements or contracts pursuant to section 7(a).

OFFICERS AND EMPLOYEES

Sec. 5. (a)(1) The Director, subject to general policies established by the Board, shall supervise the activities of persons employed by the Institute and may appoint and remove such employees as he determines necessary to carry out the purposes of the Institute. The Director shall be responsible for the executive and administrative operations of the Institute, and shall perform such duties as are delegated to such Director by the Board and the Institute.

(2) No political test or political qualification shall be used in selecting, appointing, promoting, or taking any other personnel action with respect to any officer, agent, or employee of the Institute, or in selecting or monitoring any grantee, contractor, person, or entity receiving financial assistance under this Act.

(b) Officers and employees of the Institute shall be compensated at rates determined by the Board, but not in excess of the rate of level V of the Executive Schedule specified in section 5316 of title 5, United States Code.

(c)(1) Except as otherwise specifically provided in this Act, the Institute shall not be considered a department, agency, or instrumentality of the Federal Government.

(2) This Act does not limit the authority of the Office of Management and Budget to review and submit comments upon the Institute's annual budget request at the time it is transmitted to the Congress.

(d)(1) Except as provided in paragraph (2), officers and employees of the Institute shall not be considered officers or employees of the United States.

(2) Officers and employees of the Institute shall be considered officers and employees of the United States solely for the purposes of the following provisions of title 5, United States Code: Subchapter I of chapter 81 (relating to compensation for work injuries); chapter 83 (relating to civil service retirement); chapter 87 (relating to life insurance); and chapter 89 (relating to health insurance). The Institute shall make contributions under the provisions referred to in this subsection at the same rates applicable to agencies of the Federal Government.

(e) The Institute and its officers and employees shall be subject to the provisions of section 552 of title 5, United States Code, relating to freedom of information.

GRANTS AND CONTRACTS

Sec. 6. (a) The Institute is authorized to award grants and enter into cooperative agreements or contracts, in a manner consistent with subsection (b), in order to—

(1) conduct research, demonstrations, or special projects pertaining to the purposes described in this Act, and provide technical assistance and training in support of tests, demonstrations, and special projects;

(2) serve as a clearinghouse and information center, where not otherwise adequately provided, for the preparation, publication, and dissemination of information regarding State judicial systems;

(3) participate in joint projects with other agencies, including the Federal Judicial Center, with respect to the purposes of this Act;

(4) evaluate, when appropriate, the programs and projects carried out under this Act to determine their impact upon the quality of criminal, civil, and juvenile justice and the extent to which they have met or failed to meet the purposes and policies of this Act;

(5) encourage and assist in the furtherance of judicial education;

(6) encourage, assist, and serve in a consulting capacity to State and local justice system agencies in the development, maintenance, and coordination of criminal, civil, and juvenile justice programs and services; and

(7) be responsible for the certification of national programs that are intended to aid and improve State judicial systems.

(b) The Institute is empowered to award grants and enter into cooperative agreements or contracts as follows:

(1) The Institute shall give priority to grants, cooperative agreements, or contracts with—

(A) State and local courts and their agencies;

(B) national nonprofit organizations controlled by, operating in conjunction with, and serving the judicial branches of State governments; and

(C) national nonprofit organizations for the education and training of judges and support personnel of the judicial branch of State governments.

(2) The Institute may, if the objective can better be served thereby, award grants or enter into cooperative agreements or contracts with—

(A) other nonprofit organizations with expertise in judicial administration;

(B) institutions of higher education;

(C) individuals, partnerships, firms, or corporations; and

(D) private agencies with expertise in judicial administration.

(3) Upon application by an appropriate Federal, State, or local agency or institution and if the arrangements to be made by such agency or institution will provide services which could not be provided adequately through nongovernmental arrangements, the Institute may award a grant or enter into a cooperative agreement or contract with a unit of Federal, State, or local government other than a court.

(4) Each application for funding by a State or local court shall be approved by the State's supreme court, or its designated agency or council, which shall receive, administer, and be accountable for all funds awarded by the Institute to such courts.

(c) Funds available pursuant to grants, cooperative agreements, or contracts awarded under this section may be used—

(1) to assist State and local court systems in establishing appropriate procedures for the selection and removal of judges and other court personnel and in determining appropriate levels of compensation;

(2) to support education and training programs for judges and other court personnel, for the performance of their general duties and for specialized functions, and to support national and regional conferences and seminars for the dissemination of information on new developments and innovative techniques;

(3) to conduct research on alternative means for using nonjudicial personnel in court decisionmaking activities, to implement demonstration programs to test innovative approaches, and to conduct evaluations of their effectiveness;

(4) to assist State and local courts in meeting requirements of Federal law applicable to recipients of Federal funds;

(5) to support studies of the appropriateness and efficacy of court organizations and financing structures in particular States, and to enable States to implement plans for improved court organization and finance;

(6) to support State court planning and budgeting staffs and to provide technical assistance in resource allocation and service forecasting techniques;

(7) to support studies of the adequacy of court management systems in State and local courts and to implement and evaluate innovative responses to problems of record management, data processing, court personnel management, reporting and transcription of court proceedings, and juror utilization and management;

(8) to collect and compile statistical data and other information on the work of the

courts and on the work of other agencies which relate to and effect the work of courts;

(9) to conduct studies of the causes of trial and appellate court delay in resolving cases, and to establish and evaluate experimental programs for reducing case processing time;

(10) to develop and test methods for measuring the performance of judges and courts and to conduct experiments in the use of such measures to improve their functioning;

(11) to support studies of court rules and procedures, discovery devices, and evidentiary standards, to identify problems with their operation, to devise alternative approaches to better reconcile the requirements of due process with the needs for swift and certain justice, and to test their utility;

(12) to support studies of the outcomes of cases in selected subject matter areas to identify instances in which the substance of justice meted out by the courts diverges from public expectations of fairness, consistency, or equity, to propose alternative approaches to the resolving of cases in problem areas, and to test and evaluate those alternatives;

(13) to support programs to increase court responsiveness to the needs of citizens through citizen education, improvement of court treatment of witnesses, victims, and jurors, and development of procedures for obtaining and using measures of public satisfaction with court processes to improve court performance;

(14) to test and evaluate experimental approaches to providing increased citizen access to justice, including processes which reduce the cost of litigating common grievances and alternative techniques and mechanisms for resolving disputes between citizens; and

(15) to carry out such other programs, consistent with the purposes of this Act, as may be deemed appropriate by the Institute.

(d) The Institute shall incorporate in any grant, cooperative agreement, or contract awarded under this section in which a State or local judicial system is the recipient, the requirement that the recipient provide a match, from private or public sources, equal to 25 per centum of the total cost of such grant, cooperative agreement, or contract, except that such requirement may be waived in exceptionally rare circumstances upon the approval of the chief justice of the highest court of the State and a majority of the Board of Directors.

(e) The Institute shall monitor and evaluate, or provide for independent evaluations of, programs supported in whole or in part under this Act to insure that the provisions of this Act, the bylaws of the Institute, and the applicable rules, regulations, and guidelines promulgated pursuant to this Act, are carried out.

(f) The Institute shall provide for an independent study of the financial and technical assistance programs under this Act.

LIMITATIONS ON GRANTS AND CONTRACTS

SEC. 7. (a) With respect to grants or contracts made under this Act, the Institute shall—

(1) insure that no funds made available to recipients by the Institute shall be used at any time, directly or indirectly, to influence the issuance, amendment, or revocation of any Executive order or similar promulgation by any Federal, State, or local agency, or to undertake to influence the passage or defeat of any legislation by the Congress of the United States, or by any State or local

legislative body, or any State proposal by initiative petition, unless a governmental agency, legislative body, a committee, or a member thereof—

(A) requests personnel of the recipients to testify, draft, or review measures or to make representations to such agency, body, committee, or member; or

(B) is considering a measure directly affecting the activities under this Act of the recipient or the Institute;

(2) insure all personnel engaged in grant or contract assistance activities supported in whole or part by the Institute refrain, while so engaged, from any partisan political activity; and

(3) insure that every grantee, contractor, person, or entity receiving financial assistance under this Act which files with the Institute a timely application for refunding is provided interim funding necessary to maintain its current level of activities until—

(A) the application for refunding has been approved and funds pursuant thereto received; or

(B) the application for refunding has been finally denied in accordance with section 406 of this Act.

(b) No funds made available by the Institute under this Act, either by grant or contract, may be used to support or conduct training programs for the purpose of advocating particular nonjudicial public policies or encouraging nonjudicial political activities.

(c) The authorization to enter into contracts or any other obligation under this Act shall be effective for fiscal year 1981 and any succeeding fiscal year only to the extent, and in such amounts, as are provided in advance in appropriation Acts.

(d) To insure that funds made available under this Act are used to supplement and improve the operation of State courts, rather than to support basic court services, funds shall not be used—

(1) to supplant State or local funds currently supporting a program or activity; or

(2) to construct court facilities or structures, except to remodel existing facilities to demonstrate new architectural or technological techniques, or to provide temporary facilities for new personnel or for personnel involved in a demonstration or experimental program.

RESTRICTIONS ON ACTIVITIES OF THE INSTITUTE

SEC. 8. (a) The Institute shall not—

(1) participate in litigation unless the Institute or a recipient of the Institute is a party, and shall not participate on behalf of any client other than itself;

(2) interfere with the independent nature of any State judicial system nor allow sums to be used for the funding of regular judicial and administrative activities of any State judicial system other than pursuant to the terms of any grant, cooperative agreement, or contract with the Institute, consistent with the requirements of this Act; or

(3) undertake to influence the passage or defeat of any legislation by the Congress of the United States or by any State or local legislative body, except that personnel of the Institute may testify or make other appropriate communication—

(A) When formally requested to do so by a legislative body, committee, or a member thereof;

(B) in connection with legislation or appropriations directly affecting the activities of the Institute; or

(C) in connection with legislation or appropriations dealing with improvements in

the State judiciary, consistent with the provisions of this Act.

(b)(1) The Institute shall have no power to issue any shares of stock, or to declare or pay any dividends.

(2) No part of the income or assets of the Institute shall inure to the benefit of any director, officer, or employee, except as reasonable compensation for services or reimbursement for expenses.

(3) Neither the Institute nor any recipient shall contribute or make available Institute funds or program personnel or equipment to any political party or association, or the campaign of any candidate for public or party office.

(4) The Institute shall not contribute or make available Institute funds or program personnel or equipment for use in advocating or opposing any ballot measure, initiative, or referendum, except those dealing with improvement of the State judiciary, consistent with the purposes of this Act.

(c) Officers and employees of the Institute or of recipients shall not at any time intentionally identify the Institute or the recipient with any partisan or nonpartisan political activity associated with a political party or association, or the campaign of any candidate for public or party office.

SPECIAL PROCEDURES

SEC. 9. The Institute shall prescribe procedures to insure that—

(1) financial assistance under this Act shall not be suspended unless the grantee, contractor, person, or entity receiving financial assistance under this Act has been given reasonable notice and opportunity to show cause why such actions should not be taken; and

(2) financial assistance under this Act shall not be terminated, an application for refunding shall not be denied, and a suspension of financial assistance shall not be continued for longer than thirty days, unless the grantee, contractor, person, or entity receiving financial assistance under this Act has been afforded reasonable notice and opportunity for a timely, full, and fair hearing, and, when requested, such hearing shall be conducted by an independent hearing examiner. Such hearing shall be held prior to any final decision by the Institute to terminate financial assistance or suspend or deny funding. Hearing examiners shall be appointed by the Institute in accordance with procedures established in regulations promulgated by the Institute.

PRESIDENTIAL COORDINATION

SEC. 10. The President may, to the extent not inconsistent with any other applicable law, direct that appropriate support functions of the Federal Government may be made available to the Institute in carrying out its functions under this Act.

RECORDS AND REPORTS

SEC. 11. (a) The Institute is authorized to require such reports as it deems necessary from any grantee, contractor, person, or entity receiving financial assistance under this Act regarding activities carried out pursuant to this Act.

(b) The Institute is authorized to prescribe the keeping of records with respect to funds provided by grant or contract and shall have access to such records at all reasonable times for the purpose of insuring compliance with the grant or contract or the terms and conditions upon which financial assistance was provided.

(c) Copies of all reports pertinent to the evaluation, inspection, or monitoring of any

grantee, contractor, person, or entity receiving financial assistance under this Act shall be submitted on a timely basis to such grantee, contractor, or person or entity, and shall be maintained in the principal office of the Institute for a period of at least five years after such evaluation, inspection, or monitoring. Such reports shall be available for public inspection during regular business hours, and copies shall be furnished, upon request, to interested parties upon payment of such reasonable fees as the Institute may establish.

(d) Non-Federal funds received by the Institute, and funds received for projects funded in part by the Institute or by any recipient from a source other than the Institute, shall be accounted for and reported as receipts and disbursements separate and distinct from Federal funds.

AUDITS

SEC. 12. (a)(1) The accounts of the Institute shall be audited annually. Such audits shall be conducted in accordance with generally accepted auditing standards by independent certified public accountants who are certified by a regulatory authority of the jurisdiction in which the audit is undertaken.

(2) The audits shall be conducted at the place or places where the accounts of the Institute are normally kept. All books, accounts, financial records, reports, files, and other papers or property belonging to or in use by the Institute and necessary to facilitate the audits shall be made available to the person or persons conducting the audits. The full facilities for verifying transactions with the balances and securities held by depositories, fiscal agents, and custodians shall be afforded to any such person.

(3) The report of the annual audit shall be filed with the General Accounting Office and shall be available for public inspection during business hours at the principal office of the Institute.

(b)(1) In addition to the annual audit, the financial transactions of the Institute for any fiscal year during which Federal funds are available to finance any portion of its operations may be audited by the General Accounting Office in accordance with such rules and regulations as may be prescribed by the Comptroller General of the United States.

(2) Any such audit shall be conducted at the place or places where accounts of the Institute are normally kept. The representatives of the General Accounting Office shall have access to all books, accounts, financial records, reports, files, and other papers or property belonging to or in use by the Institute and necessary to facilitate the audit. The full facilities for verifying transactions with the balances and securities held by depositories, fiscal agents, and custodians shall be afforded to such representatives. All such books, accounts, financial records, reports, files, and other papers or property of the Institute shall remain in the possession and custody of the Institute throughout the period beginning on the date such possession or custody commences and ending three years after such date, but the General Accounting Office may require the retention of such books, accounts, financial records, reports, files, and other papers or property for a longer period under section 117(b) of the Accounting and Auditing Act of 1950 (31 U.S.C. 67(b)).

(3) A report of such audit shall be made by the Comptroller General to the Congress and to the Attorney General, together with such recommendations with respect thereto

as the Comptroller General deems advisable.

(c)(1) The Institute shall conduct, or require each grantee, contractor, person, or entity receiving financial assistance under this Act to provide for, an annual fiscal audit. The report of each such audit shall be maintained for a period of at least five years at the principal office of the Institute.

(2) The Institute shall submit to the Comptroller General of the United States copies of such reports, and the Comptroller General may, in addition, inspect the books, accounts, financial records, files, and other papers or property belonging to or in use by such grantee, contractor, person, or entity, which relate to the disposition or use of funds received from the Institute. Such audit reports shall be available for public inspection during regular business hours, at the principal office of the Institute.

AUTHORIZATIONS

SEC. 13. There are authorized to be appropriated \$20,000,000 for fiscal year 1983, \$30,000,000 for fiscal year 1984, and \$40,000,000 for fiscal year 1985.

EFFECTIVE DATE

SEC. 14. The provisions of this Act shall take effect on October 1, 1981.

Mr. TOWER. Mr. President, I move that the committee amendments be agreed to en bloc and treated as original text for the purpose of further amendment.

The motion was agreed to.

UP AMENDMENT NO. 1205

(Purpose: To amend the provisions regarding the authorization of appropriations)

Mr. TOWER. Mr. President, I send an amendment to the desk on behalf of Senator GRASSLEY and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Texas (Mr. TOWER), on behalf of Mr. GRASSLEY, proposes an unprinted amendment numbered 1205.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 26, line 17, strike out "\$30,000,000" and insert in lieu thereof "\$25,000,000".

On page 26, line 18, strike out "\$40,000,000" and insert in lieu thereof "\$25,000,000".

Mr. GRASSLEY. Mr. President, When the State Justice Institute Act, S. 537, was considered in the full Judiciary Committee earlier in the session, I reluctantly opposed reporting the bill to the floor.

Unfortunately, the conditions that spawned my opposition to the bill persist. We are still operating at a deficit, we are still in the process of attempting to balance our budget, we must still consider the budgetary impact of any new programs that we create.

Senator HEFLIN and others have presented persuasive arguments in support of Federal financial assistance for

State court systems. A gentleman whom I respect very much, Chief Justice Reynoldson of the Supreme Court of Iowa, has praised this legislation in a statement to the Brookings Institution, as a potential means of enhancing State court caseload and stature. These are aims to which I certainly want to lend my support.

The amendment that I am presenting recognizes the economic implications of this bill. As currently written, the authorization for fiscal year 1983 is \$20,000,000. That is followed by a 50-percent increase the following year to \$30,000,000; and a 33-percent increase for fiscal year 1985 to \$40,000,000.

My amendment provides that the outlays for fiscal year 1984 and 1985 not exceed \$25,000,000. Besides keeping the expenditure of funds at a constant outlay, we will be saving a total of \$20,000,000 or 18-percent of the funds requested in the bill. I think that this is a significant savings.

It is my understanding that the sponsor of this legislation, Mr. HEFLIN, is agreeable to the amendment. Therefore, I would hope there would be no objection by our colleagues to its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment (UP No. 1205) was agreed to.

Mr. HEFLIN. Mr. President, I rise in support of Senate bill 537, the State Justice Institute Act of 1981.

The State Justice Institute Act would establish a nonprofit national institute to provide technical and financial assistance to State courts. The need for such an institute was well-established during extensive hearings held on this legislation this Congress as well as in the 96th Congress.

I thank Chairman STROM THURMOND, the chairman of the Senate Judiciary Committee, Senator JOE BIDEN, our ranking minority member and Senator BOB DOLE, chairman of the Subcommittee on Courts for the support and assistance on this most important legislation.

There are several important reasons for providing financial assistance to State courts. First, State courts share with the Federal courts the awesome responsibility of enforcing the rights and duties of the Constitution and laws of the United States. However, in recent years the workload of our State courts has significantly increased due to a number of factors, including decisions of the U.S. Supreme Court, wide-reaching social legislation by Congress and a diversion of cases from the Federal courts. It has been determined that State courts decide approximately 95 percent of all law suits tried. It is, therefore, appropriate and necessary that the Federal Government

provide financial and technical assistance to State courts to help alleviate many of the administrative problems which these actions at the Federal level have caused and exacerbated. This legislation would help insure that our State courts remain strong and effective.

A second reason for providing financial assistance to State courts is the problem of crime in this country. It has long been my belief that if we are to significantly reduce crime, the Federal Government must share the responsibility of improving the administration of justice with State and local governments. The State Justice Institute would be immensely beneficial to State and local governments in their attempts to control crime and in their efforts to streamline the administration of justice once a criminal has been apprehended.

The third reason has to do with the changing role of judges generally. Earlier in this century there was much argument as to whether or not a judge's function included an obligation to see that cases in their courts moved toward disposition in a regular and efficient manner. Today, however, problems of administration have taken their place along side problems of adjudication as primary responsibilities of judges. Nearly everyone has come to acknowledge that today's judges have a duty to insure that their cases do not simply languish on the docket, but instead are moved to a conclusion with as much dispatch and economy of time and effort as practicable. This, along with a heightened interest in continuing legal education generally, has resulted in thousands of judges attending intensive orientations or refresher courses offered by such organizations as the National Judicial College, and the American Academy of Judicial Education.

The concept of a State Justice Institute has been endorsed by such organizations as the Conference of Chief Justices, the Appellate Judges Conference, and the American Bar Association.

Last Congress the Senate Judiciary Committee favorably reported out the State Justice Institute Act after adopting two important amendments proposed by Senator STROM THURMOND. On July 21, 1980, the Senate passed the bill without dissent. In the House of Representatives, Congressman ROBERT W. KASTENMEIER introduced the State Justice Institute Act, which was unanimously approved by the House Subcommittee on Courts, Civil Liberties and the Administration of Justice. I was encouraged last Congress when the State Justice Institute Act received wide, bipartisan support in both the House and the Senate and I am pleased that it has again received broad bipartisan support.

Mr. President, I would like to extend my thanks to my friend from Iowa, Senator CHUCK GRASSLEY, for his suggestions and improvements of this legislation, which I wholeheartedly endorse and am most grateful for his contribution. I would also like to thank members of the committee staff that have been of valuable assistance. Vinton "Dee" Lides, Eric Hultman, Will Lucius, Pete Velde, Shella Bair, Scott Green, John Maxwell, and Lynda Nersesian.

Mr. President, I support this vital legislation and encourage all Members of the Senate to vote and support Senate bill 537.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 537

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "State Justice Institute Act of 1982".

DEFINITIONS

SEC. 2. As used in this Act, the term—

- (1) "Institute" means the State Justice Institute;
- (2) "Board" means the Board of Directors of the Institute;
- (3) "Director" means the Executive Director of the Institute;
- (4) "Governor" means the Chief Executive Officer of a State;
- (5) "recipient" means any grantee, contractor, or recipient of financial assistance under this Act;
- (6) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States; and
- (7) "Supreme Court" means the highest appellate court within a State unless, for the purposes of this Act, a constitutionally or legislatively established judicial council acts in place of that court.

ESTABLISHMENT OF INSTITUTE; DUTIES

SEC. 3. (a) There is established a private nonprofit corporation which shall be known as the State Justice Institute. The purpose of the Institute shall be to further the development and adoption of improved judicial administration in State courts in the United States. The Institute may be incorporated in the District of Columbia or in any other State. To the extent consistent with the provisions of this Act, the Institute shall exercise the powers conferred upon a nonprofit corporation by the laws of the State in which it is incorporated.

(b) The Institute shall—

- (1) direct a national program of assistance designed to assure each person ready access to a fair and effective system of justice by providing funds to—
 - (A) State courts;
 - (B) national organizations which support and are supported by State courts; and
 - (C) any other nonprofit organization that will support and achieve the purposes of this Act;

(2) foster coordination and cooperation with the Federal judiciary in areas of mutual concern;

(3) make recommendations concerning the proper allocation of responsibility between the State and Federal court systems;

(4) promote recognition of the importance of the separation of powers doctrine to an independent judiciary; and

(5) encourage education for judges and support personnel of State court systems through national and State organizations, including universities.

(c) The Institute shall not duplicate functions adequately performed by existing nonprofit organizations and shall promote, on the part of agencies of State judicial administration, responsibility for success and effectiveness of State court improvement programs supported by Federal funding.

(d) The Institute shall maintain its principal offices in the State in which it is incorporated and shall maintain therein a designated agent to accept service of process for the Institute. Notice to or service upon the agent shall be deemed notice to or service upon the Institute.

(e) The Institute, and any program assisted by the Institute, shall be eligible to be treated as an organization described in section 170(c)(2)(B) of the Internal Revenue Code of 1954 and as an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 which is exempt from taxation under section 501(a) of such Code. If such treatments are conferred in accordance with the provisions of such Code, the Institute, and programs assisted by the Institute, shall be subject to all provisions of such Code relevant to the conduct of organizations exempt from taxation.

(f) The Institute shall afford notice and reasonable opportunity for comment to interested parties prior to issuing rules, regulations, guidelines, and instructions under this Act, and it shall publish in the Federal Register, at least thirty days prior to their effective date, all rules, regulations, guidelines, and instructions.

BOARD OF DIRECTORS

SEC. 4. (a)(1) The Institute shall be supervised by a Board of Directors, consisting of eleven voting members to be appointed by the President, by and with the advice and consent of the Senate. The Board shall have both judicial and nonjudicial members, and shall, to the extent practicable, have a membership representing a variety of backgrounds and reflecting participation and interest in the administration of justice.

(2) The Board shall consist of—

- (A) six judges, to be appointed in the manner provided in paragraph (3);
- (B) one State court administrator, to be appointed in the manner provided in paragraph (3); and
- (C) four public members, no more than two of whom shall be of the same political party, to be appointed in the manner provided in paragraph (4).

(3) The President shall appoint six judges and one State court administrator from a list of candidates submitted by the Conference of Chief Justices. The Conference of Chief Justices shall submit a list of at least fourteen individuals, including judges and State court administrators, whom the conference considers best qualified to serve on the Board. Prior to consulting with or submitting a list to the President, the Conference of Chief Justices shall obtain and consider the recommendations of all interested organizations and individuals concerned

with the administration of justice and the objectives of this Act.

(4) In addition to those members appointed under paragraph (3), the President shall appoint four members from the public sector to serve on the Board.

(5) The President shall appoint the members under this subsection within sixty days from the date of enactment of this Act.

(6) The members of the Board of Directors shall be the incorporators of the Institute and shall determine the State in which the Institute is to be incorporated.

(b)(1) Except as provided in paragraph (2), the term of each voting member of the Board shall be three years. Each member of the Board shall continue to serve until the successor to such member has been appointed and qualified.

(2) Five of the members first appointed by the President shall serve for a term of two years. Any member appointed to serve for an unexpired term arising by virtue of the death, disability, retirement, or resignation of a member shall be appointed only for such unexpired term, but shall be eligible for reappointment.

(3) The term of initial members shall commence from the date of the first meeting of the Board, and the term of each member other than an initial member shall commence from the date of termination of the preceding term.

(c) No member shall be reappointed to more than two consecutive terms immediately following such member's initial term.

(d) Members of the Board shall serve without compensation, but shall be reimbursed for actual and necessary expenses incurred in the performance of their official duties.

(e) The members of the Board shall not, by reason of such membership, be considered officers or employees of the United States.

(f) Each member of the Board shall be entitled to one vote. A simple majority of the membership shall constitute a quorum for the conduct of business. The Board shall act upon the concurrence of a simple majority of the membership present and voting.

(g) The Board shall select from among the voting members of the Board a chairman, the first of whom shall serve for a term of three years. Thereafter, the Board shall annually elect a chairman from among its voting members.

(h) A member of the Board may be removed by a vote of seven members for malfeasance in office, persistent neglect of, or inability to discharge duties, or for any offense involving moral turpitude, but for no other cause.

(i) Regular meetings of the Board shall be held quarterly. Special meetings shall be held from time to time upon the call of the chairman, acting at his own discretion or pursuant to the petition of any seven members.

(j) All meetings of the Board, any executive committee of the Board, and any council established in connection with this Act, shall be open and subject to the requirements and provisions of section 552b of title 5, United States Code, relating to open meetings.

(k) In its direction and supervision of the activities of the Institute, the Board shall—

- (1) establish such policies and develop such programs for the Institute as will further achievement of its purpose and performance of its functions;

- (2) establish policy and funding priorities and issue rules, regulations, guidelines, and instructions pursuant to such priorities;

- (3) appoint and fix the duties of the Executive Director of the Institute, who shall serve at the pleasure of the Board and shall be a nonvoting ex officio member of the Board;

- (4) present to other Government departments, agencies, and instrumentalities whose programs or activities relate to the administration of justice in the State judicial systems of the United States, the recommendations of the Institute for the improvement of such programs or activities;

- (5) consider and recommend to both public and private agencies aspects of the operation of the State courts of the United States considered worthy of special study; and

- (6) award grants and enter into cooperative agreements or contracts pursuant to section 7(a).

OFFICERS AND EMPLOYEES

SEC. 5. (a)(1) The Director, subject to general policies established by the Board, shall supervise the activities of persons employed by the Institute and may appoint and remove such employees as he determines necessary to carry out the purposes of the Institute. The Director shall be responsible for the executive and administrative operations of the Institute, and shall perform such duties as are delegated to such Director by the Board and the Institute.

(2) No political test or political qualification shall be used in selecting, appointing, promoting, or taking any other personnel action with respect to any officer, agent, or employee of the Institute, or in selecting or monitoring any grantee, contractor, person, or entity receiving financial assistance under this Act.

(b) Officers and employees of the Institute shall be compensated at rates determined by the Board, but not in excess of the rate of level V of the Executive Schedule specified in section 5316 of title 5, United States Code.

(c)(1) Except as otherwise specifically provided in this Act, the Institute shall not be considered a department, agency, or instrumentality of the Federal Government.

(2) This Act does not limit the authority of the Office of Management and Budget to review and submit comments upon the Institute's annual budget request at the time it is transmitted to the Congress.

(d)(1) Except as provided in paragraph (2), officers and employees of the Institute shall not be considered officers or employees of the United States.

(2) Officers and employees of the Institute shall be considered officers and employees of the United States solely for the purposes of the following provisions of title 5, United States Code: Subchapter I of chapter 81 (relating to compensation for work injuries); chapter 83 (relating to civil service retirement); chapter 87 (relating to life insurance); and chapter 89 (relating to health insurance). The Institute shall make contributions under the provisions referred to in this subsection at the same rates applicable to agencies of the Federal Government.

(e) The Institute and its officers and employees shall be subject to the provisions of section 552 of title 5, United States Code, relating to freedom of information.

GRANTS AND CONTRACTS

SEC. 6. (a) The Institute is authorized to award grants and enter into cooperative agreements or contracts, in a manner consistent with subsection (b), in order to—

- (1) conduct research, demonstrations, or special projects pertaining to the purposes

described in this Act, and provide technical assistance and training in support of tests, demonstrations, and special projects;

- (2) serve as a clearinghouse and information center, where not otherwise adequately provided, for the preparation, publication, and dissemination of information regarding State judicial systems;

- (3) participate in joint projects with other agencies, including the Federal Judicial Center, with respect to the purposes of this Act;

- (4) evaluate, when appropriate, the programs and projects carried out under this Act to determine their impact upon the quality of criminal, civil, and juvenile justice and the extent to which they have met or failed to meet the purposes and policies of this Act;

- (5) encourage and assist in the furtherance of judicial education;

- (6) encourage, assist, and serve in a consulting capacity to State and local justice system agencies in the development, maintenance, and coordination of criminal, civil, and juvenile justice programs and services; and

- (7) be responsible for the certification of national programs that are intended to aid and improve State judicial systems.

(b) The Institute is empowered to award grants and enter into cooperative agreements of contracts as follows:

- (1) The Institute shall give priority to grants, cooperative agreements, or contracts with—

- (A) State and local courts and their agencies;

- (B) national nonprofit organizations controlled by, operating in conjunction with, and serving the judicial branches of State governments; and

- (C) national nonprofit organizations for the education and training of judges and support personnel of the judicial branch of State governments.

- (2) The Institute may, if the objective can better be served thereby, award grants or enter into cooperative agreements or contracts with—

- (A) other nonprofit organizations with expertise in judicial administration;

- (B) institutions of higher education;

- (C) individuals, partnerships, firms, or corporations; and

- (D) private agencies with expertise in judicial administration.

(3) Upon application by an appropriate Federal, State, or local agency or institution and if the arrangements to be made by such agency or institution will provide services which could not be provided adequately through nongovernmental arrangements, the Institute may award a grant or enter into a cooperative agreement or contract with a unit of Federal, State, or local government other than a court.

(4) Each application for funding by a State or local court shall be approved by the State's supreme court, or its designated agency or council, which shall receive, administer, and be accountable for all funds awarded by the Institute to such courts.

(c) Funds available pursuant to grants, cooperative agreements, or contracts awarded under this section may be used—

- (1) to assist State and local court systems in establishing appropriate procedures for the selection and removal of judges and other court personnel and in determining appropriate levels of compensation;

- (2) to support education and training programs for judges and other court personnel, for the performance of their general duties

and for specialized functions, and to support national and regional conferences and seminars for the dissemination of information on new developments and innovative techniques;

(3) to conduct research on alternative means for using nonjudicial personnel in court decisionmaking activities, to implement demonstration programs to test innovative approaches, and to conduct evaluations of their effectiveness;

(4) to assist State and local courts in meeting requirements of Federal law applicable to recipients of Federal funds;

(5) to support studies of the appropriateness and efficacy of court organizations and financing structures in particular States, and to enable States to implement plans for improved court organization and finance;

(6) to support State court planning and budgeting staffs and to provide technical assistance in resource allocation and service forecasting techniques;

(7) to support studies of the adequacy of court management systems in State and local courts and to implement and evaluate innovative responses to problems of record management, data processing, court personnel management, reporting and transcription of court proceedings, and juror utilization and management;

(8) to collect and compile statistical data and other information on the work of the courts and on the work of other agencies which relate to and effect the work of courts;

(9) to conduct studies of the causes of trial and appellate court delay in resolving cases, and to establish and evaluate experimental programs for reducing case processing time;

(10) to develop and test methods for measuring the performance of judges and courts and to conduct experiments in the use of such measures to improve their functioning;

(11) to support studies of court rules and procedures, discovery devices, and evidentiary standards, to identify problems with their operation, to devise alternative approaches to better reconcile the requirements of due process with the needs for swift and certain justice, and to test their utility;

(12) to support studies of the outcomes of cases in selected subject matter areas to identify instances in which the substance of justice meted out by the courts diverges from public expectations of fairness, consistency, or equity, to propose alternative approaches to the resolving of cases in problem areas, and to test and evaluate those alternatives;

(13) to support programs to increase court responsiveness to the needs of citizens through citizen education, improvement of court treatment of witnesses, victims, and jurors, and development of procedures for obtaining and using measures of public satisfaction with court processes to improve court performance;

(14) to test and evaluate experimental approaches to providing increased citizen access to justice, including processes which reduce the cost of litigating common grievances and alternative techniques and mechanisms for resolving disputes between citizens; and

(15) to carry out such other programs, consistent with the purposes of this Act, as may be deemed appropriate by the Institute.

(d) The Institute shall incorporate in any grant, cooperative agreement, or contract awarded under this section in which a State or local judicial system is the recipient, the

requirement that the recipient provide a match, from private or public sources, equal to 25 per centum of the total cost of such grant, cooperative agreement, or contract, except that such requirement may be waived in exceptionally rare circumstances upon the approval of the chief justice of the highest court of the State and a majority of the Board of Directors.

(e) The Institute shall monitor and evaluate, or provide for independent evaluations of, programs supported in whole or in part under this Act to insure that the provisions of this Act, the bylaws of the Institute, and the applicable rules, regulations, and guidelines promulgated pursuant to this Act, are carried out.

(f) The Institute shall provide for an independent study of the financial and technical assistance programs under this Act.

LIMITATIONS ON GRANTS AND CONTRACTS

SEC. 7. (a) With respect to grants or contracts made under this Act, the Institute shall—

(1) insure that no funds made available to recipients by the Institute shall be used at any time, directly or indirectly, to influence the issuance, amendment, or revocation of any Executive order or similar promulgation by any Federal, State, or local agency, or to undertake to influence the passage or defeat of any legislation by the Congress of the United States, or by any State or local legislative body, or any State proposal by initiative petition, unless a governmental agency, legislative body, a committee, or a member thereof—

(A) requests personnel of the recipients to testify, draft, or review measures or to make representations to such agency, body, committee, or member; or

(B) is considering a measure directly affecting the activities under this Act of the recipient or the Institute;

(2) insure all personnel engaged in grant or contract assistance activities supported in whole or in part by the Institute refrain, while so engaged, from any partisan political activity; and

(3) insure that every grantee, contractor, person, or entity receiving financial assistance under this Act which files with the Institute a timely application for refunding is provided interim funding necessary to maintain its current level of activities until—

(A) the application for refunding has been approved and funds pursuant thereto received; or

(B) the application for refunding has been finally denied in accordance with section 406 of this Act.

(b) No funds made available by the Institute under this Act, either by grant or contract, may be used to support or conduct training programs for the purpose of advocating particular nonjudicial public policies or encouraging nonjudicial political activities.

(c) The authorization to enter into contracts or any other obligation under this Act shall be effective for fiscal year 1981 and any succeeding fiscal year only to the extent, and in such amounts, as are provided in advance in appropriation Acts.

(d) To insure that funds made available under this Act are used to supplement and improve the operation of State courts, rather than to support basic court services, funds shall not be used—

(1) to supplant State or local funds currently supporting a program or activity; or

(2) to construct court facilities or structures, except to remodel existing facilities to demonstrate new architectural or techno-

logical techniques, or to provide temporary facilities for new personnel or for personnel involved in a demonstration or experimental program.

RESTRICTIONS ON ACTIVITIES OF THE INSTITUTE

SEC. 8. (a) The Institute shall not—

(1) participate in litigation unless the Institute or a recipient of the Institute is a party, and shall not participate on behalf of any client other than itself;

(2) interfere with the independent nature of any State judicial system nor allow sums to be used for the funding of regular judicial and administrative activities of any State judicial system other than pursuant to the terms of any grant, cooperative agreement, or contract with the Institute, consistent with the requirements of this Act; or

(3) undertake to influence the passage or defeat of any legislation by the Congress of the United States or by any State or local legislative body, except that personnel of the Institute may testify or make other appropriate communication—

(A) When formally requested to do so by a legislative body, committee, or a member thereof;

(B) in connection with legislation or appropriations directly affecting the activities of the Institute; or

(C) in connection with legislation or appropriations dealing with improvements in the State judiciary, consistent with the provisions of this Act.

(b)(1) The Institute shall have no power to issue any shares of stock, or to declare or pay any dividends.

(2) No part of the income or assets of the Institute shall inure to the benefit of any director, officer, or employee, except as reasonable compensation for services or reimbursement for expenses.

(3) Neither the Institute nor any recipient shall contribute or make available Institute funds or program personnel or equipment to any political party or association, or the campaign of any candidate for public or party office.

(4) The Institute shall not contribute or make available Institute funds or program personnel or equipment for use in advocating or opposing any ballot measure, initiative, or referendum, except those dealing with improvement of the State judiciary, consistent with the purposes of this Act.

(c) Officers and employees of the Institute or of recipients shall not at any time intentionally identify the Institute or the recipient with any partisan or nonpartisan political activity associated with a political party or association, or the campaign of any candidate for public or party office.

SPECIAL PROCEDURES

SEC. 9. The Institute shall prescribe procedures to insure that—

(1) financial assistance under this Act shall not be suspended unless the grantee, contractor, person, or entity receiving financial assistance under this Act has been given reasonable notice and opportunity to show cause why such actions should not be taken; and

(2) financial assistance under this Act shall not be terminated, an application for refunding shall not be denied, and a suspension of financial assistance shall not be continued for longer than thirty days, unless the grantee, contractor, person, or entity receiving financial assistance under this Act has been afforded reasonable notice and opportunity for a timely, full, and fair hearing, and, when requested, such hearing shall

be conducted by an independent hearing examiner. Such hearing shall be held prior to any final decision by the Institute to terminate financial assistance or suspend or deny funding. Hearing examiners shall be appointed by the Institute in accordance with procedures established in regulations promulgated by the Institute.

PRESIDENTIAL COORDINATION

SEC. 10. The President may, to the extent not inconsistent with any other applicable law, direct that appropriate support functions of the Federal Government may be made available to the Institute in carrying out its functions under this Act.

RECORDS AND REPORTS

SEC. 11. (a) The Institute is authorized to require such reports as it deems necessary from any grantee, contractor, person, or entity receiving financial assistance under this Act regarding activities carried out pursuant to this Act.

(b) The Institute is authorized to prescribe the keeping of records with respect to funds provided by grant or contract and shall have access to such records at all reasonable times for the purpose of insuring compliance with the grant or contract or the terms and conditions upon which financial assistance was provided.

(c) Copies of all reports pertinent to the evaluation, inspection, or monitoring of any grantee, contractor, person, or entity receiving financial assistance under this Act shall be submitted on a timely basis to such grantee, contractor, or person or entity, and shall be maintained in the principal office of the Institute for a period of at least five years after such evaluation, inspection, or monitoring. Such reports shall be available for public inspection during regular business hours, and copies shall be furnished, upon request, to interested parties upon payment of such reasonable fees as the Institute may establish.

(d) Non-Federal funds received by the Institute, and funds received for projects funded in part by the Institute or by any recipient from a source other than the Institute, shall be accounted for and reported as receipts and disbursements separate and distinct from Federal funds.

AUDITS

SEC. 12. (a)(1) The accounts of the Institute shall be audited annually. Such audits shall be conducted in accordance with generally accepted auditing standards by independent certified public accountants who are certified by a regulatory authority of the jurisdiction in which the audit is undertaken.

(2) The audits shall be conducted at the place or places where the accounts of the Institute are normally kept. All books, accounts, financial records, reports, files, and other papers or property belonging to or in use by the Institute and necessary to facilitate the audits shall be made available to the person or persons conducting the audits. The full facilities for verifying transactions with the balances and securities held by depositories, fiscal agents, and custodians shall be afforded to any such person.

(3) The report of the annual audit shall be filed with the General Accounting Office and shall be available for public inspection during business hours at the principal office of the Institute.

(b)(1) In addition to the annual audit, the financial transactions of the Institute for any fiscal year during which Federal funds are available to finance any portion of its operations may be audited by the General

Accounting Office in accordance with such rules and regulations as may be prescribed by the Comptroller General of the United States.

(2) Any such audit shall be conducted at the place or places where accounts of the Institute are normally kept. The representatives of the General Accounting Office shall have access to all books, accounts, financial records, reports, files, and other papers or property belonging to or in use by the Institute and necessary to facilitate the audit. The full facilities for verifying transactions with the balances and securities held by depositories, fiscal agents, and custodians shall be afforded to such representatives. All such books, accounts, financial records, reports, files, and other papers or property of the Institute shall remain in the possession and custody of the Institute throughout the period beginning on the date such possession or custody commences and ending three years after such date, but the General Accounting Office may require the retention of such books, accounts, financial records, reports, files, and other papers or property for a longer period under section 117(b) of the Accounting and Auditing Act of 1950 (31 U.S.C. 67(b)).

(3) A report of such audit shall be made by the Comptroller General to the Congress and to the Attorney General, together with such recommendations with respect thereto as the Comptroller General deems advisable.

(c)(1) The Institute shall conduct, or require each grantee, contractor, person, or entity receiving financial assistance under this Act to provide for, an annual fiscal audit. The report of each such audit shall be maintained for a period of at least five years at the principal office of the Institute.

(2) The Institute shall submit to the Comptroller General of the United States copies of such reports, and the Comptroller General may, in addition, inspect the books, accounts, financial records, files, and other papers or property belonging to or in use by such grantee, contractor, person, or entity, which relate to the disposition or use of funds received from the Institute. Such audit reports shall be available for public inspection during regular business hours, at the principal office of the Institute.

AUTHORIZATIONS

SEC. 13. There are authorized to be appropriated \$20,000,000 for fiscal year 1983, \$25,000,000 for fiscal year 1984, and \$25,000,000 for fiscal year 1985.

EFFECTIVE DATE

SEC. 14. The provisions of this Act shall take effect on October 1, 1981.

Mr. HEFLIN. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. TOWER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CENTER FOR THE STUDY OF READING

Mr. PERCY. Mr. President, I would like to take this opportunity to call attention to one example of Federal investment in educational research at the University of Illinois at Urbana-Champaign that has great importance to the future well-being of the Nation's citizens. The Center for the

Study of Reading, which is in large measure supported by the National Institute of Education (NIE), has produced critical findings effecting improvements in how schools teach reading, how publishers design reading curriculums, and the perspectives that policymakers bring to bear on decisions regarding reading-related issues.

The center is directed by Prof. Richard C. Anderson, president-elect of the American Educational Research Association, and is part of the College of Education at the University of Illinois. It makes significant contributions to the outstanding scholarly record of the college and the university and has received widespread recognition as a resource for the improvement of reading materials and reading instruction throughout the Nation. School systems as different as New York City and small towns in Montana have praised the research results in the center. They have testified to the improvement of reading test scores in comprehension as a result of their use of the center's work.

The changing nature of the workplace and what is required of citizens to function in an increasingly technological era demands that the Federal Government make wise investments in human capital. To be sure, education is not primarily the responsibility of the Federal Government. However, the Federal Government does have a proper and important role in educational enterprises that serve the greater interests of the Nation. Investments which have proven themselves to be important to the improvement of the quality of schools and schooling should continue.

Educational research of the type performed by the Center for the Study of Reading with the support of the NIE is one of those investments. The NIE is also supporting critical working areas such as the instructional uses of information and communications technologies, teacher personnel practices, mathematics and science teaching, the improvement of secondary schools, the advancement of computer/technological literacy, and advanced academic skills in reading comprehension, written composition, and mathematics and scientific problem solving.

Mr. President, I ask unanimous consent that two articles about the work of the center, one from the New York Times of December 8, 1981, and one from the Minneapolis Tribune of April 12, 1981, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 8, 1981]

READING: DON'T BLAME TEACHERS

(By Fred M. Hechinger)

Reading scores are improving in elementary schools all over the country, but teen-

agers' reading skills continue to slip, and so does their interest in reading.

Richard C. Anderson, director of the Center for the Study of Reading at the University of Illinois, does not consider this a paradox. It is the natural consequence, he says, of merely drilling children to get the words right, without getting the message of what they read.

"Don't misunderstand," he adds quickly, "Nobody at the center argues that phonics are not needed." Phonics is the technical term for teaching children to "decode" words letter-by-letter and sound-by-sound.

But Mr. Anderson says he feels that many of the methods now being used to teach reading are simplistic and many of the materials children are given to read are boring. In their training, he says, teachers are given plenty of techniques but not enough cohesive structure with which to apply them. If things turn out badly, he adds, do not blame the teachers, blame the methods and the materials.

Mr. Anderson illustrates a fundamental error this way: A workbook sentence may say, "The worker dug a hole in the ground." A good reader will infer that the worker used some tool, not just his bare hands. Such a reader creates a picture in his mind. But poor readers, even though they are able to read the words, make no such inferences, nor will they reason to make connections with other parts of the story. And since poor readers are also likely to be deficient in phonics, teachers will drill them and drill them, ignoring the meaning and the connections that make reading add up to more than pronouncing words correctly.

Why is this happening?

The first reason Mr. Anderson cites is that teachers get poor advice in their training. They are not taught that children who get the word right may still need help with integrating the meaning of words. Children, says Mr. Anderson, need to be prepared to bring their own knowledge to bear on what they read. If, for example, a story begins with a statement that a youngster lost a pair of mittens, a teacher, without giving away the plot, might ask: Have you ever lost anything? How did people react to it?

Many reading instructors ask children about what they have just read, Mr. Anderson says, but are too often content if the child simply parrots specific facts.

What's needed, says Mr. Anderson, are better questions to get children to push beyond the fact they have just read.

The second problem, he continues, is that too many manuals are "thin and sketchy on comprehension." They merely give teachers vague suggestions about what to do, he says, "something of a smorgasbord, probably because it sells better if it has something for any teacher."

Third, he explains, poor readers float over the surface of a text. One way to change this is to teach them to ask themselves questions. To do this a teacher may pretend to be thinking out loud: "If I were reading this, that's what I'd ask." After a while, students learn to do this for themselves.

Fourth, poor readers find it difficult to compose sensible summaries of what they have read. Teaching them to summarize improves their reading comprehension and usually their test scores as well.

"We have fragmented the school reading program," Mr. Anderson asserts, "and much of it takes place in isolation from real reading." The center's studies showed that 50 percent of class time is often spent on workbooks that ask children to fill out spaces but

require little reading. Youngsters quite understandably get bored.

There is, he adds, a dearth of interesting in-school reading material. Books are adapted, not written. They adhere to so-called "reading ability formulas" with only simple words and short sentences. "They eliminate words that show how sentences are related, such as *before, after, but, because, etc.*," the center's researchers found.

Similarly, such simplified texts cut out all hedges or qualifications. As a typical example, he cited the reduction of the sentence, "a railway agent once figured that it would take 20 flatcars to load the trunk of one giant sequoia," to the simple statement, "It would take 20 flatcars to load the trunk of one giant sequoia." How, Mr. Anderson asks, can children learn to judge the importance of an identified source?

Such an approach, he says, not only makes reading in school less interesting but fails to prepare children to deal with complexities and to cope with "real" books. School reading "seldom gets into a character's head," Mr. Anderson says. Children are not helped to identify with the content or to relate reading to the real world. In such books, Mr. Anderson complains, "there are few complexities of plot. The stories are artificial and colorless. Style has been bled away." In the later school years, he says, textbooks—from history to science—lack "cohesive themes" and "skip around without structure."

In the crucial first years of school, Mr. Anderson says, "After the initial excitement of learning to read a little—and children are excited—reading suddenly becomes a dull business." With the lure of television and the lack of training in how to distill meaning from the printed page, fewer junior high and high school students "get any real pleasure out of reading on their own."

Parents who for years have been reading to their preschool children such wonderfully complex books as the Dr. Seuss stories or "The Little Engine That Could" have long felt instinctively that their children's first excursions into reading in school too often take them into that barren territory of "basal readers," devoid of fun, excitement and challenge.

[From the Minneapolis Tribune, Apr. 12, 1981]

IF ENGLISH IS GREEK TO YOUR KIDS, BLAME MAY LIE WITH SCHOOLBOOKS

[By Gregor W. Pinney]

The tall man bought the crackers.
The bald man read the newspaper.
The funny man liked the ring.
The strong man skimmed the book.

Now, cover those sentences with your hand and try to recall which man read the newspaper. Which liked the ring? Which bought the crackers?

Tough, isn't it? You can decode the printed words and "read" the sentences. But they are tough to comprehend because the subjects have no logical connection with the action. The connection is entirely arbitrary, and arbitrariness does not fit well in the human brain, except by rote memorization.

But there is a way to recall those sentences, and millions of American school children may be learning that technique within a few years. Indeed, they may be learning a number of new skills to help them understand what they read.

A major effort has been launched by a group of researchers, based at the University of Illinois, to reform the teaching of reading comprehension by bolstering its sci-

entific underpinnings. Comprehension, they say, is really a way of thinking. It is much more than just decoding printed symbols and then practicing and getting right answers, which characterizes much of what goes on in elementary reading classes today.

The researchers, who have been working for nearly five years and who have used up nearly \$8 million of federal money in the process, gave their message to the publishers of the nation's elementary school reading textbooks at a highly unusual two-day conference in Tarrytown.

Meeting in the storied hills above the Hudson, where educational policy once was determined by schoolmaster Ichabod Crane without benefit of a federal grant, researchers urged publishers to make substantial revisions in their basal readers, workbooks and teachers' manuals. (Basal readers are the main textbooks used in most elementary classes. Their stories and exercises are written according to a master plan that provides increasingly difficult vocabulary and structure as a child progresses.)

The researchers, who called the conference, approached the publishers directly on the assumption that textbooks are the most powerful influence on American education, and the quickest route for changes in instruction. People at the conference said it was the first time to their knowledge that such a gathering had been held.

The Illinois effort, which is organized as the Center for the Study of Reading, is believed to be the largest and most expensive study of reading instruction ever conducted. It was launched after scholars and government officials decided in the early 1970s that the nation's reading instruction was inadequate and that the problem was comprehension, not decoding.

Decoding, which means translating printed symbols into words that usually are familiar, had been the focus of scholarly research before that time. And it still gets a good deal of attention from parents and the public in general because of the interminable debate over the phonics and look-say techniques.

The researchers' basic message was that teachers and textbooks must deal with the knowledge that readers have in mind before they tackle a reading assignment. This knowledge is called "reader schema," and it has an enormous effect on the message a reader gets from any piece of printed material.

Some readers don't know enough to understand a particular written passage, the researchers said. In other cases, different readers have different schemata (the plural form of the word). Whites and blacks often have different knowledge, as do young and old, rich and poor. That is because they often have different experiences and education and because they remember different things from their experiences and education.

So teachers and textbooks must recognize those differences and get young readers onto a common track before they begin reading, according to the people gathered at Tarrytown.

But ultimately, students must learn to cope on their own with the printed page, which never contains complete information. They have to figure out what they don't know and how to fill in the gaps. They have to develop ways of making sense out of disconnected items, which brings us back to the four arbitrary sentences.

Those sentences were presented at the conference by Professor John Bransford of

Vanderbilt University, who has done some consulting work at the center in Illinois. The solution to comprehending and remembering the sentences is simply to add a few words to form a plausible link between subject and action, he said:

The tall man bought the crackers that had been lying on the top shelf.

The bald man read the newspaper to look for a hat sale.

The funny man liked the ring that squirted water.

The strong man skimmed the book about weightlifting.

Students can learn to make those connections, but they need help, said Bransford. And when they finally get the hang of it, he added, "their eyes light up."

"There's no reason you can't incorporate this into regular lessons."

The conference was studied with prominent names in reading research and theory—Richard Anderson, Dolores Durkin, Harold Herber, Roger Farr, Walter McGinitie, David Pearson. And it was attended by high level representatives of virtually all the major textbook companies: Ginn, Economy, Houghton-Mifflin, Scott-Foresman, American Book Co., Holt, Rinehart and Winston, all of whose expenses were paid by their companies. It was not a freeloader.

"I can assure you they were listening carefully," said James Squire, senior vice president of Ginn & Co. "In time, you'll see, very directly, changes as a result of this meeting alone."

"It's not going to revolutionize anything," said John Ridley, editor in chief of the reading department of Houghton-Mifflin. "It's a refinement. Reading programs come out every few years, and it seems what they've said here will find its way into virtually everything that's published."

"That's partly because people will ask, 'What are you doing about schema theory?' And you'd better have an answer. There are buzz words that develop in the textbook business, and schema theory is becoming one of them."

The publishers were not about to say exactly what changes they will make, Ridley added, "Because all of our competitors are here listening."

Richard Anderson, who is director of the Center for the Study of Reading, told the audience of about 80 that a person's perspective makes a lot of difference in what he gets out of printed prose. For example, experiments have shown that a person from India will focus on such things as family financial arrangements when he reads a description of a wedding. But an American who reads the same description will concentrate on the details of the ceremony.

"Minority children frequently fall because they don't have the same set of knowledge and values as majority children and majority authors and majority teachers," said Anderson.

It is the job of those who teach and write textbooks to be aware of different backgrounds and to help readers get the necessary knowledge before they begin reading, he said.

In an interview later, Anderson said it may be necessary to give specially tailored reading materials to children from minority subcultures when they are learning to read because "It's important that we not impose obstacles." After that, however, all students must read materials with unfamiliar settings to broaden their perspective on the world, he said.

"So I'd think you have to be alert to shortcomings of knowledge that some cultures have and be prepared to bridge them."

Anderson cited one experimental in which two groups of people were given a written description of a big house. One group was told to read it from the perspective of burglars while the other group took the perspective of real estate agents. Predictably, he said, the first group remembered such things as the silverware in the dining room while the second group remembered the stone facing on the outside.

But then they were told to reverse their roles. And without rereading the passage, the burglars-turned-real-estate-agents suddenly recalled more about the structure of the house and less about its stealable contents. And the real-estate-agents-turned-burglars experienced the reverse phenomenon.

The experiment showed how the same readers carried different schemata in their brains and could voluntarily call them into action, he said. The schemata serve as sorting devices for efficient recall of information.

Putting it another way, Isabel Beck of the University of Pittsburgh said teachers and textbooks should help students develop a "framework for attention" before they read a story.

As an example, she mentioned a story about a boy and a girl who disagree on whether the girl should embark on a career of deep-sea diving.

Ordinarily, she said, a teacher would simply tell the students, "Read to find out how John and Mary solve their problem."

But, Beck said, experimentation has shown that students will comprehend more of the story if they are psyched up first on the general subject. Without taking a moralistic stand and without giving the story away, a teacher should get the students into a discussion about whether there is any logical reason a girl could not become a pilot or a boy become a nurse.

Do current textbooks make use of background knowledge? Yes, they do, said Robert Tompkins, a vice president of Holt, Rinehart and Winston. "But many teachers aren't using it."

Tompkins conceded that publishers should try harder to make the kinds of connections in knowledge that John Bransford had advocated. Tompkins said he particularly liked one of Bransford's suggestions connecting camels and desert travelers.

In that one, Bransford had told about a story in a textbook that describes a camel—with such attributes as closeable nostrils and heavy hair around the ears—without explaining that those features afford protection against blowing sand. But if young readers can be helped to make that connection, Bransford said, they will be in a good position later to understand the dress of desert travelers who wear scarves over their faces even in hot weather.

In general, publishers don't give teachers much help in teaching comprehension, according to Dolores Durkin, an author of college textbooks on reading and a staff member of the center at Illinois.

Durkin, who is establishing a reputation as a muckraker in the field of reading instruction, shook the reading establishment two years ago by reporting that reading teachers are spending only 1 percent of their time on comprehension instruction, as she defined it. She and her staff had visited classrooms, and they counted any instance in which a teacher helped a student understand any passage longer than a single word.

For her next investigation, which she reported at the Tarrytown conference, she spent eight months leafing through teachers manuals that typically accompany basal reader series. In five sets of manuals, she found a total of 6,697 suggestions to teachers. But she said only 7 percent of those suggestions could be called "instruction." By that she meant an instance in which "A manual suggests that a teacher do, say or ask something that ought to help students understand or work out the meaning of connected text."

The rest of the suggestions dealt with review (17 percent), application (25 percent) and practice (51 percent).

And lest anyone get too excited about that 7 percent on instruction, Durkin portrayed those suggestions as anemic at best. Some were perfunctory—"Introduce the word idea." Others were over the children's heads, such as a first-grade manual that urged teachers to use the words "logical," "infer," "main idea," "prepositional phrase" and "pause momentarily."

In one first-grade class, a student identified "pause" as the things at the end of a dog's feet, Durkin said.

"People who write textbooks ought to get into classrooms," she went on. "They wouldn't use a word like that."

Some manual suggest that students list certain sentences and explain the meanings of specified words. But the emphasis is on right and wrong answers, said Durkin. She said a better approach might be to ask "How do you know it means that?" or "why couldn't it mean something else?"

The publishers did not dispute Durkin's findings.

Sandra Maccaroni, reading director for American Book Co., said improvements have been made in some of the latest editions. But she conceded that "Manuals are put together a lot faster than we'd like. We just don't have the time. Sometimes you have four people working on different manuals and there's some lack of coordination."

And Tompkins, of Holt, Rinehart and Winston, said, "I feel like I have been through a mill . . . When I came here, I thought we had the best teachers' editions on earth. When I get back, I can assure you we are going to scrutinize them."

Another speaker, Georgia Green, urged publishers to print stories as originally written instead of rewriting them in simplified style as usually is done for basal readers. She said the trouble with adapting stories is that "it risks boring the children and convincing them there is nothing interesting to be read in school."

And Alice Davison said publishers should stop using readability formulas to write textbooks. Just simplifying words and syntax does not necessarily make the message clearer, said Davison, who advocated subjective judgement as a better guide. Davison and Green both are on the staff of the reading center at Illinois.

The publishers, who also had a place on the agenda, said life is more complex than the researchers see it. They said they have to make a profit and satisfy state and local textbook adoption committees. And they said teachers demand readability formulas, controlled-vocabulary stories and lots of testing for right answers, according to the publishers.

The reason textbooks are written the way they are, said Tompkins, "comes down to a definition of the American public schools and their purpose in life."

"They are an agent of social change, not just to teach reading and writing. They are trying to correct attitudes toward sex roles, toward various races, toward the aged and the handicapped."

Maccarone, of American Book Co., added, "We face adoption committees—small as well as large committees—and we aren't going out voluntarily saying. Look at our readability. And we don't like constant testing, but management priorities have put the onus on teachers to show results. And testing shows results."

BUSY WORK, CONFUSION MAR MOST WORKBOOKS, RESEARCHER SAYS

Every school day in America, millions of children sit hunched over commercially published workbooks. But what they see in those workbooks is often confusing and difficult, according to a researcher from the University of Illinois.

Jean Osborn, speaking at a conference for researchers and publishers in Tarrytown, said she found "some very good things" in workbooks. But she also found a lot of busy work, verbose instructions, inadequate assistance, difficult vocabulary and lessons that were not connected with the main reading textbooks, called basal readers.

"My impression is that workbooks are the forgotten child of basal programs," Osborn said.

Osborn, who spent months poring over workbooks, showed the audience one page from an Economy Co. booklet that she called "a terrific example of ambiguity." It was an exercise for third-graders on finding the main idea of a paragraph, but its format made it difficult for students to get paragraphs and ideas together.

In Houghton-Mifflin workbook, students were given seven lines of vaguely worded instructions. In a Ginn and Co. workbook, students were asked to fill in the blanks with letters instead of words. The letters were keyed to a list of words.

Those are not isolated examples, said Osborn. "It's very frequent—daily in a kid's life."

As she went along, she said, she tore out pages with errors, confusion and so on. "There were some series that I'd pull out every page."

One page from the Economy workbook asked students to find words suggesting mystery, hostility, peacefulness, and confusion. Those are complex ideas for second-graders, Osborn said, but no provision was made to see whether the students understood the words in advance.

Students were told to underline "peaceful" words. But it was not clear whether they meant one word or a whole phrase, such as "soft snow falling silently."

A page from a 1979 Houghton-Mifflin workbook, which Osborn called "busy work" and "utter confusion," contained 10 words, each of them inside a square, triangle or rectangle. Students were supposed to color a shape red if it contained a word of one syllable, green if two and blue if three. Then they were to cut out the shapes and put them together into big red, green and blue squares.

"An overload of instructions, all for 10 words," she said. "It will take 15 minutes, which is all right if you want to keep kids busy for 15 minutes."

In a workbook published in 1977 by Holt, Rinehart and Winston, instructions at the top of a page told students to underline the first vowel in each word below. At the bottom of the page another set of instructions told them to do the same thing.

"The hard-to-teach child will say, 'Maybe I did it wrong,'" said Osborn. Good students often don't read the instructions, she said. They simply go ahead and do the exercises. Or they consider the instructions as a problem to be conquered.

But she said poor students simply are confounded by the tasks they see laid out for them on the pages of reading workbooks.

Osborn and her colleagues visited three school districts and sat through 90 reading periods, and she said they found that students spend as much time with their workbooks as they spend in direct contact with their teachers.

"Teachers use workbooks because they think they are important—that they are part of instruction," she said.

Indeed, they use the entire basal reading packages of textbooks, workbooks and supplementary materials, even though teacher-training colleges advocate using a variety of approaches, Osborn said.

Osborn urged publishers to eliminate confusion in workbooks and to develop exercises that teach skills, not just "expose" them briefly. And she pleaded for exercises that require words to be written in the blanks, not keyed letters or numbers.

The people who publish the nation's school workbooks and textbooks were sitting in the audience as Osborn talked, but none disputed her findings.

Will her pleas be heeded?

"They will in our programs," said Dale Howard, director of language arts for Open Court Publishing Co. "I'm going back and write them up. This is one-on-one for me. I am going to take her recommendations to heart."

And James Squire, senior vice president for research and development at Ginn and Co., said, "Workbooks are never going to be the same after Jean Osborn."

ALPHA DELTA PHI—150TH ANNIVERSARY

Mr. PERCY. Mr. President, today I would like to call attention to a convention that will soon be held at Hamilton College in Clinton, N.Y. Though it may seem odd for a Senator from Illinois to speak about an event in upstate New York, I am proud to do so, since the convention will commemorate the 150th anniversary of the founding of my fraternity, Alpha Delta Phi.

Founded at Hamilton in 1832 by Samuel Eells, the fraternity has a tradition of leadership. Members from chapters in both the United States and Canada have distinguished themselves in every field, especially in business, finance and government. Oliver Wendell Holmes, Salmon P. Chase, William K. Vanderbilt, David Eisenhower, and John D. Rockefeller, Jr. were Alpha Deltas, as were Presidents Theodore Roosevelt and Franklin D. Roosevelt.

The fraternity has also maintained ties to its heritage as a literary society. During my undergraduate years at the University of Chicago, we sponsored lectures, debates, and the other literary events. Today, despite the increasing social role of fraternities, Alpha Delta Phi still requires its chapters to

sponsor similar events. In an era when many people stereotype fraternities as "Animal Houses," it is heartening to see the members of Alpha Delta Phi gathering in a sesquicentennial celebration to reaffirm this special heritage.

SENATOR HEINZ COMMENDED FOR CONTRIBUTIONS TO TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982

Mr. DOLE. Mr. President, I want to commend the senior Senator from the State of Pennsylvania for his outstanding contributions to the Tax Equity and Fiscal Responsibility Act of 1982.

Senator HEINZ is responsible for at least four provisions contained in this legislation which are in the very best interests of people as well as our national economy.

While the newspapers have carried the story of a record peacetime tax increase in this bill, there is another story about provisions of the bill that goes untold. Those provisions, the results of the very arduous efforts of my distinguished colleague from Pennsylvania, reflect a strong and longstanding commitment to the underprivileged, the aged, the poor.

Under the leadership of Senator HEINZ, amendments were adopted here on the Senate side that will help people in four different and important areas. The amendments offered by Senator HEINZ will insure that the economically and otherwise disadvantaged will have an opportunity to find private sector employment; that dying elderly will not be denied access to hospice care; that senior citizens will have the option to receive better health benefits at lower cost; and that the working poor will have access to health care.

More specifically, Senator HEINZ succeeded in gaining Senate approval of an amendment to extend a revised, improved targeted jobs tax credit program. It will give private sector employers a very powerful incentive to hire individuals who qualify under nine targeted categories, including handicapped, Vietnam veterans, certain welfare recipients, former CETA workers, and disadvantaged youths. Most importantly, the amendment promises to help those, particularly during these difficult economic times, who have historically had the greatest difficulty finding employment. I might add that it is due to Senator HEINZ' efforts during last year's tax bill that the targeted jobs tax credit was overhauled, made workable, and revived.

Mr. President, Senator HEINZ also offered an amendment which I was extremely proud to cosponsor to provide hospice care as a benefit under the medicare program. As many of my col-

leagues know, hospice frequently is considered to be a more humane and less expensive method of caring for the dying. It provides support for both the patient and the family; it emphasizes quality of the final days of life; it focuses on home and community based care. In short, it allows an individual to live and die with dignity.

Mr. President, I would just note that the hospice amendment was not included in the bill reported by the Finance Committee. Although I, Senators LONG, PACKWOOD, HEINZ, and others had introduced similar legislation and Senator HEINZ had held a hearing on the bill in his Aging Committee, not every Member of the Senate was aware that our elderly, in too many instances, are denied access to hospice care because of medicare's failure to pay for it. As we started to consider the Revenue Act, I think it is fair to say we did not have the support to adopt the floor amendment. Indeed, many floor amendments had a very difficult time. So Senator HEINZ went to work on the Senate floor, personally enlisting support for our amendment, and succeeded in getting at least 67 Senators to cosponsor it. Without that extraordinary effort, adoption of Senator HEINZ' and my hospice amendment would have been impossible. It is my full expectation that the conferees will adopt our provision, and it will soon become law.

I would also like to point out the fruits of a very long labor of Senator HEINZ—the successful amendment to the medicare law to give older people the choice to enroll in HMO's and other competitive medical plans.

Mr. President, I recall when, in the late seventies, the then junior Senator from Pennsylvania was one of the first Members of the Senate to recognize the real ills of the health care payment system and espouse a realistic solution. In rejecting hospital cost containment, a strictly regulatory approach to place a band-aid over the symptoms, Mr. HEINZ began working on legislative remedies to reverse the perverse incentives driving health care costs.

He introduced the Competitive Health and Medical Plan—CHAMP—Act in the beginning of the 97th Congress as a first major step in reversing the incentives that encourage overutilization of costly services and construction of excess hospital beds that taxpayers are forced to support whether or not they are filled. Hearings were held last year in both the Finance and Aging Committees to examine the CHAMP's approach. The bill has been endorsed by such major groups as the American Association of Retired Persons, the National Council of Senior Citizens, the AFL-CIO, and the U.S. Chamber of Commerce, as well as the advocates of a free-market, consumer

choice approach to health policy reform.

The culmination of Senator HEINZ' persistent efforts was inclusion of his CHAMP's bill in the Finance Committee's revenue and spending bill that has now passed the Senate. This marks a first, a vital reform of the medicare program, which I expect to be signed into law this year.

Like the hospice provision, the CHAMP's amendment is cost effective, promising to save the Government money and contribute to the long-run reduction of the Federal deficit.

Finally, Mr. President, I would like to point out the amendment drafted by Senator HEINZ to provide medicaid as a work incentive for the working poor in our society.

As many of my colleagues know, last year as part of the Omnibus Reconciliation Act, the so-called work incentives in the aid to families with dependent children—AFDC—program were limited. This was done primarily because there was little evidence of the effectiveness of these generous income disregards in breaking welfare dependency. However, we did not at that time recognize that there was something positive we could do that would indeed encourage work instead of welfare for the AFDC population.

That positive step is a continuation of medicaid coverage for welfare recipients who find work in jobs that do not provide health insurance. A careful examination of the issue, as Senator HEINZ has pointed out, reveals that the population we are talking about here is comprised primarily of single parent mothers with little training or job experience. The jobs they find are usually part time, minimum wage, with no employer-provided health coverage. Therefore, when these families lose their medicaid coverage, a powerful work disincentive is created.

The amendment that Senator HEINZ developed addresses this problem by giving States flexibility to continue medicaid coverage for those working poor families who lose their AFDC benefits as a result of the limitations we imposed last year. In essence, his amendment will help to insure that access to health care will not be denied to those individuals struggling to break welfare dependency and become self-sufficient.

Mr. President, we can all be proud of the dedication, leadership, and outstanding work of the distinguished Senator from Pennsylvania.

SPOUSE EQUITY ACT, S. 1814

Mr. MITCHELL. Mr. President, I wish to express my strong support of S. 1814, a bill which will return to State courts the determination of property settlements in the event of divorces in military marriages. I hope

the Senate will consider this bill in the very near future.

Last June, the Supreme Court overturned a State court decision which granted a divorced wife a property right in the pension earned by her military husband. That decision, in effect, places the marriage and divorce decisions of military families beyond the reach of State law in certain important respects. That situation should be corrected.

In our Nation, the States have primary jurisdiction over laws concerning marriage, divorce, property settlements, child support payments, and related domestic issues. This is not an area in which the Federal Government ought to be involved. And we should not remove the protection of State laws from those men and women who serve in the Nation's Armed Forces.

S. 1814 will correct this situation by allowing State courts to treat military pensions in divorce cases as they treat civilian pensions, in accordance with the State's property laws.

S. 1814 does not prejudice the major factors in any divorce. Such questions as individuals' contribution to the joint property of the family, duration of marriage, fault or no-fault, are properly a judgment of the court hearing the divorce case, not of the Federal Government. What the bill does is to restore the military spouses the same rights their civilian counterparts have in divorce proceedings.

Not every State of the Nation treats pensions as joint property in dissolving a marriage. But in those States which do, there is no reason why pensions earned pursuant to a military career should be exempted from the other property acquired in the course of a marriage. Yet this is precisely the effect the Supreme Court's ruling has. It is time that ruling was changed.

The dissolution of any marriage is a personal tragedy for those involved. The frequency of divorce in our Nation is a social tragedy. The divorce rate reflects changes in our society which are outside the scope of legislation. Today, men and women who find their marriages cannot be amicably maintained seek to go their separate ways.

A decision to divorce is a personal decision. But legislation can help assure that neither partner is materially injured by such a decision.

In practice today, divorce frequently impoverishes the female partner, particularly in marriages of long duration. The reality is that a woman whose life has been devoted to making a home and raising children is often not in a position to pursue paid employment. Today's labor market demands skills that are not learned in the home. At a time such as the present, when unemployment is high, the labor market

can and does demand work experience as well as skills. Trained computer programmers are in oversupply today unless they have 5 years' experience. It is unrealistic in such a labor market to contend that divorced women can readily be self-supporting regardless of age, training, or work experience.

Our society will ultimately have to modify the worth it now ascribes and the monetary rewards it gives to various functions. We pay lip service to the importance of making a home and raising a family, but our laws generally reflect a judgment that making a home and raising children are activities of less value than pursuing an active career.

That judgment will change in future, I am certain, because we must eventually recognize that the creation of a stable home and the rearing of children are the foundation of our society. But future changes in society's values and rewards do not compensate women who have already devoted their lives to domestic duties and are threatened with the loss of all sources of livelihood today. When such women face the bitterness of a failed marriage, the law should give practical recognition to their contribution to the dissolving partnership.

The worth of a wife's contribution to a military career is verbally acknowledged by the leaders of our armed services. The Army Chief of Staff, Gen. Ed Meyer says "We recruit soldiers, but we retain families."

Statistical evidence indicates that the active support of spouses is crucial to the decision of military men to reenlist and pursue a military career. The Air Force reports that without their wives' support, only 30 percent of Air Force men would continue a military career. The contribution of the spouse to a career decision in the military is a major factor, just as a spouse's support for a move or a job change is important in civilian life.

Congress has taken substantial steps to upgrade military pay and conditions, an effort that has my strong support. It is vital that we reward the hardships of military service appropriately.

But we should not forget that the families of those serving in our Armed Forces bear the frequent moves, the disruptions, the financial losses, and the severed friendships in moving around the country and overseas, along with their enlisted spouses.

Our armed services rely substantially on the active participation of an enlistee's spouse in maintaining the military community and in providing the kind of family environment which enhances military service. That burden falls most heavily on women because men make up the bulk of our Armed Forces.

Military wives move to new duty stations with their husbands, they up

root their children from schools, they make homes on military bases, and buy homes in cities about which they know nothing and where they have no acquaintances. The frequent moves and disruptions of a military career are part of the service our Nation demands of our military enlistees. And the price is paid, not only by the officer moving, but also by the family which accompanies him.

Military wives have found in many instances that their personal behavior and their willingness to be active in community affairs has directly affected their husbands' careers. Today, when 50 percent of military wives hold paid jobs, that factor of military life may be moderated, as it has somewhat moderated in the civilian sector. But, just as many private companies judge the wives of their male employees, fairly or not, the military judges the wife when it considers advancement for the husband. And those wives who have devoted their time and talents to the furtherance of their husbands' careers have surely made as great an investment in the military life as the men directly.

Military wives who have worked, either from choice or financial necessity, know that the frequent moves involved in a military career do not constitute a sound basis for a well-paid career for themselves. Frequently a shorter term job does not even earn the worker a basic pension, because most firms' pension vesting periods are longer than the average duty assignment. Frequent job changes are inimical to career growth and advancement within a company.

Many military wives have found that despite their education, they must be content with starting anew in a new job in every new military assignment. No comparable situation faces any substantial sector of the civilian economy.

Careers such as the military, which entail frequent moves, do not allow a married couple to build up the property that a more settled family can generally acquire. In many cases, the military pension represents the major form of property acquired in such marriages.

It is grossly unfair, in such circumstances, to arbitrarily rule that this property does not belong in any part to the nonmilitary spouse. No similar distinction is made about property acquired by civilian families, whether both spouses work or not. There is no reason to treat military spouses differently. In effect, the Supreme Court ruling makes military spouses second-class citizens in the event of a divorce. That is unfair and this legislation will correct it.

The bill does not make any arbitrary prejudgments in the case of any individual marriage. It maintains fundamental protections against impover-

ishing any member of the military, without denying the marriage partner a reasonable judgment when that is reached by the State court involved.

It is foolishness to claim, as some have, that this legislation will precipitate a rash of divorce proceedings against military enlistees or retirees. Men and women do not divorce or fail to divorce on the basis of material considerations alone. Marriages are not maintained or dissolved solely because of money or property. Anyone who has been married knows that the relationships between human beings are too complex to be reduced to such a simple basis.

The complexity of human relations is reflected in S. 1814. It would leave to the courts to determine, on a case-by-case basis, as they now do, what the proper division of belongings is in a marriage that is being dissolved. This legislation will not encourage or discourage divorce among military families and more than the existence of divorce laws now encourages divorce in civilian households.

We should not force military marriages to contend with different rules than their civilian counterparts.

The Supreme Court's decision on property rights state that the determination of the proper treatment of military pensions in divorce cases is properly a congressional decision.

Recognizing that responsibility, the Congress is now ready to act. Language identical to that in S. 1814 has already been passed by the House of Representatives in the form of an amendment to the Defense authorization. I hope the Senate can consider its version of the bill promptly, so that we can return to the spouses of our military families the assurance that their domestic rights will be treated by State courts without distinction because of their service in the military.

Neither this legislation nor any other can moderate the personal tragedy of a failed marriage. But legislation can assure that when marriages do dissolve, the contribution of both partners will be judged within the context of the individual relationship, so that neither party is rendered without cause and destitute without redress.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chiridon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry

nominations and a treaty which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that he had approved and signed the following acts and joint resolution:

On July 19, 1982:

S. 2651. An act to extend the expiration date of section 252 of the Energy Policy and Conservation Act.

On July 22, 1982:

S. 881. An act to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy.

S. 1230. An act to provide to the minting of commemorative coins to support the 1984 Los Angeles Olympic games.

On July 23, 1982:

S. 2240. An act to amend title 5, United States Code, to provide permanent authorization for Federal agencies to use flexible and compressed employee work schedules.

On July 28, 1982:

S.J. Res. 95. Joint resolution to authorize and direct the Secretary of the Interior, subject to the supervision and approval of the Franklin Delano Roosevelt Memorial Commission, to proceed with the construction of the Franklin Delano Roosevelt Memorial, and for other purposes.

On August 3, 1982:

S. 2332. An act to amend the Energy Policy and Conservation Act to extend certain authorities relating to the international energy program, to provide for the Nation's energy emergency preparedness, and for other purposes.

On August 9, 1982:

S. 2317. An act to recognize the organization known as the National Federation of Music Clubs.

S. 2218. An act to provide for the development and improvement of the recreation facilities and programs of Gateway National Recreation Area through the use of funds obtained from the development of methane gas resources within the Fountain Avenue Landfill site by the city of New York.

MESSAGES FROM THE HOUSE

At 2:02 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 6276. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to allow the issuance of revenue bonds to finance college and university programs which provide student educational loans.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 388. Concurrent resolution disapproving certain regulations submitted

to the Congress on July 29, 1982, with respect to the Education Consolidation and Improvement Act of 1981.

At 5:08 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House agrees to the amendments of the Senate to the following joint resolution:

H.J. Res. 541. Joint resolution concerning the successful completion of the test flight phase of the Space Shuttle program.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 6955. An act to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Congress).

HOUSE BILL REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 6276. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to allow the issuance of revenue bonds to finance college and university programs which provide student educational loans; to the Committee on Governmental Affairs.

HOUSE BILL PLACED ON CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 6955. An act to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Congress).

ENROLLED JOINT RESOLUTIONS SIGNED

The PRESIDENT pro tempore (Mr. THURMOND) announced that on today, August 10, 1982, he signed the following enrolled joint resolutions, which had previously been signed by the Speaker of the House of Representatives:

S.J. Res. 123. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week";

S.J. Res. 183. Joint resolution to authorize and request the President to issue a proclamation designating October 17 through October 23, 1982, as "Lupus Awareness Week"; and

S.J. Res. 190. Joint resolution to authorize and request the President to designate "National Family Week."

ENROLLED JOINT RESOLUTIONS PRESENTED

The Secretary reported that on today, August 10, 1982, he had presented to the President of the United States the following enrolled joint resolutions:

S.J. Res. 123. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week";

S.J. Res. 183. Joint resolution to authorize and request the President to issue a proclamation designating October 17 through October 23, 1982, as "Lupus Awareness Week"; and

S.J. Res. 190. Joint resolution to authorize and request the President to designate "National Family Week."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4048. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, notice of a decision made to convert the Custodial Services Function at the Public Works Center, Norfolk, Virginia to performance under contract; to the Committee on Armed Services.

EC-4049. A communication from the General Counsel of the Department of Defense transmitting a draft of proposed legislation to authorize student nutritional assistance programs in the defense overseas schools; to the Committee on Armed Services.

EC-4050. A communication from the Secretary of Housing and Urban Development transmitting, pursuant to law, the annual report of the Solar Energy and Energy Conservation Bank for fiscal year 1981; to the Committee on Banking, Housing, and Urban Affairs.

EC-4051. A communication from the Chairman of the Securities and Exchange Commission transmitting, pursuant to law, a supplement to the Commission's 47th annual report entitled "Annual Report of Corporate Reorganizations Under the Bankruptcy Code;" to the Committee on Banking, Housing, and Urban Affairs.

EC-4052. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Increasing Entrance Fees—National Park Service"; to the Committee on Energy and Natural Resources.

EC-4053. A communication from the Director of the Minerals Management Service, Department of the Interior transmitting, pursuant to law, a request from Diamond Shamrock Corp. for a refund of an excess royalty payment; to the Committee on Energy and Natural Resources.

EC-4054. A communication from the Assistant Secretary of the Interior for Territorial and International Affairs, transmitting, pursuant to law, the annual report on the fiscal condition of the Government of Guam for the year ended September 30, 1980; to the Committee on Energy and Natural Resources.

EC-4055. A communication from the Joint Chairmen of the Interagency Task Force on Acid Precipitation, transmitting, pursuant to law, the final National Acid Precipitation Assessment Plan; to the Committee on Environment and Public Works.

EC-4056. A communication from the Acting Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to August 4, 1982; to the Committee on Foreign Relations.

EC-4057. A communication from the Acting Director of the Office of Legislative Affairs, Agency for International Development, transmitting, pursuant to law, a report on proposed amendments to a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-4058. A communication from the Executive Secretary of the Federal Reserve Employee Benefits System, transmitting, pursuant to law, the annual report on the retirement plan of the Federal Reserve System for calendar year 1981; to the Committee on Governmental Affairs.

EC-4059. A communication from the Commissioner of the Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders suspending deportation of certain aliens under section 244(a)(1) of the Immigration and Nationality Act; to the Committee on the Judiciary.

EC-4060. A communication from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to authorize the Veterans' Administration to administer a community residential care program; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute and an amendment to the title:

S. 2172. A bill to amend the Communications Act of 1934 (Rept. No. 97-518).

S. 2450. A bill to authorize funds for the Magnuson Fishery Conservation and Management Act for fiscal years 1983, 1984, and 1985 to improve conservation and management of our Nation's fisheries, and for other purposes (Rept. No. 97-519).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 2320. A bill to amend section 1936 of title 18, United States Code, and the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et seq.) to provide for criminal forfeiture of the proceeds of racketeering activity, to provide for the sanction of criminal forfeiture for all felony drug offenses, to facilitate forfeitures in drug related and racketeering cases, and for other purposes (Rept. No. 97-520).

By Mr. ROTH, from the Committee on Governmental Affairs, without amendment:

H.R. 1710. A bill to authorize the use of the frank for official mail sent by the Law Revision Counsel of the House of Representatives.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. NICKLES (for himself and Mr. PELL):

S. 2822. A bill to amend title IV of the Higher Education Act of 1965 to provide standards for students for maintaining satisfactory progress as a condition for assistance under that title; to the Committee on Labor and Human Resources.

By Mr. STAFFORD:

S. 2823. A bill to amend title IV of the Social Security Act with respect to the treatment of earned income for purposes of the aid to families with dependent children program, and for other purposes; to the Committee on Finance.

By Mr. NUNN (for himself, Mrs. KASSEBAUM, Mr. QUAYLE, Mr. RANDOLPH, Mr. CRANSTON, Mr. LEVIN, Mr. SARBANES, Mr. CANNON, Mr. BURDICK, Mr. LEAHY, Mr. GLENN, Mr. DECONCINI, and Mr. MELCHER):

S.J. Res. 228. Joint resolution to provide for the designation of the week beginning on October 24, 1982, as "National Tourette Syndrome Awareness Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. NICKLES (for himself and Mr. PELL):

S. 2822. A bill to amend title IV of the Higher Education Act of 1965 to provide standards for students maintaining satisfactory progress as a condition for assistance under that title; to the Committee on Labor and Human Resources.

STUDENT ASSISTANCE REFORM ACT

● Mr. NICKLES. Mr. President, today I am pleased to join with my distinguished colleague, Senator PELL, in introducing a bill which makes some commonsense changes in the Federal student aid programs.

Currently, a student continues to receive student assistance from the Federal Government as long as the educational institution which he or she attends will confirm that the student is in "good standing." It is left up to the discretion of each individual educational institution to define good standing.

This policy has, unfortunately, resulted in serious mismanagement and use of Federal student aid resources. The General Accounting Office released a study in December of 1981 which found that 20 percent of the students receiving Pell grants at 19 randomly selected institutions had less than a "C" average, half of which (10 percent) had an "F" average. Clearly, this lax discretion and judgment by some educational institutions is significant enough to merit congressional action.

The legislation that Senator PELL and I offer today gives a student receiving Federal financial assistance a 1-year period to establish an academic record. At the conclusion of this first year, the student's grade point average, or its equivalent, is reviewed. If the student has less than a "C" average, then he or she is given a warning measure by being placed on probation for one grading period. If, during that grading period, the student again fails to make a "C" average or better, then he or she is no longer eligible for Federal financial assistance.

The legislation contains an "undue hardship" clause which provides for

special difficulties that a student may encounter during the academic year or probationary period. This clause is intended to allow the institution to give the student another probationary period if it determines that the student has had to contend with unusually severe circumstances during the academic grading period in question. Examples of the kinds of extenuating circumstances which might be cited and accepted are the death of a close relative or serious personal injury or illness.

A student who, for academic reasons, has lost eligibility for Federal student assistance may again become eligible if he can demonstrate, in two consecutive grading periods, his academic commitment by maintaining a "C" average or better. Upon establishing such a record, he may again apply for Federal assistance. This reapplication for aid is limited to a one-time readmission to the student assistance program.

Implementation of this legislation will simplify current law by creating a consistent and fair standard for students receiving Federal aid. It adds no new bureaucratic steps, in that an institution must already verify that a student is in good standing. This legislation simply asks for a GPA as parts of that verification process.

Although there is no concrete figure as to the amount of financial assistance which can be redirected to more serious students, evidence indicates that it could be very sizable amount. In the GAO's sampling alone, they found that 19.9 percent of the Department of Education aid recipients, 23.1 percent of the social security aid recipients, and 12.4 percent of the Veterans' Administration aid recipients had cumulative GPA's less than 2 (or a C average). Even if this figure is not truly representative of all 7,726 schools that have students receiving Federal assistance, it indicates that a significant portion of the \$7 billion spent on student aid could be used more effectively.

In closing, I think it is essential that Congress do all that is in its power to once again earn the respect and confidence of the American people for the manner in which we spend their tax dollars. Elimination of wasteful or inappropriate programs is only a part of the answer. The rest is in analyzing and reforming, where needed, the existing and valuable programs so that they are more cost effective and responsible in their use of tax dollars. This is the intent of the "Student Assistance Reform Act." I am pleased that Senator PELL, who is one of the most highly respected Members of this body for his knowledge and activity in the field of education, has understood the importance of maintaining integrity and responsibility in the Federal student aid programs for some time

now. In 1980, Senator PELL introduced an amendment which was in the same spirit as the legislation we are introducing today.

I encourage my colleagues to examine our proposal, for I am convinced that what we have put forth today is a judicious and fair approach to directing student assistance to those students which not only need it, but who are serious in their determination to make the most of their educational opportunity. ●

● Mr. PELL. Mr. President, I am very pleased to join my distinguished colleague from Oklahoma in introducing the Student Assistance Reform Act of 1982. We are both very concerned that the absence of specific academic standards for the receipt of Federal student aid can result in abuse of these important programs, and thus weaken the very valuable assistance they provide students who desire to pursue a postsecondary education but cannot afford it.

Last year the General Accounting Office examined 5,800 student transcripts at 20 postsecondary institutions across our Nation. The institutions ranged from 4-year private to 2-year proprietary schools. The results of the GAO survey, contained in the report entitled "Students Receiving Federal Aid Are Not Making Satisfactory Academic Progress: Tougher Standards Are Needed," indicated that many institutions have inadequate satisfactory progress standards and/or have failed to enforce the standards that they have in place.

The work of the GAO uncovered some glaring irregularities. For instance,

A student at a public, 4-year college received \$2,438 in Federal educational assistance over three quarters, during which his cumulative grade point averages were 0.44, 0.28, and 0.63.

A student at a public community college received \$2,215 in Pell grants over five semesters, successfully completing only 3 of 58 credit hours attempted with a 0.11 grade point average.

A student at a private, 4-year college received \$7,771 in Federal educational assistance over four semesters, with a cumulative grade point average of 0.76.

Overall, the GAO report estimated that about 20 percent of the Federal student aid recipients had less than a 2.0 grade point required for graduation, and about 10 percent had less than a 1.5 grade point.

Clearly, there is a need for Federal legislative action in this area. The bill we are introducing, however, is in no way punitive. It would simply insure that Federal student aid money would continue to be targeted not only to students with need but also who are serious and responsible in meeting their academic responsibilities. We believe it is an important proposal that

should most certainly become a part of current law for all Federal student aid programs within the Higher Education Act.

The background and history of the proposal which Senator NICKLES and I are offering today is one that merits your serious consideration. It demonstrates clearly that this is not a partisan issue, but a matter of prudent government.

The first satisfactory progress proposal was advanced by the Carter administration during the higher education hearings in October 1979. Dr. Mary Berry, then Assistant Secretary for Education in the Department of Health, Education, and Welfare, proposed on behalf of the administration that a student must successfully complete at least 50 percent of the course load undertaken using title IV aid during a given period of enrollment in order to be eligible for Federal aid in a subsequent period of enrollment. She also stipulated that this requirement would be waived for demonstrated hardship circumstances.

During the question and answer period that followed Dr. Berry's formal statement, I expressed my completed support for the idea that a student should have to maintain decent grades in order to receive Federal student aid. In fact, I thought the administration's proposed standard of 50 percent was too low.

In May 1980, when the full Senate passed S. 1839, the Education Amendments of 1980, included was a requirement, of which I was the principal proponent, that a student must successfully complete 75 percent of his or her academic course load to be eligible for assistance provided from Federal student aid programs. The legislation, however, did not define what constituted successful completion of a course, but left that decision up to the individual institution of postsecondary education.

Unfortunately, the provision in the Senate bill was dropped when the House and Senate Conferees met to consider and work out differences between the higher education legislation passed by each House.

Since passage of the 1980 amendments, I understand that the Department of Education has worked closely with representatives of the postsecondary education community to develop regulations that would require more specific standards of satisfactory progress. These efforts were designed to help insure the integrity of the Federal student aid programs while also preserving institutional discretion in setting specific standards.

I applaud the initiative that has taken place between the Department and the education community, but I must frankly and candidly say that this action is a case of too little, too late. It is encouraging, for example,

that the proposed rules stipulate that satisfactory progress must be the same as or stricter than the institution's standards for determining progress toward and successful completion of the educational objective. This would help avoid the situation cited in the GAO report where students remained eligible for Federal student aid even though the student was never required to maintain a grade point average that matched the institution's requirement for graduation.

As encouraging as these proposed regulations are, they simply do not go far enough. There is a need for a Federal standard that spells out specifically what a student must accomplish in terms of a grade averaged if he or she is to continue to receive Federal student assistance.

The issue in this matter is not one of institutional integrity, or interfering with the operation of institutions of postsecondary education. Rather, it is the question of an agreement which a student makes with the Federal Government when he or she accepts Federal student aid. I contend that the aid should be dependent upon the student's maintaining a satisfactory grade point average, which is the matter directly addressed in this legislation.

This is neither a new nor an intrusive step. Already we have a series of eligibility rules for student assistance programs in areas such as family income, a student's status as dependent or independent, and whether or not he or she is a full-time or part-time student. We have agreements concerning the repayment of loans. And we have limits on the amount of money a student can receive through a grant or loan. The legislation Senator NICKLES and I are proposing would simply add another requirement with respect to the level of academic work a student must maintain if he or she is to continue to be eligible for Federal student aid.

The Student Assistance Reform Act would apply to all Federal student aid programs included in title IV of the Higher Education Act of 1965, as amended. If a student after the first year of postsecondary work has less than a "C" average or its equivalent, then he or she would be placed on probation for the next grading period. If the student receives an average of "C" or better for the following grading period, then he or she would no longer be considered on probation and could continue to receive Federal student assistance.

Should the student earn less than a "C" average, however, he or she would be dropped from eligibility for the Federal student aid programs. Once dropped from eligibility, a student would have to earn a grade average of "C" or better for two consecutive

terms in order to become eligible once again to receive Federal student aid.

There is also an undue hardship clause in our legislation. It would allow a postsecondary institution to judge students with unusually severe situations, such as sudden death or illness in the family or particularly difficult personal or emotional problems, and allow them to continue to receive Federal student aid.

Mr. President, passage of this legislation will not only protect the integrity of the Federal student aid programs but also insure that public moneys spent on these programs are used wisely and well by the millions of recipients who benefit from them each year. I urge my fellow colleagues from both sides of the aisle to join Senator NICKLES and me in cosponsoring this important piece of legislation. ●

By Mr. STAFFORD:

S. 2823. A bill to amend title IV of the Social Security Act with respect to the treatment of earned income for purposes of the aid to families with dependent children program, and for other purposes; to the Committee on Finance.

WORK INCENTIVE ACT OF 1982

● Mr. STAFFORD. Mr. President, on May 31 of this year, I met in Montpelier, Vt. with a number of working mothers who recently have lost supplementary welfare benefits for themselves and their children. They are women who work for low wages in the only jobs available to them, and who, until early this year, were eligible for help under the work incentive provisions of the aid to families with dependent children (AFDC) program.

As a result of the 1981 Omnibus Reconciliation Act, there are 711 Vermonters, who have lost the incentives to work that were built into the AFDC program. Another 1,500 had their benefits substantially reduced, working severe hardships on themselves and their children. The Congressional Budget Office estimates that, because of the work disincentive created by the 1981 Reconciliation Amendments, working mothers in 100,000 to 120,000 AFDC families will leave their jobs and go completely on welfare.

I promised the women I met that night that I would begin work on a bill to restore work incentive benefits to our low-income working parents. Today, I am introducing the Work Incentive Act of 1982.

The AFDC work incentive amendments I am proposing will repeal the 4-month limit on provisions of the AFDC law that require States to disregard certain portions of income when calculating benefits. Under the limit, low-income working parents have lost all or part of their benefits after working for 4 months.

Without those small monthly checks and other benefits such as Medicaid,

many working parents are unable to meet the needs of their children. Some have stopped working already. Others are facing the hard choice of staying home with their children to regain benefits and ease their families' burdens, or keeping their jobs, while sacrificing such basic necessities as adequate food and medical care.

My amendments will require States to calculate AFDC eligibility according to a formula that will assure that a low-income working parent realized at least a small financial advantage for going out to work.

Specifically, my amendments will allow the amount of earnings used to calculate benefits to be reduced by 20 percent of gross income for working expenses. Monthly child care expenses, up to \$160 a month per child, will also be disregarded in determining income.

In addition, the first \$50 of monthly income, and one-third of net remaining income will be disregarded in calculating benefits. It is this provision that will make working at least slightly more profitable than not working.

Recently, my office was contacted by a business manager in Vermont, who said he has spent 2 years training a young mother who has lost her work incentive support. She needs \$150 a month to get by and the business is unable to pay it, so she will be quitting work to go on welfare.

The manager complained that this new form of federalism is counterproductive if he is to pay taxes to support someone who is not working.

I want to point out that, while the bill I am proposing will keep parents such as this one working and ease their financial hardships, it also will solve some of the basic problems that existed before the 1981 changes.

It maintains the cap on gross income, and it calculates the one-third provision on net rather than gross income. These significantly lower the amount of income a worker can have and still receive benefits.

The result of adopting my amendments will be a law that solves the basic problems the 1981 act was aiming at, while restoring benefits to the neediest of our working families, and most important, restoring the incentive to work.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2823

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Work Incentive Act of 1982".

TREATMENT OF EARNINGS

SEC. 2. (a) Section 402(a)(8) of the Social Security Act is amended to read as follows:

"(8) provide that, in making the determination under paragraph (7) with respect to any month, the State agency—

"(A) shall disregard all of the earned income of each dependent child receiving aid to families with dependent children who is (as determined by the State in accordance with standards prescribed by the Secretary) a full-time student, or a part-time student who is not a full-time employee, attending a school, college, or university, or a course of vocational or technical training designed to fit him for gainful employment;

"(B) shall disregard from the total earned income of any child who is claiming aid to families with dependent children, any relative who is claiming such aid, and any other individual (living in the same home as such relative and child) whose needs are taken into account in making such determination, the first \$50 of such total earned income for such month;

"(C) shall disregard from the total earned income of the persons specified in subparagraph (B) an amount equal to 20 percent of the total (determined prior to the application of subparagraph (B)) of any amounts received by such persons in such month as wages or salary or as net earnings from self-employment, plus the full amount of any costs incurred by them in producing self-employment income in such month;

"(D) shall disregard from the total earned income of the persons specified in subparagraph (B) an amount equal to the cost of care in such month for a dependent child, or an incapacitated individual living in the same home as the dependent child, receiving aid to families with dependent children and requiring such care for such month, to the extent that such amount does not exceed \$160 for any one such child or individual;

"(E) shall disregard from the total earned income of the persons specified in subparagraph (B) a standard amount equal to the average monthly cost of an employee contribution for a group health insurance policy or plan for a family in such State (as determined by the State); and

"(F) shall disregard from the total earned income of the persons specified in subparagraph (B) an amount equal to one-third of the amount of such earned income not already disregarded under subparagraph (B), (C), (D), or (E);

except that if a child who is one of the persons specified in subparagraph (B) is also included under subparagraph (A), no income of such child to which such subparagraph (A) applies shall be taken into account in applying subparagraph (B), (C), (D), (E), or (F); and except that (with respect to any month) the State agency—

"(F) shall not disregard, under subparagraph (B) or (F), any earned income of any one of the persons specified in subparagraph (B) if such person—

"(i) terminated his employment or reduced his earned income without good cause within such period (of not less than thirty days) preceding such month as may be prescribed by the Secretary;

"(ii) refusing without good cause, within such period preceding such month as may be prescribed by the Secretary, to accept employment in which he is able to engage which is offered through the public employment offices of the State, or is otherwise offered by an employer if the offer of such employer is determined by the State or local agency administering the State plan, after

notification by him, to be a bona fide offer of employment; or

"(iii) failed without good cause to make a timely report (as prescribed by the State plan) to the State agency of earned income received in such month;

"(G) shall not disregard, under subparagraph (B) or (F), any income derived from participation in a project maintained under the programs established by section 432 (b) (2) and (3); and

"(H) shall not disregard, under subparagraph (B) or (F), any earned income of any of the persons specified in subparagraph (B) if with respect to such month the income of the persons so specified was in excess of their need as determined by the State agency pursuant to paragraph (7) (without regard to subparagraphs (A), (B), and (F) of this paragraph), unless, for any one of the four months preceding such month, the needs of such person were met by the furnishing of aid under the plan;"

(b) Section 402(a)(17) of such Act is amended by striking out "paragraph (8)(A)(i) or (ii)" in the matter preceding subparagraph (A) and inserting in lieu thereof "paragraph (8) (A) or (B)".

TREATMENT OF EARNED INCOME CREDIT

Sec. 3. Section 402(d)(1) of the Social Security Act is amended to read as follows:

"(1) For purposes of paragraphs (7) and (8) of subsection (a), any refund of Federal income taxes made by reason of section 43 of the Internal Revenue Code of 1954 (relating to earned income credit) and any payment made by an employer under section 3507 of such Code (relating to advance payment of earned income credit) shall be considered earned income."

EFFECTIVE DATE

Sec. 4. The amendments made by this Act shall become effective on October 1, 1982; except that any of such amendments may, at the option of a State, be made effective in that State on any earlier date (on or after the date of the enactment of this Act) which the State may designate.●

By Mr. NUNN (for himself, Mrs. KASSEBAUM, Mr. QUAYLE, Mr. RANDOLPH, Mr. CRANSTON, Mr. LEVIN, Mr. SARBANES, Mr. CANNON, Mr. BURDICK, Mr. LEAHY, Mr. GLENN, Mr. DECONCINI, and Mr. MELCHER):

S.J. Res. 228. Joint resolution to provide for the designation of the week beginning on October 24, 1982, as "National Tourette Syndrome Awareness Week"; to the Committee on the Judiciary.

NATIONAL TOURETTE SYNDROME AWARENESS WEEK

● Mr. NUNN. Mr. President, today I am introducing legislation which would declare the week of October 23, 1982, as "National Tourette Syndrome Awareness Week."

There are many diseases which affect relatively few Americans, but when taken together they affect millions of our citizens. Huntington's disease, Myoclonus, Cystic Fibrosis, Muscular Dystrophy, Amyotrophic Lateral Sclerosis (Lou Gehrig's disease), and Tourette Syndrome are but a few examples.

The cosponsors of this bill are also cosponsors on another related bill, S.

2130, the Orphan Drug Act. Unfortunately, there are few if any commercial drugs available to treat most of these diseases. The primary reason for this lack of treatment is one of economics. There simply are not enough patients with each disease to make the development of drugs financially feasible for the pharmaceutical industry.

Drug companies, after all, are in business to make a profit. The research and development for a single new drug costs millions of dollars. Then, the company must follow the lengthy and costly process of getting approval from the U.S. Food and Drug Administration to put it in the market. If a company cannot forecast a profit at the end of this long road, then there is little incentive to invest the funds necessary to develop a new drug.

It is because there are so few sufferers of each disease—and hence so little financial incentive to develop new drugs to treat them—that we use the term "orphan drugs" to describe this situation. The Orphan Drug Act, S. 2130, is designed to reduce some of the economic barriers to the development of these new drugs. I and the other cosponsors hope that by setting aside the week of October 23 to learn more about one of these rare diseases, Tourette syndrome, we will better understand the problems facing the individuals and families with other rare diseases and appreciate their courage and strength.

The problems of finding treatments for these relatively rare diseases need our immediate attention. We hope that the chairman of the Senate Labor and Human Resources Committee will see the benefits of holding hearings on S. 2130, the Orphan Drug Act. These individuals and families deserve an opportunity to tell their stories and request the help of Congress in fighting these little understood diseases.

I ask that the following article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A DEBASING DISEASE TOO FEW RECOGNIZE (By Lawrence Galton)

For 10 years the boy had been on a medical merry-go-round—ever since at age 8, he was sent home from summer camp because of uncontrollable episodes of head-jerking. Other bizarre disturbances had followed: bouts of grunting, barking, jerking of neck and arms. He had been seen by more than a dozen physicians, diagnosed as suffering from severe emotional disorder, and subjected to many treatments, including years of psychoanalysis.

No treatment worked. The diagnosis was wrong.

It was wrong, too, to a 54-year-old man whose disturbances, much like the boy's had persisted for 37 years—complicated by uncontrollable outbursts of obscenities that could occur anywhere, anytime.

Today, both are free of symptoms after treatment for the real problem: Tourette syndrome, one of the most commonly misdiagnosed and mistreated disorders.

Says Dr. T. J. Murray, professor of medicine at Dalhousie University, Halifax, Nova Scotia: "The time from onset of symptoms to diagnosis averages 10 years, but undoubtedly, in many persons with this disorder, the correct diagnosis is never made."

A neurological rather than a mental or emotional illness, Tourette afflicts an unknown number. Some authorities believe at least 50,000 Americans are affected; some think the number may be far higher.

It always begins in childhood, may worsen, and can spoil lives of its victims—subjecting them to ridicule, turning many into recluses. It need not.

The first hint that such a strange disorder even existed came in 1825 when Dr. J.M.G. Itard, a French physician described the case of a young French noblewoman who, since the age of 7, had suffered from involuntary muscular tics or jerks and later gave vent to uncontrollable cursing. In 1885, Gilles de la Tourette, another French physician, reviewed her case and described eight others. Ever since, the disorder has borne his name.

Until very recently, it was considered a rarity. Medical texts gave it a paragraph. Few physicians had any idea of what it was like.

It affects three times as many boys as girls. The first indications, which usually appear between the ages of 2 and 16, are muscle twitching or tics around the eyes and face. Subsequently, shoulders, arms, legs and torso may be involved, often in complex and multiple jerking movements—brief, rapid, purposeless.

MORE THAN A TIC

These manifestations are often passed off as common habit spasms or nervous tics of childhood. Later, when the vocalizations appear, physicians, parents and teachers often think a serious psychoneurosis is present. The most frequent sounds are grunts, barking, throat clearing, repeated coughing. Some victims have noisy or irregular breathing; some tend to repeat what others have just said in tic-like fashion. Most striking is sudden cursing, which occurs in about 50 percent of patients; they experience a mounting inner tension relieved only by an outburst of obscenities.

Tourette victims have been subjected to diverse, even bizarre treatments: prolonged sipping of water, acupuncture, allergic desensitization, diets, chiropractic manipulation, electroshock, insulin coma, hypnotherapy, behavior modification, psychoanalysis.

It was Dr. Arther K. Shapiro, now clinical professor of psychiatry at Mount Sinai School of Medicine, New York City, who did much to change the picture for Tourette victims.

Almost 30 years ago, Shapiro, then a medical student, was browsing in a bookstore when he heard a string of curse words coming from behind a stack. To his astonishment, he found an attractive, well-dressed young woman examining books of poetry. She was obviously deeply interested and minding her own business but would suddenly, without apparent reason, unleash outbursts of obscene shouts.

He had no idea what was wrong. Nor when he did—many years later, as a practicing psychiatrist—he was confronted one day by a woman who entered his office grimacing, barking and cursing. She had come for psychotherapy. But when she wasn't manifesting her "crazy" symptoms, she wasn't at all emotionally disturbed.

Certain that psychotherapy would not help, Shapiro wondered whether any drug

might be of use. After checking into three dozen, he finally found one that had a dramatic effect, eliminating the woman's symptoms. The drug, haloperidol (trade-named Haldol), was the first of a new series of major tranquilizing agents for psychotic disorders. Even now, its precise mechanism has not been established.

By 1974, Dr. Shapiro and his wife, Dr. Elaine Shapiro, a psychologist, could report on the first 34 patients treated with the drug. In the majority, 90 percent of symptoms disappeared after a year. By 1976, the Shapiros and their colleagues, reported much the same results in a follow-up study of 78 patients. In 1978, after further successful experience, they published a textbook, *Gilles de la Tourette Syndrome*, for physicians.

Other investigators have also been reporting successful experiences. Of patients treated by Dr. Faruk S. Abuzzahab of Minneapolis, 89 percent have shown improvement. Dr. Gerald S. Golden of the University of Texas Medical Branch, Galveston, has treated a group of children for whom correct diagnosis had been delayed average of four years (the longest was 12 years). The majority of parents had been told it was simply a matter of tension and no specific treatment was needed. On haloperidol, 75 percent of the youngsters had good or excellent responses.

SIDE EFFECTS A PROBLEM

Haloperidol is no panacea. The drug can have side effects—muscular rigidity, fatigue, depression, motor restlessness. It should be administered expertly, starting with very small doses, gradually increasing to the point where there is maximum relief of symptoms and minimum side effects. It can take several months before that point is reached, and other medication may sometimes be needed to reduce side effects early in treatment when they are likely to be most troublesome.

Other treatments are under study, especially for those who do not respond to haloperidol. Lithium carbonate, often used for manic depressive illness, has shown promise in very limited trials. At Toronto's Clark Institute of Psychiatry, Dr. Harvey Moldofsky has been finding an experimental agent, pimozide, useful for some patients. Early trials by Dr. Michael Feinberg of University Hospital, Ann Arbor, Mich., suggest apomorphine may have value.

At New York University Medical Center, Dr. Arnold Friedhoff gave L-dopa, a drug sometimes used for shaking palsy, to two patients, aged 11 and 14, who had failed to respond to haloperidol or could not tolerate it. After L-dopa led to a worsening of symptoms, it was stopped, whereupon the symptoms improved greatly and remained improved for months, then returned gradually. Resumption of L-dopa and its withdrawal again resulted in improvement. It may be possible, with further study, to avoid the transient worsening of symptoms if haloperidol and L-dopa are given simultaneously at the beginning of treatment.

So the outlook for Tourette victims promises to brighten further. But there's a vital need for understanding of the disorder and for early diagnosis.

Tourette symptoms are often viewed as bizarre and frightening, they provoke ridicule. Some teachers cannot tolerate children with the syndrome in class because their movements and noises are disruptive. Many youngsters are either taught at home or sent to special classes or schools. Children who remain in a normal school situation are

often made to feel miserable. "Parents, too," says Dr. Arthur K. Shapiro, "are frequently overwhelmed by the strangeness of their child's behavior. This is especially evident when coprolalia (cursing) is present. The child may be threatened, excluded from family activities and prevented from enjoying normal interpersonal relationships. These difficulties may become greater as the child becomes a teenager and his symptoms are mistaken for drug-induced behavior. Early diagnosis and treatment are urgent if the child is to avoid psychological harm. The longer he is subjected to others' belief that he is different or crazy, the more likely he is to believe it. Early diagnosis is especially important, since it is now possible to control symptoms."

HELP AVAILABLE

Anyone who knows of a Tourette victim should contact the Tourette Syndrome Association at 41-02 Bell Blvd., Bayside, N.Y. 11361. Formed in 1973 by a group of nine parents of afflicted children, it now has a membership of 4000. There are 30 parent-child groups across the country and more being formed, plus a new Canadian affiliate in Toronto.

The voluntary, nonprofit association is working to educate both the public and physicians about the disease. It holds exhibits at medical conventions and membership meetings several times a year to provide information about recent research and treatment. It also publishes literature and a newsletter listing names of physicians and centers throughout the country with expertise in treating Tourette syndrome.●

ADDITIONAL COSPONSORS

S. 27

At the request of Mr. DOLE, the names of the Senator from Iowa (Mr. GRASSLEY), and the Senator from Oklahoma (Mr. BOREN) were added as cosponsors of S. 27, a bill to amend the Internal Revenue Code of 1954 to make permanent the allowance of a deduction for eliminating architectural and transportation barriers for the handicapped and to increase the amount of such deduction from \$25,000 to \$100,000.

S. 1368

At the request of Mr. HUMPHREY, the name of the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 1368, a bill to amend the Internal Revenue Code of 1954 to provide that services performed for camps by certain students who generally are not eligible to receive unemployment compensation will not be subject to the Federal unemployment tax.

S. 1918

At the request of Mr. SPECTER, the name of the Senator from Connecticut (Mr. WEICKER) was added as a cosponsor of S. 1918, a bill to establish the Northeast-Midwest States Federal Hydropower Financing Authority.

S. 2130

At the request of Mrs. KASSEBAUM, the name of the Senator from Kentucky (Mr. FORD) was added as a cosponsor of S. 2130, a bill to amend the Federal Food, Drug, and Cosmetic Act

to facilitate the development of drugs for rare diseases and conditions, and for other purposes.

S. 2513

At the request of Mr. BAUCUS, the name of the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of S. 2513, a bill to require the Secretary of Agriculture to make land diversion payments for the 1982 crops of wheat, feed grains, cotton, and rice and to establish acreage limitation programs for the 1983 through 1985 crops of wheat, feed grains, and cotton if producers approve such programs or if carryovers of such crops reach certain levels, and for other purposes.

S. 2585

At the request of Mr. CRANSTON, the names of the Senator from Alabama (Mr. HEFLIN), the Senator from Oklahoma (Mr. BOREN), the Senator from Washington (Mr. JACKSON), and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of S. 2585, a bill to provide that the Armed Forces shall pay benefits to surviving spouses and dependent children of certain members of the Armed Forces who die from service-connected disabilities in the amounts that would have been provided under the Social Security Act for amendments made by the Omnibus Budget Reconciliation Act of 1981.

S. 2598

At the request of Mr. McCURE, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 2598, a bill to provide for the disposal of silver from the National Defense Stockpile through the issuance of silver coins.

S. 2634

At the request of Mr. NICKLES, the names of the Senator from Indiana (Mr. QUAYLE), the Senator from Utah (Mr. GARN), the Senator from Utah (Mr. HATCH), the Senator from South Carolina (Mr. THURMOND), and the Senator from North Carolina (Mr. EAST) were added as cosponsors of S. 2634, a bill to amend section 14(c)(3) of the Fair Labor Standards Act of 1938, to permit the employment of handicapped and severely handicapped individuals in common areas, to permit the employment of handicapped individuals in demonstration projects, and for other purposes.

S. 2659

At the request of Mr. SASSER, the name of the Senator from Nebraska (Mr. EXON) was added as a cosponsor of S. 2659, a bill to amend the Social Security Act to provide that disability benefits may not be terminated prior to completion of the reconsideration process including an evidentiary hearing, to provide that medicare entitlement shall continue through the administrative appeal process, and to require the Secretary of Health and Human Services to make quarterly re-

ports with respect to the results to periodic reviews of disability determinations.

S. 2734

At the request of Mr. HUMPHREY, the names of the Senator from North Carolina (Mr. EAST), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Florida (Mrs. HAWKINS) were added as cosponsors of S. 2734, a bill to amend the Federal Food, Drug, and Cosmetic Act to provide the Food and Drug Administration with power to enjoin the distribution of forged or counterfeit drugs.

S. 2735

At the request of Mr. HUMPHREY, the names of the Senator from North Carolina (Mr. EAST), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Florida (Mrs. HAWKINS) were added as cosponsors of S. 2735, a bill to amend title 39 of the United States Code to provide that drug abuse oriented advertisements and shipments of drugs in response to drug abuse oriented advertisements shall be nonmailable matter.

S. 2736

At the request of Mr. HUMPHREY, the names of the Senator from North Carolina (Mr. EAST), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Florida (Mrs. HAWKINS) were added as cosponsors of S. 2736, a bill to make it unlawful to manufacture, distribute, or possess with intent to distribute, a drug which is an imitation of a controlled substance or a drug which purports to act like a controlled substance.

S. 2742

At the request of Mrs. HAWKINS, the names of the Senator from New Mexico (Mr. SCHMITT), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 2742, a bill to establish the U.S. Capitol Page Board for supervision and education of congressional pages, and for other purposes.

S. 2784

At the request of Mr. DECONCINI, the name of the Senator from Wisconsin (Mr. PROXMIER) was added as a cosponsor of S. 2784, a bill to clarify the application of the antitrust laws to professional team sports leagues, to protect the public interest in maintaining the stability of professional team sports leagues, and for other purposes.

S. 2807

At the request of Mr. ROBERT C. BYRD, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 2807, a bill to amend the Federal Reserve Act.

SENATE JOINT RESOLUTION 97

At the request of Mr. MITCHELL, the names of the Senator from Tennessee (Mr. BAKER), the Senator from Kentucky (Mr. FORD), the Senator from Arkansas (Mr. BUMPERS), the Senator

from Arkansas (Mr. PRYOR), and the Senator from Ohio (Mr. GLENN) were added as cosponsors of Senate Joint Resolution 97, a joint resolution to designate the second full week in October as "National Legal Secretaries' Court Observance Week."

SENATE JOINT RESOLUTION 159

At the request of Mr. ROTH, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of Senate Joint Resolution 159, a joint resolution entitled the "White House Conference on Productivity Act."

SENATE JOINT RESOLUTION 206

At the request of Mr. BENTSEN, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of Senate Joint Resolution 206, a joint resolution entitled "The Flat Rate Income Tax Resolution."

SENATE JOINT RESOLUTION 226

At the request of Mr. COCHRAN, the names of the Senator from Mississippi (Mr. STENNIS), the Senator from Arizona (Mr. GOLDWATER), the Senator from Arkansas (Mr. PRYOR), the Senator from Utah (Mr. HATCH), the Senator from Tennessee (Mr. SASSER), the Senator from North Carolina (Mr. HELMS), the Senator from Arizona (Mr. DECONCINI), the Senator from South Carolina (Mr. THURMOND), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from South Dakota (Mr. ABDNOR), the Senator from Oklahoma (Mr. BOREN), the Senator from New Mexico (Mr. SCHMITT), the Senator from Alabama (Mr. HEFLIN), the Senator from Indiana (Mr. LUGAR), the Senator from Nevada (Mr. CANNON), and the Senator from Nevada (Mr. LAXALT) were added as cosponsors of Senate Joint Resolution 226, a joint resolution to authorize and request the President to designate October 1, 1982, as "American Enterprise Day."

SENATE RESOLUTION 393

At the request of Mr. PRESSLER, the name of the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of Senate Resolution 393, a resolution expressing the sense of the Senate that the Secretary of Agriculture should promptly call for a section 22 study on honey imports.

AMENDMENT NO. 2014

At the request of Mr. SCHMITT, the names of the Senator from New Mexico (Mr. DOMENICI), the Senator from Nevada (Mr. LAXALT), the Senator from Arizona (Mr. DECONCINI), the Senator from Montana (Mr. BAUCUS), and the Senator from Nevada (Mr. CANNON) were added as cosponsors of Amendment No. 2014 intended to be proposed to H.R. 6863, a bill making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENTS SUBMITTED FOR PRINTING

IMMIGRATION REFORM AND REVISION ACT

AMENDMENT NO. 2017

(Ordered to be printed and to lie on the table.)

Mrs. HAWKINS submitted an amendment intended to be proposed by her to the bill (S. 2222) to revise and reform the Immigration and Nationality Act, and for other purposes.

HOUSING, COMMUNITY, AND NEIGHBORHOOD DEVELOPMENT

AMENDMENT NO. 2018

(Ordered to be printed and to lie on the table.)

Mr. SCHMITT submitted an amendment intended to be proposed by him to the bill (S. 2607) to amend and extend certain Federal laws relating to housing, community, and neighborhood development, and related programs, and for other purposes.

● Mr. SCHMITT. Mr. President, today I am submitting an amendment to title V of S. 2607, which modifies the Farmers Home Administration housing programs and proposes a rural housing block grant. These provisions accommodate some of the major concerns expressed by the Department of Agriculture, the Office of Management and Budget, Members of Congress, and rural interest groups.

The incorporation of these amendments will result in a comprehensive, workable rural housing block grant program which will improve the delivery of housing services to rural families. This program which is now strongly endorsed by the administration, embraces our common goal of providing adequate, safe, and sanitary housing for very low income rural residents. This is accomplished in a manner which is consistent with congressional budget and policy objectives and significantly furthers the concept of New Federalism by building a positive working partnership between the Federal Government and the States without excessively burdening either.

The most significant provision in this amendment insures that there is no lapse in the availability of housing assistance to the rural poor while the block grant program is implemented. During this transitional period, FmHA is authorized to make subsidized loans for the construction and rehabilitation of single family housing. Funding for this subsidized lending activity will be available for up to 9 months following the enactment of S. 2607 and will be provided by deobligating unused funds set aside for single and multifamily units in preceding fiscal years, and by carrying over uncommitted fiscal year 1982 funds. We estimate that this will provide up to \$700 million for subsi-

dized single family housing. This increase in funding is still well within the budgetary limitations agreed to by the Budget Committee and does not change proposed fiscal year 1983 appropriations.

During this transitional period, \$5 million in technical assistance funds will be available to States that have indicated an interest in participating in the block grant program. This money would enhance States' capacity to plan and develop programs that meet the varied housing needs of their rural constituents during this 9-month period.

The amendment also sets a time table for the development of FmHA regulations and requires States to submit a final statement of activities to the Secretary by July 15 if they intend to participate in the block grant program. This provision intends to give FmHA adequate time to develop regulations while allowing participating States to receive funding and begin to actively plan a local program as soon as possible.

The definition of "very low income" has been changed from 50 percent of area median income to allow an adjustment for smaller and larger families. In order to provide States with a degree of flexibility in designing and administering housing programs, the Secretary may give States the ability to use up to 20 percent of their block grant funding to assist rural residents with incomes up to 80 percent of median. This will allow States to broaden the scope of their programs, and increase their ability to leverage funds; stretching the impact of Federal dollars.

Title V of S. 2607 allows for the renewal of all interest credit contracts, which reduce the interest rate paid on single family homes to as low as 1 percent. This amendment goes beyond this authority by allowing the Secretary to make interest credit agreements with existing borrowers that currently have unsubsidized FmHA loans and have encountered situations of economic hardship which make them unable to repay their loans. FmHA would also have the ability to make a new interest credit contract with an eligible family that assumes the loan of a FmHA subsidized home.

Part C of title V, giving Congress the authority to review all rules and regulations related to the rural housing block grant, is eliminated by this amendment. This authority would be granted under S. 1080, as passed by the Senate, which is pending in the House of Representatives. It should be noted that this amendment also specifically grants FmHA the authority to administer the block grant program.

This amendment, which contains these and other clarifying provisions,

is the result of a concerted effort made by the FmHA, the OMB, myself, and staff to devise a sound program which will meet our shared goals and objectives for housing the rural poor. This rural housing legislation possesses the potential to benefit a very low income population that has been virtually overlooked by the Federal Government's housing assistance programs. The rigid and outdated structure of existing housing programs has prevented Federal resources from reaching very low income families and I have proposed an alternative which would redirect our funds to meet these severe and increasing needs.

This amendment has strengthened the potential this legislation holds for assisting the needy families living in our rural areas. I hope that you will support and endorse title V of S. 2607, as amended when it is addressed on the floor of this Chamber.

Mr. President, I ask unanimous consent that the amendment and a letter from the Director of the Office of Management and Budget and the Secretary of Agriculture be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows.

AMENDMENT NO. 2018

On page 114, line 22, before the semicolon, insert the following: "or, in the case of a transfer or an assumption, a different borrower who is eligible for interest credits".

On page 114, line 22, strike out "and".

On page 115, line 2, strike out the period and insert in lieu thereof "; and".

On page 115, between lines 2 and 3, insert the following:

"(iii) the Secretary may enter into an interest credit contract with respect to a single family dwelling which is inhabited by a borrower to whom the loan was made prior to such effective date and who is suffering economic hardship, if the Secretary determines that additional assistance in the form of credits is necessary to reduce the effective interest rate to a level sufficient to allow maintenance of mortgage payments by the borrower but not to less than 1 per centum per annum."

On page 115, strike out lines 3 through 13 and insert in lieu thereof the following:

"(C)(i) Any contract for interest credits entered into under this section with a borrower under section 502 shall provide that the borrower shall contribute not less than 30 per centum of his income for debt service, except that the contribution of a borrower receiving such assistance prior to the effective date of the National Rural Housing Act shall not increase as a result of this subsection or any other provision of Federal law or Federal regulation by more than 10 per centum during any twelve-month period, unless the increase above 10 per centum is attributable to increases in income which are unrelated to this subsection or other law, or regulation."

"(ii) In the case of loans under sections 514 and 515 approved prior to the effective date of the National Rural Housing Act with respect to which rental assistance is provided, the rent for tenants receiving such assistance shall not exceed 30 per centum of income. In the case of a section 515 loan ap-

proved prior to the effective date of the National Rural Housing Act with respect to which interest credits are provided, the tenant's rent shall not exceed the greater of 30 per centum of income or the rent level established on a basis of a 1 per centum interest rate on debt service. No rent for a unit financed under section 514 or 515 shall be increased as a result of this subsection or other provision of Federal law or Federal regulation by more than 10 per centum in any twelve-month period, unless the increase above 10 per centum is attributable to increases in income which are unrelated to this subsection or other law, or regulation.

"(D) Notwithstanding any other provision of section 526 of the National Rural Housing Act, a State, or the Secretary in a State where the Secretary is distributing funds under section 527(d) of such Act, may use grant funds to assist families under current or renewed interest credit contracts with the Secretary when such families as a result of this subsection are required to pay an amount greater than 30 per centum of income. Such assistance may be used to reduce the effective payment by the family to a level of 30 per centum of income."

On page 117, line 13, after "loan" insert "under this subsection".

On page 118, line 22, after "Sec. 516." insert "(a)".

On page 119, between lines 6 and 7, insert the following:

(b) Section 526 of such Act is amended by adding at the end thereof the following:

"(e) The Secretary shall make or insure a loan under this section if he determines that the project or units to be financed are comparable to or lower in cost on a per unit basis than single family detached units in the same area, taking into account management and other condominium fees, and if the project or units otherwise meet the requirements of this title."

On page 121, between lines 21 and 22, insert the following:

UNDERWRITING FACTORS

SEC. 518. Section 501 of the Housing Act of 1949 is amended by adding at the end thereof the following:

"(h) In carrying out his functions under this title and in determining whether to approve a proposal for assistance under this title, the Secretary shall take into account energy costs, management expenses, and other operating expenses of the proposed project or unit."

On page 123, strike out lines 14 through 18 and insert in lieu thereof the following:

"(i) the term 'very low income residents' means those rural residents having a total income of not more than 50 per centum of State rural median income, with adjustments for smaller and larger families;"

On page 133, between lines 19 and 20, insert the following:

"(f) Upon request by the State, the Secretary may authorize up to 20 per centum of the funds received by a State to be used to assist rural residents with total income of more than 50 per centum of state rural median income but not in excess of 80 per centum of state rural median income, with adjustments for larger and smaller families."

On page 124, line 16, strike out "community association."

On page 125, line 8, after "Sec. 524." insert "(a)".

On page 125, between lines 17 and 18, insert the following:

"(b) The Secretary is authorized to prescribe such rules and regulations and make such delegations of authority as he deems necessary to carry out this part."

On page 138, between lines 14 and 15, insert the following:

TRANSITIONAL PROVISIONS

Sec. 532. (a) The Secretary shall assure that assistance under this part is made available in accordance with this section in a timely and expeditious manner.

(b)(1) Not later than December 1, 1982, the Secretary shall make appropriate technical assistance available to States which have indicated a desire to receive such assistance in order to determine the practicality of their participation in the block grant program under this part. For the purpose of this paragraph, the Secretary may utilize not to exceed \$5,000,000 of the funds available to carry out this part during each of the fiscal years 1983, 1984, and 1985.

(2) Not later than April 1, 1983, the Secretary shall publish proposed regulations implementing the provisions of this part.

(3) Not later than May 15, 1983, States desiring to participate in the block grant program under this part shall so indicate to the Secretary.

(4) Not later than July 1, 1983, the Secretary shall publish final regulations implementing the provisions of this part.

(5) Not later than July 15, 1983, each State desiring to participate in the block grant program under this part shall submit a final statement of activities to the Secretary in accordance with the provisions of section 525. Assistance shall be made available as provided in this part as soon as is practicable after the receipt of the final statement of activities.

(c) Notwithstanding any other provision of law, any funds appropriated or otherwise made available to carry out any program under title V of the Housing Act of 1949 prior to October 1, 1982, but which are not obligated on October 1, 1982, or which are deobligated on or after October 1, 1982, shall remain available for obligation under sections 502 and 504 of such Act (as such sections were in effect immediately prior to the enactment of this Act) until July 1, 1983. The total amount of funds which may be obligated under this subsection shall be determined by the Secretary. Any funds not obligated in accordance with the provisions of this subsection prior to July 1, 1983, shall be paid into the Treasury as miscellaneous receipts.

On page 138, line 16, strike out "Sec. 532." and insert in lieu thereof "Sec. 533."

Beginning with page 138, line 18, strike out all through page 152, line 2.

Amend the table of contents accordingly.

THE WHITE HOUSE,

Washington, July 30, 1982.

HON. HARRISON SCHMITT,
Chairman, Subcommittee on Rural Housing
and Development, Committee on Bank-
ing, Housing, and Urban Affairs, U.S.
Senate, Washington, D.C.

DEAR MR. CHAIRMAN: We are pleased to inform you that the Administration supports your efforts to reform and restructure the Farmers Home Administration's rural lending programs. We hope that the Congress will act expeditiously to adopt the provisions of Title V of S. 2607, as modified by the Committee amendments.

The rural housing block grant program authorized in S. 2607 is fully consistent with the Administration's policy and budget goals. It would extend the concept of feder-

alism while recognizing the necessity for fiscal restraint. Most important of all, the Committee proposal would redirect Federal assistance to meeting the needs of very low income rural residents.

We especially wish to thank the Committee for its willingness to work closely with the Administration in devising an appropriate transition mechanism to the new program and in making a number of other changes in the legislation.

The Administration is confident that Title V of S. 2607 will improve the delivery of housing assistance to rural areas in a manner that is fully in keeping with our common goals. We look forward to successful implementation of this legislation.

Sincerely,

JOHN R. BLOCK,
Secretary of Agriculture.

DAVID A. STOCKMAN,
Director, Office of Management and
Budget.

IMMIGRATION REFORM AND REVISION ACT

AMENDMENT NO. 2019

(Ordered to be printed and to lie on the table.)

Mr. HAYAKAWA submitted an amendment intended to be proposed by him to the bill (S. 2222) to revise and reform the Immigration and Nationality Act, and for other purposes.

SUPPLEMENTAL APPROPRIATIONS, 1982

AMENDMENT NO. 2020

(Ordered to be printed.)

Mr. SYMMS proposed an amendment to the bill (H.R. 6863) making supplemental appropriations for the fiscal year 1982, and for other purposes.

NOTICES OF HEARINGS

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH, AND RULES

Mr. DANFORTH. Mr. President, the Subcommittee on Federal Expenditures, Research, and Rules of the Committee on Governmental Affairs has scheduled a hearing on S. 1782, the Small Business Contract Payment Procedures Act. The hearing has been scheduled for Wednesday, August 18, 1982, commencing at 9:30 a.m. It is to be held in room 3302 of the Dirksen Senate Office Building.

The subcommittee has invited witnesses to provide testimony on this bill, which eliminates the automatic retainage of a portion of progress payments due Government contractors. S. 1782 authorizes such retainage only in cases where the Government's contracting officer finds inadequate contractor performance.

The subcommittee encourages the submission of written testimony by any interested person. Written submissions should be addressed to the Subcommittee on Federal Expenditures, Research, and Rules, 128 C Street NE., Room 44, Washington, D.C. 20510. For

additional information, interested persons should contact William B. Montalto, procurement policy counsel for the subcommittee, or its chief clerk, Pat Otto, at 202-224-0211.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I wish to announce that confirmation hearings have been scheduled on pending nominations before the Senate Committee on Agriculture, Nutrition, and Forestry on Tuesday, August 17.

The committee will consider first the nomination of Wilmer D. Mizell to be Assistant Secretary for Governmental and Public Affairs at the U.S. Department of Agriculture. Following his hearing, the committee will receive testimony on Tom H. Carothers and Leonard R. Fouts to be members of the Federal Farm Credit Board of the Farm Credit Administration.

The hearings will begin at 10 a.m. in room 324 Russell Senate Office Building.

Anyone wishing to testify should contact Denise Alexander or Martha Amburn at 224-2035.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Subcommittee on Export Promotion and Market Development will conduct a hearing to "Consider the Obstacles Faced by Small Business Exporters," on August 19, 1982, in room 424 of the Russell Senate Office Building beginning at 9:30 a.m. Senator BOSCHWITZ will chair. For further information contact Anne Sullivan of the committee staff at 224-3188.

SUBCOMMITTEE ON FORESTRY, WATER RESOURCES, AND ENVIRONMENT

Mr. HAYAKAWA. Mr. President, as chairman of the Senate Agriculture Subcommittee on Forestry, Water Resources, and Environment, I wish to announce that hearings have been scheduled on S. 2805 which would provide for the orderly termination, extension, or modification of certain contracts for the sale of Federal timber.

The hearing will be held on Thursday, August 12, beginning at 9:30 a.m. in room 324 Russell Building.

Anyone wishing further information should contact Denise Alexander or Martha Amburn at 224-2035.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands and Reserved Water, of the Committee on Energy and Natural Resources, be authorized to meet during the session of the Senate on Wednesday, August 11, at 2

p.m., to consider H.R. 5161, a bill dealing with West Virginia wilderness.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON TRANSPORTATION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Transportation, of the Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Tuesday, August 10, at 2 p.m., to hold an oversight hearing on highway revenue and cost allocation issues.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AGRICULTURE RESEARCH AND GENERAL LEGISLATION

Mr. TOWER. Mr. President, I ask unanimous consent that the Subcommittee on Agriculture Research and General Legislation, of the Committee on Agriculture, Nutrition, and Forestry, be authorized to meet during the session of the Senate on Wednesday, August 11, at 10 a.m., to hold a hearing to consider S. 2348, the Meat, Poultry, and Egg Products Inspection Amendments of 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

TRIBUTE TO VICE PRESIDENT GEORGE BUSH AND THE SOUTH FLORIDA TASK FORCE

● Mrs. HAWKINS. Mr. President, in 1980, sales of cocaine and marijuana in the United States totaled at least \$45 billion. About 70 percent of that illegal traffic came through south Florida. This enormous illegal industry was responsible for the growth in violent, drug-related crime. Miami had become the national port-of-entry for a flood of illegal drugs and the "Murder Capital" of America, with over 614 murders in Dade County during 1980. This was an increase of 60 percent over the previous year. The FBI crime statistics showed that of the top 11 crime-plagued communities in the United States, 6 are now in Florida.

President Reagan responded forcefully by creating a Federal South Florida Task Force under the direction of Vice President GEORGE BUSH. Under Vice President BUSH's effective leadership, the South Florida Task Force has taken massive and multifaceted action against international drug trafficking.

The task force is using military resources and intelligence. For the past 5 months, drug smugglers have been confronted with a sophisticated network of Navy E-2C Mini-AWACS radar planes and stationary radar. Navy destroyers in the Caribbean carry Coast Guard teams that board and capture suspicious boats. The Army has loaned the Customs Service

two Cobra helicopter gunships that are especially effective in tracking and intercepting smugglers' planes. Additionally, FBI forces and Coast Guard patrols have been provided with needed funding and manpower. Two hundred and fifty DEA agents and Customs officers and 45 firearms agents have also been posted to south Florida, along with more than a dozen more U.S. attorneys and Federal judges.

The President's initiative and the Vice President's leadership has had a significant impact on drug smuggling and drug-related crime. During the past 5 months, the Coast Guard has seized 104 vessels and 1.6 million pounds of marijuana—compared with 129 vessels and 1.7 million pounds all last year. During the past 2 months, not a single new plane load of illegal drugs has been sighted, and experts believe that smugglers are stockpiling. Wholesale prices of cocaine in Colombia have dropped by 25 percent to \$15,000 a kilo, while U.S. prices have significantly increased.

As chairman of the Senate Drug Enforcement Caucus, I want to take this opportunity to applaud the outstanding leadership of Vice President GEORGE BUSH.

I ask that the following article from the August 5, 1982, Wall Street Journal be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Aug. 5, 1982]

NARCOTICS DRIVE: JOINT AGENCY EFFORT IS CURBING SMUGGLING OF DRUGS INTO FLORIDA (By Stanley Penn)

MIAMI.—It seemed to be just another fishing boat returning to Miami from Bimini in the Bahamas, but there was something a bit odd about the two fishermen: One was wearing a Pierre Cardin pullover and the other a Sassoon jacket.

This was enough to rouse the suspicions of U.S. Customs Service agent Keith Deerman, and a search of the boat turned up a concealed floor compartment stuffed with 1,000 pounds of marijuana.

The case of the overdressed fishermen is just one of a growing number of drug-enforcement success stories coming out of South Florida since the federal government started a multi-agency crash effort five months ago to seal this area's porous defenses against the drug traffic. In recent years more than 70 percent of the cocaine and the marijuana smuggled into the U.S. are believed to have come through South Florida's coves, inlets and out-of-the-way landing strips for aircraft.

To battle the smugglers, Customs has increased its patrol-boat surveillance of South Florida to 24 hours a day from 12 hours previously. Three high-speed Army helicopters, together with at least two Navy radar planes, have been thrown into the fray. A blimp, dubbed Fat Albert, with a radar reach of 150 miles is patrolling for drug planes near Key West, and a second Fat Albert is planned for Patrick Air Force base, farther north.

ADDED MANPOWER

Below Florida, four Coast Guard cutters are trying to choke off the main shipping

lanes for drug boats that come up from South America. Meanwhile, the Federal Bureau of Investigation, the Drug Enforcement Administration and the Customs Service have permanently added 160 investigators to their local staffs, and a separate team of Customs-DEA agents from all over the U.S. has been in Miami on temporary assignment since March 15 to disrupt the major dope rings' financing and distribution activities.

The results of this concerted effort have been clearly discernible. Cmdr. Gary Nelson, a Coast Guard official in Miami, says that Coast Guard cutters in South Florida have seized 1.6 million pounds of marijuana in the first six months of this year—almost as much as the 1.7 million pounds confiscated in all of 1981. The wholesale price of cocaine in South Florida has jumped \$5,000 a kilo to \$60,000. At the other end of the pipeline, in Colombia, the price to wholesalers who go there to get supplies has sagged to \$10,000 a kilo from \$15,000, reflecting the increasing difficulty of moving the drug to Florida, according to Allan Pringle, a DEA official in Miami.

Marijuana supplies, too, are shrinking in Florida. Reflecting this, the price paid by wholesalers in the Miami area has gone up as much as \$40 a pound to as high as \$300 a pound, Mr. Pringle says.

IMPACT ON BANK DEPOSITS

Many of Colombia's drug traffickers live in Miami and deposit their drug proceeds in Miami-area banks. The result has been that year after year the area banks have experienced a huge cash surplus running into hundreds of millions of dollars. This year to date, the surplus is down 17% from a year ago, according to the Treasury Department. The squeeze on profits of the drug dealers is believed to be one reason, although the effect of the current recession also has to be reckoned with.

Some 93 federal indictments involving 209 defendants have resulted since the Customs-DEA enforcement team began its criminal investigations five months ago, says Stanley Marcus, U.S. attorney in Miami. His office is being increased by 22 permanent and temporary prosecutors partly to handle the increased courtroom load. In addition, Mr. Marcus says, the federal court in Miami is adding four judges on temporary assignment.

Narcotics agents believe that the international drug traders are lying low in the hope that the government will abandon its emergency effort. "We see large numbers of aircraft parked in the Bahamas," says the DEA's Mr. Pringle. "We suspect they're sitting there trying to outwait us."

VICE PRESIDENT BUSH'S PROJECT

How long the feds will keep up the pressure is a matter of concern in Miami. Much of the killing and the shooting that has outraged the community in recent years has been linked to drug wars between rival gangs. This violence has noticeably decreased since the anti-drug effort began. At a recent congressional hearing, Rep. Dante Fascell, a Florida Democrat, said that the traffickers "are sitting on their front porches, drinking bourbon and waiting for the heat to die down."

A South Florida Task Force, headed by Vice President George Bush, is directing the multi-agency effort. Adm. Daniel Murphy, Mr. Bush's chief of staff and head of the task force's working group, says he is repeatedly asked how long the task force will stay. "We're here for the long haul," he

says. "No way we are going to walk away." Adm. Murphy contends that the emergency effort is resulting in little, if any, added federal costs, because the manpower and the resources have largely been pulled in from other districts.

One unwanted effect, however, could be a shift of the smuggling problem to other areas of the country, along the coast of Georgia, the Carolinas and points north and to Louisiana, Texas and California to the west. "It's going to mean a longer, more costly haul, but the profits are so big the smugglers are prepared to do it," a narcotics agent says.

Last month, for example, authorities grabbed 40 tons of marijuana at a Newark, N.J., pier—one of the first major seizures outside of Florida since the start of the blockade. The dope was being unloaded in a tractor-trailer from a 110-foot freighter, which authorities suspect came from northern Colombia.

Ted Hunter, the special agent in charge of the DEA's Los Angeles division, is receiving information that traffickers may be moving so-called mother ships loaded with drugs up Mexico's west coast for delivery to U.S. cities on the West Coast. "Seattle, San Francisco and Los Angeles are all actively involved in mother-load investigations," Mr. Hunter says.

To circumvent the air blockade, smugglers also are making increasing use of couriers to sneak small shipments of cocaine into Florida on commercial airliners. A favorite tactic for the courier is to grease his throat with vegetable oil and swallow tiny rubber packets of cocaine for evacuation after he leaves the airport.

TAKING A BIG RISK

"We had one recent example of a guy who had 67 (cocaine) condoms in his body," says Mr. Pringle of the DEA. After he was seized by federal agents, the courier was brought to a hospital where the drugs were removed. "If one condom had broken inside him, he would have died," Mr. Pringle says.

Because planes are finding it hard to get through, cocaine increasingly is being disguised in commercial shipments flown in by legitimate air-freight carriers. Arthur Nehrbass, who heads the organized-crime bureau of the Metro Dade (Miami-area) Police Department, says his agents recently overheard suspects discussing on the phone the possibility of "buying a starch factory in Costa Rica and putting cocaine in starch barrels" for shipment to Florida through commercial channels.

Single- and twin-engine piston planes have been traditionally used by smugglers to sneak in drugs from South America and the Bahamas. These slow-moving, low-flying craft often are able to evade the law-enforcement radar planes. But the introduction of Navy Hawkeye radar planes has partly nullified the smugglers' advantage. "They give us the downward-looking range to cover those blind spots," says Robert N. Battard, the Customs Service's regional commissioner in Miami. "These planes give us (radar) coverage of 240 miles. Our standard coverage is 40 miles."

The Customs Service also is benefiting from the addition of three Army Cobra helicopters, formerly used in Vietnam. The Cobras are speedy and highly maneuverable, capable of overtaking slow-moving drug planes, landing next to them and blocking the smugglers' escape. In the past, Customs had to rely on fixed-wing aircraft. Such planes could force down the suspect craft, but often the pilot and the crew had

escaped by the time the Customs plane landed. "Our arrest rate has gone from 42% to 100% with the addition of the helicopters," according to Mr. Battard.

In zeroing in on the drug planes, the feds have imposed new restrictions on private aircraft that enter Florida. "In the past, if a plane flew at a speed under 180 knots, it didn't need to file a flight plan, but now it's got to file with the Federal Aviation Administration," says Charles Rinkevich, Vice President Bush's Miami-based representative on the task force. Also, Mr. Rinkevich reports that private aircraft coming into Florida won't be free to sneak into out-of-the-way landing strips any longer but will be required to land at one of seven designated airports. Pilots whom Customs detects disregarding the new rules will automatically come under suspicion as carrying drugs.

A 60-FOOT NEEDLE

The drug planes, however, still have ways of slipping through the air surveillance. "They go piggyback," says a narcotics investigator for the Florida state police. "Two planes come into Florida one above the other," he says. "Radar catches the bottom plane, which has no drugs, but not the other, which has the stuff. The drug plane, undetected, is home free."

The Coast Guard has no easy task, either, in interdicting drug boats from Colombia. A favorite route for smugglers from the South American nation is through the Yucatan Straits between Mexico and Cuba. Other lanes are the Windward Passage, between Cuba and Haiti, and Mona Passage, between the Dominican Republic and Puerto Rico. The Coast Guard cutters can hardly keep all the drug boats from sneaking past their patrols. "You put a 60-foot boat there and it looks like a needle in the haystack," says Coast Guard Cmdr. Nelson.

Coast Guard officials have developed a profile of suspected drug boats. "We look for rusty boats; boats that don't display a name or flag, or a mom-and-pop sailboat that you wouldn't expect to see that far out," Cmdr. Nelson says.

The intensified surveillance by sea and air has forced drug traffickers to use more and more small, high-speed boats to try to sneak through the net. "The mother ship parks somewhere in the Bahamas and loads up small boats for the run to Miami," a narcotics agent says.

In attempting to get through, the smugglers are trying the "shotgun" approach: "Three or four small boats head for the Miami coast. Then they split up and go in different directions. If one is caught, well that's the cost of doing business," the agent adds. Another tactic is the use of a decoy boat that doesn't contain drugs. "If the decoy gets through, smugglers on shore signal the other small drug boats that the coast is clear," the agent says. ●

PROFESSOR MILLER ON COURT JURISDICTION

● Mr. MOYNIHAN. Mr. President, Prof. Arthur R. Miller, a distinguished and learned professor of law at Harvard Law School, has done us all a great service by setting forth an argument against various attempts to limit, in legislation, the jurisdiction of the Federal courts.

With his customary clarity, Professor Miller examines the history of our independent judiciary and the precise

nature of those proposals that would threaten both the independence of the courts and the fragile balance of authorities amongst the branches of our Federal Government. He concludes, rightly so in my view that—

If Congress believes that the Federal courts have been too active, caution suggests that the inevitable swing of history's pendulum be allowed to correct the situation. Since the machine really isn't broken, Congress shouldn't try to fix it.

Mr. President, there are measures now before this body that represent nothing less than an assault upon our carefully-crafted system of government. We should spare no effort in understanding these measures. We should hear Professor Miller, and heed this advice.

Mr. President, I ask that the article by Prof. Arthur R. Miller from the August 1, 1982 issue of the Long Island, N.Y. newspaper, *Newsday*, be printed in the RECORD:

The article follows:

ASSAULT ON COURTS IMPERILS BASIC RIGHTS (By Arthur R. Miller)

The president of the American Bar Association labels it "turf disputes" between the branches of government. A legal scholar fears it is a "dangerous and tawdry precedent." A respected legal journal calls it "jurisdictional gerrymandering."

"It" refers to the current congressional attempts to make the federal courts play the constitutional ball game by the rules of the New Right—to have the New Right take the bat and ball away from the judges.

Some 30 bills are now pending aimed at limiting the federal courts' power to rule on certain politically charged issues. Most involve school busing, abortion and school prayer, all matters that the courts have handled in ways that have aroused the ire of many. To understand the real implications of limiting the power of our federal courts, one must look beyond the issues themselves.

We all learned in ninth-grade civics about the balance the Constitution establishes among the three coequal branches of our government. Congress makes the laws, the executive branch puts them into action and the judicial branch interprets and enforces them.

The delicate relationship between the legislative and judicial branches is underscored by the fact that each has the power to hamstring the other. The federal courts have the right to rule on whether laws passed by Congress are or are not constitutional. And, within certain limits, Congress has the power to say what kind of federal courts there will be and what types of cases they can handle. Thus far, the two branches have accommodated each other. The courts generally have not struck down laws passed by Congress, and Congress for the most part has not assailed the courts' jurisdiction. Each side's self-restraint has legitimized the other's authority—it is on that fragile reed that our democratic system rests.

The federal judiciary's Achilles' heel is that the Constitution merely creates the Supreme Court and authorizes Congress to "ordain and establish" such other courts as it chooses. Thus, federal trial courts that are located in every state and the 12 regional courts of appeals—the middle step in the

structure—exists only because Congress "ordained and established" them.

In fact, it is a given of constitutional law that Congress, if it wished, could abolish a whole class of federal courts. And it is far from certain that all the matters on the Constitution's grocery list of cases the federal courts may hear must be put in their jurisdictional pantry. This power to regulate the federal courts is what one commentator calls Congress' "final trump."

Congress has other "trump cards," but most of them seem more difficult to play than simply amputating an arm of the federal courts. One card is a constitutional amendment cutting the courts down a peg. But the Founding Fathers made that difficult to do. It takes a "super-majority" of two-thirds of each house of Congress plus three-fourths of the states. For good reason. The framers wanted our constitutional principles and governmental structure to be stable.

The other trump card is regulating the size of the Supreme Court. The best-known example is Franklin D. Roosevelt's unsuccessful "court-packing" plan in the 1930s; he wanted to appoint extra justices amenable to his policies. FDR's ploy didn't work. During the Civil War, however, the high court was enlarged to 10 members—the object was to get a majority of justices who favored the president's war views.

Most of the time, Congress has refrained from trying to rig the judiciary. In fact, when the Senate Judiciary Committee rejected FDR's plan to pack the court, it proclaimed, "Let us . . . declare that we would rather have an independent Court, a fearless Court, a Court that will dare to announce its honest opinions in what it believes to be the defense of liberties . . . than a Court that, out of fear or sense of obligation to the appointing power or factional passion, approves any measure we may enact."

"We are not above the Constitution," the Senators said then. But many members of the current Congress apparently have a different view. Most of the pending bills are unabashed attempts to reverse certain decisions and to give "a spanking" to what critics call "the imperial judiciary." For example, some congressmen don't like court-ordered busing to achieve the school integration required by the Constitution. So, bills have been introduced to take away federal court authority to order busing or any other race-conscious "assignment" of students.

The federal courts still must carry out integration, but the proposed legislation would deprive them of a key remedy to set things right. Some fear that the threat of declaring a segregated public school unconstitutional is a toothless tiger if not reinforced by effective corrective remedies.

Some of the anti-abortion bills work much the same way—they would prevent the federal courts from hearing a challenge to a state law that prohibits or restricts abortions. Ironically, the bills give access to the federal courts to those who want to uphold anti-abortion statutes. Thus, a pregnant woman couldn't sue in a federal court to invalidate an anti-abortion law. But someone representing a fetus—declared a "person" by these proposals—could ask a federal court to shut an abortion clinic.

By stripping the lower federal courts of jurisdiction to hear certain types of cases, these bills "draw a target" on certain constitutional rights—such as a first-trimester abortion and integrated schools—that are disfavored by certain groups. According to

some, these bills in effect tell state officials hostile to these rights to "go ahead, do what you want, we won't let the federal courts do anything about it." Many state courts, with elected judges who are subject to the shifting sands of popular sentiment, would be more apt to ignore past Supreme Court edicts and curtail minority viewpoints. Also these proposals create dangerous precedents; if enacted, our most cherished freedoms might be in jeopardy should the national mood become ugly enough.

Most careful constitutional commentators have concluded that there are several reasons why Congress cannot do violence to the jurisdiction of the federal courts so easily. First, it will be the federal courts who ultimately will rule on the constitutionality of any jurisdiction-stripping statute passed by Congress. Thus, a federal court could declare any attempt to limit its jurisdiction unconstitutional, and go merrily on adjudicating cases.

Something like that happened in the 1870s. Congress had given the U.S. Court of Claims power to hear cases involving recovery of property seized by the military during the Civil War. It then passed a statute stripping away the court's ability to hear claims brought by people who had been given a presidential pardon—presumably all Confederate sympathizers. No go, said the Supreme Court—Congress couldn't negate the effect of a presidential pardon by preventing the bringing of claims.

Another judicial tactic, admittedly a bit farfetched, is simply refusing to play the game. If a law unconstitutionally removes part of the federal courts' jurisdiction in certain matters, the judges simply might decline to hear any related matter. To use an exaggerated example, suppose Congress passes a statute creating a right but says that the lower federal courts can't hear claims under it by blacks. A judge might say, "This whole package, which allows suits only by whites, is so tainted that my oath to uphold the Constitution makes it impossible for me to touch any of it. So I won't hear any claims under the statute!" Whites then would be denied the right as well, and presumably the public outcry would force Congress to back down.

But let's put all this careful legal reasoning and tactical machination to one side. The best hope is that ultimately respect for the Constitution itself will defeat any jurisdiction-stripping bill aimed at rigging the court system to deprive people of their ability to assert their rights. Many commentators hope that Congress just won't vote for any bill that tampers with a balance of power that has served so well for 200 years. After all, members of Congress are sworn to uphold the Constitution, swayed though they may be by public opinion and personal convictions as to the particular issues involved.

But if the bills do become law, federal judges, also bound to uphold the Constitution, won't let them stand, say most observers. The Constitution wisely insulates federal judges from politics by giving them life tenure and salary security. In words that seem amazingly contemporary, Alexander Hamilton advocated the Constitution's grant of life tenure so judges could exercise freely the "uncommon . . . fortitude" necessary to do their duty "as faithful guardians of the Constitution, where legislative invasions of it [have] been instigated by the major voice of the community. . . ."

This faith in the obedience of our officials to the Constitution extends to state court

judges, should they be faced with deciding cases Congress has taken away from the federal courts. Although state judges usually are elected, and inevitably think about reelection, they also are bound by the principle that the Constitution "shall be the supreme Law of the Land." But even if state judges act in good faith, we will end up with 50 different interpretations of our constitutional principles. If Congress withdraws jurisdiction from lower federal courts on certain matters, we would lose the Supreme Court's ability to reconcile different versions of the same idea because cases would be less likely to reach the Supreme Court from the state system. Some of our most important rights could end up fragmented, with each state treating citizens differently than the others.

The pending bills are a reaction to a judiciary that some feel has grown too powerful. What is ironic and sad is that had other governmental elements, state and federal, acted responsibly on discrimination, prisons, school prayer, mental health institutions and abortion, the courts wouldn't have had to take as aggressive a role as they have. When the other branches of government have fled the field, only the courts remained in the trenches to defend the Constitution.

But these bills are an overreaction. If Congress disapproves of a court decision, it would be far more appropriate to deal with its substance, directly and constitutionally, rather than snipping off bits and pieces of the judiciary's power each time a new "emotional" issue takes center stage.

For almost two centuries, the federal courts have been our watchdog of democracy. A former Supreme Court justice once told a group of journalists that "the stork didn't bring" constitutional rights. "They came because the courts . . . at some time or place when some other agency of government was trying to push [you] around . . . protected you."

If that capacity is to be preserved, our watchdogs must be protected against political crosswinds. That means Congress must exercise restraint and not take both the bark and bite out of our judges' ability to breathe life into our Constitution. The balance among the branches of our federal government, with teeterings here and totterings there, has worked well. The current attempt to alter that balance, however well intentioned and emotionally attractive it may seem, threatens to throw the whole fragile structure out of alignment. If Congress believes that the federal courts have been too active, caution suggests that the inevitable swing of history's pendulum be allowed to correct the situation. Since the machine really isn't broken, Congress shouldn't try to fix it. ●

GLENWOOD S. (GLEN) TROOP, JR.

● Mr. RIEGLE. Mr. President, late last Wednesday night Glenwood S. (Glen) Troop, Jr., a personal friend and one of Washington's premier lobbyists, died of a heart attack at his home in suburban Alexandria at the age of 58.

To many in this town Glen Troop was a Washington institution. He represented the U.S. League of Savings Associations as their chief lobbyist. To

many the names of Glen Troop and the U.S. League were synonymous.

Glen was at the same time an intensely private, highly individualistic, and totally devoted public servant. His was the most difficult of Washington occupations—influencing the course of legislation in the service of a business he knew best. In Glen's case that was the savings and loan business.

In his field there was none better.

As his Washington staff acknowledged:

The servants of the people in our democracy include the vain and the modest, the important and the self-important. Glen was satisfied when the praise went to others less deserving and was content, too, to swallow the blame, when undeserved. Throughout he earned the admiration of all for his knowledge . . . for his skill . . . for the strength of his convictions . . . and, above all, for his integrity. His word was his bond.

Beneath his gruff exterior (and his legendary salty tongue), we knew and loved Glen Troop. He was generous and compassionate, warm and caring, a friend as well as a colleague. To those of us who learned from him day by day, he was a master.

These views of his staff I know are shared by many in the Senate who knew and worked with Glen.

On numerous occasions I sought Glen Troop's counsel in considering legislation which might benefit Americans in their dream of homeownership.

I respected and shared his belief that the American people deserved to have a system of financial institutions specializing in home finance and I always enjoyed the total professionalism with which Glen Troop approached his job.

There is no question in my mind, that Glen Troop significantly affected the legislative process for the better. He brought the highest standards to his job. For as long as I am in the Senate I believe that each time we consider financial institutions or housing legislation I will think of and miss Glen Troop.

He is already missed in my office and my staff joins me in extending condolences to his wife, the former Anne Brinkley; his son and daughter-in-law, Michael G. and Cinda; and his daughter, Mrs. Patricia Anne Wharton. ●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of \$50 million or, in the case of major defense equipment as defined in the act, those in excess of \$14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provisions stipulates that, in the Senate, the notification of a proposed sale shall be sent to the

chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD a notification which has been received.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., August 9, 1982.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-73, concerning the Department of the Army's proposed Letter of Offer to Turkey for defense articles and services estimated to cost \$134 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

You will also find attached a certification as required by Section 620C(d) of the Foreign Assistance Act of 1961, as amended, that this action is consistent with Section 620C(b) of that statute.

Sincerely,

WALTER B. LIGON,
Acting Director.

[Transmittal No. 82-73]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

- (i) Prospective Purchaser: Turkey
(ii) Total Estimated Value:

	Million
Major defense equipment ¹	\$0
Other	134
Total	134

¹ As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: Five hundred eighteen M48A5 tank conversion kits consisting of 14 selected sub-kits, support items, and services for the conversion of M48A1 tanks to the M48A5 configuration.

(iv) Military Department: Army (UPI)

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: 9 August 1982.

POLICY JUSTIFICATION

Turkey—M48A5 tank conversion kits

The Government of Turkey has requested the purchase of 518 M48A5 tank conversion kits consisting of 14 selected sub-kits, support items, and services for the conversion of M48A1 tanks to the M48A5 configuration at an estimated cost of \$134 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Turkey in fulfillment of its NATO obligations; furthering NATO rationalization, standardization, and interoperability; and enhancing the defense of the Western Alliance.

The Government of Turkey needs these conversion kits to continue to upgrade its Korean War vintage M48 series tanks. Turkey will have no difficulty in absorbing and maintaining the converted tanks as the

tanks, parts, tools, and test equipment are already in the inventory and trained personnel are available. This sale will enable the Turkish Army to increase its military capability. The tank conversion kits will be provided in accordance with and subject to the limitations on use and transfer provided for under the Arms Export Control Act, as embodied in the terms of sale. This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question.

There is no prime contractor for all of the various sub-kits requested in this sale. Parts and sub-kits of the conversion kits produced by the various contractors will be shipped to the Anniston Army Depot, Alabama, for assembly into a "package" shipment.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Turkey.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

UNDER SECRETARY OF STATE,
Washington, D.C., August 3, 1982.

Pursuant to section 620C(d) of the Foreign Assistance Act of 1961, as amended (the Act), and the authority vested in me by Department of State Delegation of Authority No. 145, I hereby certify that the provision to Turkey of 518 M48A5 tank conversion kits is consistent with the principles contained in section 620C(b) of the Act.

This certification will be made part of the certification to the Congress under section 36(b) of the Arms Export Control Act regarding the proposed sale of the above-named articles and is based on the justification accompanying said certification, and of which such justification constitutes a full explanation.

JAMES L. BUCKLEY. ●

THE RE-ENGINEED KC-135

● Mr. GOLDWATER. Mr. President, recently a very important event took place in Arizona when the Arizona Air National Guard received its first re-engine KC-135 aircraft.

There are those who are critical of defense spending and frequently they are most critical of waste in defense spending. I submit that the re-engineing of these KC-135 tanker aircraft is one of the many instances where the taxpayers' money is being spent very judiciously. The initial units to receive this KC-135 aircraft will be the 161st Air Refueling Group in Phoenix, Ariz.; the 151st Air Refueling Group in Salt Lake City, Utah; and the 134th Air Refueling Group in Knoxville, Tenn. After congressional funding is approved for the remainder of the KC-135 aircraft, additional locations will be selected. The Air National Guard has proposed to re-engine 11 of its KC-135 refueling units with the Pratt & Whitney JT3D engine. Two remaining National Guard units will be re-engineed with the General Electric CFM-56 engine.

Having mentioned the plan for the re-engineing program, let me now highlight what this program does for the

Air National Guard and, in turn, the American taxpayer. The KC-135 tanker aircraft has been using old, inefficient engines. Basically, the KC-135 is a Boeing 707 aircraft which has been modified to fit the role as a tanker for inflight refueling of other aircraft. Instead of going to a new airplane or even a buying of factory-fresh engines, the Air Force has bought engines from 707 aircraft being retired by the airlines in favor of smaller passenger planes. With the new JT3D engines, the KC-135 tankers can accomplish a lot of things. They can take off using 2,000 feet less runway, while emitting 90 percent less visible smoke and producing 60 percent less noise. If you have ever lived in the vicinity of an airfield where the 707 was being flown, you could certainly appreciate this. In addition, and perhaps most importantly, the increased fuel efficiency of these aircraft will result in a savings of about 90,000 gallons of fuel for each tanker annually.

Those are not the only benefits. The basic reason for this re-engining was that the Air Force currently has a significant tanker shortfall caused by increased wartime air refueling requirements for strategic tactical, and airlift aircraft. What do these new engines do to correct that situation? In addition to saving the taxpayers' money, these engines also improve the operational capability of the aircraft. Because the tankers require less fuel for their own engines, they can deliver more to other aircraft during inflight refueling. Because they also have a 30-percent thrust increase, they can take off from the runways in hot climates with a full load of fuel in the summertime, as opposed to having carry a less load of fuel which will be receiving aircraft.

Mr. President, the conferees from the Senate Armed Services Committee will be discussing this issue in conference with the House shortly. I feel that this is one of the more cost-effective programs which the Department of Defense has undertaken and I am hopeful that our colleagues in the House will see fit to fund the re-engining of these vital KC-135 aircraft at an appropriate level.

Mr. President, I ask that the KC-135 paper, as well as the two articles from the Phoenix Gazette be printed in the RECORD.

The material follows:

KC-135 REENGINEING

1. GENERAL

Thirteen Air National Guard units are equipped with KC-135 Strategic Tankers. Eleven of these units are located at commercial airfields or Air Force bases without active Air Force KC-135 units. Two units are collocated with active Air Force KC-135 units on Air Force bases. All of the ANG KC-135 units have a day-to-day alert commitment in support of the SAC Strategic Integrated Operations Plan (SIOP).

The Air Force currently has a significant tanker shortfall caused by increased wartime air refueling requirements of strategic, tactical and airlift aircraft. This shortfall can be most effectively reduced by reengining the KC-135 fleet with the CFM56 engine. This will reduce fuel consumption by 25 percent and provide an aggregate 50 percent increase in fuel offload capability.

To complement the CFM56 reengining program and to provide near term improvements to the ANG KC-135 fleet, the Air Force, at the direction of the Congress, has begun a program to reengine the ANG KC-135s with the JT3D engine. Compared to the current engine, the JT3D provides: 30 percent thrust increase; 10-12 percent fuel savings; 18 percent increased offload capability, and include environmental impact (noise and emissions). With all of the ANG KC-135s equipped with JT3D engines, the annual fuel savings should be over 8 million gallons per year.

The first three Air National Guard units to receive the JT3D reengined KC-135s are the 161 Air Refueling Group, Phoenix, AZ; the 151 Air Refueling Group, Salt Lake City, UT; and the 134 Air Refueling Group, Knoxville, TN. The specific locations for additional reengined KC-135s has not been announced pending Congressional funding.

The ANG proposes to reengine 11 ANG KC-135 units with the JT3D. The two remaining ANG KC-135s units will be reengined with the CFM56. ANG units are scheduled to receive their first CFM56 modified aircraft in fiscal year 1985 and fiscal year 1986.

The long term plan for the CFM56 will include reengining all 104 ANG KC-135s with the CFM56 engine.

2. IMPACT

Without additional JT3D reengined aircraft the ANG will continue to experience mission degradation due to the inefficiency of the current engines; the ANG will not be able to take advantage of the fuel economies and efficiencies available through the use of JT3D engine; and unnecessary noise and air environmental pollution will continue to exist at an around Air National Guard KC-135 units.

3. RECOMMENDATION

That the Congress add \$135 million in fiscal year 1983 for the JT3D reengining of 28 ANG KC-135 aircraft.

JT3D RE-ENGINE SCHEDULE

	Date
FISCAL YEAR 1982 SCHEDULE

151st Salt Lake	Oct. 29, 1982
161st Phoenix	Nov. 5, 1982
FISCAL YEAR 1983 SCHEDULE (PROPOSED)	
1 KC-135E:	
151st Salt Lake	Nov. 12, 1982
134th Knoxville	Nov. 26, 1982
161st Phoenix	Dec. 3, 1982
161st Phoenix	Dec. 17, 1982
151st Salt Lake	Dec. 24, 1982
134th Knoxville	Jan. 3, 1983
151st Salt Lake	Jan. 7, 1983
134th Knoxville	Jan. 21, 1983

Note: 161st Comp by Dec. 17, 1982; 151st Comp by Jan. 7, 1983; 134th Comp by Jan. 21, 1983.

[From the Phoenix Gazette, July 23, 1982]

A GOLDEN EGG AWARD

A counterpart of Sen. William Proxmire's Golden Fleece Award for wasteful spending—a Golden Egg Award, perhaps—should go to the Air Force for the enormous economies it is achieving in modernizing its aerial tanker fleet.

The tankers—KC-135s like those flown by the Air National Guard in Phoenix—were using old, inefficient engines. Instead of going to a new airplane or even buying factory-fresh engines, the Air Force bought engines from 707s being retired by the airlines in favor of smaller passenger planes.

With the newly-acquired turbofan engines, the KC-135 tankers can take off using 2,000 feet less runway, while emitting 90 percent less visible smoke and producing 60 percent less noise. The increased fuel efficiency will result in savings of 90,000 gallons of fuel for each tanker annually.

In addition to cost savings, the new engines also improve the operational capabilities of the aircraft. Because the tankers require less fuel for their own engines, they can deliver more to warplanes during inflight refueling.

Refitting a KC-135 with the airliner engines and making other modifications that improve performance and safety costs \$3.5 million per plane—a fraction of what a new aerial tanker would cost.

The first KC-135s went into service in the mid 1950s, and in many cases the airplane is older than the pilot flying it. The modification, however, will extend the service life of the tankers into the late 1990s.

Although perhaps it robs the dignity of the venerable KC-135 to liken it in any way to a goose, the Air Force's modification program—with its cost underrun—certainly produced a golden egg for the taxpayers. ■

LEST WE FORGET CORPORATE RESPONSIBILITY

● Mr. SASSER. Mr. President, record high levels of unemployment have caused frustration and despair for over 10 million workers in this country, while the prospects for economic recovery look dim.

The economic program offered by the administration last year is premised upon the private sector's willingness and ability to absorb the transfer of social responsibility away

from the Federal Government. In numerous communities corporate enterprises have taken an active role in developing and implementing essential services for the betterment of the respective communities in which they are located.

The motion of corporate responsibility is an important concept, and one which should be given particular attention in light of the serious economic difficulties confronting our society. I would like to bring to the attention of my colleagues a recent superb article on this subject by Mr. Bernard Rapoport, the chairman of the board and the chief executive officer of the American Life Insurance Co. I ask that the full text of Mr. Rapoport's article be printed in the RECORD.

The article follows:

CORPORATE RESPONSIBILITY

(By Bernard Rapoport)

To tell you the truth, I'm just a little bit nervous. I've spoken to groups all over this country, but to come back home and talk to the Rotarians which include some of this community's most distinguished citizens is an exciting challenge. I relish it, and I'm going to do the very best I can to articulate my ideas on this all-important subject of corporate responsibility and hope that in so doing it will stimulate your thinking and result in more dialogue within the community among those of us who run the business of Waco.

Most of us are executives. I am reminded of the query of a youngster who said to his father: "Daddy, what is executive ability?" And the father's retort was: "Executive ability, my son, is the art of getting the credit for all the hard work that somebody else does."

Getting down to this serious business of corporate responsibility, I'm not one who is a great advocate of principles because I'm persuaded that good business executives ought to be guided more by situational ethics. And let me tell you why I feel this way. What we need in our country are idealists rather than ideologues. The latter are intransigent, inflexible, immovable. The idealist, on the other hand, has balance and considers problems in terms of the short term gains as well as the long term requirements.

A couple of examples: corporate responsibility necessitates a commitment to the free market and free enterprise system. An idealist who subscribes to this philosophy recognizes that this necessitates an economic system that has access for those who wish to enter into the market system. For too many ideologues, they express a verbal commitment to the free market system and then insist on that particular kind of regulation that restricts entrance of others to compete. A few examples will suffice, whether we are talking about professional associations or highly-regulated businesses. There are just numerous examples to confirm the premise that too many of us in positions of responsibility give lip service to free enterprise, but in practice, want monopoly when it comes to our own particular interests. This, to me, is irresponsible and antithetical to any concept of corporate responsibility.

We give lip service to the fact that we want a competitive society, and yet we have an antitrust policy that is farcical. We are

confronted with the highest interest rates that we've experienced in a hundred years, and monopolistic corporations tie up billions and billions of dollars in seeking acquisitions that are nonproductive, non-job producing, noncontributing so far as our economy is concerned. The ideologue says that's free enterprise and the reality is, it not only stifles it, but if it continues at the rate that it's going, there are going to be very, few independent businesses that survive.

I remember when I moved to Waco in the early forties. From the old square all the way to 8th Street on Austin Avenue, there was business after business after business; and to the best of my recollection, I don't think there were over 4 or 5 that were owned by chains. They were all independent Waco business people. Today, Waco is in the same situation as the other communities of our nation—virtually everything is chain operated and chain dominated.

Well, you might ask, what has this got to do with corporate responsibility? It is my firm conviction that corporate responsibility necessitates a community involvement and commitment on the part of those who run the businesses and corporation of this nation to being sensitized and to encourage that kind of legislation that will provide access for those who want to enter into the business world and which will be restrictive toward this trend toward mergers and monopoly in our nation.

The idealist to which I allude has this kind of flexibility and understanding that a free market society means that there has to be a realistic and pragmatic approach to this tendency in our society to increasingly narrow the parameters which permit entrance of those who possess entrepreneurial spirit into the business world.

Too many ideologues say, we don't want regulation, we have too much regulation. And let me say this: I couldn't agree more. But we need to recognize that too many businesses scream about regulation and yet they want it when it preserves the status quo in their particular industry. The airlines squealed when they deregulated. The same for the trucking companies. We can't have it both ways. We are either for free enterprise and for prices being determined in the market place, or we're not. On the other hand, when it comes to the public safety, that isn't a matter to be decided in the market place. There are certain areas that determine the decency and the spirituality of a nation—how it takes care of its young and its aged, its handicapped and its mentally retarded, areas of education and culture. Our commitment in these areas will determine how future generations will evaluate us.

You might question at this point why I am making reference to the importance of a free market system, regulation and antitrust policies in a speech the subject of which is corporate responsibility. I believe very firmly in the organic nature of this society and that everything is interrelated. It is difficult to talk about ethics and morality without taking into account economics.

It is when we become single issue oriented that our society begins to get into serious and sometimes unresolvable problems. We need to always keep in mind the organic nature of things of which I just spoke. For example, it should never be the attitude of any business that "We've got so many problems in our own business, we don't have time to be concerned about anything other than those matters relating to our company." It is this type of attitude that leads to

the decay of any civilization. It is even more true in this year where we have whittled away at our commitment to the work ethic, and how tragic this is.

Corporate responsibility means being very aware of what Richard Parker told us in one of his essays:

"A cynical, each-man-for-himself attitude becomes the rule of life. That only the most powerful, the most resourceful and unscrupulous, the hyenas of economic life can come through unscathed. The great mass of those who put their trust in the traditional order, the innocent and the unworried, all those who do productive and useful work but don't know how to manipulate money, the elderly who hope to live on what they've earned in the past—all those are doomed to suffer. An experience of this kind poisons the morale of a nation."

And, my fellow citizens, the morale of this nation is suffering and as it does, your business and mine also suffer.

I alluded to the word "principle" when I started. Most of you have engaged in numerous charitable drives, you've worked with United Way, the Red Cross, the hospitals in our community, and gee, these are worthwhile efforts, they really are. I don't think there is anything more disgusting than to be confronted by someone who says, "It's against my principles to give to this or that or the other." He's assuming that you are interpreting what he says with "principle" ending in "le" and the reality is, he's using this as an excuse to conserve his principal ending with an "al." It's this myopic type of individual that contributes to the condition in which this nation now finds itself.

We want people that are committed to the work ethic. I think it's the most essential ingredient in the character of a nation—that is, its commitment to the work ethic. Here we find ourselves in a situation where we have the highest unemployment since the depression, and we're saying to these people, there are no jobs for you. This is the price that we all have to pay to get the nation back on an even keel.

It doesn't seem quite fair to me that out of the 220 or 230 million people that we have in this country—of which approximately 10 or 12 million want to be working—that we say to those 10 or 12 million unemployed, "It's tough, but while we're working and doing all right, you've got to pay the price." You ask me, what's the answer? Well, this isn't the time or the place to get into economics, but the one thing I'm certain of is that fairness is the most essential requisite in a free democratic society. Putting the burden on 10 or 12 million people is not a reasonable answer with which to cure inflation.

This is the greatest nation in the world. What makes it so are the standards to which we have adhered. When we begin to lessen those standards, our commitment to greatness diminishes. And when it does begin to do this—to diminish, that is—it accelerates at an exponential rate. And I submit to you that it's up to those of us who head up corporations to take it upon ourselves as an essential part of corporate responsibility to advocate those policies and immediately that will encourage full employment.

I know what survival means in business. I started one on a shoestring that has matured into a major American corporation. All along, however, we've taken into account our corporate responsibilities—not nearly to the extent that perhaps we should have.

But the truth is, we don't have any choice now. As business people, we negotiate that which is negotiable. We try to buy the products we use at the best prices we can to sell at prices that produce a fair and equitable profit. We watch our costs and do those things that are attendant to good business practices.

On the other hand, we also have to assume those responsibilities that decency dictates. Take, for example, United Way. It was conceived by those of us in business primarily. There were so many drives going on within the community that it was almost impossible for any executive to see all of the solicitors. Yet, within every community there are needs that have to be fulfilled, whether it's the YMCA, Boy Scouts or Girl Scouts, nursing homes, daycare centers, organizations that provide hot meals for the aged, care of orphans—well, part of corporate responsibility is that we recognize the need to assume those responsibilities that decency dictates. And let me tell you one thing. Corporate intelligence recognizes that today's unmet needs produce tomorrow's revolutions. Many, many dictators—none for whom I have any grief at all—would still be in power if they would have recognized that axiom that today's unmet needs produce tomorrow's revolutions.

Yes, corporate responsibility recognizes those areas in which the corporation must negotiate that which is negotiable and assume those responsibilities that decency dictates. We don't need to do this out of the goodness of our heart. It's just plain good common sense.

Corporate responsibility means that a corporation isn't looking for a free lunch, that it's not going to be a parasite on the community. And what I mean by that is, after all, if a business has 100, 200, 500, 2,000 or 4,000 employees, these employees utilize the services of many of the service organizations of the community. These services may be recreational or a daycare center. It might be that the parents of the employee are being serviced by some particular organization in the community. Where does the money come from for these services? It comes from two places—from those who work and the businesses of our community. Both have to measure up to their responsibilities. Sometimes those businesses that talk the most about the free enterprise system are the most wanting when it comes to meeting corporate responsibilities. They suck up the best in the community and give nothing in return. Their leaders pride themselves in being men of principle and they are, but the word ends with "al." I have a deep resentment about this very small minority of business people because to me they threaten the free enterprise competitive system, without which there can be no free democratic society.

We might all take heed from Albert Camus' advice:

"I shall tell you a great secret, my friend. Do not wait for the last judgment. It takes place every day."

That, my friends, sums up the approach that I think best describes corporate responsibility. ●

A FIRST-CLASS PATENT AND TRADEMARK OFFICE

● Mr. SCHMITT. Mr. President, strong and effective patent and trademark systems are essential to the economic well-being of our Nation. The patent system provides the incentive

to invent, invest in, and disclose new technology. It has proved to be the cornerstone for our growth as a leader among industrialized nations. The trademark system allows product identification and prevents consumer confusion in the marketplace.

When this administration took office, the Patent and Trademark Office was in a sorry state, with ever-increasing backlogs of patent and trademark applications and unacceptably long times to get a patent or register a trademark.

Significant steps have been taken over the past year to improve the Patent and Trademark Office and the patent and trademark systems. The Commissioner of Patents and Trademarks, Gerald J. Mossinghoff, outlined these steps in a speech in San Francisco to the American Bar Association's Section on Patent, Trademark and Copyright Law on August 7, 1982. He described progress toward the administration goals to reduce the time it takes to get a patent to 18 months by 1987 and to reduce the time it takes to register a trademark to 13 months by 1985. The Commissioner also cited steps taken toward a fully automated Patent and Trademark Office in the 1990's.

The key to lasting improvements in the Patent and Trademark Office is to assure adequate and stable funding for the Office through enactment of a new fee structure in H.R. 6260. This measure awaits floor action in the Senate now, having passed in the House.

Enactment of a comprehensive and uniform Federal patent policy under my bill, S. 1657, will also be a significant improvement to the patent system. Presently, the Federal agencies operate under a variety of policies, that generally require that title to a contractor's invention made under a Federal contract be transferred to the Government. Ownership to thousands of inventions have been acquired in this manner, with fewer than 5 percent of these inventions ever being successfully commercialized.

In his speech, the Commissioner noted that contractor-owned patents of Government sponsored inventions are about 20 times more likely to be commercialized than if the Government retains the patent. Mr. President, I believe the citizens of this country deserve a better return on their investment of \$40 billion in federally sponsored research and development. My bill will make it possible for more Government-sponsored inventions to be commercialized to the benefit of our economy and to the enhancement of our position as world leaders in technological innovation.

I ask for the text of the Commissioner's remarks be printed in the RECORD. The text follows:

REMARKS OF GERALD J. MOSSINGHOFF

Distinguished Guests, Ladies and Gentlemen; I am delighted once again to report to the Section on Patent, Trademark and Copyright Law on the status of the U.S. Patent and Trademark Office to outline our progress over the past year and to highlight our plans for the future.

In my report to your Section last year, I rejected out of hand the notion that for some reason Government programs cannot be made to succeed. I also stated that I felt uniquely privileged to serve as Commissioner at this time and during this Administration. Everything that has happened in the world of patents and trademarks this past year has reinforced my optimism.

Key to all of our plans to upgrade the U.S. Patent and Trademark Office has been to assure adequate and stable funding for the Office, not only during this Administration but for the foreseeable future. The importance of that cannot be overstated. The Office was plagued by very real and pervasive problems at the end of the previous Administration. The most serious of those resulted directly from a lack of adequate resources. With the new fee structure in H.R. 6260, the Office is assured of adequate resources over the next decade without the need for increases in appropriations.

H.R. 6260 represents a compromise on all sides. Patent filing fees for large and medium size companies will be \$100 higher than those recommended by your section at its March 23 meeting. The same holds true for patent issue fees. For individual inventors and small businesses, patent filing fees will be \$50 less, and patent issue fees \$150 less, than those recommended at your March 23 meeting.

From the Administration's viewpoint, in order to accommodate the concern expressed by the patent bar and others on behalf of individual inventors and small businesses, additional appropriations of \$7 million will be required next fiscal year to accommodate the two-tier system of fees which Congress adopted. Also, responding to inventor and bar groups, Congress chose not to give the Patent and Trademark Office the authority to set patent fees administratively; rather major patent fees were written into H.R. 6260. Significantly, those fees can be adjusted administratively every three years, but only to keep pace with inflation.

MANAGEMENT ACHIEVEMENTS

Perhaps the most important feature of H.R. 6260 is that it represents a bargain between the Administration and those whom we serve to bring about significant and lasting improvements in the Office. We have made real progress during the past year to carry out our end of that bargain.

To begin to manage our still-increasing 218,000-case backlog of pending patent applications, we have hired 235 new examiners since last October 1. Our recruiting program is already in high gear to hire an additional 245 examiners during fiscal year 1983. To achieve our goal this year we pulled out all stops. We visited almost 200 engineering schools, conducted 1500 interviews, established and publicized a toll-free 800 number, advertised extensively in national journals and college newspapers, displayed posters with tear-off mail-in cards in virtually every engineering school in the nation, and relied extensively on the generous help of local patent law associations in contacting graduates in their areas. The results are impressive. A majority of the engineers we hired

are honors graduates. The mean grade point average of all those we hired is 2.93.

We are on schedule to achieve the goal of Plan 18/87 in patents, i.e., to reduce the average time of pendency to 18 months by fiscal year 1987. During fiscal year 1983 we will dispose of nearly 100,000 patent applications, compared with 83,000 this fiscal year. In fiscal year 1984 we will process almost 109,000 patent applications. In that year, for the first time in six years, we will dispose of more patent applications than we will receive.

In trademarks it now takes us 9 months on the average to render a first opinion on registrability and 22 months to dispose of an application. That is down from the record high 24 months which it took last year. We will achieve the goal of 3/13—three months to first action and 13 months to disposal—at least by fiscal year 1985. This coming fiscal year we will turn the corner in trademarks and dispose of more cases than we will receive.

We have taken several important steps to move realistically toward a fully automated Patent and Trademark Office in the 1990's. Through a reorganization of the Office we established the senior position of Administrator for Automation, and we appointed Dr. J. Howard Bryant, who has impressive experience both in industry and Government, to that position. Dr. Bryant has overall responsibility for the management of all automation initiatives in the Office—in patents, trademarks and administration. He has spearheaded our efforts to refine our automation blueprint under § 9 of P.L. 96-517. Copies of the final Executive Summary of that study will be available by mid-September. The § 9 plan is based on our conviction that we do not have to sit back passively and wait for the estimated 24 million paper documents we now have to become 50 million paper documents by the turn of the century. One of the most serious problems we now face is that 7% of our 24 million paper documents are either missing or misfiled. Only by moving aggressively toward automated systems in which paper is replaced by advanced technology can we ever hope to achieve anything even approaching 100% file integrity in our vast collection of technical documents.

We have already installed computer terminals in each of our 15 patent examining groups to give patent examiners access to all available commercial patent data bases. Given increased resources in FY 1983 we will be able to increase significantly the amount of "on-line" time the examiners can use.

To eliminate the 80,000 handwritten examiner opinions that were sent each year to industry and inventors world-wide, we have completed the world's largest installation of IBM Displaywriter word processors. Using the 50,000-word built-in vocabulary, the detailed form paragraphs we developed and the hand-tailored dictionaries of technical terms, these machines are now producing 200,000 first-class documents each year.

We are in the final stages of the full-text search experiment we are conducting in a joint venture with Mead Data Central using the LEXIS system. The full texts of 50,000 patents have been stored in LEXIS and are being accessed through seven LEXIS terminals located in six art units.

We have completed augmentation of our in-house Burroughs computer, increasing its capability by a factor of four, to support our expanded case-tracking system. And we have acquired additional space in Crystal

City to receive a replacement of our existing in-house computer in FY 1984. That space had already been configured to house a large main-frame computer complex.

Secretary Baldrige's reorganization of the Department of Commerce is now complete. That reorganization formalizes the arrangement under which I report directly to the Secretary and the Deputy Secretary, Mr. Guy W. Fiske. The reorganization of the PTO has also been approved. In addition to establishing the position of Administrator for Automation, which I have already mentioned, we have promoted Mike Kirk into the new position of Assistant Commissioner for External Affairs, and we have elevated the Office of Quality Review to report directly to Deputy Commissioner Don Quigg.

In his day-to-day attention to the Quality Review program, Don has changed the standard used in reviewing the quality of examination in the 4 percent sample of cases selected for quality review, and he is insisting that the line managers be totally involved in the quality review process. Instead of reviewing a case for "clearly unpatentable" claims, the test now will be whether there are "questions of patentability" of any of the claims in a case.

Don Quigg has also assumed day-to-day responsibility for the Examiner Education Program, which was jointly established by the Intellectual Property Owners Association and the Patent and Trademark Office. Examiners have already traveled to industrial installations to gain a better appreciation of trends in industrial development. Industry has been generous in its support of the program. We have received over \$75,000 in contributions since the program was established this spring. Thanks to Don's efforts, the Internal Revenue Service ruled on July 20 that contributions to the program are tax deductible.

We are beginning negotiations this month with the Patent Office Professional Association—the union which represents professionals on the patent side of the Office—with a view toward revising totally the outdated agreement under which we currently operate. Bargaining units in the Government play a critically important role in the management of any agency. I am convinced that the Patent Office Professional Association, or POPA as it is called, is totally dedicated to our goal of significant and lasting improvements in the U.S. patent system. Our objective in renegotiating the basic agreement with POPA is to produce an agreement which will be clear and understandable to all parties, without the need for protracted litigation and grievances. That task will not be easy, but it will be accomplished given a renewed spirit of cooperation between management and the union.

LEGISLATION

In the legislative area there have been several significant developments.

H.R. 6260, of course, represents a major accomplishment. In addition to authorizing a greatly expanded PTO program for FY 1983 through FY 1985, and increasing the user fees we will charge, that bill incorporates a number of cost-saving proposals.

Under that law, we will accord filing dates for patent and trademark applications based on a showing of when it was deposited in the U.S. mail.

We will revive unintentionally abandoned patent applications upon payment of a \$500 statutory fee.

We will be able to substitute one sole inventor for another, provided the mistake was not due to deceit.

We will do away with the current bureaucratic hassles in granting time extensions; they will be granted automatically upon payment of the statutory fees.

We will eliminate the need for verification of trademark oppositions and cancellations.

Finally, and most significantly, we are gratified that H.R. 6260 specifically authorizes voluntary binding arbitration of patent validity and infringement issues. That authority will provide business executives with an attractive and cost-effective alternative to protracted and complex Federal litigation in patent cases.

The Office is proud of the role the Department of Commerce played in supporting the enactment of P.L. 97-164, which established the Court of Appeals for the Federal Circuit. As I reported to you last year, we are convinced that, by providing a single authoritative tribunal to handle patent cases nationwide, the new court will contribute greatly to a single standard of patentability which will be understandable to inventors and business executives alike.

It appears that the "Patent Term Restoration Act," S. 255 and H.R. 6444, will be enacted by the 97th Congress. That reform is long overdue. It will restore an appropriate balance of incentives to patent owners whose products have been held back from the marketplace by Federal regulatory procedures. We agree totally with the views expressed in the Senate Judiciary Committee report on S. 255 that, "There is no valid reason for a better mousetrap to receive 17 years of patent protection and a life-saving drug less than 10 years."

Although time is becoming a critical factor, we are still hopeful that this Congress will enact a comprehensive Federal patent policy along the lines of Senator Schmitt's S. 1657 and Congressman Ertel's H.R. 4564. The debate on who should receive commercial rights to inventions resulting from Federal sponsorship is now well into its fourth decade. During that time the Department of Defense has for the most part given its contractors the first option of acquiring such commercial rights. Literally tens of thousands of DOD-sponsored inventions were handled under that policy, and not a single case has been identified in which that policy has had any adverse impact. On the other side of the coin, NASA's experience clearly shows that contractor-owned patents on NASA-sponsored inventions are about 20 times more likely to be commercialized than NASA-owned patents on contractor-generated inventions.

The Patent and Trademark Office intends to propose three new initiatives in our 1983 legislative program.

The U.S. Government owns twice as many active patents—more than 28,000—than any other single entity. Most of these belong to the Department of Defense and most were acquired solely for defensive purposes. In a speech made before the Government Patent Lawyers Association on April 14, I proposed that legislation be enacted to permit the issuance of a patent on a Government-owned invention without the examination required by 35 USC §§ 131 and 132 if the head of the appropriate department or agency or his or her designee waives all remedies of 35 USC §§ 271 through 289 with respect to the patent or any reissue of the patent. A patent so issued would be a U.S. patent for all defensive purposes: the application or the patent could become involved in an in-

terference; it would be a "constructive reduction to practice" under our first-to-invent system; it would be "prior art" under all subsections of 35 USC § 102; and it would be classified and cross-referenced like any other patent, disseminated to foreign patent offices, stored in the PTO computer tapes made available in commercial data bases, and announced in the Official Gazette. In addition, it would serve as the basis for a priority claim in a foreign application. In response to our proposal, we have received many recommendations from industry and the bar. There seems to be general agreement that something needs to be done in this area. We have received recommendations that the defensive patent be made available to industry as well as to Government agencies. Some support the concept, but question whether the term "patent" should be used to describe the document we would issue. Still others would support legislation under which the Government agencies could defend a 28 USC § 1498 action on the basis of prior inventorship. That would obviate the need for the Government to acquire any defensive patents. We are currently weighing these alternatives prior to presenting a formal recommendation to the Congress next January.

We are formulating a new proposal to change interference procedures. Under our proposal we would retain the present first-to-invent system of priority. But we would change the procedures so that a patent will be issued to the first person to file an application, and it would be up to the second person filing an application on the same invention to trigger an interference with the patentee. If the "junior party" is successful in the interference, his or her patent would run from the date of the original senior party's patent. We are still working on the details of this proposal, and we would very much welcome your views and counsel.

We are recommending an amendment to 35 U.S.C. § 271 to provide that importation into the United States of a product made in another country by a process covered by a U.S. patent will constitute infringement of the U.S. patent. The United States is one of the few major countries whose domestic patent law does not extend process patent protection to products manufactured by the patented process. Considering the great strides being made—for example, in genetic research where revolutionary new processes are used to make existing and therefore unpatentable products such as insulin—it is time to close the gap in patent protection which now exists.

INTERNATIONAL ACTIVITIES

In the international arena, we are deeply involved in preparations for the Third Session of the Diplomatic Conference on the Revision of the Paris Convention. That conference will begin October 4 in Geneva. While the prospects in Geneva are uncertain at best, we are hopeful that there will be efforts made there to seek a broader consensus on Article 5A of the Paris Convention, the article which deals with compulsory licensing and forfeiture of patent rights.

Over the past year we have been active in joint Government-industry efforts to encourage several nations to strengthen their protection of patents and trademarks.

For example, working closely with the Department of Commerce International Trade Administration, we have had productive meetings with officials of Mexico, Korea, and Romania in this regard.

The Office is participating in the negotiations to establish an International Code of

Conduct for the Transfer of Technology under the auspices of UNCTAD, the United Nations Conference on Trade and Development. These deliberations are currently aimed at deciding whether to hold a fifth session of the UN Conference on the Code next year.

In meetings with Chinese officials in Beijing this past May, I discussed with them the transfer of the Chinese Patent Bureau from the State Scientific and Technological Commission to the State Economic Commission. It remains to be seen whether that move will expedite their consideration and enactment of a patent law.

We have reached agreement with the European Patent Office (EPO) that, beginning this October 1, they will serve as an International Searching Authority for U.S. industry using the Patent Cooperation Treaty international filing procedures. This will give U.S. industry a potentially attractive alternative to using the U.S. Patent and Trademark Office as an International Searching Authority. Details of the arrangement with the EPO, including the fees they will charge, are now being worked out and will be announced prior to the October 1 date.

To help us carry out our automation programs here at home, we have entered into a cooperative venture with the European Patent Office to exchange advanced forms of documentation, both on film and magnetic tape, and to coordinate closely the advanced automation programs conducted by each. The leadership of the European Patent Office recognizes, as we do, that we must eventually move away from all paper hand-file-and-retrieve systems if we are to keep pace with the explosion in technological data. We are exploring the possibility of similar joint ventures with other major patent offices.

FIVE-POINT PLAN TOWARD A FIRST-CLASS PTO

Our efforts to upgrade the patent and trademark systems generally center on the PTO itself. We have made real progress, but much more needs to be done. None of us can be satisfied until the Office itself is a true service organization, one that is first class in every respect and every sense of that term. Attention to detail will be the keynote. We simply must improve the operations at every level and in every function. Working with our employees and officials of their bargaining units, we are undertaking a five-point action plan. The major elements of this plan are:

(1) To upgrade the physical environment—to rehabilitate furnishings, to pay particular attention to interior design and office layout, to improve cleaning services, to clean out old files and papers, to control signs and bulletin boards to ensure a professional appearance, and to upgrade the training facilities.

(2) To improve internal communications—to conduct cross-training programs to ensure all employees understand their role in the overall programs of the Office, to insist on the sharing of information downward and upward, to investigate promptly causes of employee morale problems, to encourage managers to involve employees in solving problems and improving services, and to ensure that all employees are aware of important developments in the Office.

(3) To ensure that all employees in demeanor and dress reflect favorably on the Office and its important mission of public service.

(4) To improve communications with the public—to provide training in courteous and effective communications techniques, on

the telephone and in person, to elicit specific public feedback, good and bad, and to recognize good performers.

(5) To establish a focal point within the PTO staffed with knowledgeable, articulate employees to respond to public inquiries, complaints and, hopefully, commendations so that we can recognize highly motivated, service-oriented employees and correct deficiencies if they should occur.

Our first actions in these efforts will be to respond aggressively to the recent user survey of Patent and Trademark Office services. That survey will be very useful to us in pinpointing where to focus our initial attention.

CONCLUSION

The Patent and Trademark Office has all the ingredients for success. We have the strong support of Secretary Baldrige and Deputy Secretary Fiske. We have a very able and effective executive staff and core of Senior Executives. We have employees totally dedicated to serving industry and inventors. We are assured of adequate financial resources. And we have the momentum and spirit to bring about a truly first class organization. That is our commitment. And we are well on our way!

THE SOCIAL SECURITY PROBLEM

● Mr. BAUCUS. Mr. President, Monday's Washington Post published a perceptive analysis of President Reagan's current budget dilemma. The Post reported that the President has said he will not scale back his defense buildup for next year, not support additional tax increases beyond the bill now in conference, and still reduce the budget deficit.

The Post concludes that the only way to accomplish these goals is to cut even deeper in domestic spending, especially social security and other entitlements.

We seem to be moving beyond budgetary blue smoke and mirrors. A closer look at the latest budget numbers illustrates the magnitude of the President's problem.

The 1983 budget can be broken down into five parts: interest on the national debt, defense spending, discretionary domestic spending, entitlements, and tax expenditures. Mr. Reagan wants to go ahead with a \$1.5 trillion military buildup and no additional reductions in his \$250 billion tax cut.

That leaves domestic spending and entitlements as the primary candidates for future cuts.

President Reagan has made several previous attempts to cut social security benefits. Medicare, one of the three major components of the social security system, has been slashed some \$3.5 billion in the tax increase bill.

Social security minimum benefits have been eliminated for new retirees. Student benefits are being eliminated. Recipients of disability insurance benefits, also part of social security, are finding their cases under review. Many recipients are being dropped from the

program, despite the fact that their medical condition has not improved.

The President tried unsuccessfully to delay and reduce scheduled cost-of-living adjustments—COLA—for retirement benefits.

I share the President's goal for reducing the size of the Federal Government. I know there is waste and mismanagement in Federal agencies.

But this is a question of priorities. I cannot stand by and be silent while the administration seeks to balance the budget by slashing social security benefits, while unnecessarily increasing other programs.

The domestic spending reductions already enacted have cut much more than fat. They come perilously close to the bone.

Meanwhile, the Pentagon is fatter than ever. There are scores of documented examples of unnecessary, inappropriate, and wasteful spending in the name of the national defense buildup.

The Defense Department spends \$1.4 million on shots and other veterinary services for the pets of military personnel. Millions more are spent on transporting the pets of military personnel who have been transferred.

The General Accounting Office has estimated that nearly half the messages sent over DOD teletype nets are routine, nonpriority messages which would be better sent by mail, saving \$20 million a year.

Shortly after taking office, President Reagan called on Federal agencies to cut their travel budgets by 10 percent. Civilian agencies responded by cutting their 1981 travel budgets by some 16 percent. But this savings was wiped out by the Pentagon's 9-percent increase.

By 1987 President Reagan wants 37 percent of all Federal spending to go for defense.

Mr. President, I favor a steady, sustained increase in national defense spending. I favor defense programs that are vital in the dangerous world in which we live. However, we do not strengthen our security by providing a blank check to the Pentagon, any more than we can solve domestic problems by merely throwing money at them.

I cannot support irresponsible cuts in medicare and social security so that the administration can indiscriminately fund every possible weapon and cut taxes for the wealthy.

Social security trust funds are depleted, true. We need to take action. But to conclude that Congress must either cut social security benefits or raise payroll taxes is wrong.

Like medicare, social security's problems will not be solved by cutting benefits. To insure the future solvency of social security will force all of us to make tough decisions and cast difficult votes.

But let us remember the commitment our predecessors made when they created social security and medicare. They made an important commitment to the financial security of older Americans.

When Congress finally comes to grips with the funding problems facing social security, we may be told we face a crisis. We may be told that drastic action is needed to protect monthly benefit checks. We may be told that we must either cut benefit checks or raise payroll taxes.

But let us keep this in perspective. Let us not forget that it is the President's decision to give the Pentagon a blank check and his refusal to alter the massive tax cut that are the reason for this dilemma.

I ask that the Washington Post article be printed in the RECORD.

The article follows:

[From the Washington Post, Aug. 9, 1982]

**BENEFIT CUTS MAY BE THE ONLY WAY—
SOCIAL SECURITY PROBLEM DOGS REAGAN**

(By David Hoffman)

President Reagan finally has come down to the budget issue that has dogged him throughout his political career: cutting Social Security benefits.

That is the underlying message of the last two weeks of skirmishing over budget and taxes in which the president has indicated he intends (1) to stick with his defense buildup next fiscal year, but (2) have no tax increase beyond the one pending in Congress and (3) still drive down the Federal deficit.

The only way to accomplish all three objectives is to make further large cuts in domestic spending, and many domestic programs already have been cut close to the bone.

The largest and ripest left are the entitlement programs, the basic benefit programs at the heart of the budget. And the largest and ripest of these is Social Security, which now is about a fifth of the budget and which so far has not been cut significantly.

Administration officials will not say directly that Social Security cuts are next. Social Security is probably the most sensitive of all political issues except war and peace. One American in seven is supported in whole or part by Social Security payments. And the Nov. 2 congressional elections take place before the fiscal 1984 budget is scheduled to go to Congress, next January or February.

But there is no secret about the direction the administration is headed.

"We still have much further to go in reducing the increase in government spending," Reagan said at his July 28 news conference.

David A. Stockman, director of the Office of Management and Budget, told the Senate Budget Committee last week, "As a practical matter it would be necessary in the '84 budget . . . to substantially reduce nondefense spending beyond what we've done already . . . to close the budget deficit gap."

Next year "we will have an all-out campaign to cut entitlements," a senior administration official said in a recent interview.

And given the implacable math of it all, "the word entitlements then becomes a euphemism for Social Security," said economist Rudolph Penner of the American En-

terprise Institute, who served in OMB during the Ford administration.

There are other large entitlement programs: Medicare, Medicaid, food stamps, housing assistance, college student aid. But some of these already have been cut, and others are slated to be cut this year. Further cuts in these are unlikely to do the job for Reagan without inroads into Social Security—either in current benefits or in future benefit increases—as well.

The Social Security system has been nettlesome for Reagan since his earliest days in politics. In the 1960s he created a tempest by suggesting that participation might be made voluntary.

By the 1976 presidential campaign, he had become so sensitive about it that he exempted Social Security along with defense from \$90 billion he said could be cut from the federal budget. But this came to embarrass him, too, because by exempting Social Security he was condemning the rest of the government to be cut nearly in half.
